# THORBURN'S SPECIAL COLLECTIONS OF CHOICE BULBS

 THESE ASSORTMENTS ARE MADE UP OF THE FINEST STANDARD SORTS,  
AND MAY BE RELIED UPON TO GIVE SATISFACTION.

## No. 1. COLLECTION OF CHOICE BULBS FOR HOUSE CULTURE

PRICE, \$2.50.

If ordered by mail, add 30 cents for postage.

12 White Roman Hyacinths,	6 Trumpet Narcissus Princeps,
6 Fine Named Dutch Hyacinths,	6 Double Narcissus Van Sion,
6 Fine Mixed Dutch Hyacinths,	6 Poet's Narcissus,
12 Fine Mixed Single Tulips,	12 Mixed Spanish Iris,
12 Fine Mixed Double Tulips,	6 Campernelle Jonquils,
30 Mixed Crocus,	6 Scilla Sibirica,
6 Polyanthus Narcissus,	6 Freesia refracta.

## No. 2. COLLECTION OF CHOICE BULBS FOR HOUSE CULTURE

PRICE, \$4.75.

Consists of the same varieties as Collection No. 1, but with double the number of each sort.

## No. 3. COLLECTION OF CHOICE BULBS FOR HOUSE CULTURE

PRICE, \$9.

Consists of the same varieties as Collection No. 1, but with four times the number of each sort.

## No. 4. COLLECTION OF HARDY BULBS FOR OUTDOOR CULTURE

PRICE, \$2.

If ordered by mail, add 30 cents for postage.

6 Mixed Double Red Hyacinths,	1 Crown Imperial,
6 Mixed Single Blue Hyacinths,	12 Spanish Iris,
6 Mixed Single White Hyacinths,	6 Double White Narcissus,
24 Mixed Early Tulips,	6 Butter-and-Egg Narcissus,
50 Mixed Crocus,	6 Scilla campanulata,
12 Mixed Double Anemones,	3 Bulbocodium vernum.

## No. 5. COLLECTION OF HARDY BULBS FOR OUTDOOR CULTURE

PRICE, \$3.75.

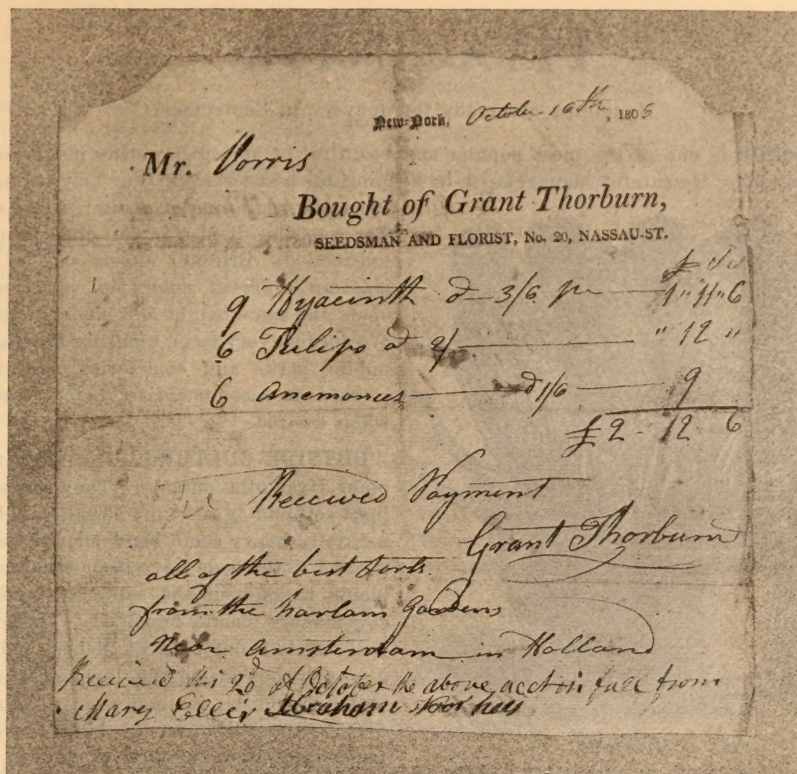

Consists of the same varieties as Collection No. 4, but with double the number of each sort.

## No. 6. COLLECTION OF HARDY BULBS FOR OUTDOOR CULTURE

PRICE, \$7.

Consists of the same varieties as Collection No. 4, but with four times the number of each sort.

Fac-simile of a bill for Bulbs made early in the last century (1806) by the founder of our house

## J. M. THORBURN & CO.'S BULBS FOR FALL PLANTING

AUGUST 16, 1901

**T**HE growing of bulbs for winter and spring flowering is very interesting and very easy. If the directions given in this Catalogue are observed, there need be no disappointment with the results. Many of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of flowers may be had from December till May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn.

**Our Bulbs are all selected**, and from the best growers, and should not be confounded with the cheap "case" and second-size bulbs sent to this country on speculation and often sold at auction, and otherwise, at very low prices.

**ORDERS** should be sent as soon as possible after receipt of this Catalogue. The bulbs will be sent in proper time for planting. They are ready from August to October, according to the time of ripening and the country from which they come. Orders booked earliest are surest of being filled as ordered. If left too late, the supply of some of the varieties may be exhausted.

Please address all orders and remittances to

**J. M. THORBURN & CO.**

36 CORTLANDT ST., NEW YORK

# HYACINTHS.

Hyacinths are ready for delivery in September.

The **Hyacinth** is one of the most popular and beautiful of spring-flowering plants for indoor and outdoor decorations. By careful management in keeping up a succession, they may be had in flower

from the beginning of winter to the end of May. For a spring display in the open ground they are unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

*Group of Hyacinths.*

will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs; some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has become frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field mice, which may burrow in it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch, or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibry loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulbs should remain above the soil. The pots should then be buried in the open ground to the depth of six inches, and left there for five or six weeks, until the pots are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be always applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.** Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gas light. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

**Persons unacquainted** with the different varieties will do well to leave the selections to us, only specifying in their orders whether the bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortments of named Hyacinths of our selection offered on page 4, and to the Hyacinth Glasses which are described at the end of the Catalogue.

The names of our Hyacinths and Tulips are those given to them by the originators in Holland.

## SELECT NAMED HYACINTHS.

The Single-flowered varieties are generally more effective than the Double ones. They also, as a rule, succeed better in glasses. The Double varieties are distinguished by an asterisk (\*), and those of them that do well in water by two asterisks (\*\*).

If ordered by mail, please add 15 cents per dozen for postage.

## NAMED BLUE HYACINTHS.

## GROUPS OF HYACINTHS FOR DESIGN BEDDING.

To obviate the disappointment resulting from selecting unsuitable varieties for design beds, we give the following groups of sorts that bloom about the same time and grow to the same height. They will all form most effective combinations. We recommend **named** sorts for design bedding as decidedly better than mixtures.

{ **Baron Thuyll, Red.**  
 { **Alba Superbissima, White.**  
 { **Charles Dickens, Blue.**  
 { **Gigantea, Red.**  
 { **Grandeur a Merveille, White.**  
 { **Baron Thuyll, Blue.**

{ **Robert Steiger, Red.**  
 { **Mad. Vanderhoop, White.**  
 { **Marie, Blue.**

{ **General Pelissier, Red.**  
 { **Baroness Thuyll, White.**  
 { **Grand Maitre, Blue.**  
 { **Norma, Red.**  
 { **La Franchise, White.**  
 { **La Peyrouse, Blue.**

## MIXED HYACINTHS IN SEPARATE COLORS.

The very largest size made in mixture. Suitable either for forcing or bedding.

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all large size, measuring 6 inches and over in circumference. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

*If ordered by mail, add 15 cents per dozen for postage.*

## ROMAN HYACINTHS.

Extensively used by florists for forcing for cut-flowers. of bulbs. The flowers are pure white, delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early; and by making successive plantings they may be had in flower all through the winter. The blue and rose Roman Hyacinths flower from one to two weeks later than the white variety.

For this purpose they are the best and most popular

*If by mail, add 10 cents per dozen for postage.*

## ITALIAN HYACINTHS.

These are grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are hardier than the Romans, and may also be planted outside in the fall for flowers for early spring cutting.

	Each	Per doz.	Per 100
<b>Single White Italian</b> .....	\$0 05	\$0 50	\$2 50

## MINIATURE HYACINTHS.

These are also known as "Dutch Roman" and "Pan Hyacinths." They are very suitable for growing in groups in pots or earthen pans, as shown in the illustration on page 2. We offer them in separate colors, and also mixed, as follows:

<b>Pure White,</b>	<b>Rosy Red,</b>	<b>Light Blue,</b>
<b>Cream White,</b>	<b>Dark Blue,</b>	<b>Yellow,</b>
<b>Dark Red,</b>		<b>Mixed, all colors.</b>

Price, 50 cents per dozen, \$3 per 100.

## TULIPS.

 Tulips are ready for delivery in September.

For beauty of form and brilliancy of coloring, Tulips are unequaled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers can select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot-culture and forcing for winter cut-flowers, they are also invaluable.

**CULTURE.** The cultural directions given for Hyacinths on page 2 are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November, before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot-culture, a compost of two parts loam to one part of light manure, with some sand intermixed, is suitable. From 3 to 5 bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for Hyacinths. Most of the varieties named below are equally well adapted for pot-culture or the open border.

### SINGLE EARLY TULIPS.

 Six of a kind at dozen rates, 25 at 100 rates.

## SINGLE LATE-FLOWERING TULIPS.

These are all tall-growing May-flowering Tulips, with very large, most brilliantly colored flowers of perfect form. They will be found invaluable for garden work. The named Bizarres and Bybloems are the sorts grown by florists for show purposes.

		Per doz.	100
<b>Bizarres.</b> Crimson, violet-purple, etc., on yellow ground (25 named varieties).....	each 8c.	\$0 60	\$4 00
<b>Bybloems.</b> Purple, violet and maroon on white ground (25 named varieties).....	each 8c.	60	4 00
<b>" Rosy on white</b> (25 named varieties).....	each 8c.	60	4 00

## SINGLE LATE-FLOWERING TULIPS, continued.

		Per doz.	100
<b>Bridesmaid (Blushing Bride).</b> Splendid .....	each 6c.	\$0 50	\$3 00
<b>Breeders.</b> Assorted; separate colors .....	each 8c.	60	4 00
<b>Mixed Bizarres, Bybloems and Breeders,</b> see under the head of "Mixed Tulips," page 10.			
<b>Bouton d'Or (Ida).</b> The only late pure deep yellow; very beautiful; fine for cutting .....	each 5c.	40	2 50
<b>Gesneriana.</b> Dazzling scarlet, black center; effective in beds; fine for cutting .....	each 6c.	50	3 00
<b>Golden Crown.</b> Deep yellow, edged red; fine for cutting .....	3 for 10c.	30	1 50
<b>Golden Eagle or Yellow Gesneriana.</b> Deep yellow, with narrow orange red fringe .....	each 5c.	40	2 25
<b>Rose Pompon.</b> Fine rose color, late .....	each 8c.	60	4 00

## DOUBLE TULIPS.

The Double Tulips come into bloom a little later than the single varieties. They are splendid for bedding, and the flowers last longer in bloom than the single sorts. Some of the sorts are quite dwarf.

If ordered by mail, add 6 cents per dozen for postage.

	Height, inches.	Per doz.	100
<b>Agnes.</b> Very brilliant red; early; quite dwarf .....	5....each 5c.	\$0 35	\$2 00
<b>Alba Maxima.</b> Pure white; early .....	6....each 5c.	40	2 50

<b>Violet.</b> White-edged; very dwarf.....	6....	3 for 10c.	30	1 50
<b>Yellow.</b> Citron-yellow.....	6....	each 6c.	60	3 50
<b>White.</b> Clear satiny white.....	6....	each 6c.	50	3 00
<b>Double Red, Yellow-Bordered.</b> .....	6....	2 for 5c.	20	1 25

## DARWIN TULIPS.

These belong to the class of single late-flowering Tulips (page 8), being in fact modern forms of *Gesneriana*. They grow very tall, with large flowers of fine form. Being borne on very long stems, they are excellent for cutting to put in vases for house decoration. They are all single, self-colored, and surpass all others in brilliancy and variety of coloring. They are also most effective for bedding. Besides the mixture, we offer the following named sorts:

	Each	Per doz.	100
<b>Urania.</b> Fiery red.....	\$0 08	\$0 60	\$3 50
<b>Van't Hoff.</b> Dark purple.....	08	60	3 50

	Each	Per doz.	100
<b>Pales.</b> Bright lilac.....	\$0 08	\$0 60	\$3 50
<b>Coridon.</b> Bluish lilac.....	08	60	3 50
<b>Æsculape.</b> Violet.....	08	60	3 50
<b>Lysiscus.</b> Light lilac.....	08	60	3 50
<b>T. Winkler.</b> Dark red.....	08	60	3 50

Each. Per doz. 100.

**Henry Lyte.**  
Scarlet....\$0 08 \$0 60 \$3 50

violet..... 08 60 3 50

**Longfellow.**  
Dark rose.... 08 60 3 50

**General Ver-  
spyck.** Car-  
mine red.... 08 60 3 50

**Edmond Ros-  
tand.** Bright  
red ..... 08 60 3 50

**Mixed** ..... 05 50 2 50

## PARROT TULIPS.

For outdoor cultivation. The petals of these have feathered edges, and in addition to other colors combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant color, and form very effective groups for the flower border. *Very late in flowering.*

If ordered by mail, add 6 cents per dozen for postage.

	Each	Per doz.	100
<b>Café Brown.</b> Brown and yellow-striped.....	\$0 05	\$0 35	\$2 00
<b>Constantinople.</b> Large, blood-colored flowers, tipped with orange.....	05	35	2 00
<b>Lutea Major.</b> Large, yellow flowers.....	05	35	2 00
<b>Markgrave of Baden.</b> Bright yellow flowers, striped with scarlet.....	05	45	3 50
<b>Monstre Cramoisie Brilliant.</b> .....	05	35	2 00
<b>Perfecta.</b> Yellow, spotted red.....	05	35	2 00
<b>Mixed, all colors.</b> .....	3 for 10 cts.	30	1 50

*Darwin Tulip.*

## MISCELLANEOUS AND BOTANICAL TULIPS.

If ordered by mail, add 5 cents per dozen for postage.

	Each	Per doz.
<b>Tulipa carinata.</b> Purple-red .....	\$0 05	\$0 40
“ <b>celsiana</b> ( <i>Australis</i> ). Yellow, outside maroon .....	10	1 00
“ <b>clusiana</b> (The Lady Tulip). Red stripes, black center on white ground .....	15	1 50
“ <b>cornuta</b> (Chinese). Scarlet and yellow .....	10	1 00
<b>Tulipa Didleri.</b> Light red, dark center .....	08	75

## MIXED TULIPS.

For bedding. Planted in large masses, these make a magnificent show and, being inexpensive, should be largely used. Our special mixtures of Early Single and Early Double Tulips are made up of the finest bulbs and the brightest colors. If planted in large beds, they will produce an exceedingly beautiful and lively effect.

If ordered by mail, add 6 cents per dozen for postage.

No. 5. 100 Fine Named Double Tulips, in 25 varieties .. 3 00

Bed of Tulips.

## TULIP BEDS.

It is to be regretted that the gorgeous displays presented by the Tulip beds of our public parks should so seldom be seen on our private lawns. Tulips are so hardy and of such easy culture that failure to obtain satisfactory results is possible only by selecting unsuitable *sorts*. In order to obviate this difficulty, we give the following groups of sorts that bloom at the same time and are of equal height. Any of these groups will form an effective combination. After the Tulips have flowered, the beds can be used for bedding plants, such as Geraniums, etc., to full advantage. Rich soil is necessary.

It is advisable to order as soon as possible after receipt of this Catalogue, as later on in the season we may be sold out of some varieties, owing to an unusual demand for them. In that case we shall substitute equally fine sorts of same color and time of bloom.

## GROUPS OF TULIPS THAT WILL FORM EFFECTIVE COMBINATIONS.

## SINGLE TULIPS.

- { Duc van Thol Scarlet.
- { La Reine.
- { L'Immaculee.
- { Duc van Thol Scarlet.
- { Rose Gris-de-lin.
- { Proserpine.
- { Pottebakker Yellow.
- { " White.
- { Golden Prince.
- { Cottage Maid.
- { Pottebakker White.
- { Cozleur Ponceau.

## SINGLE TULIPS.

- { Belle Alliance.
- { Princess Mary Ann.
- { Mon Tresor.
- { Pottebakker Scarlet.
- { Chrysolora.
- { Joost van Vondel.
- { Duchesse de Parma.

<b>Ostrowskyanum.</b> Deep carmine .....	05	45	2 50

*Types of Narcissi.*

## NARCISSUS.

Narcissi are Ready for Delivery in September.

The very beautiful species and varieties of *Narcissus* are among the most popular and largely grown of spring-flowering bulbs, and that deservedly, too, for they are certainly "the fairest among them all." Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them. To know them is to love them, and to love them is a liberal education.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, or lakes, or ponds, and in mixed flower or shrubbery borders. They are also suitable for naturalizing in the grass, by the side of woodland walks or in open spaces between trees and shrubs. With the exception of the *Polyanthus* section, they are all perfectly hardy.

Narcissi are also very suitable for growing in pots, requiring about the same treatment as hyacinths, with 3 or 4 bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers.

### SINGLE NARCISSUS, or DAFFODILS.

*If ordered by mail, add 13 cents per dozen for postage.*

	Each	Per doz.	100
<b>Albicans.</b> The "Swan's Neck" or "White Spanish" Daffodil. Large white trumpet, tinged cream color, and beautifully fringed at brim.....	\$0 10	\$1 00	\$6 50

# LILIES.

For stateliness of habit, beauty of form, and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown, and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a rich, deep loam, they all do best in a light, well-drained soil. Some peat or leaf-mould may be used to advantage. *L. auratum* cannot bear manure, but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

*Lilium Harrisii* and *Lilium candidum* ready in August; all others not till November.

If ordered by mail, add 3 cents each for those marked (\*); others from 1 to 2 cents each for postage.

*Lilium*  
*Washingtonianum*.

## LILIUM HARRISII.

(BERMUDA EASTER LILY.)

Bulbs ready now.

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, and last a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decorations. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

*If ordered by mail, add from 10 to 20 cents per dozen for postage, according to size.*

## CHINESE SACRED LILY.

(THE WATER-FAIRY FLOWER.)

Ready in September.

10 cents each, \$1 per dozen.

*If ordered by mail, add 30 cents per dozen for postage.*

A variety of the Polyanthus Narcissus, imported from China. The Chinese have the following interesting fable connected with this flower:

"Once upon a time a father left his property to his two sons, with the understanding that it should be equally divided; but the elder son seized all the tillable land and left the younger nothing but an acre covered with rocks and water. The younger son, failing to obtain justice, sat at the water's edge bemoaning his misfortune. A benevolent fairy appeared, and, giving him these Narcissus bulbs, told him to drop them into the water. Shortly afterwards their flowers were developed, and the neighbors crowded to see the fairy's gift. In the course of a few years the badly treated brother accumulated a fortune by the rapid increase and sale of his bulbs. Then the elder brother, envious of the prosperity of the younger, bought up great numbers of the bulbs—hoping to get a monopoly by getting all of them—at so heavy a price that he was obliged to mortgage his property to procure funds for the purpose. He planted all his good land with bulbs, but they soon began to die, as they cannot live long out of water. He was ruined, while his brother, who had bought the mortgage, foreclosed it, and became possessed of the whole estate in time to plant some of the dying bulbs in the watery acre."

The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulb so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulb entirely, and place in a sunny window in a cool room.

10 cents each, \$1 per dozen.

*Chinese Sacred Lily.*

*Lilium Harrisii.*

## LILIES, continued—BEAUTIFUL JAPAN LILIES.

These do not generally arrive till November and December. We import our supply direct from Japan every year. Every garden should have some of these most beautiful and easily grown Lilies.

Postage on these varies from 2 to 10 cents on each, according to size.

**Auratum** (Golden-Banded Lily). The grandest of all hardy Lilies; flowers white, spotted with maroon, having a bright yellow band through the center of each petal. The plant grows from 3 to 6 feet high.

8 to 9 inches in circumference. 10 cts. each, \$1 per dozen, \$7.50 per 100.

9 to 11 inches in circumference. 15 cts. each, \$1.50 per dozen, \$10 per 100.

11 to 12 inches in circumference. 25 cts. each, \$2.50 per dozen, \$17 per 100.

**Auratum macranthum**, or **platyphyllum**. A splendid variety of the above, with much larger flowers; of perfect form and great substance; 5 to 8 feet. 40 cents each, \$4 per dozen.

**Auratum rubro-vittatum**. Enormous flowers, sometimes measuring 10 inches across; pure white, beautifully spotted, and with a deep crimson stripe through center of each petal; very fragrant. 75 cents each, \$8 per dozen.

**Auratum pictum**. Flowers like those of the common *Auratum*, with yellow band through each petal. It is beautifully spotted with rich crimson. 50 cts. each, \$5 per dozen.

**Auratum Wittei**. Very large, pure white flowers, with raised spots of satiny white; a grand Lily; 4 to 6 feet. 75 cts. each, \$7.50 per dozen.

**Auratum Virginale**. Very large, pure white flowers, with yellow band through center of each petal; a magnificent variety, growing from 4 to 6 feet high. 65 cts. each, \$6.50 per dozen.

**Speciosum album Krætzeri**. Beautiful pure white flowers of large size; 2 to 4 feet high; one of the handsomest and easiest grown Lilies we have. 20 cts. each, \$2 per doz.

**Speciosum rubrum**. White, shaded rose and spotted deep red; 2 to 4 feet high. 15 cts. each, \$1.50 per dozen.

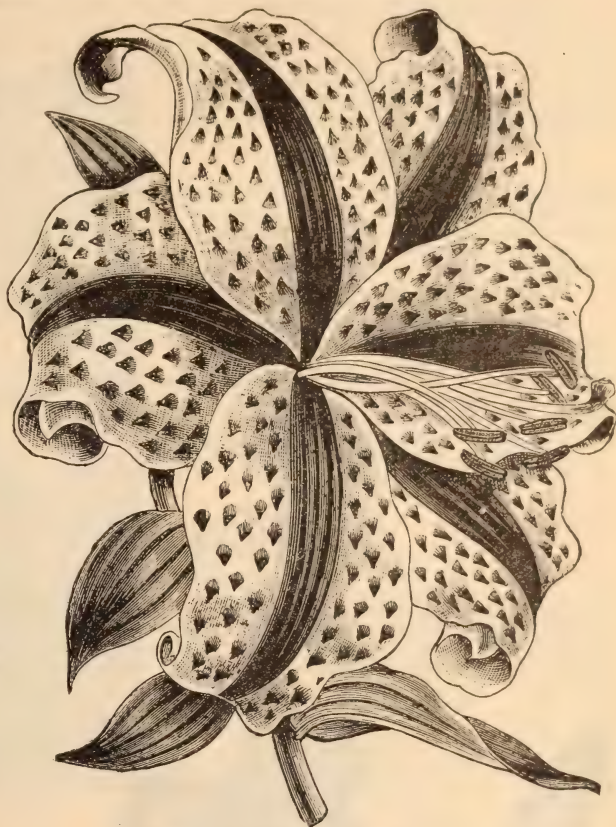

**Speciosum rubrum Melpomene**. Very dark, crimson-spotted flowers of large size and striking appearance; 2 to 4 feet high. Each Per doz \$0 20 \$2 00

**Batmanni**. Richly colored, unspotted flowers of bright apricot tint; a most beautiful variety; 3 to 4 feet high. 15 1 50

**Krameri**. White, slightly tinged with red; sweet-scented. 15 1 50

**Leichtlinii**. Orange-red, with crimson spots; 2 to 3 feet high. 20 2 00

**Leichtlinii Canary Yellow**. Like above, but in color pure canary yellow. 40 4 00

*Lilium auratum rubro-vittatum.*

*Lily-of-the-Valley.*

## LILY-OF-THE-VALLEY.

(CONVALLARIA MAJALIS.)

Ready in November.

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them.

**Convallaria majalis**. White flowers; fine large clumps, with 15 or more flowering pips on each. Fine for planting outside in shaded positions, and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per dozen clumps.

**Convallaria majalis**. Strong pips for forcing. 50 cts. per bundle of 25, \$1.75 per 100, \$14 per 1,000.

## ARUMS.

Ready for shipment in September and October.

A genus of curious and ornamental perennials, with peculiar and distinct foliage and flowers. They make handsome pot-plants, and are also very effective in subtropical gardening. *A. Dracunculus* is hardy, and may be left in the ground over winter, with a little covering. The others should be potted in the autumn and kept dormant till spring. They are all of easy cultivation, requiring rich soil and plenty of water during the growing season. A compost of rich loam, with a third of well-rotted manure and some sand, is very suitable.

If ordered by mail, add 3 cents each for postage.

	Each	Per Doz.
<b>Crinitum.</b> Marble stems; broad, flesh-colored, spotted flowers, covered with hairs.....	\$0 25	\$2 50
<b>Cornutum</b> (Red Calla). Flowers red, spotted black; stems mottled; a handsome pot-plant.....	12	1 25

*Arum Dracunculus.*

## AMARYLLIS.

Ready in October.

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mould or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September,

when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure water during the growing season.

Each Per Doz.

<b>Aulica</b> (Lily-of-the-Palace). Very large, handsome flowers; crimson, shaded with green.....	\$1 25

## BEGONIA GRANDIFLORA, TUBEROUS-ROOTED.

Ready in November.

Splendid pot plants for the house or greenhouse and especially valuable for bedding, flowering in the greatest profusion throughout the summer. For bedding they should be started in hotbed in March and April. The hollow end of the bulb should be up and but slightly covered. They should get very little water until the plants are growing.

<b>Mixed.</b> All sorts .....	05	30	1 50

## CROCUS.

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted close—say 2 inches apart—and in close rows, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful.

For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

If ordered by mail, add 15 cents per 100 for postage.

	Per doz.	100	1,000		Per doz.	100	1,000

## HYBRID NAMED CROCUS.

Composed of the most beautiful varieties; remarkable for richness of color and immense size. These varieties are best for forming letters or designs on the lawn, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. The flowers are produced very early, and the mowing later on will not seriously injure the Crocus bulbs.

If ordered by mail, add 25 cents per 100 for postage.

# CALOCHORTUS.

(MARIPOSA LILY, or BUTTERFLY TULIP.)

Ready in September.

Very handsome bulbous plants from California. They are remarkable for the brilliancy and variety of their coloring, and their gracefulness of habit. They grow freely in light, sandy loam; though hardy, they should be protected during winter with litter. They may also be successfully grown in frames and in pots.

If ordered by mail, add 5 cents per dozen for postage.

	Each	Per doz.	100

**MIXED, All Sorts** ..... 05 30 2 00

## CYCLAMEN.

Most of them ready in November.

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The *C. giganteum* is an improved strain of the old *C. Persicum*, having much larger and more brilliantly colored flowers, and producing them more abundantly. We offer seed of our superb strain of these at the end of this Catalogue.

	Each	Per doz.

<b>Hederæfolium, Rose</b> .....	20	2 00

*Cyclamen giganteum.*

## CROWN IMPERIALS.

(FRITILLARIA IMPERIALIS.)

A hardy-growing plant, with dark green foliage, and flowers of all intermediate shades between yellow and orange, effective for months of time, hardy and permanent, and not so generally planted as they should be.

*Crown Imperial.*

Their flowers are produced quite early in spring, and are very ornamental and decorative in the center of a bed of other bulbous plants. The old dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil: the flowers will be larger and of finer coloring, as well as more enduring.

Ready in September.

It ordered by mail, add 2 cents each for postage.

Sonne. Tall and light tower, white bordered .....	\$0 25	\$2 50
Tour d'Effet. Brilliant blue, striped in center .....	25	2 50

## FRITILLARIAS.

Ready in September.

Beautiful, hardy, spring-flowering, bulbous plants, thriving in good, rich, well-drained soil. The name is from *fritillus*, a chess-board, in allusion to the checkered flowers of some of the species. Some are interesting from their peculiar coloring, and others are really beautiful. They are very effective in mixed flower borders, and they also make excellent pot-plants.

	Each	Per doz.
Biflora. Low-growing species: brown ground, prettily lined .....	\$0 08	\$0 80
Coccinea. Narrow, tubular flowers of a deep glowing red color; a most beautiful variety .....	08	80

Meleagris (Vulgaris Peck Flower). Mixed colors. Valuable for outdoor dinner-plate .....	05	25
<i>Fritillaria imperialis</i> . See Crown Imperials, above.		

*Fritillaria recurva.*

## FREESIA.

The justly popular *Freesias* are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in a light, sandy soil, in a frame or greenhouse, and are excellent for window culture in winter; one plant will perfume a large room, but not in the persistent manner of a tuberose. The plant has tooth-shaped bulbs and flat, spreading leaves. For the information of all not acquainted with these bulbs, we may say that they are quite small, and produce very large blooms in comparison to their size.

***Freesia refracta alba.*** Pure white and sweet-scented; very largely forced. It is one of the prettiest bulbous plants known. The flowers are 2 inches long, and about the same in width, shaped like miniature gladioli, and in clusters of 6 to 10, on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. There is a peculiar delicacy and beauty about this flower that is all its own: the fragrance is remarkable and very lasting.

**Monster Size Bulbs.** 30 cts. per doz., \$1.50 per 100, \$12 per 1,000.

**First Size Bulbs.** 20 cts. per doz., \$1 per 100, \$8 per 1,000.

**Second Size Bulbs.** 15 cts. per doz., 60 cts. per 100, \$5 per 1,000.

***Freesia Leichtlinii.*** Creamy white, shading to yellow; a pretty sort; distinct in color. 30 cts. per doz., \$2 per 100.

*Freesia refracta alba.*

## GLADIOLUS.

Ready in November.

*Gladiolus Colvillei*, "The Bride."

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse, except those prefixed with an (\*), which are hardy, and may be planted out: it is best, however, to give them a slight protection. Some varieties are successfully forced.

The French Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty. Every year is now adding varieties of most exquisite tint and shade; and from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published January 1.

If ordered by mail, add 5 cents per dozen for postage.

## GLOXINIAS.

Ready in November.

Gloxinias are among the most beautiful of greenhouse plants, the flowers being remarkable for the intensity and variety of their coloring, and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mould and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large-sized, and of the erect-flowering strain. 12 cts. each, \$1.25 per doz., \$7 per 100.

# IRIS. (FLEUR-DE-LIS.)

Ready in October and November.

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together in the flowers. Irises are of easy culture, requiring very little attention after

once being planted. They do best in a light, rich, sandy soil, and in a sunny situation. Good drainage is very important. The newer varieties of *Iris Kämpferi*, recently introduced from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 or 12 flower spikes 3 feet high, each bearing 2 to 4 enormous blossoms, measuring 8 to 10 inches across, and of the most delicate and beautiful colors, markings and combinations; no other flowers excel them in richness. These require a liberal supply of water when growing. With the exception of *Morea pavonia* and *Tuberosa*, all the varieties are hardy.

*New Large-Flowered Japan Iris.*

SPANISH IRIS. (IRIS HISPANICA.)

Very profitable for florists, who are planting them largely for cut-flowers. Plant in beds in the open as soon as received in the autumn, and protect slightly in the winter months. In the beginning of April cover the beds with glass, so as to have the flowers ready for cutting in May.

Ixias.

Superfine Mixed.....	2 for 5 cts..	15	60

IXIAS.

Ready in October.

The Named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they

require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

	Each	Per doz.	100
Azurea. Blue, with purple center; very beautiful.....	\$0 05	\$0 40	\$2 50

ERYTHRONIUMS. (DOG'S-TOOTH VIOLETS.)

Ready in September.

Very ornamental, hardy, bulbous plants, of neat and dwarf habit. They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in sheltered positions on rockeries, or in mixed flower or shrubbery borders. They may also be grown in pots in coldframes for house decoration when in flower.

Giganteum (Giant Dog's-Tooth Violet). Very large, straw-colored flowers, with orange center, borne on long, slender stems; the foliage is richly mottled in dark brown, and its elegant habit makes a very attractive pot plant for window decoration.....	Each	Per doz.	100
	\$0 05	\$0 40	\$2 50
Grandiflorum. Leaves unmottled; flowers bright yellow, with recurved petals.....	10	1 00	6 00

Revolutum. Leaves mottled white and brown; flowers opening white, and passing to pink and purple.....	08	65	4 50
Dens-canis (Dog's-Tooth Violet). Mixed colors; very pretty; leaves blotched in brown and white.....	05	30	1 50

Erythronium.

## LACHENALIAS.

Ready in September.

Very pretty, spring-flowering, greenhouse, bulbous plants, with brightly colored flowers and elegant habit. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mould and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air, and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging baskets.

*Lachenalias.*

	Each	Per doz.	
<b>Luteola.</b> Pale yellow flowers, flushed with green .....	\$0 25	\$2 50	
<b>Pendula.</b> Very handsome, large and showy species, with broad foliage and rich red flowers, tipped with black .....	25	2 50

## MONTBRETIAS.

Ready in November.

Hardy, summer-flowering, bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties:

# NERINE.

Ready in October and November.

Very beautiful greenhouse bulbous plants, succeeding best in pots, in light soil—say a compost of loam, leaf-mould and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die they should be kept quite dry in a cool place until they begin to grow again.

Nerine Sarniensis.

# OXALIS.

Ready in September.

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging baskets. They are easily grown in sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

Buttercup Oxalis.

## PAEONIES. Ready in October.

The old-fashioned double Pæonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Pæonies rank about first for lawn, or flower-border, or shrubbery decoration. They are all hardy.

*Pæony Chinensis.*

**Pæony Chinensis, Double White.**  
30 cts. each, \$3 per doz.

**Pæony Chinensis, Double Crimson.**  
20 cts. each, \$2 per doz.

**Pæony tenuifolia, Double.** Bright  
crimson. 30 cts. each, \$3 per doz.

## RANUNCULUS.

Ready in September.

The main soil for these should be loam or clay, with a good dressing of rotten manure and leaf-mould; if heavy, add a little sand. The soil should be well drained, cool, deep, rich and moist. Plant late in the autumn, claws downward, from 4 to 6 inches apart and 3 inches deep, covering with fine, pulverized soil.

If ordered by mail, add 3 cents per dozen for postage.

*Ranunculus.*

## RICHARDIAS, or CALLAS.

Ready in September and October.

Tall-growing, bulbous perennials of exceedingly graceful habit and very handsome foliage and flowers. They are easily cultivated in pots, requiring only a rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully replotting in September.

**White Calla, or Lily-of-the-Nile** (*Calla Æthiopica*). Each Per doz. 100  
Large, white, trumpet-shaped flowers of great substance. One of the most popular and ornamental of house and greenhouse plants... \$0 20 \$2 00 \$15 00

**"Little Gem" Calla.** Very neat, dwarf habit; makes an excellent pot-plant ..... 08 75 5 00

**Spotted Calla** (*C. Æthiopica alba maculata*). An extremely ornamental pot-plant, with pure white flowers and handsome, deep green leaves, spotted with white..... 08 75 5 00

**Black Calla.** See *Arum sanctum*, page 18.

White Calla.

## SCILLAS.

Ready in September.

No garden can be complete without these beautiful flowers. *S.*

*Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years.

If ordered by mail, add 5 cents per dozen for postage, except those marked with a star (\*), to which add 2 cents each.

**Sibirica.** The effect in early spring of this intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the Snowdrop and the varied hues of the Crocus, can hardly be over-estimated; are most valuable for permanent edging. 2 for 5 cts., 20 cts. per doz., \$1 per 100, \$8 per 1,000.

Scilla Sibirica.

" <b>cœrulea</b> (Blue Cuban Lily). 15		1 50	

## SNOWDROPS.

(*GALANTHUS NIVALIS*.)

Ready in September.

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest-flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in the spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms.

If ordered by mail, add 3 cents per dozen, or 25 cents per 100, for postage.

	Per doz.	100	1,000
<b>Single-Flowering Snowdrops</b> .....	\$0 15	\$1 00	\$7 50

<b>Giant Snowdrop of Asia Minor</b> ( <i>Galanthus Elwesii</i> ).....	15	1 00	7 50

Snowdrops.

## SPIRAEA, or ASTILBE.

Ready in November.

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

**Japonica** (Hoteia). Excellent pot-plant for winter blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting. 10 cts. each, \$1 per doz., \$6 per 100.

**Japonica fol. aurea reticulata**. Beautiful gold-striped foliage; large panicles of pure white flowers. 15 cts. each, \$1.50 per doz., \$10 per 100.

**Japonica compacta multiflora**. The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.25 per doz., \$7 per 100.

**Astilboides floribunda**. Very large, pure white plumes; neat habit; very abundant bloomer. 15c. each, \$1.25 per doz., \$7 per 100.

**Hybrida, Gladstone**. Beautiful new large-flowered pure white. 20 cts. each, \$2 per doz.

**Hybrida, Washington**. Splendid new hybrid, with enormous pure white flowers. 20 cts. each, \$2 per doz.

**Palmata**. Crimson; strong clumps. 15 cts. each, \$1.50 per doz., \$10 per 100.

*Spiraea Astilboides floribunda*

## TUBEROSES. Ready in December.

The purity of color and rich perfume of the Tuberose are well known. In this latitude May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich warm soil and in a sunny situation. Cut off about a quarter of an inch from the bottom of the bulb before planting and set so that the top will be one inch below the soil.

**Dwarf Double Pearl**. Dwarf habit; Each Per doz. 100  
large fine flowers of great substance. \$0 05 \$0 35 \$1 50

"Albino." Early; single white. . . . . 05 40 2 00

**Variegated-Leaved Single**. Leaves bordered creamy white; flowers single, very large and delightfully fragrant. It blooms much earlier than other sorts. . 05 40 2 00

*Trillium sessile Californicum*.

## TRILLIUMS.

(AMERICAN WOOD LILY, or INDIAN SHAMROCK.)

Hardy, herbaceous perennials, succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are natives of North America, and are known by various common names in different localities. They have violently emetic roots.

	Each	Per doz.	100
<b>Grandiflorum</b> ("Giant American Wood Lily," or "Wake Robin"). Large white flowers, changing to rose; quite hardy, and easily grown in shaded positions. . . . .	\$0 05	\$0 40	\$2 50
<b>Erectum</b> ("Birth Root"). Dark purple flowers; erect habit; about one foot high	05	50	3 00
<b>Erectum album</b> . A white-flowered variety of the above . . . . .	08	60	4 00
<b>Erythrocarpum</b> (Painted Trillium). White, striped purple. . . . .	15	1 50	10 00
<b>Ovatum</b> . White, changing to purple. . .	10	75	5 00
<b>Sessile Californicum</b> . Handsome, pure white flowers; prettily mottled foliage. .	10	1 00	6 00

*Chionodoxa Lucilliae.**Tricyrtis hirta*

## Miscellaneous Bulbs and Roots.

	Each	Per doz.	100
<b>Achimenes</b> , Mixed. Lovely greenhouse pot-plants .....	\$0 08	\$0 75	\$5 00

# Hardy Flower Seeds.

For Autumn Sowing.

Many varieties of Flower Seeds, ANNUALS as well as BIENNIALS and PERENNIALS, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring.

## STRAWBERRY PLANTS.

Layer plants can be had in September. Pot-grown plants ready now.

	Layer per 100	Pot-grown per 100
<b>Beder Wood.</b> Very early, productive; large, conical, bright red color; excellent quality .....	\$1 00	\$3 00
<b>Bismarck.</b> Large, firm, brilliant scarlet berries of fine quality; vigorous and very prolific .....	1 00	3 00
<b>Brandywine.</b> Large, roundish conical, glossy crimson, firm and solid; of fine, aromatic flavor. Plant vigorous and productive; succeeds on any soil. Mid-season to late .....	1 00	3 50
<b>Bubach No. 5.</b> A very large berry of dark color. Productive; of fair flavor. Largely grown for market. Mid-season .....	1 00	3 00
<b>Clyde.</b> Very regular, bright scarlet berries; large, and of excellent flavor; firm, and a good shipper. Plant remarkably healthy, vigorous and productive. Season early .....	1 00	3 00
<b>Excelsior.</b> Very early, large, good color, firm and of fine quality. A vigorous grower and very productive .....	1 00	3 00
<b>Gladstone.</b> Large, early and of good quality; color red, with red flesh; solid .....	1 00	3 00
<b>Glen Mary.</b> Of large size; bright glossy crimson, of fine flavor. Plant is strong and healthy, very prolific, and on good soil the berries are large to the end of the season. Early .....	1 00	3 50
<b>Johnson's Early.</b> A fine new extra-early of large size and deep red color; glossy, firm, sweet, and of excellent flavor .....	1 00	3 00
<b>Marshall.</b> Large, dark crimson, good. Plant luxuriant, but needs rich soil and careful culture. Mid-season .....	1 00	3 00
<b>McKinley.</b> Large, roundish, crimson; flesh firm and quality good. The plant is vigorous and a great yielder; flowers bi-sexual or perfect. Season medium to late .....	1 00	4 00
<b>Nick Ohmer.</b> Very large, dark glossy red, firm and excellent; vigorous and productive .....	1 00	3 00
<b>Sharpless.</b> Demands rich, strong soil. Plant large and vigorous; berries very large, irregular in shape, crimson, moderately firm and of good quality. Mid-season .....	1 00	3 00
<b>Success.</b> Early, large, bright crimson color, high flavor, and continues bearing a long time .....	1 00	3 00
<b>Wm. Belt.</b> The berries are as large as Bubach, more perfect in shape, just as productive, and the color is perfect .....	1 00	4 00

# Grass Seeds for Autumn Sowing.

Autumn sowing is recommended from the latter part of August to the end of September, so that the young grass may become well rooted before winter sets in. Our new-crop seed of the leading sorts is ready now.

## THE THORBURN LAWN GRASS.

The Thorburn Lawn Grass Mixture is composed exclusively of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich green sward in three or four weeks from the time of sowing. It should be sown at the rate of four to five bushels to the acre (15 lbs. to the bushel). Per qt., 25 cts.; ½pk., 65 cts.; pk., \$1; bus., \$3.50.

## THORBURN'S LAWN-RESTORING GRASS SEED.

A mixture of grasses peculiarly suited to take firm hold and grow quickly on hard, worn-out or burned spots. Some Lawn-Restoring Grass Seed should be sown on thin places before every rain. Per qt., 30 cts.; bus. of 24 lbs., \$5.

## THORBURN'S MIXTURE FOR SHADY SPOTS.

A mixture of grasses that thrive in shaded situations, under trees, or close to walls where there is a little sun. Per qt., 35 cts.; pk., \$1.75; bus., \$6.

## PERMANENT GRASS SEED FOR GOLF LINKS.

On application we will send, free of charge, to interested parties, our pamphlet on "The Seeding and Preservation of Golf Links." We have given much attention to this subject, and have seeded most of the finest links in the country.

**Golf Links Mixture.** For the grounds in general. Per bus. of 20 lbs., \$2.50.

**Putting-Green Mixture.** A mixture of extra fine grasses that will make a close, firm, green and lasting turf, which will improve with tramping. Per qt., 30 cts.; pk., \$1.50; bus. of 24 lbs., \$5.

## GRASS SEEDS.

These prices are subject to change.

**Agrostis canina** (*Rhode Island Bent Grass*). It makes a beautiful, close, fine turf, and is one of the very best grasses for lawns. It adapts itself to almost any soil, rich and moist, or dry, sandy and sterile. 50 pounds to the acre for lawns. Height, 1 to 2 feet. (15 pounds to the bushel.) Per lb., 35 cts.; 100 lbs., \$30.

**Agrostis stolonifera** (*Creeping Bent, or Fiorin*). Of rapid growth and spreading habit, and the stoloniferous roots form a strong turf that is improved by trampling. It is one of the most valuable lawn grasses. If sown alone, 50 pounds to the acre. Height, 1 to 2 feet. (15 pounds to the bushel.) Per lb., 35c.; 100 lbs., \$30.

**Agrostis vulgaris** (*Red Top; Herd's Grass*). A very hardy native perennial grass. It accommodates itself to a variety of soils, even to quite dry situations, and stands our hot climate admirably. Height, 1 to 2 feet. (14 pounds to the bushel.) Per lb., 15 cts.; 100 lbs., \$11.

**Agrostis vulgaris** (*Fancy Heavy Red-Top Grass*). Absolutely clean and free from chaff. 30 pounds to the acre. Per lb., 25 cts.; 100 lbs., \$20.

**Allopecurus pratensis** (*Meadow Foxtail*). One of the best permanent pasture grasses for rich moist lands. Its chief characteristics are its extreme earliness and its faculty of standing high summer heats without burning. It should be sown only in connection with other grasses, 3 or 4 pounds to the acre. Height, 2 to 3 feet. (7 pounds to the bushel.) Per lb., 35 cts.; 100 lbs., \$30.

**Ammophila arundinacea** (*Beach Grass*). Valuable on the sandy seashore, canal and railway banks, etc. Height, 2 to 3 feet. Per lb., 45 cts.; 100 lbs., \$40.

**Anthoxanthum odoratum** (*True Perennial Sweet Vernal Grass*). For a mixture with pasture grasses. From 2 to 3 pounds to the acre when mixed. Per lb., 85 cts.; 100 lbs., \$75.

**Anthoxanthum odoratum pueilli** (*Annual Sweet Vernal Grass*). Smaller than the perennial. 20 to 25 pounds to the acre. Per lb. 20 cts.; 100 lbs., \$15.

**Avena elatior** (*Tall Meadow Oat Grass*). Most valuable for pastures; it produces an abundant supply of foliage. Valuable for our southern states, where it is extensively cultivated for winter grazing and for hay. Height, 2 to 4 feet. 50 pounds to the acre. (13 pounds to bushel.) Per lb., 25 cts.; 100 lbs., \$18.

**Bermuda Grass** (*Cynodon dactylon*). A most valuable grass for our southern states, both for pasture and lawns. It is of dwarf habit, with long creeping stems. It cannot endure frost. 15 pounds to the acre. Per lb., 80 cts.; 100 lbs., \$70.

**Bromus inermis** (*Awnless, or Smooth Brome Grass*). An erect perennial, 3 to 5 feet high. It is recommended for dry, arid soils, where better grasses would not grow. It has been found to do well in the semi-arid regions of the west and northwest on account of its remarkable drought-resisting powers, while its extreme hardness recommends it for the colder sections of Canada. Sow 35 or 40 pounds to the acre. Per lb., 25 cts.; 100 lbs., \$18.

**Bromus pratensis** (*Meadow Brome Grass*). A hardy perennial, 2 to 3½ feet high, much used in mixtures for meadows, both for mowing and pasture. It withstands extreme cold and drought, and if cut before flowering it makes a good hay. 30 pounds to the acre. Per lb., 25 cts.; 100 lbs., \$20.

**Bromus Schraderi** (*Rescue Grass*). In good, rich soil several crops have been cut in a season. It cures into hay of fair nutritive quality, but heavy and difficult to eat. For pasture, or for cutting and feeding green, it is more suitable. Height, 1 to 2 feet. 30 pounds to the acre. Per lb., 30 cts.; 100 lbs., \$25.

**Cynosurus cristatus** (*Crested Dog's-tail*). A stoloniferous perennial, forming a smooth, compact and lasting turf. Its roots penetrate deeply into the ground, which enables it to stand severe droughts.

It is very nutritious, and valuable in mixtures for permanent pastures. It thrives well in the shade, and is valuable for shaded parts of lawns. If sown alone 30 pounds to the acre. Height, 1 to 2 feet. Per lb., 50 cts.; 100 lbs., \$48.

**Dactylis glomerata** (*Orchard Grass; Cocksfoot*). One of the grasses most employed in permanent meadows, either for pasture or for mowing. It is very productive and makes excellent hay. It can stand considerable shade, and is recommended as a pasture grass for woodlands. Height, 3 feet. (14 pounds to the bushel.) Sow 3 or 4 bushels to the acre. Per lb., 20 cts.; 100 lbs., \$17.

**Festuca duriuscula** (*Hard Fescue*). Excellent for dry lands, doing well on sandy and shallow silicious soils. It is exceedingly hardy and withstands extremes of heat and cold, and also long periods of drought. Height, 1 to 2 feet. 30 pounds to the acre. Per lb., 25 cts.; 100 lbs., \$20.

**Festuca elatior** (*Tall Meadow Fescue*). It succeeds best in moist, alluvial and strong clayey soils. It is very productive and of long duration, and is especially valuable for permanent pasture. Height, 3 to 4 feet. 40 pounds to the acre. Per lb., 35 cts.; 100 lbs., \$28.

**Festuca heterophylla** (*Various-Leaved Fescue*). A very early hardy perennial, 2 to 3 feet high. Valuable in grass mixtures for permanent meadows, and an excellent bottom grass. 40 pounds to the acre. Per lb., 30 cts.; 100 lbs., \$25.

**Festuca ovina** (*Sheep's Fescue*). It prefers dry uplands, and thrives in poor, shallow, gravelly soils where other grasses would fail. It is very hardy, resisting extreme heat and cold. In grass mixtures for pastures on high and dry lands it is especially valuable. Height, ½ to 1½ feet. 35 pounds to the acre. Per lb., 25 cts.; 100 lbs., \$20.

**Festuca pratensis** (*Meadow Fescue, or English Blue Grass*). One of the grasses most used in permanent or temporary meadows for mowing or for pasture. The forage, either green or dried, is very nourishing. Height, 2 feet. 40 pounds to the acre. Per lb., 25 cts.; 100 lbs., \$18.

**Festuca rubra** (*Red, or Creeping Fescue*). A creeping-rooted species, forming a close and lasting turf, and specially adapted for dry, sandy soils. It resists extreme drought, and thrives on very inferior soils, gravelly banks and exposed hillsides. It is also valuable for binding shifting sands on the seashore. 30 pounds to the acre. Per lb., 25 cts.; 100 lbs., \$22.

**Festuca tenuifolia** (*Slender Fescue*). It will grow on very dry and inferior soil, and its dwarf habit of growth and fineness of leaf render it not unsuitable for dry slopes on lawns. 30 pounds to the acre. Per lb., 40 cts.; 100 lbs., \$35.

**Hungarian Grass**. See *Panicum Germanicum*.

**Lolium perenne** (*Perennial Rye Grass*). The most valuable grass of Great Britain, both for pastures and for meadows, occupying there the same relative position of importance that Timothy holds here. It succeeds well in our middle and eastern states, and adapts itself to a great diversity of soils. Its nutritive value, especially in mixtures with Red Clover, is very great. It is excellent in mixtures for quick effects in lawns. Height, 1½ to 2 feet. 60 pounds to the acre. Per lb., 12 cts.; 100 lbs., \$8.

**Lolium perenne**, *Thorburn's Selected Dwarf*. A carefully selected, short-seeded, dwarf-growing strain, suitable for lawns. Makes a fine green turf in three weeks. Per lb., 15 cts.; 100 lbs., \$13.

**Lolium Italicum** (*Italian Rye Grass*). Though lasting two or three years under very favorable circumstances, it is practically an annual. It is remarkably rapid grower, and stands extremes of temperature. When sown very thickly, or in mixture with other sorts, it makes a good, dense turf, and it has been used with much satisfaction on lawns as far south as Jacksonville. Height, 1½ to 2½ feet. 50 pounds to the acre. Per lb., 12 cts.; 100 lbs., \$9.

## GRASS SEED, continued.

**Panicum Germanicum** (*Hungarian Grass*). One of the most valuable annual soiling plants. It is of very rapid growth, being ready for cutting within sixty days. It should be cut just before blooming. Sow 1 to 1½ bushels to the acre. (50 pounds to the bushel.) Price variable. Present price \$1.40 per bushel.

**Phleum pratense** (*Timothy*). On moist, loamy or clayey soil it produces a larger hay crop than any other grass. It is not so well suited for light, sandy soils. It should be cut when flowering, as if left later the hay becomes hard and coarse. Height, 2 to 3 feet. (45 pounds to the bushel.) Price variable.

**Poa compressa** (*Canada Blue Grass*). A very hardy perennial grass, with creeping rootstalks, forming a close and durable turf of fine texture. It grows on the poorest and driest soils, sandy, gravelly or clayey, standing extremes of wetness or drought. Height, 6 to 18 inches. (14 pounds to the bushel.) 3 bushels to the acre. Per lb., 18 cts.; 100 lbs., \$12.

**Poa nemoralis** (*Wood Meadow Grass*). Good for shaded positions in lawns and woodland parks. It is very permanent and hardy, resisting extremes of heat and cold. The creeping roots are formed underground, and make a good turf. 30 pounds to the acre. Per lb., 50 cts.; 100 lbs., \$48.

**Poa pratensis** (*Kentucky Blue Grass; June Grass*). It combines more points of excellence than any other sort. It is a true perennial, lasting indefinitely and improving every year. Its densely creeping rootstalks, spreading habit, and smooth, even growth, fine texture and rich green color render it one of the very best grasses for lawns. Height, 9 to 18 inches. (14 pounds to the bushel.) 3 bushels to the acre. Per lb., 18 cts.; 100 lbs., \$13.

**Poa trivialis** (*Rough-Stalked Meadow Grass*). A spreading, thickly matting, stoloniferous-rooted species, forming a fine turf, and well adapted for the more shaded portions of lawns. Height, 1 to 3 feet. 20 pounds to the acre. Per lb., 50 cts.; 100 lbs., \$43.

## MIXTURES FOR MEADOWS AND PASTURES.

It is a well-ascertained fact that a thicker and more prolonged growth is produced by a mixture of many sorts of grasses than by only one or two. For every different kind and condition of soil there are grasses that are especially suitable. Some sorts do best on high ground and in dry weather; others prefer plenty of moisture. Some mature so early, and others so late, that from the beginning of spring until winter sets in, there is no time when one species or another is not at its best. *The quantities given are the minimum, and may often be increased to advantage.*

## MEADOW OR PASTURE MIXTURES FOR ONE ACRE.

1 " White Clover.	35 lbs. Price per acre, \$5.75.	
35 lbs. Price per acre, \$5.25.		

## CRIMSON or SCARLET CLOVER.

(TRIFOLIUM INCARNATUM.)

An annual, with beautiful, long crimson flowers. Sown late in the summer, it furnishes an early green fodder the following season; largely sown in Virginia and North Carolina for improving poor soil by turning under when still green, thus adding much nitrogen to the ground through its decomposition. 15 to 20 pounds to the acre. Per lb., 12 cts.; per 100 lbs., \$8.

# Insecticides and Remedies for Plant Diseases.

## Bug Death.

A fungicide, insecticide and plant-food combined. 1-lb. package, 15 cts.; 3 lb. package, 35 cts.; 5-lb. package, 50 cts.; 12½-lb. package, \$1.

Perfection Shaker for applying above, 65 cts. each.

## Copperdine.

A combined fungicide and insecticide, used simply by adding water in proportion of one pound of the paste to 16 gallons of water. 1-lb. box, 25 cts., makes 16 gallons spray; 5-lb. box, \$1, makes 80 gallons spray.

## Fir-Tree Oil.

For greenhouse and house plants. It destroys all plant insects without injuring the plant. Dilute in the proportion of 1 pint to 20 gallons of water. Apply with vaporizer or syringe. ½ pt., 40 cts.; pt., 75 cts.; qt., \$1.25; ½ gal., \$2.25; gal., \$4.

## Fir-Tree Oil Soap.

Same as the Fir-Tree Oil, but in soap form. Mix at rate of 1 ounce to a gallon of water, and apply with bellows or syringe. ½-lb. tin, 25 cts.; 2-lb. tin, 75 cts.; 5-lb. tin, \$1.75.

## Dalmatian Insect Powder.

Effective against almost all kinds of insects. Per ½-lb. box, 30 cts.; per 1-lb. box, 50 cts.

## Gishurst's Compound.

A certain remedy for greenfly, scale, mealy bug, etc. Good for greenhouse. Per 1-lb. box, 50 cts.

## Hammond's Grape Dust.

For the prevention of mildew on roses, grapes, gooseberries, etc. Apply with bellows. 5-lb. package, 35 cts.; 10-lb. package, 60 cts.; 100-lb. keg, \$5.

## Hellebore, Powdered.

An excellent protection from currant worms, grape slugs, caterpillars, etc. May be applied dry or mixed in water—1 oz. to 3 gallons. Per 2-lb. box, 35 cts.; per 1-lb. box, 20 cts.; ½-lb. box, 12 cts.

## Little's Antipest.

A sure destroyer of all insect pests. ½-gal. can, \$1.50; gal. can, \$2.50.

## Nikoteen.

A powerful insecticide, specially prepared for use in greenhouses and conservatories. Per pint bottle, \$1.50.

## Nikoteen Aphis Punk.

It kills bugs under glass and does not injure sensitive blooms or foliage. 60 cts. per box of 1 doz. rolls; \$6.50 per case of 1 doz. boxes.

## Paris Green.

Mixed at the rate of 1 lb. to 200 gallons of water, it will prove effective against all chewing insects. Per 1-lb. can, 35 cts.; ½-lb. can, 20 cts.; ¼-lb. can, 15 cts. This article is liable to fluctuate in price.

## Slug Shot (Hammond's).

Excellent for destroying cabbage, turnip and beet fly, potato bugs, currant worms, etc. 5-lb. package, 30 cts.; 10-lb. package, 50 cts.; 100 lbs. \$4.

## Sulphur, Powdered.

For protecting against mildew on grapes, roses, etc. Per lb., 10 cts.; 10 lbs., 60 cts.; 100 lbs., \$4.

## Sulpho-Tobacco Soap.

Dissolve in proportion of 2 ounces to a gallon of water, and apply with a syringe or atomizer. It will destroy rose slugs, aphides, greenfly, bark-lice, etc. Per ½-lb. box, 25 cts.

## Tobacco Dust.

If dusted on *while the foliage is moist* it destroys rose lice, cabbage and turnip fleas, etc. Per 1-lb. box, 10 cts.; 5-lb. package, 30 cts.; 10-lb. package, 50 cts.; per 100 lbs., \$2.50.

## Tobacco Stems.

For fumigating plants infested with greenfly. Per bale of about 100 lbs., \$1.50; per bale of about 200 lbs., \$2.75; per bale of about 400 lbs., \$4.50.

## "Rose Leaf" Tobacco Extract.

Highly concentrated extract of tobacco, for destroying insects and scale on plants. Pint can, 30 cts.; qt., 50 cts.; gal. \$1.25.

## Whale-Oil Soap.

For washing trees and destroying all insects on the bark. Per 1-lb. box, 18 cts.; 5 lbs., 50 cts.; 10 lbs., 90 cts.; 100-lb. keg, \$7.

## Bordeaux Mixture, or Funguroid.

For all fungous diseases. Dry, 1-lb. box, 20 cts.; 5 lbs. and over at 15 cts. per lb.; 50-lb. keg, \$6; liquid, 1 gallon, \$1.25.

# High Grade Registered Fertilizers.

## Thorburn's Lawn Fertilizer.

Guaranteed to contain ammonia, 6 to 7 per cent; available phosphoric acid, all soluble, 8 to 10 per cent; actual potash, 5 to 6 per cent; lime, sulphate of magnesia, soda, sulphuric acid, etc. In 167-lb. bags, per ton, \$48; single bags of 167 lbs., \$4.50; per bag of 100 lbs., \$3; 50 lbs., \$1.75; 25 lbs., \$1; 10 lbs., 50 cts.

## Clay's Celebrated Fertilizer.

Undoubtedly one of the best manures for all horticultural purposes, either in greenhouse or garden. 1 cwt. (112 lbs.), \$7; ½ cwt. (56 lbs.), \$4; ¼ cwt. (28 lbs.), \$2.25; ⅛ cwt. (14 lbs.), \$1.25.

## Pulverized Sheep Manure.

A very rich, pure natural manure. It is excellent as a top-dressing for lawns. There is nothing better for

mixing with the soil for greenhouse plants—one part manure and six parts soil. 5-lb. package, 30 cts; 10 lbs., 50 cts.; 50 lbs., \$1.25; 100 lbs., \$2; ton, \$30.

## Pure Ground Bone Meal.

This finely pulverized ground bone is excellent for rose culture. It decomposes very rapidly, and is more quickly effective than the coarser grade. It is excellent for mixing with the soil for potting. 5 lbs., 25 cts.; 50 lbs., \$1.25; 100 lbs., \$2; per ton, \$32.

## Bowker's Food for Flowers.

A dressing made expressly for plants grown in the house, garden or conservatory; clean, odorless, and producing early and abundant blossoms, and healthy, luxuriant plants. Small packages, 15 cts. each; large packages, 25 cts.

## PLANT TUBS.

**Flower Tubs, Columbia.** Made of cypress timber.  
Natural varnish finish.

## FINLEY ROTARY LAWN RAKE.

It can be easily adjusted to fit any work by simply turning two nuts. It is simple and strong in construction, durable, and with no intricate parts. It can be adjusted so as to scarify the ground, remove summer grass, worm casts, etc., or raised so as merely to skim the surface of the grass, picking up loose grass, leaves or any loose litter. It is a most efficient machine. Price, free on board New York, \$13.

## LAWN SWEEPER, "Model No. 1."

Designed for use on ordinary lawns, small parks, tennis courts, etc. It is 25 inches wide over all, weighs 23 pounds, and carries a 21-inch brush. The brush is fan-shaped, and revolves very rapidly, in the same direction as the drive wheels, throwing the litter backward from the under surface. Immediately behind the brush, and parallel with it, a thin shoe passes along over the ground, with its upper surface inclined. If sticks or stones are encountered, the shoe does not allow them to pass under it, but provides a passage over it into the hopper. Price, \$10.

CATALOGUE OF

## *Bulbs and Flowering Roots for Fall Planting*

AUGUST 13, 1902.

**T**HE growing of bulbs for winter and spring flowering is very interesting and very easy. If the directions given in this Catalogue are observed, there need be no disappointment with the results. Many of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of flowers may be had from December till May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. There is nothing more refreshing than the first Snowdrop of spring. It appears before the snow is right off the ground, and is quickly followed by the Chionodoxa, or "Glory-of-the-Snow," the bright and variously colored Crocuses and Scillas and the lovely Daffodils. Then come the gorgeous lawn displays of Hyacinths and Tulips. All these are produced from bulbs planted in the fall.

We invite special attention to the collections of bulbs offered on the second page of cover, both for indoor and outdoor cultivation. They contain only sorts that will insure satisfaction. The cultural directions found under the respective headings are also worthy of careful attention.

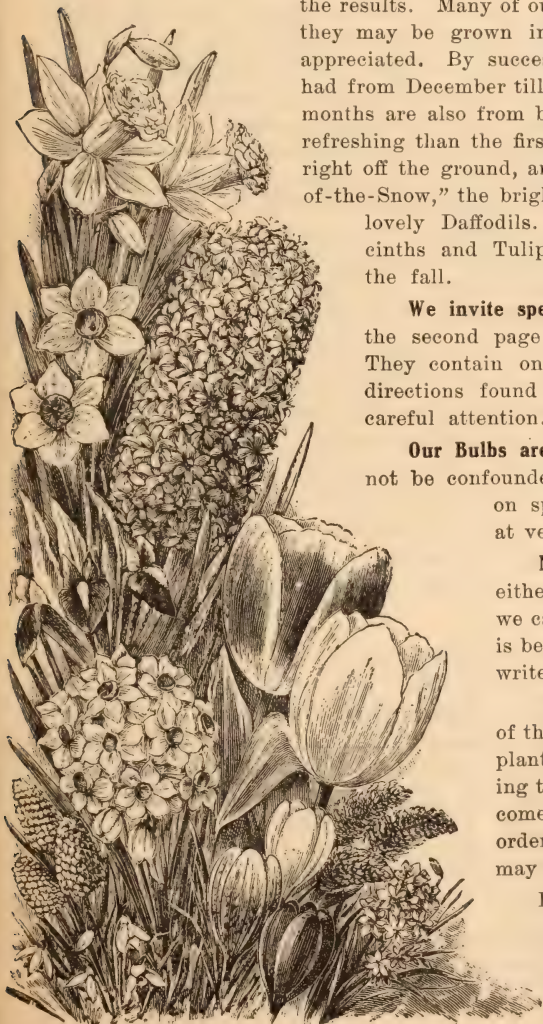

Our Bulbs are all selected, and from the best growers, and should not be confounded with the cheap "ease" bulbs sent to this country on speculation and often sold at auction, and otherwise, at very low prices.

**NAME and ADDRESS.** We often receive orders with either the name or the address of the sender omitted. As we can do nothing with them, the customer thinks his order is being neglected. We therefore beg our correspondents to write on each order their name and full address.

**ORDERS** should be sent as soon as possible after receipt of this Catalogue. The bulbs will be sent in proper time for planting. They are ready from August to October, according to the time of ripening and the country from which they come. Orders booked earliest are surest of being filled as ordered. If left too late, the supply of some of the varieties may be exhausted.

Please address all orders and remittances to

J. M. THORBURN & CO.  
36 CORTLANDT ST., NEW YORK

# HYACINTHS.

Hyacinths are ready for delivery in September.

The **Hyacinth** is one of the most popular and beautiful of spring-flowering plants for indoor and outdoor decorations. By careful management in keeping up a succession, they may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground they are unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

*Group of Hyacinths.*

will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs; some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has become frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field mice, which may burrow in it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch, or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibry loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of six inches, and left there for five or six weeks, until the pots are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be always applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.** Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gas light. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

**Persons unacquainted** with the different varieties will do well to leave the selections to us, only specifying in their orders whether the bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortments of named Hyacinths of our selection offered on page 4, and to the Hyacinth Glasses which are described at the end of the Catalogue.

The names of our Hyacinths and Tulips are those given to them by the originators in Holland.

## SELECT NAMED HYACINTHS.

The Single-flowered varieties are generally more effective than the Double ones. They also, as a rule, succeed better in glasses. The Double varieties are distinguished by an asterisk (\*) and those of them that do well in water by two asterisks (\*\*).

If ordered by mail, please add 15 cents per dozen for postage.

## NAMED BLUE HYACINTHS.

Three of a kind sold at the dozen rate.

## GROUPS OF HYACINTHS FOR DESIGN BEDDING.

To obviate the disappointment resulting from selecting unsuitable varieties for design beds, we give the following groups of sorts that bloom about the same time and grow to the same height. They will all form most effective combinations. We recommend **named** sorts for design bedding as decidedly better than mixtures.

{ **Baron Thuyll, Red.**  
**Alba Superbissima, White.**  
**Charles Dickens, Blue.**

{ **Gigantea, Red.**  
**Grandeur a Merveille, White.**  
**Baron Thuyll, Blue.**

{ **Robert Steiger, Red.**  
**Mad. Vanderhoop, White.**  
**Marie, Blue.**

{ **General Pelissier, Red.**  
**Baroness Thuyll, White.**  
**Grand Maitre, Blue.**

{ **Norma, Red.**  
**La Franchise, White.**  
**La Peyrouse, Blue.**

## MIXED HYACINTHS IN SEPARATE COLORS.

The very largest size. Suitable either for forcing or bedding.

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all large size, measuring 6 inches and over in circumference. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

*If ordered by mail, add 15 cents per dozen for postage.*

## ROMAN HYACINTHS.

Extensively used by florists for forcing for cut-flowers. of bulbs. The flowers are pure white, delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early; and by making successive plantings they may be had in flower all through the winter. The blue and rose Roman Hyacinths flower from one to two weeks later than the white variety.

For this purpose they are the best and most popular

*If by mail, add 10 cents per dozen for postage.*

<b>Double Dark Rose Roman</b> .....	05	45	3 00
<b>Single Blue Roman</b> .....	05	45	3 00

## ITALIAN HYACINTHS.

These are grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are hardier than the Romans, and may also be planted outside in the fall for flowers for early spring cutting.

	Each	Per doz.	Per 100
<b>Single White Italian</b> .....	\$0 05	\$0 50	\$3 50

## MINIATURE HYACINTHS.

These are also known as "Dutch Roman" and "Pan Hyacinths." They are very suitable for growing in groups in pots or earthen pans, as shown in the illustration on page 2. We offer them in separate colors, and also mixed, as follows:

**Pure White, Rosy Red, Light Blue,**  
**Cream White, Dark Blue, Yellow,**  
**Dark Red, Mixed, all colors.**

Price, 50 cents per dozen, \$3 per 100.

## TULIPS.

 Tulips are ready for delivery in September.

For beauty of form and brilliancy of coloring, Tulips are unequalled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers can select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot-culture and forcing for winter cut-flowers, they are also invaluable.

**CULTURE.** The cultural directions given for Hyacinths on page 2 are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November, before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot-culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From 3 to 5 bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for Hyacinths. Most of the varieties named below are equally well adapted for pot-culture or the open border

### SINGLE EARLY TULIPS.

 Six of a kind at dozen rates, 25 at 100 rates.

<b>Double Red, Yellow-Bordered</b> .....	9....	2 for 5c.	20	1 25

## DARWIN TULIPS.

These belong to the class of single late-flowering Tulips (page 8), being in fact modern forms of Gesneriana. They grow very tall, with large flowers of fine form. Being borne on very long stems, they are excellent for cutting to put in vases for house decoration. They are all single, self-colored, and surpass all others in brilliancy and variety of coloring. They are also most effective for bedding. Besides the mixture, we offer the following named sorts :

	Each	Per doz.	100
<b>Baronne de la Tonnoye.</b> Vivid rose.....	\$0 08	\$0 60	\$3 50

## PARROT TULIPS.

For outdoor cultivation. The petals of these have feathered edges, and in addition to other colors combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant color, and form very effective groups for the flower border. *Very late in flowering.*

If ordered by mail, add 6 cents per dozen for postage.

	Each	Per doz.	100

## TULIP BEDS.

It is to be regretted that the gorgeous displays presented by the Tulip beds of our public parks should so seldom be seen on our private lawns. Tulips are so hardy and of such easy culture that failure to obtain satisfactory results is possible only by selecting unsuitable *sorts*. In order to obviate this difficulty, we give the following groups of sorts that bloom at the same time and are of equal height. Any of these groups will form an effective combination. After the Tulips have flowered, the beds can be used for bedding plants, such as Geraniums, etc., to full advantage. Rich soil is necessary.

It is advisable to order as soon as possible after receipt of this Catalogue, as later on in the season we may be sold out of some varieties, owing to an unusual demand for them. In that case we shall substitute equally fine sorts of same color and time of bloom.

### GROUPS OF TULIPS THAT WILL FORM EFFECTIVE COMBINATIONS.

#### SINGLE TULIPS.

- { Duc van Thol Scarlet.
- { La Reine.
- { L'Immaculee.
- { Duc van Thol Scarlet.
- { Rose Gris-de-lin.
- { Proserpine.
- { Pottebakker Yellow.
- " White.
- { Golden Prince.
- { Cottage Maid.
- { Pottebakker White.
- { Cozleur Ponceau.

#### SINGLE TULIPS.

- { Belle Alliance.
- { Princess Mary Ann.
- { Mon Tresor.

<b>Ostrowskyanum.</b> Deep carmine .....	05	40	2 25

*Types of Narcissi.*

## NARCISSUS.

Narcissi are Ready for Delivery in September.

The very beautiful species and varieties of *Narcissus* are among the most popular and largely grown of spring-flowering bulbs, and that deservedly, too, for they are certainly "the fairest among them all." Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them. To know them is to love them, and to love them is a liberal education.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, or lakes, or ponds, and in mixed flower or shrubbery borders. They are also suitable for naturalizing in the grass, by the side of woodland walks or in open spaces between trees and shrubs. With the exception of the *Polyanthus* section, they are all perfectly hardy.

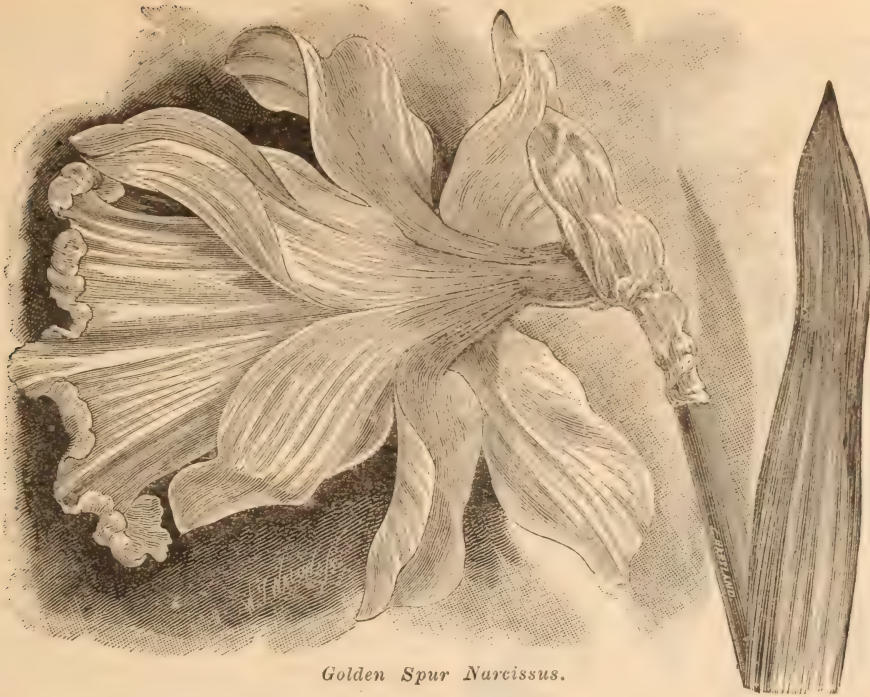

Narcissi are also very suitable for growing in pots, requiring about the same treatment as hyacinths, with 3 or 4 bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers.

### SINGLE NARCISSUS, or DAFFODILS.

*If ordered by mail, add 13 cents per dozen for postage.*

	Each	Per doz.	100
<b>Ard Righ</b> (Irish King). Magnificent golden yellow trumpet; very large and graceful. One of the earliest and finest for forcing.....	\$0 12	\$1 25	\$6 50

<b>Large Double.</b> Yellow .....	06	50	3 00
<b>Silver Jonquill</b> ( <i>Narcissus tenuior</i> ) .....	08	75	4 00

# LILIES.

For stateliness of habit, beauty of form, and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown, and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a rich, deep loam, they all do best in a light, well-drained soil. Some peat or leaf-mould may be used to advantage. *L. auratum* cannot bear manure, but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot-culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

*Lilium Thunbergianum.*

*Lilium Harrisii* and *Lilium candidum* ready in August; all others not till November.

If ordered by mail, add 3 cents each for those marked (\*); others from 1 to 2 cents each for postage.

	Each	Per doz.

<b>Leichtlinii, Canary Yellow.</b> Like above, but in color pure canary-yellow.....	40	4 00

## LILY-OF-THE-VALLEY.

(CONVALLARIA MAJALIS.)

Ready in November.

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them.

**Clumps.** Fine large clumps, with 15 or more flowering pips on each. Fine for planting outside in shaded positions, and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per dozen clumps.

**Pips for forcing.** 50 cts. per bundle of 25, \$1.75 per 100; \$14 per 1,000.

*Lily-of-the-Valley.*

Amaryllis.

## AMARYLLIS.

Ready in October.

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mould or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure water during the growing season.

	Each	Per doz.
<b>Aulica</b> (Lily-of-the-Palace). Very large, handsome flowers; crimson, shaded with green.....	\$1 00	
<b>Belladonna</b> . Violet and white; flowers in large umbels; very fragrant..	20	\$2 00

<b>Vittata Mixed</b> . Striped red and white.....	60	\$6 00
<b>Mixed Hybrids</b> . Beautifully colored hybrids; large bulbs.....	60	6 00

## ARUMS.

Ready for shipment in Sept. and Oct.

A genus of curious and ornamental perennials, with peculiar and distinct foliage and flowers. They make handsome pot-plants, and are also very effective in subtropical gardening. *A. Dracunculus* is hardy, and may be left in the ground over winter, with a little covering. The others should be potted in the autumn and kept dormant till spring. They are all of easy cultivation, requiring rich soil and plenty of water during the growing season. A compost of rich loam, with a third of well-rotted manure and some sand, is very suitable.

If ordered by mail, add 3 cents each for postage.

	Each	Per doz.
<b>Crinitum</b> . Marble stems; broad, flesh-colored, spotted flowers, covered with hairs..	\$0 20	\$2 00
<b>Cornutum</b> (Red Calla). Flowers red, spotted black; stems mottled; a handsome pot-plant.	15	1 50
<b>Dracunculus</b> (Dragon-flower). A striking and very ornamental plant for pots or garden. It grows to a height of 3 feet, with mottled stem and handsome foliage.....	12	1 25

" <b>Whirlwind.</b> It bears in profusion large, semi-double, pure white flowers of great substance; splendid for cutting.	06	50	3 00

## BEGONIA GRANDIFLORA, TUBEROUS-ROOTED.

Ready in November.

Splendid pot-plants for the house or greenhouse and especially valuable for bedding, flowering in the greatest profusion throughout the summer. For bedding they should be started in hotbed in March and April. The hollow end of the bulb should be up and but slightly covered. They should get very little water until the plants are growing.

<b>Mixed.</b> All sorts.....	05	30	1 50

*Brodiaea coccinea.*

## CROCUS.

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted close—say 2 inches apart—and in close rows, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful.

For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

If ordered by mail, add 15 cents per 100 for postage.

## HYBRID NAMED CROCUS.

Composed of the most beautiful varieties; remarkable for richness of color and immense size. These varieties are best for forming letters or designs on the lawn, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. The flowers are produced very early, and the mowing later on will not seriously injure the Crocus bulbs.

If ordered by mail, add 25 cents per 100 for postage.

# CALOCHORTUS.

(MARIPOSA LILY, or BUTTERFLY TULIP.)

Ready in September.

Very handsome bulbous plants from California. They are remarkable for the brilliancy and variety of their coloring, and their gracefulness of habit. They grow freely in light, sandy loam; though hardy, they should be protected during winter with litter. They may also be successfully grown in frames and in pots.

If ordered by mail, add 5 cents per dozen for postage.

Cyclamen giganteum.

# CYCLAMEN.

Most of them ready in November.

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The *C. giganteum* is an improved strain of the old *C. Persicum*, having much larger and more brilliantly colored flowers, and producing them more abundantly. We offer seed of our superb strain of these at the end of this Catalogue.

# CROWN IMPERIALS.

(FRITILLARIA IMPERIALIS.)

A stately growing plant, with dark green foliage, and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be.

Crown Imperial.

Their flowers are produced quite early in spring, and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

Ready in September.

If ordered by mail, add 3 cents each for postage.

Fritillaria imperialis. See Crown Imperials, above.

# FREESIA.

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in a light, sandy soil, in a frame or greenhouse, and are excellent for window-culture in winter; one plant will perfume a large room, but not in the persistent manner of a tuberose. The plant has tooth-shaped bulbs and flat, spreading leaves. For the information of all not acquainted with these bulbs, we may say that they are quite small, and produce large blooms in comparison to their size.

**Freesia refracta alba.** Pure white and sweet-scented; very largely forced. The flowers are 2 inches long, and about the same in width, shaped like miniature gladioli, and in clusters of 6 to 10, on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. The fragrance is remarkable and very lasting.

**Freesia Leichtlinii.** Creamy white, shading to yellow; distinct in color.... 35 2 00

Freesia refracta alba.

## GLADIOLUS.

Ready in November.

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse, except those prefixed with an (\*), which are hardy, and may be planted out; it is best, however, to give them a slight protection. Some varieties are successfully forced.

The French Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty. Every year is now adding varieties of most exquisite tint and shade; and from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published January 1.

## GLOXINIAS.

Ready in November.

Gloxinias are among the most beautiful of greenhouse plants, the flowers being remarkable for the intensity and variety of their coloring, and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil

composed of leaf-mould and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large-sized, and of the erect flowering strain.

		Each	Per doz.	100

## CRINUMS.

Splendid large-flowering bulbs, closely allied to the Amaryllis. The most suitable soil is a compost of turfy loam, cow manure and some sand. They should be grown in large pots or in tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a coolhouse and allowed to rest till new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure water during the growing season. They may be placed outside when warm weather begins and will flower all through the summer, making splendid lawn or veranda plants.

	Each
<b>Giganteum, Giant White.</b> Immense bulbs; large white flowers; blooms all summer; very fragrant; they should be watered plentifully while growing .....	\$2 50

“ <b>intermedium.</b> Light rose; hardy.....	3 00

Crinum.

# IRIS (FLEUR-DE-LIS). Ready in October and November.

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together in the flowers. Irises are of easy culture, requiring very little attention after once being planted. They do best in a light, rich, sandy soil, and in a sunny situation. Good drainage is very important. The newer varieties of *Iris Kämpferi*, recently introduced from Japan, are remarkable for the beauty of

their colors and their stateliness of habit. Some of these send up 10 or 12 flower spikes 3 feet high, each bearing 2 to 4 enormous blossoms, measuring 8 to 10 inches across, and of the most delicate and beautiful colors, markings and combinations; no other flowers excel them in richness. These require a liberal supply of water when growing. With the exception of *Morea pavonia* and *Tuberosa*, all the varieties are hardy.

*New Large-Flowered Japan Iris.*

<b>Mixed Large-Flowering Single Japan</b> .....	10	1 00	7 00

IRIS, Continued—SPANISH IRIS. (*Iris Hispanica*.)

Very profitable for florists, who are planting them largely for cut-flowers. Plant in beds in the open as soon as received in the autumn, and protect slightly in the winter months. In the beginning of April cover the beds with glass, so as to have the flowers ready for cutting in May.

*Iris.*

## IXIAS.

Ready in October.

The Named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

	Each	Per doz.	100
<b>Azurea.</b> Blue, with purple center; very beautiful.....	\$0 05	\$0 40	\$2 50

<b>In Splendid Mixture</b> .....	2 for 5 cts..	20	75

## ERYTHRONIUMS. (DOG'S-TOOTH VIOLETS.)

Ready in September.

Very ornamental, hardy, bulbous plants, of neat and dwarf habit. They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in sheltered positions on rockeries, or in mixed flower or shrubby borders.

<b>Giganteum</b> (Giant Dog's-Tooth Violet). Very large, straw-colored flowers, with orange center, borne on long, slender stems; the foliage is richly mottled in dark brown and its elegant habit makes a very attractive pot-plant for window decoration.....	Each	Per doz.	100
	\$0 05	\$0 40	\$2 50
<b>Grandiflorum.</b> Leaves unmottled; flowers bright yellow, with recurved petals.....	10	1 00	6 50

<b>Johnsonii.</b> Large, clear pink flowers, with orange center; foliage prettily variegated in dark brown; grown in pots in frames and brought into the house when in flower, they make very attractive decorative plants.....	12	1 25	8 00
<b>Revolutum.</b> Leaves mottled white and brown; flowers opening white, and passing to pink and purple .....	08	65	4 50
<b>Dens-canis</b> (Dog's-Tooth Violet). Mixed colors; very pretty; leaves blotched in brown and white .....	05	30	1 50
<b>Mixed</b> .....	05	40	2 50

*Erythronium.*

## LACHENALIAS.

Ready in September.

Very pretty, spring-flowering, greenhouse, bulbous plants, with brightly colored flowers and elegant habit. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mould and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air, and keep near the glass to insure sturdy growth. *Lachenalias* are also excellent subjects for hanging baskets.

*Lachenalias.*

<b>Crocsmiæflora.</b> Large; bright orange, tinged scarlet.....			
<b>Drap d'Or.</b> Rich yellow; very large, handsome flowers.....			
<b>Eldorado.</b> Large, golden yellow flowers; very floriferous; dwarf habit.....

<b>Hybrids Mixed</b> .....	10	1 00

## MONTBRETIAS.

Ready in November.

Hardy, summer-flowering, bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties:

<b>Bouquet Parfait.</b> Large, Each	Doz.	100
bright vermilion flowers,		
with deep yellow center...	\$0 06	\$0 60 \$3 00

<b>Umbellatum</b> (Star of Bethlehem). Outside green and white striped, inside satiny white; flowers in umbels; very showy.....	2 for 5 cts..	20	1 00

# NERINE.

Ready in October and November.

Very beautiful greenhouse bulbous plants, succeeding best in pots, in light soil—say a compost of loam, leaf-mould and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die they should be kept quite dry in a cool place until they begin to grow again.

Nerine Japonica.

<b>Crispa.</b>	Very handsome scarlet flowers.....	Each	Per doz.
			\$1 00

<b>Sarniensis</b> (True Guernsey Lily).	Flowers brilliant crimson, in large clusters. The best known sort.....	30	3 00
<b>Undulata.</b>	Rosy purple, wavy flowers; very handsome....	75	

# OXALIS.

Ready in September.

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging baskets. They are easily grown in sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

		Each	Per doz.	100
<b>Buttercup.</b>	A splendid winter-blooming plant for pot-culture. The flowers are pure bright yellow, and produced in great abundance. It is very easily cultivated, and, being a strong grower, only one or two bulbs should be planted in a 5- or 6-inch pot.....	\$0 05	\$0 45	\$2 50

# PAEONIES.

Ready in October.

The old-fashioned double Pæonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Pæonies rank about first for lawn or flower-border or shrubbery decoration. They are all hardy.

		Each	Per doz.

Pæonies.

## RANUNCULUS.

Ready in September.

The main soil for these should be loam or clay, with a good dressing of rotten manure and leaf-mould; if heavy, add a little sand. The soil should be well drained, cool, deep, rich and moist. Plant late in the autumn, claws downward, from 4 to 6 inches apart and 3 inches deep, covering with fine, pulverized soil.

If ordered by mail, add 3 cents per dozen for postage.

### PERSIAN VARIETIES.

*Ranunculus.*

*White Calla.*

## RICHARDIAS, or CALLAS.

Ready in September and October.

Tall-growing, bulbous perennials of exceedingly graceful habit and very handsome foliage and flowers. They are easily cultivated in pots, requiring only a rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting in September.

	Each	Per doz.	100
<b>White Calla,</b> or <b>Lily-of-the-Nile</b> ( <i>Calla Æthiopica</i> ). Large, white, trumpet-shaped flowers of great substance. One of the most popular and ornamental of house and greenhouse plants..	\$0 20	\$2 00	\$15 00

<b>Red Calla</b> ( <i>Arum cornutum</i> ). Flowers red, spotted black; stems mottled; a handsome pot-plant...	15	1 50	

## SCILLAS.

Ready in September.

No garden can be complete without these beautiful flowers. *S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years.

If ordered by mail, add 5 cents per dozen for postage, except those marked with a star (\*), to which add 2 cents each.

**Sibirica.** The effect in early spring of the intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the Snowdrop and the varied hues of the Crocus, can hardly be over-estimated; are most valuable for permanent edging. 30 cts. per doz., \$1.70 per 100, \$12 per 1,000.

Each Perdoz. 100

<b>Sibirica alba.</b> White-flowered variety of the above.....	\$0 05	\$0 45	\$3 00

## SNOWDROPS. (GALANTHUS NIVALIS.)

Ready in September.

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest-flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in the spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms.

*Snowdrops.*

If ordered by mail, add 3 cents per dozen, or 25 cents per 100, for postage.

	Perdoz.	100	1,000
<b>Single-Flowering Snowdrops</b> .....	\$0 15	\$1 00	\$7 50
<b>Double-Flowering Snowdrops</b> .....	25	1 75	14 00
<b>Giant Snowdrop of Asia Minor</b> ( <i>Galanthus Elwesii</i> ).....	15	1 00	7 50

## TIGRIDIAS.

Bulbs ready for shipment in the Spring.

These very handsome summer-flowering bulbs should be planted in the spring. They will flower profusely all summer. The plants grow about 2 feet high, with large and finely colored flowers.

Each Perdoz. 100

<b>Burbank's New Hybrids.</b> Giant flowers of red, white, yellow, orange, rose, crimson and gold, with shades and combinations of color never shown before by Tigridias.....	\$0 20	\$2 00	\$15 00
<b>Canariensis.</b> Very handsome light yellow, with brown spots.....	08	60	4 00

<b>Speciosa pavonia.</b> Bright crimson, mottled yellow.	08	60	3 50
<b>Grandiflora alba.</b> Large-flowered; white, spotted crimson.....	08	60	3 50

*Tigridia.*

## SPIRAEA, or ASTILBE.

Ready in November.

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

**Japonica** (Hoteia). Excellent pot-plant for winter blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting. 10 cts. each, \$1 per doz., \$6 per 100.

**Japonica fol. aurea reticulata**. Beautiful gold-striped foliage; large panicles of pure white flowers. 15 cts. each, \$1.50 per doz., \$10 per 100.

**Japonica compacta multiflora**. The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.25 per doz., \$7 per 100.

**Astilboides floribunda**. Very large, pure white plumes; neat habit; very abundant bloomer. 15 cts. each, \$1.25 per doz., \$7 per 100.

**Palmata**. Crimson; strong clumps. 15 cts each, \$1.25 per doz., \$8 per 100.

*Spiraea Astilboides floribunda.*

## TUBEROSES. Ready in December.

The purity of color and rich perfume of the Tuberose are well known. In this latitude May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich warm soil and in a sunny situation. Cut off about a quarter of an inch from the bottom of the bulb before planting and set so that the top will be one inch below the soil.

**Dwarf Double Pearl**. Dwarf habit; Each Doz. 100  
large fine flowers of great substance. \$0 05 \$0 35 \$1 50

*Trillium sessile Californicum.*

## TRILLIUMS.

(AMERICAN WOOD LILY, or INDIAN SHAMROCK.)

Hardy herbaceous perennials, succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are natives of North America, and are known by various common names in different localities. They have violently emetic roots.

	Each	Doz.	100
<b>Grandiflorum</b> ("Giant American Wood Lily," or "Wake Robin"). Large white flowers, changing to rose; quite hardy, and easily grown in shaded positions.....	\$0 05	\$0 40	\$2 50
<b>Erectum</b> ("Birth Root"). Dark purple flowers; erect habit; about one foot high.....	05	50	3 00
<b>Erectum album</b> . A white-flowered variety of the above .....	08	60	4 00
<b>Erythrocarpum</b> (Painted Trillium). White, striped purple.....	15	1 50	10 00
<b>Ovatum</b> . White, changing to purple....	10	75	5 00
<b>Sessile Californicum</b> . Handsome, pure white flowers; prettily mottled foliage	10	1 00	6 00

*Chionodoxa Lucillæ.**Tricyrtis hirta.*

## Miscellaneous Bulbs and Roots.

# Selected List of Hardy Flower Seeds.

For Autumn Sowing.

Many varieties of Flower Seeds, ANNUALS as well as BIENNIALS and PERENNIALS, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring.

# STRAWBERRY PLANTS.

Layer plants can be had in September. Pot-grown plants ready now.

	Layer per 100	Pot-grown per 100
<b>Beder Wood.</b> Very early, productive; large, conical, bright red color; excellent quality .....	\$1 00	\$3 00
<b>Brandywine.</b> Large, roundish conical, glossy crimson, firm and solid; of fine, aromatic flavor. Plant vigorous and productive; succeeds on any soil. Midseason to late .....	1 00	3 50
<b>Brunette.</b> This variety, in its combination of delicious flavor and beauty, has probably taken a step in advance of any variety now generally cultivated. Its berries are above medium size, round, and almost invariably perfect; of a dark mahogany color when fully ripe, and without any white tip. The plant is a strong grower and as free from rust as any variety now cultivated; flower perfect. The fruit is round in form, handsome, and of exquisite flavor.....	1 00	3 50
<b>Bubach No. 5.</b> A very large berry of dark color. Productive; of fair flavor. Largely grown for market. Midseason.....	1 00	3 00
<b>Clyde.</b> Very regular, bright scarlet berries; large, and of excellent flavor; firm, and a good shipper. Plant remarkably healthy, vigorous and productive. Season early .....	1 00	3 00
<b>Excelsior.</b> This is without exception the most valuable extra-early sort now on the market. A persistent and healthy grower, a cross between Hoffman and Wilson Albany. Twice as vigorous and healthy as either. Will average larger than Hoffman, twice as productive and equal to Hoffman as a shipper, which is saying a great deal, but not too much, and this year it was five days earlier than either Hoffman or Michel's Early. The above is our own experience and is strictly true; it is useless to say more.....	1 00	3 00
<b>Gladstone.</b> Large, early and of good quality; color red, with red flesh; solid.....	1 00	3 50
<b>Glen Mary.</b> Of large size; bright glossy crimson, of fine flavor. Plant is strong and healthy, very prolific, and on good soil the berries are large to the end of the season. Early .....	1 00	3 50
<b>Johnson's Early.</b> A fine new extra-early of large size and deep red color; glossy, firm, sweet, and of excellent flavor.....	1 00	3 50
<b>Kansas.</b> The plant is very vigorous and the fruit is a brilliant crimson, not only on the outside but through and through. This feature, together with its strong Strawberry flavor, will make it very popular when better known. Season late .....	1 00	3 50
<b>Lady Garrison.</b> This is a new one from south Jersey, where the originator and others have been fruiting it for a number of years, and where it has sold for higher prices than any other variety. Last year large quantities of the berries were shipped to New York and Boston, bringing 2 to 4 cents per quart more than others. Large, fine-looking, good flavor, second-early .....	1 00	3 50
<b>Marshall.</b> Large, dark crimson, good. Plant luxuriant, but needs rich soil and careful culture. Midseason .....	1 00	3 50
<b>McKinley.</b> Large, roundish, crimson; flesh firm and quality good. The plant is vigorous and a great yielder; flowers bi-sexual or perfect. Season medium to late.....	1 00	3 50
<b>New York.</b> The berries are very large, ripening midseason. Color, dark scarlet, changing to crimson when fully ripe. Colors all over at once. Quality first-class. This berry won a prize of \$100 in gold in competition with many other varieties against the Glen Mary.....	1 00	3 50
<b>Nick Ohmer.</b> For market, for home use or for exhibition, this is probably the greatest berry ever offered. It is certainly the most desirable berry that has come under our observation. It is our candid opinion that all who grow the Nick Ohmer will be astonished at its healthy, vigorous growth and great productiveness. The fruit will be a surprise to all who see it, being mammoth size, beautiful in form and color and of excellent quality.....	1 00	3 50
<b>Palmer's Early.</b> After two seasons' fruiting, an experienced and reliable Strawberry grower writes: "Palmer's Early ripened four days before Johnson's Early, or Excelsior. The berry is long, somewhat the shape of Parker Earle; color is dark red when fully ripe. It is very productive and the best-flavored berry I ever tasted".....	1 00	3 50
<b>Sharpless.</b> Demands rich, strong soil. Plant large and vigorous; berries very large, irregular in shape, crimson, moderately firm and of good quality. Mid-season. Layer, \$1 per 100; pot-grown, \$3 per 100.		
<b>St. Joseph.</b> New French Everbearing Strawberry. Fruit of good size; color, a rich glossy crimson, with flesh of same color. The plant is hardy and a continuous bearer, both on the old plants and the young ones as well. Pot-grown plants set out this summer will fruit abundantly next spring, and continue to fruit, more or less, during the summer. In addition to this, if the runners are not severed from the parent plants, they will form new plants, which will fruit the same season, giving a continuous supply of fruit throughout the summer. Layer, \$1 per 100; pot-grown, \$3.50 per 100.		
<b>Success.</b> Early, large, bright crimson color, high flavor, and continues bearing a long time. Layer, \$1 per 100; pot-grown, \$3.50 per 100.		
<b>Wm. Belt.</b> The berries are as large as Bubach, more perfect shape, just as productive, and the color is perfect. Layer, \$1 per 100; pot-grown, \$3 per 100.

## Grass Seeds for Autumn Sowing.

Autumn sowing is recommended from the latter part of August to the end of September, so that the young grass may become well rooted before winter sets in. Our new-crop seed of the leading sorts is ready now.

### THE THORBURN LAWN GRASS.

**The Thorburn Lawn Grass Mixture** is composed exclusively of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich greensward in three or four weeks from the time of sowing. It should be sown at the rate of four to five bushels to the acre (15 lbs. to the bushel). Per qt., 25 cts.;  $\frac{1}{2}$  pk., 65 cts.; pk., \$1; bus., \$3.50.

### THORBURN'S LAWN-RESTORING GRASS SEED.

A mixture of grasses peculiarly suited to take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-Restoring Grass Seed** should be sown on thin places before every rain. Per qt., 30 cts.; bus. of 24 lbs., \$5.

### THORBURN'S LAWN GRASS FOR THE SOUTH.

A mixture of grasses that stand extremes of heat and drought well and that are therefore peculiarly adapted for southern lawns. Per bushel of 20 lbs., \$5.

### THORBURN'S MIXTURE FOR SHADY SPOTS.

A mixture of grasses that thrive in shaded situations, under trees, or close to walls where there is little sun. Price, per quart, 35 cts.; peck, \$1.75; bushel of 24 lbs., \$6.

### PERMANENT GRASS SEED FOR GOLF LINKS.

We have given much attention to this subject, and have seeded most of the finest golf links in the country, among which we may mention the following celebrated links: St. Andrews, Baltusrol, Shinnecock Hills, Garden City, Nassau County, Philadelphia Country Club, Montclair Golf Club, Apawamis, Fox Hills, etc.

**Golf Links Mixture.** For the grounds in general. Per bushel of 20 lbs., \$2.50.

**Putting-Green Mixture.** A mixture of extra fine grasses, that will make a close, firm, green and lasting turf, which will improve with trampling. Per quart, 30 cts.; peck, \$1.75; bushel of 24 lbs., \$6

### GRASS SEED MIXTURES FOR MEADOWS AND PASTURES.

For over a hundred years our house has made a specialty of grasses. The formation of permanent pastures and meadows has for many years been a subject of careful study with us; and the following mixtures for seeding grass-lands have received universal recognition.

#### MEADOW MIXTURES FOR ONE ACRE.

- No. 1. For good land, neither too dry nor too wet. Price per acre (40 lbs.), \$5.
- No. 2. For high and dry land. Price per acre (40 lbs.), \$6.
- No. 3. For wet, late land. Price per acre (40 lbs.), \$5.

#### PASTURE MIXTURES FOR ONE ACRE.

- No. 4. For good land, neither too dry nor too wet. Price per acre (40 lbs.), \$5.50.
- No. 5. For dry land. Price per acre (40 lbs.), \$6.
- No. 6. For wet land. Price per acre (40 lbs.), \$5.50.

**N. B.** We shall be pleased to make special mixtures for particular purposes, or to suit exceptional conditions of soil, situation or climate—for very sandy or clayey ground, for very dry or wet situations, for steep slopes, terraces, tennis-courts, croquet greens, polo-grounds, etc. We invite consultation about any difficulties experienced in getting the right turf for any purpose or in any place.

## MUSHROOM SPAWN.

We have always on hand fresh spawn of the very highest grade. Cultural directions will be found in our General Catalogue. Any one requiring fuller details should get Mr. Wm. Falconer's book on Mushroom Culture, which we can send, postpaid, for \$1.

**English Spawn.** Per lb., 15 cts.; 10 lbs., \$1; 100 lbs., \$9.

**French Spawn.** Per lb., 50 cts.

*Mushrooms.*

# Insecticides and Remedies for Plant Diseases.

## Bug Death.

A fungicide, insecticide and plant-food combined. 1-lb. package, 15 cts.; 3-lb. package, 35 cts.; 5-lb. package, 50 cts.; 12½-lb. package, \$1; 100 lbs., \$7.

Perfection Shaker for applying above, 65 cts. each.

## Copperdine.

A combined fungicide and insecticide, used simply by adding water in proportion of one pound of the paste to 16 gallons of water. 1-lb. box, 25 cts., makes 16 gallons spray; 5-lb. box, \$1, makes 80 gallons spray.

## Fir-Tree Oil.

For greenhouse and house plants. It destroys all plant insects without injuring the plant. Dilute in the proportion of 1 pint to 20 gallons of water. Apply with vaporizer or syringe. ½ pt., 40 cts.; pt., 75 cts.; qt., \$1.25; ½ gal., \$2.25; gal., \$4.

## Fir-Tree Oil Soap.

Same as the Fir-Tree Oil, but in soap form. Mix at rate of 1 ounce to a gallon of water, and apply with bellows or syringe. ½-lb. tin, 25 cts.; 2-lb. tin, 75 cts.; 5-lb. tin, \$1.75.

## Gishurst's Compound.

A certain remedy for greenfly, scale, mealy bug, etc. Good for greenhouse. Per 1-lb. box, 50 cts.

## Hammond's Grape Dust.

For the prevention of mildew on roses, grapes, gooseberries, etc. Apply with bellows. 5-lb. package, 35 cts.; 10-lb. package, 60 cts.; 100-lb. keg., \$5

## Hellebore, Powdered.

An excellent protection from currant worms, grape slugs, caterpillars, etc. May be applied dry or mixed in water—1 oz. to 3 gallons. Per 2-lb. box, 35 cts.; per 1-lb. box, 20 cts.; ½-lb. box, 12 cts.

## Lemon Oil.

For destroying scale, caterpillar, mealy bug, red spider, greenfly, etc. Directions on can. ½ pt., 25 cts.; pt., 40 cts.; qt., 75 cts.; gal., \$2.

## Little's Antipest.

A sure destroyer of all insect pests. ½-gal. can, \$1.50; gal. can, \$2.50.

## Nikoteen.

A powerful insecticide, specially prepared for use in greenhouses and conservatories. Per pint bottle, \$1.50.

## Nikoteen Aphis Punk.

It kills bugs under glass and does not injure sensitive blooms or foliage. 60 cts. per box of 1 doz. rolls; \$6.50 per case of 1 doz. boxes.

## Paris Green.

Mixed at the rate of 1 lb. to 200 gallons of water, it will prove effective against all chewing insects. Per 1-lb. can, 35 cts.; ½-lb. can, 20 cts.; ¼-lb. can, 15 cts. This article is liable to fluctuate in price.

## Slug Shot (Hammond's).

Excellent for destroying cabbage, turnip and beet fly, potato bugs, currant worms, etc. 5-lb. package, 30 cts.; 10-lb. package, 50 cts.; 100 lbs., \$4.

## Sulphur, Powdered.

For protecting against mildew on grapes, roses, etc. Per lb., 10 cts.; 10 lbs., 60 cts.; 100 lbs., \$4.

## Sulpho-Tobacco Soap.

Dissolve in proportion of 2 ounces to a gallon of water, and apply with a syringe or atomizer. It will destroy rose slugs, aphides, greenfly, bark-lice, etc. Per ½-lb. box, 25 cts.

## Tobacco Dust.

If dusted on *while the foliage is moist* it destroys rose lice, cabbage and turnip fleas, etc. Per 1-lb. box, 10 cts.; 5-lb. package, 30 cts.; 10-lb. package, 50 cts.; per 100 lbs, \$2.50.

## Tobacco Stems.

For fumigating plants infested with greenfly. Per bale of about 100 lbs., \$1.50; per bale of about 200 lbs., \$2.75; per bale of about 400 lbs., \$4.50.

## "Rose Leaf" Tobacco Extract.

Highly concentrated extract of tobacco, for destroying insects and scale on plants. Pint can, 30 cts.; qt., 50 cts.; gal., \$1.25.

## Whale-Oil Soap.

For washing trees and destroying all insects on the bark. Per 1-lb. box, 18 cts., 5 lbs., 50 cts.; 10 lbs., 90 cts.; 100-lb. keg, \$7.

## Bordeaux Mixture, or Fungiroid.

For all fungous diseases. Dry, 1-lb. box, 20 cts.; 5 lbs. and over at 15 cts. per lb.; 50-lb. keg, \$6; liquid, 1 gallon, \$1.25.

# Thorburn's Registered Fertilizers.

## Thorburn's Lawn Fertilizer.

Guaranteed to contain ammonia, 6 to 7 per cent; available phosphoric acid, all soluble, 8 to 10 per cent; actual potash, 5 to 6 per cent; lime, sulphate of magnesia, soda, sulphuric acid, etc. In 167-lb. bags, per ton, \$48; single bags of 167 lbs., \$4.50; per bag of 100 lbs., \$3; 50 lbs, \$1.75; 25 lbs., \$1; 10 lbs., 50 cts.

## Clay's Celebrated Fertilizer.

Undoubtedly one of the best manures for all horticultural purposes, either in greenhouse or garden. 1 cwt. (112 lbs.), \$7; ½ cwt. (56 lbs.), \$4; ¼ cwt. (28 lbs.), \$2.25; ⅛ cwt. (14 lbs.), \$1.25.

## Pulverized Sheep Manure.

A very rich, pure natural manure. It is excellent as a top-dressing for lawns. There is nothing better for

mixing with the soil for greenhouse plants—one part manure and six parts soil. 5-lb. package, 30 cts.; 10 lbs., 50 cts.; 50 lbs., \$1.25; 100 lbs., \$2; ton, \$30.

## Pure Ground Bone Meal.

This finely pulverized ground bone is excellent for rose culture. It decomposes very rapidly, and is more quickly effective than the coarser grade. It is excellent for mixing with the soil for potting. 5 lbs., 25 cts.; 50 lbs., \$1.25; 100 lbs., \$2; per ton, \$32.

## Hard-Wood Ashes.

Finest Canada unleached hard-wood ashes; analysis guaranteed. Excellent fall top-dressing for lawns. Fine lot now on way. Price on application.

## PLANT TUBS.

**Flower Tubs, Union.** Made of cypress, painted green, with iron hoops and feet and handles; perforated bottom; very strong.

*Union Flower Tub.*

	Diam.	Height	Each
No. 1, 11 in. by 13 inches			\$0 75

No. 8, 12 "	10 "	1 75

## FINLEY ROTARY LAWN RAKE.

It can be easily adjusted to fit any work by simply turning two nuts. It is simple and strong in construction, durable,

*Finley Rotary Lawn Rake.*

and with no intricate parts. It can be adjusted so as to scarify the ground, remove summer grass, worm casts, etc., or raised so as merely to skim the surface of the grass, picking up loose grass, leaves or any loose litter. It is a most efficient machine. Price, free on board New York, \$12.

## LAWN SWEEPER, "Model No. 1."

Designed for use on ordinary lawns, small parks, tennis courts, etc. It is 25 inches wide over all, weighs 28 pounds, and carries a 21-inch brush. Price, \$10.

**Carnation Supports, Model Extension.** Per doz. 100  
\$0 50 \$3 00

**Galvanized Wire Stakes.** For roses, etc.

3 feet	40	2 50
4 feet	50	3 00

**Glazing Points, Van Reyper's Perfect.** Per 1,000, 75 cts.; pincers for same, 50 cts. each.

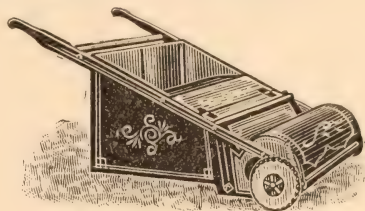

**Horse Boots.** The best make. Per set, \$9.

**Hose, Rubber, Finest "Wallabout." Three-ply.**

¾-inch, in any length, at 15 cts. per foot; 1-inch, in any length, at 21 cts. per foot.

" " "Electric." ¾-in. at 20 cts. per foot.

**Hyacinth Glasses.** Tall Shape—Blue, Green and Purple. Each, 20 cts.; per doz., \$1.75.

*Lawn Sweeper, "Model No. 1."*

## No. 5. COLLECTION OF HARDY BULBS FOR OUTDOOR CULTURE PRICE, \$3.75.

Consists of the same varieties as Collection No. 4, but with double the number of each sort.

## No. 6. COLLECTION OF HARDY BULBS FOR OUTDOOR CULTURE PRICE, \$7.

Consists of the same varieties as Collection No. 4, but with four times the number of each sort.

# J. M. THORBURN & Co.

CATALOGUE OF

## Bulbs and Flowering Roots for Fall Planting

August 13, 1903

**T**HE growing of bulbs for winter and spring flowering is very interesting and very easy. If the directions given in this Catalogue are observed, there need be no disappointment with the results. Many of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of flowers may be had from December till May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. There is nothing more refreshing than the first Snowdrop of spring. It appears before the snow is right off the ground, and is quickly followed by the Chionodoxa, or "Glory-of-the-Snow," the bright and variously colored Crocuses and Scillas and the lovely Daffodils. Then come the gorgeous lawn displays of Hyacinths and Tulips. All these are produced from bulbs planted in the fall.

We invite special attention to the collections of bulbs offered on the second page of cover, both for indoor and outdoor cultivation. They contain only sorts that will insure satisfaction. The cultural directions found under the respective headings are also worthy of careful attention.

Our Bulbs are all selected, and from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation and often sold at auction, and otherwise, at very low prices.

**NAME and ADDRESS.** We often receive orders with either the name or the address of the sender omitted. As we can do nothing with them, the customer thinks his order is being neglected. We therefore beg our correspondents to write on each order their name and full address.

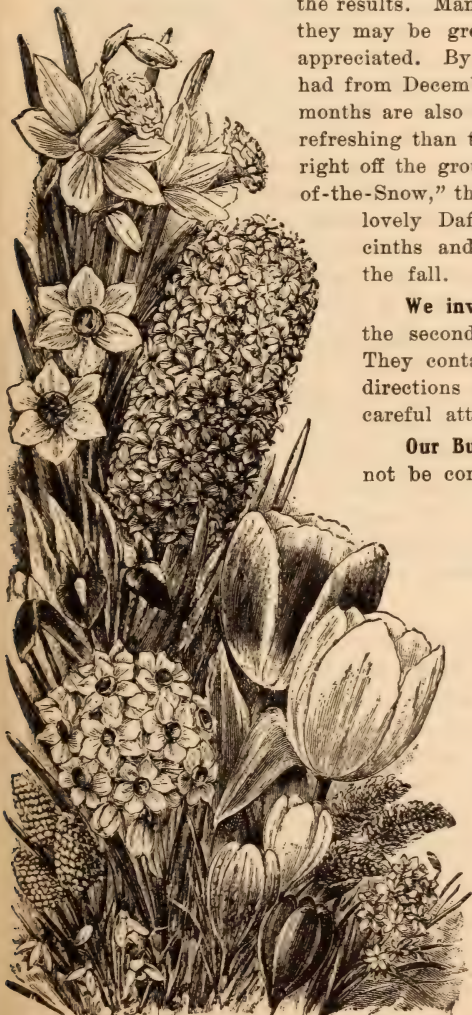

**ORDERS** should be sent as soon as possible after receipt of this Catalogue. The bulbs will be sent in proper time for planting. They are ready from September to November, according to the time of ripening and the country from which they come. Orders booked earliest are surest of being filled as ordered. If left too late, the supply of some of the varieties may be exhausted.

Please address all orders and remittances to

F. W. BRUGGERHOF,  
PRESIDENT.  
E. E. BRUGGERHOF,  
VICE-PRES. AND TREAS.  
R. R. MACKENZIE,  
SECRETARY.

36 Cortlandt St., NEW YORK

# HYACINTHS.

Hyacinths are ready for delivery in September.

The **Hyacinth** is one of the most popular and beautiful of spring-flowering plants for indoor and outdoor decorations. By careful management in keeping up a succession, they may be had in flower

from the beginning of winter to the end of May. For a spring display in the open ground they are unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

**OUTSIDE CULTURE.**—October is the month to plant Hyacinths outside. They succeed best in a light soil and in a sunny situation. If the soil is naturally heavy some sand should be mixed with it; and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they

*Group of Hyacinths.*

will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs; some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has become frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field mice, which may burrow in it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch, or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibry loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of six inches, and left there for five or six weeks, until the pots are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be always applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.** Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gas light. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

**Persons unacquainted** with the different varieties will do well to leave the selections to us, only specifying in their orders whether the bulbs are wanted for pot, glass or garden culture.

**We invite special attention** to the assortments of named Hyacinths of our selection offered on page 4, and to the Hyacinth Glasses which are described at the end of the Catalogue.

**The names** of our Hyacinths and Tulips are those given to them by the originators in Holland.

## SELECT NAMED HYACINTHS.

The Single-flowered varieties are generally more effective than the Double ones. They also, as a rule, succeed better in glasses. The Double varieties are distinguished by an asterisk (\*) and those of them that do well in water by two asterisks (\*\*).

If ordered by mail, please add 15 cents per dozen for postage.

## GROUPS OF HYACINTHS FOR DESIGN BEDDING.

To obviate the disappointment resulting from selecting unsuitable varieties for design beds, we give the following groups of some of the sorts that bloom about the same time and grow to the same height. They will all form most effective combinations. We recommend named sorts for design bedding as decidedly better than mixtures.

{ **Baron Thuyll, Red.**  
 { **Alba Superbissima, White.**  
 { **Charles Dickens, Blue.**  
 { **Gigantea, Red.**  
 { **Grandeur a Merveille, White.**  
 { **Baron Thuyll, Blue.**

{ **Robert Steiger, Red.**  
 { **Mad. Vanderhoop, White.**  
 { **Marie, Blue.**

{ **General Pelissier, Red.**  
 { **Baroness Thuyll, White.**  
 { **Grand Maitre, Blue.**  
 { **Norma, Red.**  
 { **La Franchise, White.**  
 { **La Peyrouse, Blue.**

## MIXED HYACINTHS IN SEPARATE COLORS.

The very largest size. Suitable either for forcing or bedding.

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all large size, measuring 6 inches and over in circumference. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

*If ordered by mail, add 10 cents per dozen for postage.*

## ROMAN HYACINTHS.

Extensively used by florists for forcing for cut-flowers. of bulbs. The flowers are pure white, delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early; and by making successive plantings they may be had in flower all through the winter. The blue and rose Roman Hyacinths flower from one to two weeks later than the white variety.

*If by mail, add 10 cents per dozen for postage.*

<b>Pure White Roman.</b> Extra-selected, Each	Per doz.	100
largest.....per 1,000, \$38..	\$0 06	\$0 60 \$4 00

<b>Double Dark Rose Roman</b> .....	05	50 3 50
<b>Single Blue Roman</b> .....	05	50 3 50

## ITALIAN HYACINTHS.

These are grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are harder than the Romans, and may also be planted outside in the fall for flowers for early spring cutting.

	Each	Per doz.	Per 100
<b>Single White Italian</b> .....	\$0 06	\$0 60	\$4 00
“ <b>Yellow</b> .....	15	1 75	12 00

## MINIATURE HYACINTHS.

These are also known as “Dutch Roman” and “Pan Hyacinths.” They are very suitable for growing in groups in pots or earthen pans, as shown in the illustration on page 2. We offer them in separate colors, and also mixed, as follows:

Pure White,      Rosy Red,      Light Blue,  
 Cream White,    Dark Blue,      Yellow,  
 Dark Red,        Mixed, all colors,

Price, 50 cents per dozen, \$3 per 100.

For this purpose they are the best and most popular

## TULIPS.

Tulips are ready for delivery in September.

For beauty of form and brilliancy of coloring, Tulips are unequaled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers can select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot-culture and forcing for winter cut-flowers, they are also invaluable.

**CULTURE.** The cultural directions given for hyacinths, on page 2, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November; before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot-culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot-culture or the open border.

A, B and C indicate season of flowering. A and B may be planted to flower about the same time in the open ground; C flowers later.

### SINGLE EARLY TULIPS.

☞ Six of a kind at dozen rates, 25 at 100 rates.

Double Tulips.

## DOUBLE TULIPS.

The Double Tulips come into bloom a little later than the single varieties. They are splendid for bedding, and the flowers last longer in bloom than the single sorts. Some of the sorts are quite dwarf.

If ordered by mail, add 6 cents per dozen for postage.

	Height, inches.	Per doz.	100
<b>B Agnes.</b> Brilliant red; early; quite dwarf.....	5...3 for 10c.	\$0 30	\$1 75

<b>Cochineal.</b> Brilliant vermillion; very early .....	6...	each 8c.	75	4 00
<b>Double Red, Yellow-bordered</b> .....	9...	2 for 5c.	20	1 25

## DARWIN TULIPS.

These belong to the class of single late-flowering Tulips (page 8), being, in fact, modern forms of Gesneriana. They grow very tall, with large flowers of fine form. Being borne on very long stems, they are excellent for cutting to put in vases for house decoration. They are all single, self-colored, and surpass all others in brilliancy and variety of coloring. They are also most effective for bedding. Besides the mixture, we offer the following named sorts:

	Each	Per doz.	100
<b>Baronne de la Tonnoye.</b> Vivid rose .....	\$0 08	\$0 60	\$3 50
<b>Bruno.</b> Glossy dark brown.....	08	60	3 50
<b>Burgomaster Fock.</b> Dark red .....	08	60	3 50
<b>Dream.</b> Lilac.....	08	60	3 50

	Each	Per doz.	100
<b>Liszt.</b> Brownish violet .....	\$0 08	\$0 60	\$3 50
<b>Mr. W. Roberts.</b> Dark brownish red .....	08	60	3 50
<b>Pales.</b> Bright lilac.....	08	60	3 50
<b>Æsculape.</b> Violet.....	08	60	3 50
<b>Lysicus.</b> Light lilac.....	08	60	3 50

	Each	Per doz.	100
<b>Henry Lyte.</b> Scarlet..	\$0 08	\$0 60	\$3 50
<b>Heroed.</b> Light violet...	08	60	3 50
<b>Edmond Rostand.</b> Bright red .....	08	60	3 50
<b>Mixed</b> .....	05	40	2 00

## REMBRANDT TULIPS.

A sport from the well-known Darwin Tulips. The flowers are very large and irregularly flamed in the richest colors. Late-flowering, and highly recommended for garden culture. Finest mixture, 10 cts. each, \$1 per doz., \$6.50 per 100.

## PARROT TULIPS.

For outdoor cultivation. The petals of these have feathered edges, and in addition to other colors combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant color, and form very effective groups for the flower border. Very late in flowering.

If ordered by mail, add 6 cts. per doz. for postage.

	Each	Per doz.	100
<b>Cafe Brown.</b> Brown and yellow-striped.....	\$0 05	\$0 35	\$2 00
<b>Constantinople.</b> Large, blood-colored flowers, tipped with orange .....	05	35	2 00
<b>Lutea major.</b> Large, yellow flowers.....	05	35	2 00
<b>Markgrave of Baden.</b> Bright yellow flowers, striped with scarlet.....	05	35	2 00
<b>Monstre Cramoisie Brilliant</b> .....	05	40	2 50
<b>Perfecta.</b> Yellow, spotted red.....	05	35	2 00
<b>Mixed, all colors</b> .....	3 for 10 cts...	30	1 25

*Darwin Tulip.*

## MISCELLANEOUS AND BOTANICAL TULIPS.

If ordered by mail, add 5 cents per dozen for postage.

	Each	Per doz.

## MIXED TULIPS.

For bedding. Planted in large masses, these make a magnificent show and, being inexpensive, should be largely used. Our special mixtures of Early Single and Early Double Tulips are made up of the finest bulbs and the brightest colors. If planted in large beds, they will produce an exceedingly beautiful and lively effect.

If ordered by mail, add 6 cents per dozen for postage.

No. 5. **100 Fine Named Double Tulips,** in 25 varieties ..... 3 50 |

*Types of Narcissi.*

## NARCISSUS.

Narcissi are Ready for Delivery in September.

The very beautiful species and varieties of Narcissus are among the most popular and largely grown of spring-flowering bulbs, and that deservedly, too, for they are certainly "the fairest among them all." Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them. To know them is to love them, and to love them is a liberal education.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, or lakes, or ponds, and in mixed flower or shrubbery borders. They are also suitable for naturalizing in the grass, by the side of woodland walks or in open spaces between trees and shrubs. With the exception of the Polyanthus section, they are all perfectly hardy.

Narcissi are also very suitable for growing in pots, requiring about the same treatment as hyacinths, with 3 or 4 bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers.

### SINGLE NARCISSUS, or DAFFODILS.

*If ordered by mail, add 13 cents per dozen for postage.*

	Each	Per doz.	100
<b>Ard Righ</b> (Irish King). Magnificent golden yellow trumpet; very large and graceful. One of the earliest and finest for forcing.....	\$0 10	\$1 00	\$6 00

<b>Paper White.</b> Pure white; earliest; valuable for forcing.....	3 for 10 cts...	30	1 50

*Jonquils.*

# LILIES.

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown, and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a rich, deep loam, they all do best in a light, well-drained soil. Some peat or leaf-mould may be used to advantage. *L. auratum* cannot bear manure, but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

*Lilium Thunbergianum.*

*Lilium Harrisii* and *Lilium candidum* ready in August; all others not till November.

If ordered by mail, add 3 cents each for those marked (\*); others from 1 to 2 cents each for postage.

	Each Per doz.	
* <i>Atrosanguineum</i> ( <i>Fulgens</i> ). Dark crimson, black spots. . . \$0 25	\$2 25	
" <i>maculatum</i> . Handsomely spotted . . .	25 2 25

## LILIUM HARRISII.

(BERMUDA EASTER LILY.)

Bulbs ready now.

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, and last a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decorations. It gets its popular name from the fact that it is so largely used for church decoration

at Easter. It is easily grown and can be forced into flower in a remarkably short time. It is also well adapted to garden-culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

If ordered by mail, add from 10 to 20 cents per dozen for postage, according to size.

	Each	Per doz.	100

## CHINESE SACRED LILY.

(THE WATER-FAIRY FLOWER.)

Ready in September.

If ordered by mail, add 5 cents each or 30 cents per dozen for postage.

A variety of the Polyanthus Narcissus, imported from China. The Chinese have the following interesting fable connected with this flower:

"Once upon a time

a father left his property to his two sons, with the understanding that it should be equally divided; but the elder son seized all the tillable land and left the younger nothing but an acre covered with rocks and water. The younger son, failing to obtain justice, sat at the water's edge bemoaning his misfortune. A benevolent fairy appeared, and, giving him these Narcissus bulbs, told him to drop them into the water. Shortly afterwards their flowers were developed, and the neighbors crowded to see the fairy's gift. In the course of a few years the badly treated brother accumulated a fortune by the rapid increase and sale of his bulbs. Then the elder brother, envious of the prosperity of the younger, bought up great numbers of the bulbs—hoping to get a monopoly by getting all of them—at so heavy a price that he was obliged to mortgage his property to procure funds for the purpose. He planted all his good land with bulbs, but they soon began to die, as they cannot live long out of water. He was ruined, while his brother, who had bought the mortgage, foreclosed it, and became possessed of the whole estate in time to plant some of the dying bulbs in the watery acre."

*Lilium Harrisii.*

The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulb so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulb entirely, and place in a sunny window in a cool room.

**Leichtlinii, Canary Yellow.** Like above, but in color pure canary-yellow. 40 cts. each. \$4 per doz.

## LILY-OF-THE-VALLEY.

(*Convallaria majalis.*)

Ready in November.

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them.

**Clumps.** Fine large clumps, with 15 or more flowering pips on each. Fine for planting outside in shaded positions, and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per dozen clumps.

**Pips for forcing.** 50 cts. per bundle of 25, \$1.75 per 100, \$14 per 1,000.

*Lily-of-the-Valley.*

## ANEMONE, OR WINDFLOWER.

Very ornamental, hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

If ordered by mail, add 15 cents per 100 for postage.

*Anemone Japonica.*

## AMARYLLIS. (Ready in October.)

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mould or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure water during the growing season.

*Amaryllis.*

## ARUMS.

Ready for shipment in September and October.

A genus of curious and ornamental perennials, with peculiar and distinct foliage and flowers. They make handsome pot-plants, and are also very effective in subtropical gardening. *A. Dracunculus* is hardy, and may be left in the ground over winter, with a little covering. The others should be potted in the autumn and kept dormant till spring. They are all of easy cultivation, requiring rich soil and plenty of water during the growing season. A compost of rich loam, with a third of well-rotted manure and some sand, is very suitable.

If ordered by mail, add 3 cents each for postage.

	Each	Per doz.
<b>Crinitum</b> . Marble stems; broad, flesh-colored, spotted flowers, covered with hairs..	\$0 20	\$2 00

<b>Meleagris</b> (Guinea Fowl Flower). Mixed colors.....	05	40	2 50
<b>Fritillaria imperialis.</b> See Crown Imperialis, on page 22.			

CROCUS.

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted close,—say 2 inches apart,—and in close rows, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful.

For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

If ordered by mail, add 15 cents per 100 for postage.

	Per doz.	100	1,000		Per doz.	100	1,000

Striped and Variegated.....	10	45	3 25				

HYBRID NAMED CROCUS.

Composed of the most beautiful varieties; remarkable for richness of color and immense size. These varieties are best for forming letters or designs on the lawn, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. The flowers are produced very early, and the mowing later on will not seriously injure the Crocus bulbs.

If ordered by mail, add 25 cents per 100 for postage.

# CALOCHORTUS.

(MARIPOSA LILY, or BUTTERFLY TULIP.)

Ready in September.

Very handsome bulbous plants from California. They are remarkable for the brilliancy and variety of their coloring, and their gracefulness of habit. They grow freely in light, sandy loam; though hardy, they should be protected during winter with litter. They may also be successfully grown in frames and in pots.

If ordered by mail, add 5 cents per dozen for postage.

Cyclamen giganteum.

# CYCLAMEN.

Most of them ready in November.

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The *C. giganteum* is an improved strain of the old *C. Persicum*, having much larger and more brilliantly colored flowers, and producing them more abundantly. We offer seed of our superb strain of these at the end of this Catalogue.

# CROWN IMPERIALS.

(FRITILLARIA IMPERIALIS.)

A stately-growing plant, with dark green foliage, and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be.

Crown Imperial.

Their flowers are produced quite early in spring, and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

Ready in September.

# FREESIA.

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in a light, sandy soil, in a frame or greenhouse, and are excellent for window-culture in winter; one plant will perfume a large room, but not in the persistent manner of a tuberosc. The plant has tooth-shaped bulbs and flat, spreading leaves. For the information of all not acquainted with these bulbs, we may say that they are quite small, and produce large blooms in comparison to their size.

**Freesia refracta alba.** Pure white and sweet-scented; very largely forced. The flowers are 2 inches long, and about the same in width, shaped like miniature gladioli, and in clusters of 6 to 10, on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. The fragrance is remarkable and very lasting.

## Freesia Leichtlinii.

Creamy white, shading to yellow with orange blotch; distinct in color ..... 35 2 00 14 00

Freesia refracta alba.

## GLADIOLUS.

Ready in November.

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse, except those prefixed with an (\*), which are hardy, and may be planted out; it is best, however, to give them a slight protection. Some varieties are successfully forced.

The French Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty. Every year is now adding varieties of most exquisite tint and shade; and from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published January 1.

If ordered by mail, add 5 cents per dozen for postage.

## GLOXINIAS.

Ready in November.

Gloxinias are among the most beautiful of greenhouse plants, the flowers being remarkable for the intensity and variety of their coloring, and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mould and peat in equal parts, with a

little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large-sized, and of the erect flowering strain.

## GRAPE, FEATHERED, ETC., HYACINTHS.

Very pretty hardy bulbous plants, well adapted for mixed borders and for naturalizing in sunny spots among short grass. They succeed in almost any soil and situation, and require little care. Also suitable for growing in pots in the house, 5 or 6 bulbs in a pot.

<b>Hyacinthus candicans.</b> A snow-white, summer-flowering giant Hyacinth.....	08	60	3 50

## CRINUMS.

Splendid large-flowering bulbs, closely allied to the Amaryllis. The most suitable soil is a compost of turfy loam, cow manure and some sand. They should be grown in large pots or in tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a coolhouse and allowed to rest till new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure water during the growing season. They may be placed outside when warm weather begins and will flower all through the summer, making splendid lawn or veranda plants.

*Crinum.*

# IRIS (FLEUR-DE-LIS). Ready in October and November.

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together in the flowers. Irises are of easy culture, requiring very little attention after once being planted. They do best in a light, rich, sandy soil, and in a sunny situation. Good drainage is very important. The newer varieties of *Iris Kämpferi*, recently introduced from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 or 12 flower spikes 3 feet high, each bearing 2 to 4 enormous blossoms, measuring 8 to 10 inches across, and of the most delicate and beautiful colors, markings and combinations; no other flowers excel them in richness. These require a liberal supply of water when growing. With the exception of *Morea pavonia* and *Tuberosa*, all varieties are hardy.

*Iris.*

## IXIAS.

## READY IN OCTOBER.

The Named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

	Each	Per doz.	100
<b>Azurea.</b> Blue, with purple center; very beautiful .....	\$0 05	\$0 40	\$2 50
<b>Bucephalus Major.</b> Rich crimson; very fine .....	05	40	2 50

<b>William the Conqueror.</b> Large; white, with purple eye.....	05	45	2 50
<b>In Splendid Mixture</b> .....		20	75

## ERYTHRONIUMS. (DOG'S-TOOTH VIOLETS.)

## Ready in September.

Very ornamental, hardy, bulbous plants, of neat and dwarf habit. They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in sheltered positions on rockeries, or in mixed flower or shrubby borders.

	Each	Per doz.	100
<b>Giganteum</b> (Giant Dog's-Tooth Violet). Very large, straw-colored flowers, with orange center, borne on long, slender stems; the foliage is richly mottled in dark brown and its elegant habit makes a very attractive pot-plant for window decoration .....	\$0 05	\$0 40	\$2 50
<b>Citrinum.</b> Leaves mottled; flowers yellow....	10	1 00	6 00
<b>Grandiflorum.</b> Leaves unmottled; flowers bright yellow, with recurved petals.....	10	1 00	6 00
<b>Hartwegii.</b> Fine new variety; light yellow flowers, like those of <i>E. giganteum</i> , but each borne on a separate stalk.....	06	50	3 00

<b>Howellii.</b> Leaves mottled; flowers pale yellow. .	10	1 00	6 00
<b>Revolutum.</b> Leaves mottled white and brown; flowers opening white, and passing to pink and purple.....	08	65	4 50
<b>Dens-canis</b> (Dog's-Tooth Violet). Mixed colors; very pretty; leaves blotched in brown and white .....	05	30	1 50
<b>Mixed</b> .....	05	40	2 50

*Erythronium.*

## LACHENALIAS.

Ready in September.

Very pretty, spring-flowering, greenhouse, bulbous plants, with brightly colored flowers and elegant habit. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mould and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air, and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging baskets.

*Lachenalias.*

<b>Crocsmilæflora.</b> Large; bright orange, tinged scarlet.....	05	30	1 50
<b>Drap d'Or.</b> Rich yellow; very large, handsome flowers.....	05	40	2 00

<b>Hybrids Mixed</b> .....	10	1 00

Each Doz.

## MONTBRETIAS.

Ready in November.

Hardy, summer-flowering, bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties:

<b>Bouquet Parfait.</b> Large, Each	Doz.	100
bright vermilion flowers,		
with deep yellow center...	\$0 05	\$0 45 \$2 50

*Montbretias.*

# NERINE.

Ready in October and November.

Very beautiful greenhouse bulbous plants, succeeding best in pots, in light soil—say a compost of loam, leaf-mould and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die they should be kept quite dry in a cool place until they begin to grow again.

*Nerine Japonica.*

	Each	Per doz.
<b>Crispa.</b> Very handsome scarlet flowers.....	\$1 00

<b>Mixed</b> .....	2 for 5 ets..	20	1 00

# PAEONIES.

Ready in October.

The old-fashioned double Pæonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Pæonies rank about first for lawn or flower-border or shrubbery decoration. They are all hardy.

# RANUNCULUS.

Ready in September.

The main soil for these should be loam or clay, with a good dressing of rotten manure and leaf-mould; if heavy, add a little sand. The soil should be well drained, cool, deep, rich and moist. Plant late in the autumn, claws downward, from 4 to 6 inches apart and 3 inches deep, covering with fine, pulverized soil.

If ordered by mail, add 3 cents per dozen for postage.

Ranunculus.

# RICHARDIAS, or CALLAS.

Ready in September and October.

Tall-growing, bulbous perennials of exceedingly graceful habit and very handsome foliage and flowers. They are easily cultivated in pots, requiring only a rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting in September.

	Each	Per doz.	100
<b>White Calla, or Lily-of-the-Nile</b> ( <i>Calla Æthiopica</i> ). Large, white, trumpet-shaped flowers of great substance. One of the most popular and ornamental of house and greenhouse plants..	\$0 20	\$2 00	\$15 00

SNOWDROPS. (GALANTHUS NIVALIS.)

Ready in September.

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest-flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in the spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms.

Tigridia.

SCILLAS.

Ready in September.

No garden can be complete without these beautiful flowers. *S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years.

If ordered by mail, add 5 cents per dozen for postage, except those marked with a star (\*), to which add 2 cents each.

**Sibirica.** The effect in early spring of the intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the Snowdrop and the varied hues of the Crocus, can hardly be over-estimated; are most valuable for permanent edging. 30 cts. per doz., \$2 per 100.

	Each	Per doz.	100

TIGRIDIAS.

Bulbs ready for shipment in the Spring.

These very handsome summer-flowering bulbs should be planted in the spring. They will flower profusely all summer. The plants grow about 2 feet high, with large and finely colored flowers.

	Each	Per doz.	100
<b>Burbank's New Hybrids.</b> Giant flowers of red, white, yellow, orange, rose, crimson and gold, with shades and combinations of color never shown before by Tigridias.....	\$0 20	\$1 75	\$12 00
<b>Canariensis.</b> Very handsome light yellow, with brown spots.....	08	60	4 00
<b>Cœlestis.</b> Beautiful light blue.....	08	75	5 00
<b>Conchiflora.</b> Rich yellow, spotted red.....	08	60	3 50
<b>Immaculata alba.</b> Pure white; unspotted.....	08	60	4 00
<b>Speciosa pavonia.</b> Bright crimson, mottled yellow.	08	60	3 50
<b>Grandiflora alba.</b> Large-flowered; white, spotted crimson.....	08	60	3 50

## SPIRAEA, or ASTILBE.

Ready in November.

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

**Japonica** (Hoteia). Excellent pot-plant for winter blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting. 10 cts. each, \$1 per doz., \$6 per 100.

**Japonica fol. aurea reticulata**. Beautiful gold-striped foliage; large panicles of pure white flowers. 15 cts. each, \$1.50 per doz., \$10 per 100.

**Japonica compacta multiflora**. The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.25 per doz., \$7 per 100.

**Astilboides floribunda**. Very large, pure white plumes; neat habit; very abundant bloomer. 15 cts. each, \$1.25 per doz., \$7 per 100.

**Palmata**. Crimson; strong clumps. 15 cts. each, \$1.25 per doz., \$8 per 100.

*Spiraea Astilboides floribunda.*

## TUBEROSES. Ready in December.

The purity of color and rich perfume of the Tuberose are well known. In this latitude May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich warm soil and in a sunny situation. Cut off about a quarter of an inch from the bottom of the bulb before planting and set so that the top will be one inch below the soil.

**Dwarf Double Pearl**. Dwarf habit; Each Doz. 100  
large fine flowers of great substance. \$0 05 \$0 35 \$1 50

**Albino**. Purest white, single flowers. . . . 05 40 2 00

**Variegated Leaf**. Foliage striped white  
and green; single white flowers. . . . 05 45 3 00

*Trillium sessile Californicum.*

## TRILLIUMS.

(AMERICAN WOOD LILY, or INDIAN SHAMROCK.)

Hardy herbaceous perennials, succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are natives of North America, and are known by various common names in different localities. They have violently emetic roots.

	Each	Doz.	100
<b>Grandiflorum</b> ("Giant American Wood Lily," or "Wake Robin"). Large white flowers, changing to rose; quite hardy, and easily grown in shaded positions. . . . .	\$0 05	\$0 40	\$2 50

<b>Erectum</b> ("Birthroot"). Dark purple flowers; erect habit; about 1 foot high. . . . .	05	50	3 00
--	----	----	------

<b>Erectum album</b> . A white-flowered variety of the above. . . . .	08	60	4 00
---	----	----	------

<b>Ovatum</b> . White, changing to purple. . . . .	10	75	5 00
--	----	----	------

<b>Sessile Californicum</b> . Handsome, pure white flowers; prettily mottled foliage. . . . .	10	1 00	6 00
---	----	------	------

*Schizostylis coccinea.**Hemerocallis.*

## Miscellaneous Bulbs and Roots.

	Each	Per doz.	100
<b>Achimenes</b> , Mixed. Lovely greenhouse pot-plants.....	\$0 08	\$0 75	\$5 00
<b>Aconite</b> . See Eranthis, page 33.			
<b>Allium</b> . Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.			
“ <b>Azureum</b> . Beautiful sky-blue flowers in large umbels; fine for pots or garden .....	08	75	5 50
“ <b>Neapolitanum</b> . Large umbels of pure white flowers, borne on long stems; valuable for forcing for winter cut-flowers, as well as for summer garden decoration.....	05	25	1 00
“ <b>Moly luteum</b> . Golden yellow flowers in large umbels; very showy and attractive; fine for growing in the garden in groups or for naturalizing in masses. 2 for 5 cts....		20	75
“ <b>Hermettil grandiflorum</b> . Makes a splendid pot-plant for winter blooming in the house, the handsome, large, pure white flowers being produced abundantly and for a long time; largely used by florists for forcing for cut-flowers.....	05	25	1 00
“ <b>Ostrowskianum</b> . Deep carmine.....	05	40	2 25
<b>Alstroemeria</b> , Mixed. Tall plant, with beautiful flowers; for pots or frames.....	10	75	4 00
<b>Anomatheca cruenta</b> . Rich crimson flowers; neat, dwarf habit; excellent for window-garden .....	05	25	1 25
<b>Anthericum</b> . Very ornamental border plants, and also excellent for pot-culture. They do best in light, rich soil, and require plenty of water while growing.			
“ <b>Liliago</b> (St. Bernard's Lily). Pure white flowers; 1½ feet high.....	10	1 00	7 00
“ <b>Lilliastrum major</b> (St. Bruno's Lily). Much larger flowers than the above; flowers white, with petals delicately tipped green; 2 feet high .....	10	1 00	
“ <b>Ramosum</b> . Of branching habit; white flowers; 2 feet high .....	10	1 00	
<b>Antholyza</b> , Mixed. Like Gladioli. Take up in fall .....	12	1 25	8 00
<b>Apios tuberosa</b> . Hardy climber, with clusters of fragrant purple flowers .....	05	50	3 00
<b>Asphodelus ramosus</b> . Hardy perennial; large, white flowers; very pretty .....	40	4 00	
<b>Babiana</b> . Mixed colors; charming for pots .....	05	40	2 50
<b>Bessera elegans</b> (Coral Drops). Bright coral-scarlet, with white cups.....	05	50	3 50
<b>Bloomeria aurea</b> . Very pretty; light yellow; easily grown.....	05	50	3 50
<b>Bravoa geminiflora</b> . Orange and scarlet; twin-flowered .....	15	1 50	
<b>Bulbocodium vernum</b> . A very pretty little bulbous plant, with rosy purple, crocus-like flowers; it is one of the earliest of spring plants, blooming even before the Crocus.....	10	1 00	6 50
<b>Caladium esculentum</b> (Elephant's Ear). Large-sized bulbs.....	25	2 50	
<b>Callas</b> . See Richardia, page 29.			
<b>Camassia Cusickii</b> . Superb new variety, with very large leaves and lovely pale sky-blue flowers, produced in racemes 2 to 3 feet long.....	15	1 50	
“ <b>esculenta</b> . Pretty violet-blue flowers; fine for cutting.....	05	30	1 50
“ <b>Leichtlinii</b> . Splendid, tall, purple variety .....	10	1 00	

## MISCELLANEOUS BULBS AND ROOTS, continued.

	Each	Per doz.	100
	\$0 05	\$0 35	\$2 00
<b>Chionodoxa gigantea.</b> Very large lilac-blue flowers, with large white eye .....			
“ <i>Lucilie</i> (“Glory of the Snow”). Porcelain-blue, white eye.....	05	25	1 25
“ <i>Sardensis</i> . Lovely deep blue flowers, produced in great numbers.....	05	30	1 50
<b>Clematis coccinea.</b> A hardy herbaceous perennial climber; flowers rich scarlet .....	15	1 50	10 00
<b>Colchicum Agrippinae.</b> From Asia Minor.....	20	2 00	
“ <i>autumnale</i> fl. pl. (Meadow Saffron) .....	10	1 00	7 00
“ <i>Mixed</i> . Many bright colors.....	08	60	4 00
<b>Cocperia Drummondii</b> (Evening Star). White; take up in fall.....	05	40	2 50
“ <i>pedunculata</i> . Beautiful white fragrant flowers .....	05	40	2 50
<b>Crocasmia aurea</b> (Tritonia). Half-hardy; orange flower .....	05	45	3 00
<b>Cyclobothra flava</b> (Yellow Shell-flower). Golden yellow cup, with fine black dots; pretty ...	05	40	2 50
<b>Cypella Herberti.</b> Bright orange-yellow; half-hardy .....	30	3 00	
<b>Dicentra spectabilis</b> (Dielytra, Bleeding-Heart). Hardy; also for forcing .....	20	2 00	12 00
<b>Dodecatheon Clevelandi.</b> Rosy purple and white.....	08	60	4 00
“ <i>Hendersoni</i> . Rose-purple, with yellow band.....	06	50	3 00
“ <i>patulum</i> . Pale cream color.....	08	60	4 00
<b>Eranthis hyemalis</b> (Winter Aconite). Yellow .....	05	25	1 00
<b>Eucharis Amazonica.</b> Fine white-flowered greenhouse plant.....	75		
<b>Funkia alba marginata.</b> Beautiful white-bordered Day Lily .....	12	1 25	7 00
<b>Galanthus Elwesii</b> (Asia Minor Giant Snowdrops) .....	05	15	1 00
<b>Hæmanthus albigiflos.</b> White; fine for pots.....	1 25		
“ <i>coccineus</i> . Scarlet; for pots.....	1 50		
“ <i>punicus</i> . Orange-red; for pots .....	1 50		
“ <i>tigrinus</i> . Crimson; for pots.....	2 00		
<b>Helleborus niger major</b> (Christmas Rose). Perfectly hardy, but most valuable for forcing..	30	3 00	
<b>Hemerocallis flava.</b> Clear yellow.....	10	1 00	6 00
“ <i>fulva</i> . Coppery orange, shaded crimson .....	10	1 00	6 00
“ <i>Kwanso flore pleno</i> . Coppery orange; double.....	10	1 00	6 00
“ <i>Sieboldii</i> . Reddish orange .....	10	1 00	6 00
<b>Hyacinthus candicans.</b> A snow-white summer-flowering giant Hyacinth .....	08	65	4 00
<b>Incarvillea Delavayi.</b> Large; rosy purple; splendid hardy perennial, with handsome foliage..	50	5 00	
<b>Ismene calathinum.</b> White; sweet-scented; hardy.....	20	2 00	
“ <i>undulata</i> . Fragrant white flowers, with beautifully fringed petals.....	15	1 50	
<b>Leucojum æstivum.</b> Summer-flowering white Snowflake.....	05	45	3 00
“ <i>vernum</i> . Spring-flowering dwarf Snowflake.....	05	35	2 00
<b>Milla biflora.</b> Pure waxy white flowers, over 2 inches in diameter.....	05	40	2 50
<b>Pancratium calathinum</b> (Basket-flower). Very fragrant white flowers.....	20	2 00	
“ <i>Illyricum</i> . Half-hardy; large, fragrant white flowers.....	50	5 00	
“ <i>maritimum</i> (Sea Daffodil). Delightfully fragrant; white.....	15	1 50	9 00
“ <i>undulatum</i> . White.....	15	1 50	9 00
<b>Pentlandia miniata.</b> Beautiful crimson flowers; for greenhouse .....	20	2 00	
<b>Schizostylis coccinea.</b> Scarlet gladiolus-like flowers in spikes .....	05	45	3 00
<b>Solomon's Seal</b> (Polygonatum multiflorum) .....	10	1 00	6 00
<b>Sparaxis.</b> Finest mixed .....	05	20	1 00
<b>Tricyrtis hirta.</b> Beautiful; fall-flowering; hardy; from Japan.....	10	1 00	5 00
<b>Triteleia uniflora.</b> Pure white, shaded with blue; hardy .....	05	20	80
<b>Tritoma uvaria grandiflora</b> (Red-Hot-Poker Plant). Half-hardy .....	12	1 25	8 00
“ <i>MacOwani</i> . New dwarf variety; bright orange-red .....	12	1 25	8 00
“ <i>corallina</i> .....	25	2 50	
“ <i>Pfitzeri</i> . Large spikes of intense flame-colored flowers. In beds it makes a gorgeous display. It should be planted in the spring .....	15	1 50	12 00
<b>Tritonia crocata.</b> Mixed .....	05	40	2 50

# Hardy Annual and Perennial Flower Seeds.

For Autumn Sowing.

Many varieties of Flower Seeds, ANNUALS as well as BIENNIALS and PERENNIALS, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring.

## STRAWBERRY PLANTS.

*Layer plants can be had in September. Potted plants ready latter part of July, and in Aug. and Sept.*

	Layer per 100	Potted per 100
<b>Brandywine.</b> Large, roundish conical, glossy crimson, firm and solid; of fine, aromatic flavor. Plant vigorous and very productive; succeeds on any soil. Midseason to late...per 1,000, \$5..	\$1 00	\$3 50
<b>Bubach No. 5.</b> Noted for its large and uniform size. Very robust and productive; berry dark color and of good flavor. Largely grown for market. Midseason .....Layer, \$5 per 1,000..	1 00	3 50
<b>Candy.</b> One of the best late berries; good strong grower; large, firm and regular, and bright in color .....	Layer, \$5 per 1,000.. 1 00	3 50
<b>Glen Mary.</b> An exceedingly attractive berry; large size; bright glossy crimson; of fine flavor. Plant is strong and healthy, very prolific, and on good soil the berries are large to the end of the season. Early.....	per 1,000, \$5.... 1 00	3 50
<b>Marshall.</b> Large; dark crimson when fully ripe, but colors all over a light crimson before ripe; fine flavor. Plant luxuriant, but needs rich soil and careful culture. Midseason..per 1,000, \$5..	1 00	3 50
<b>New York.</b> The berries are very large, ripening midseason. Color dark scarlet, changing to crimson when fully ripe. Colors all over at once. Quality first-class. This berry won a prize of \$100 in gold in competition with many other varieties against the Glen Mary..per 1,000, \$5..	1 00	3 50
<b>Nick Ohmer.</b> For market, for home use or for exhibition, this is probably the greatest berry ever offered. It is certainly the most desirable berry that has come under our observation. It is our candid opinion that all who grow the Nick Ohmer will be astonished at its healthy, vigorous growth and great productiveness. The fruit will be a surprise to all who see it, being of mammoth size, beautiful in form and color and of excellent quality .....	per 1,000, \$5.. 1 00	3 50
<b>Parker Earle.</b> Robust, enduring hot dry weather better than most varieties. Will thrive on light soil, and is a good grower and cropper. Berries large and firm. Early to medium .....	Layer, \$5 per 1,000.. 1 00	3 50
<b>Rough Rider.</b> A new variety. Enormously productive; berries very large, roundish but elongated; dark red color; very firm. Layer, \$1 per 100, \$5 per 1,000; pot-grown, \$3.50 per 100.		
<b>Sample.</b> New. Said to be very large, free from rust, healthy in every way and a good runner. Very productive; uniformly roundish and conical, firm, dark in color, coloring all over at once. Mid-season. Layer, \$1 per 100, \$5 per 1,000; pot-grown, \$3.50 per 100.		
<b>Sharpless.</b> Demands rich, strong soil. Plant large and vigorous; berries very large, irregular in shape, crimson, moderately firm and of good quality. Mid-season. Layer, \$1 per 100, \$5 per 1,000; pot-grown, \$3.50 per 100.		
<b>Wm. Belt.</b> Berries large, rather long, conical, regular in outline; color bright, glossy red; productive and of fine flavor. Layer, \$1 per 100, \$5 per 1,000; pot-grown, \$3.50 per 100.		

## ALBERT'S PLANT-FOOD.

THE [BEST FERTILIZER FOR HOUSE PLANTS.

This celebrated plant-food, made in Germany, is a scientific preparation containing in a highly concentrated and easily soluble form the food elements required by plants. It is odorless, clean to handle, quick in its action, and unequalled in its effects. It is put up in attractive tins with full directions for use printed on each, and containing inside a small spoon holding the exact quantity required for dissolving in a quart of water. By its application plants acquire a sturdier growth, fuller development and a manifold increase in bloom. For Palms, Ferns, India Rubber Plants, Bulbs, and all kinds of pot-plants, it is by far the most complete, most effective, most economical and easiest applied fertilizer made.

PRICE: 15 cents per tin (sent by mail for 8 cents extra).

## Grass Seeds for Autumn Sowing.

Autumn sowing is recommended from the latter part of August to the end of September, so that the young grass may become well rooted before winter sets in. Our new-crop seed of the leading sorts is ready now.

### THE THORBURN LAWN GRASS.

The **Thorburn Lawn Grass Mixture** is composed exclusively of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich greensward in three or four weeks from the time of sowing. It should be sown at the rate of four to five bushels to the acre (15 lbs. to the bushel). Per qt., 25 cts.;  $\frac{1}{2}$ pk., 65 cts.; pk., \$1; bus., \$3.50.

### THORBURN'S LAWN-RESTORING GRASS SEED.

A mixture of grasses peculiarly suited to take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-restoring Grass Seed** should be sown on thin places before every rain. Per qt., 30 cts.; bus. of 24 lbs., \$5.

### THORBURN'S LAWN GRASS FOR THE SOUTH.

A mixture of grasses that stand extremes of heat and drought well and that are therefore peculiarly adapted for southern lawns. Per bushel of 20 lbs., \$5.

### THORBURN'S MIXTURE FOR SHADY SPOTS.

A mixture of grasses that thrive in shaded situations, under trees, or close to walls where there is little sun. Price, per quart, 35 cts.; peck, \$1.75; bushel of 24 lbs., \$6.

### PERMANENT GRASS SEED FOR GOLF LINKS.

We have given much attention to this subject, and have seeded most of the finest golf links in the country, among which we may mention the following celebrated links: St. Andrews, Baltusrol, Shinnecock Hills, Garden City, Nassau County, Philadelphia Country Club, Montclair Golf Club, Apawamis, Fox Hills, etc.

**Golf Links Mixture.** For the grounds in general. Per bushel of 20 lbs., \$2.50.

**Putting-green Mixture.** A mixture of extra fine grasses, that will make a close, firm, green and lasting turf, which will improve with trampling. Per quart, 30 cts.; peck, \$1.75; bushel of 24 lbs., \$6.

### GRASS SEED MIXTURES FOR MEADOWS AND PASTURES.

For over a hundred years our house has made a specialty of grasses. The formation of permanent pastures and meadows has for many years been a subject of careful study with us, and the following mixtures for seeding grass-lands have received universal recognition.

#### MEADOW MIXTURES FOR ONE ACRE.

No. 1. For good land, neither too dry nor too wet. Price per acre (40 lbs.), \$5 50.

No. 2. For high and dry land. Price per acre (40 lbs.), \$6.50.

No. 3. For wet, late land. Price per acre (40 lbs.), \$6.

#### PASTURE MIXTURES FOR ONE ACRE.

No. 4. For good land, neither too dry nor too wet. Price per acre (40 lbs.), \$6.50.

No. 5. For dry land. Price per acre (40 lbs.), \$7.

No. 6. For wet land. Price per acre (40 lbs.), \$6.50.

**N. B.** We shall be pleased to make special mixtures for particular purposes, or to suit exceptional conditions of soil, situation or climate—for very sandy or clayey ground, for very dry or wet situations, for steep slopes, terraces, tennis-courts, croquet greens, polo-grounds, etc. We invite consultation about any difficulties experienced in getting the right turf for any purpose or in any place.

## MUSHROOM SPAWN.

We have always on hand fresh spawn of the very highest grade. Cultural directions will be found in our General Catalogue. Any one requiring fuller details should get Mr. Wm. Falconer's book on Mushroom Culture, which we can send, postpaid, for \$1.

**English Spawn.** Per lb., 12 cts.; 10 lbs., \$1; 100 lbs., \$8.

**French Spawn.** Per lb., 40 cts.

*Mushrooms.*

# Insecticides and Remedies for Plant Diseases.

## BUG DEATH.

This is a fungicide, insecticide and plant-food combined. 1-lb. package, 15 cts.; 3-lb. package, 35 cts.; 5-lb. package, 50 cts.; 12½-lb. package, \$1; 100-lb. package, \$7.

Perfection Shaker for applying above, 65 cts. each.

## COPPERDINE.

A combined fungicide and insecticide, used simply by adding water in proportion of one pound of the paste to 16 gallons of water. 1-lb. box, 25 cts., makes 16 gallons spray; 5-lb. box, \$1, makes 80 gallons spray.

## FIR-TREE OIL.

For greenhouse and house plants. It destroys all plant insects without injuring the plant. It is the best insecticide for scale, aphid, red spider, mealy bug, thrip and worms. Dilute in the proportion of 1 pint to 20 gallons of water. Apply with vaporizer or syringe. ½ pt., 40 cts.; pt., 75 cts.; qt., \$1.25; ½ gal., \$2.25; gal., \$4.

## FIR-TREE OIL SOAP.

This is the same as the Fir-Tree Oil, but in soap form. Mix at rate of 1 ounce to a gallon of water, and apply with bellows or syringe. ½-lb. tin, 25 cts.; 2-lb. tin, 75 cts.

## DALMATIAN INSECT POWDER.

Effective against almost all kinds of insects. Per ½-lb. box, 30 cts.; per 1-lb. box, 50 cts.

## GISHURST'S COMPOUND.

A certain remedy for greenfly, scale, mealy bug, etc. Excellent for greenhouse use. Per 1-lb. box, 50 cts.

## HAMMOND'S GRAPE DUST.

For the prevention of mildew on roses, grapes, gooseberries, etc. Apply with bellows. 5-lb. package, 35c.; 10-lb. package, 60 cts.; 100-lb. keg, \$5.

## HELLEBORE, POWDERED.

An excellent protection from currant worms, grape slugs, caterpillars, etc. May be applied dry or mixed in water—1 oz. to 3 gallons. Per 2-lb. box, 35 cts.; per 1-lb. box, 20 cts.; ½-lb. box, 12 cts.

## LEMON OIL.

For destroying scale, caterpillar, mealy bug, red spider, greenfly, etc. Directions on can. ½ pt., 25c.; pt., 40 cts.; qt., 75 cts.; gal., \$2.

## LITTLE'S ANTIPEST.

A sure destroyer of all insect pests. Qt., 85 cts.; ½ gal. can, \$1.50; gal. can, \$2.50.

## NICOTICIDE.

For fumigating or spraying. Used effectually for greenfly, mealy bug, red spider and thrips. Does not

damage the foliage or flowers of the most tender plant. Sold in cans as follows: No. 1, containing 1 pt., sufficient for 32,000 cubic feet of space, \$2.50 each; No. 2, containing ½ pt., sufficient for 16,000 cubic feet of space, \$1.25; No. 3, containing ¼ lb., sufficient for 8,000 cubic feet of space, 70 cts. Per gal., \$18.

## NICOTICIDE FUMIGATORS

Consisting of pan, wire-frame and the lamp, are very durable, and will last for years. Price, 50 cts.

Full directions for using both compound and fumigators are printed on each can.

## PARIS GREEN.

Mixed at the rate of 1 lb. to 200 gallons of water, it will prove effective against all chewing insects. Per 1-lb. can, 35 cts.; ½-lb. can, 20 cts.; ¼-lb. can, 15 cts. This article is liable to fluctuate in price.

## SLUG SHOT (HAMMOND'S).

Excellent for destroying cabbage, turnip and beet fly, potato bugs, currant worms, etc. 5-lb. package, 30 cts.; 10-lb. package, 50 cts.; 100 lbs., \$4.

## SULPHUR, POWDERED.

Valuable for protecting against mildew on grapes, roses, etc. Per lb., 10 cts.; 10 lbs., 60 cts.; 100 lbs., \$4.

## SULPHO-TOBACCO SOAP.

Dissolve in proportion of 2 ounces to a gallon of water, and apply with a syringe or atomizer. It will destroy rose slugs, aphides, greenfly, bark-lice, etc. Per 3-oz. box, 10 cts.; 8-oz. box, 20 cts.; 10-lb. box, \$3.

## TOBACCO DUST.

If dusted on *while the foliage is moist* it destroys rose lice, cabbage and turnip fleas, etc. Spread upon the ground, it keeps off all earth insects. Per 1-lb. box, 10 cts.; 5-lb., 30 cts.; 10-lb., 50 cts.; per 100 lbs., \$2.50.

## TOBACCO STEMS.

For fumigating plants infested with greenfly. Per bale of about 100 lbs., \$1.50; 200 lbs., \$2.75; 400 lbs., \$4.50.

## "ROSE LEAF" TOBACCO EXTRACT.

A perfectly pure, highly concentrated extract of tobacco, most effective for destroying all insects and scale on plants. Pint cans, 30c.; qt., 50c.; gal., \$1.25.

## WHALE-OIL SOAP.

For washing trees and destroying all insects on the bark. Per 1-lb. box, 15 cts.; 5 lbs., 50 cts.; 10 lbs., 90 cts.; 100-lb. keg, \$7.

## BORDEAUX MIXTURE, or FUNGIROID.

For all fungous diseases. Dry, 1-lb. box, 20 cts.; 4 lbs. and over at 15 cts. per lb.; 50-lb. keg, \$6; liquid, 1 gallon, \$1.25.

# Thorburn's Registered Fertilizers.

## THORBURN'S LAWN FERTILIZER.

Per ton, \$48; single bags of 167 lbs., \$4.50; per bag of 100 lbs., \$3; 50 lbs., \$1.75; 25 lbs., \$1; 10 lbs., 50c.

## CLAY'S CELEBRATED FERTILIZER.

Undoubtedly one of the best manures for all horticultural purposes, either in greenhouse or garden. 1 cwt. (112 lbs.), \$7; ½ cwt. (56 lbs.), \$4; ¼ cwt. (28 lbs.), \$2.25; ⅓ cwt. (14 lbs.), \$1.25.

## PULVERIZED SHEEP MANURE.

A very rich, pure natural manure. It is excellent as a top-dressing for lawns. There is nothing better for mixing with the soil for greenhouse plants—one part manure and six parts soil. 5-lb. package, 30 cts.; 10 lbs., 50 cts.; 50 lbs., \$1.25; 100 lbs. \$2; ton, \$30.

## PURE GROUND BONE MEAL.

This finely pulverized ground bone is excellent for rose culture. It decomposes very rapidly, and is more quickly effective than the coarser grade. It is excellent for mixing with the soil for potting. 5 lbs., 25 cts.; 50 lb., \$1.25; 100 lbs., \$2; per ton, \$32.

## CANADA HARD-WOOD ASHES.

We quote only the very highest grade, extra screened, unleached, analysis guaranteed. For top-dressing for lawns, especially if the soil is inclined to be stiff or sour, there is nothing better. Besides the high fertilizing value, the 30 per cent of lime in these ashes sweetens the soil and keeps away insects. In barrels of 200 lbs., \$3; per ton, \$20.

## ALBERT'S PLANT-FOOD

The Best Fertilizer for House Plants

This celebrated plant-food, made in Germany, is a scientific preparation containing in a highly concentrated and easily soluble form the food elements required by plants. It is odorless, clean to handle, quick in its action and unequalled in its effects. It is put up in attractive tins with full directions for use printed on each, and containing inside a small spoon holding the exact quantity required for dissolving in a quart of water. By its application plants acquire a sturdier growth, fuller development and a manifold increase in bloom.

For palms, ferns, India-rubber plants, bulbs and all kinds of pot-plants, it is by far the most complete, most effective, most economical and easiest applied fertilizer made. 15 cts. per tin; by mail, 8 cts. extra.

## CEDAR FLOWER OR TREE TUBS.

These are made of Virginia white cedar, painted green, with hoops, handles and leg-castings painted black. The bottoms are perforated and are removable.

CATALOGUE OF

## *Bulbs and Flowering Roots for Fall Planting*

*August 15, 1904.*

**T**HE growing of bulbs for winter and spring flowering is very interesting and very easy. If the directions given in this Catalogue are observed, there need be no disappointment with the results. Many of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of flowers may be had from December till May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. There is nothing more refreshing than the first Snowdrop of spring. It appears before the snow is right off the ground, and is quickly followed by the Chionodoxa, or "Glory-of-the-Snow," the bright and variously colored Crocuses and Scillas and the lovely Daffodils. Then come the gorgeous lawn displays of Hyacinths and Tulips. All these are produced from bulbs planted in the fall.

We invite special attention to the collections of bulbs offered on the second page of cover, both for indoor and outdoor cultivation. They contain only sorts that will insure satisfaction. The cultural directions found under the respective headings are also worthy of careful attention.

**Our Bulbs** are all selected, and from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation and often sold at auction, and otherwise, at very low prices.

**NAME and ADDRESS.** We often receive orders with either the name or the address of the sender omitted. As we can do nothing with them, the customer thinks his order is being neglected. We, therefore, beg our correspondents to write on each order their name and full address.

**ORDERS** should be sent as soon as possible after receipt of this Catalogue. The bulbs will be sent in proper time for planting. They are ready from September to November, according to the time of ripening and the country from which they come. Orders booked earliest are surest of being filled as ordered. If left too late, the supply of some of the varieties may be exhausted.

Please address all orders and remittances to

**J. M. THORBURN & CO.**

36 Cortlandt St., NEW YORK

# HYACINTHS

*Ready for delivery in September*

The **Hyacinth** is one of the most popular and beautiful of spring-flowering plants for indoor and outdoor decorations. By careful management in keeping up a succession, they may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground they are unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to any one suitable sorts when desired.

—October is the month to plant Hyacinths outside. They succeed best in a light soil and in a sunny situation. If the soil is naturally heavy, some sand should be mixed with it; and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and

## OUTSIDE CULTURE.

raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulbs, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs; some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has become frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field mice, which may burrow in it.

**CULTURE IN POTS.**—For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6 inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibry loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of six inches, and left there for five or six weeks, until the pots are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be always applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.**—Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs can not stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

**Persons unacquainted** with the different varieties will do well to leave the selections to us, only specifying in their orders whether the bulbs are wanted for pot, glass or garden culture.

*The magnificent display of Hyacinths, Tulips and other bulbs shown this spring in Central Park, City Hall Park, Battery Park, and the various other squares in New York City, were all produced from bulbs supplied by us*

## SELECT NAMED HYACINTHS

N. B. *Our selected named Hyacinths are the cream of the Holland Nurseries, under their original names. For forcing in pots or for outdoor beds they far surpass the class of bulbs usually sold.*

The Single-flowered varieties are generally more effective than the Double ones. They also, as a rule, succeed better in glasses. The Double varieties are distinguished by an asterisk (\*) and those of them that do well in water by two asterisks (\*\*).

If ordered by mail, please add 15 cts. per dozen for postage. Three of a kind sold at the dozen rate.

## GROUPS OF HYACINTHS FOR DESIGN BEDDING

To obviate the disappointment resulting from selecting unsuitable varieties for design beds, we give the following groups of some of the sorts that bloom about the same time and grow to the same height. They will all form most effective combinations. We recommend **named** sorts for design bedding as decidedly better than mixtures.

{ **Baron Thuyll, Red.**  
 { **Alba Superbissima, White.**  
 { **Charles Dickens, Blue.**

{ **Gigantea, Red.**  
 { **Grandeur a Merveille, White.**  
 { **Baron Thuyll, Blue.**

{ **Robert Steiger, Red.**  
 { **Mad. Vanderhoop, White.**  
 { **Marie, Blue.**

{ **General Pelissier, Red.**  
 { **Baroness Thuyll, White.**  
 { **Grand Maitre, Blue.**

{ **Norma, Red.**  
 { **La Franchise, White.**  
 { **La Peyrouse, Blue.**

Single Hyacinths.

## MIXED HYACINTHS IN SEPARATE COLORS

*The very largest size. Suitable either for forcing or bedding*

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all large size, measuring 6 inches and over in circumference. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

If ordered by mail, add 10 cents per dozen for postage.

## ROMAN HYACINTHS

Extensively used by florists for forcing for cut-flowers. For this purpose they are the best and most popular

of bulbs. The flowers are pure white, delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early; and by making successive plantings they may be had in flower all through the winter. The blue and rose Roman Hyacinths flower from one to two weeks later than the white variety.

If by mail, add 10 cents per dozen for postage.

	Each	Per doz.	100
Pure White Roman. Extra-selected, largest.....per 1,000, \$38..	\$0 06	\$0 65	\$4 50

Double Rose-Pink Roman.....	06	65	4 50
Double Dark Rose Roman.....	05	50	3 50
Single Blue Roman.....	05	50	3 50

## ITALIAN HYACINTHS

These are grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are harder than the Romans, and may also be planted outside in the fall for flowers for early spring cutting.

	Each	Per doz.	100
Single White Italian.....	\$0 06	\$0 60	\$4 00
" Yellow.....	12	1 25	8 00

## MINIATURE HYACINTHS

These are also known as "Dutch Roman" and "Pan Hyacinths." They are very suitable for growing in groups in pots or earthen pans. We offer them in separate colors, and also mixed, as follows:

Pure White, Cream White, Dark Red, Rosy Red, Light Blue and Yellow. 45 cts. per doz., \$3 per 100.  
Mixed, all colors. 40 cts. per doz., \$2.50 per 100.

Roman Hyacinths.

# TULIPS

*Tulips are ready for delivery in September*

For beauty of form and brilliancy of coloring, Tulips are unequaled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers can select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers, they are also invaluable.

**CULTURE.**—The cultural directions given for hyacinths, on page 2, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the

## TULIPS, continued

bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November, before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open border.

A, B and C indicate season of flowering. A and B may be planted to flower about the same time in the open ground; C flowers later.

## SINGLE EARLY TULIPS

 Six of a kind at dozen rates, 25 at 100 rates.

## MIXED TULIPS

For bedding. Planted in large masses, these make a magnificent show, and, being inexpensive, should be largely used. Our special mixtures of Early Single and Early Double Tulips are made up of the finest bulbs and the brightest colors. If planted in large beds, they will produce an exceedingly beautiful and lively effect.

If ordered by mail, add 6 cents per dozen for postage.

No. 4. Eight each, same 12 varieties as in collection No. 1 (96 named bulbs).....2 25

Types of Narcissi.

## NARCISSUS

*Narcissi are Ready for Delivery  
in September*

The very beautiful species and varieties of Narcissus are among the most popular and largely grown of spring-flowering bulbs, and that deservedly, too, for they are certainly "the fairest among them all." Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them. To know them is to love them, and to love them is a liberal education.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, or lakes, or ponds, and in mixed flower or shrubbery borders. They are also suitable for naturalizing in the grass, by the side of woodland walks or in open spaces between trees and shrubs. With the exception of the Polyanthus section, they are all perfectly hardy.

Narcissi are also very suitable for growing in pots, requiring about the same treatment as hyacinths, with 3 or 4 bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers.

### SINGLE NARCISSUS, or DAFFODILS

If ordered by mail, add 13 cents per dozen for postage.

	Each	Per doz.	100
<b>Ard Righ</b> (Irish King). Magnificent golden yellow trumpet; very large and graceful. One of the earliest and finest for forcing.....	\$0 10	\$1 00	\$6 00

Silver Jonquil ( <i>Narcissus tenuior</i> ).....	06	50	3 00

Jonquils.

# LILIES

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown, and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a rich, deep loam, they all do best in a light, well-drained soil. Some peat or leaf-mould may be used to advantage. *L. auratum* cannot bear manure, but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

*Lilium Harrisii* and *Lilium candidum* ready in August; all others not until November

If ordered by mail, add 3 cents each for those marked (\*); others from 1 to 2 cents each for postage.

**Leichtlinii**. Orange-red, with crimson spots; 2 to 3 feet high. 15 cts. each, \$1.50 per doz.

*Lilium auratum.*

*Lily-of-the-Valley.*

## LILY-OF-THE-VALLEY

(*Convallaria majalis*)

Ready in November

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them.

**Clumps**. Fine large clumps, with 15 or more flowering pips on each. Fine for planting outside in shaded positions, and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per dozen clumps.

**Pips for forcing**. 50 cts. per bundle of 25, \$1.75 per 100, \$14 per 1,000.

# ANEMONE, or WINDFLOWER

Very ornamental hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

If ordered by mail, add 15 cents per 100 for postage

<b>Sylvestris</b> (Snowdrop Windflower). Very beautiful pure white .....				05	45	3 50

# AMARYLLIS

Ready in October

Amaryllis.

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mould or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure water during the growing season.

Each Per doz.

<b>Aulica</b> (Lily-of-the-Palace). Very large, handsome flowers; crimson, shaded with green.....	\$1 00	
<b>Belladonna major</b> . Violet and white; flowers in large umbels; fragrant..	25	\$2 50

# ARUMS

Ready for shipment in September and October

A genus of curious and ornamental perennials, with peculiar and distinct foliage and flowers. They make handsome pot-plants, and are also very effective in subtropical gardening. *A. Dracunculus* is hardy, and may be left in the ground over winter, with a little covering. The others should be potted in the autumn and kept dormant till spring. They are all of easy cultivation, requiring rich soil and plenty of water during the growing season. A compost of rich loam, with a third of well-rotted manure and some sand, is very suitable.

If ordered by mail, add 3 cents each for postage.

	Each	Per doz.
<b>Crinitum</b> . Marble stems; broad, flesh-colored, spotted flowers, covered with hairs.....	\$0 20	\$2 00
<b>Cornutum</b> (Red Calla). Flowers red, spotted black; stems mottled; handsome pot-plant.....	25	2 50
<b>Dracunculus</b> (Dragon-flower). A striking and very ornamental plant for pots or garden. It grows to a height of 3 feet, with mottled stem and handsome foliage.....	12	1 25

Arum Palaestinum sanctum.

BEGONIA GRANDIFLORA, TUBEROUS-ROOTED

Ready in November and December

Splendid pot-plants for the house or greenhouse, and especially valuable for bedding, flowering in the greatest profusion throughout the summer. For bedding they should be started in hotbed in March and April. The hollow end of the bulb should be up and but slightly covered. They should get very little water until the plants are growing.

<b>Meleagris</b> (Guinea Fowl Flower). Mixed colors.....	05	35	2 00
<b>Fritillaria imperialis</b> . See Crown Imperials, on page 23.			

Fritillaria recurva.

## CROCUS

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted close,—say 2 inches apart,—and in close rows, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful.

For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

If ordered by mail, add 15 cents per 100 for postage.

	Per doz.	100	1,000

Mixed. All colors.....	10	40	3 00

## HYBRID NAMED CROCUS

Composed of the most beautiful varieties; remarkable for richness of color and immense size. These varieties are best for forming letters or designs on the lawn, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. The flowers are produced very early, and the mowing later on will not seriously injure the Crocus bulbs.

If ordered by mail, add 25 cents per 100 for postage.

# CALOCHORTUS

(Mariposa Lily, or Butterfly Tulip)

Ready in September

Very handsome bulbous plants from California. They are remarkable for the brilliancy and variety of their coloring, and their gracefulness of habit. They grow freely in light, sandy loam; though hardy, they should be protected during winter with litter. They may also be successfully grown in frames and in pots.

If ordered by mail, add 5 cents per dozen for postage

# CYCLAMEN

Most of them ready in November

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The *C. giganteum* is an improved strain of the old *C. Persicum*, having much larger and more brilliantly colored flowers, and producing them more abundantly. We offer seed of our superb strain of these at the end of this Catalogue.

# CROWN IMPERIALS

(*Fritillaria imperialis*)

A stately-growing plant, with dark green foliage, and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring, and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil; the flowers will be larger and of fine coloring, as well as more enduring.

*Ready in September*

## FREESIA

The justly popular *Freesias* are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in a light, sandy soil, in a frame or greenhouse, and are excellent for window culture in winter; one plant will perfume a large room, but not in the persistent manner of a tuberose. The plant has tooth-shaped bulbs and flat, spreading leaves. For the information of all not acquainted with these bulbs, we may say that they are quite small, and produce large blooms in comparison to their size.

***Freesia refracta alba.*** Pure white and sweet-scented; very largely forced. The flowers are 2 inches long, and about the same in width, shaped like miniature gladioli, and in clusters of 6 to 10, on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. The fragrance is remarkable and very lasting.

# GLADIOLUS

*Ready in November*

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse, except those prefixed with an (\*), which are hardy, and may be planted out; it is best, however, to give them a slight protection. Some varieties are successfully forced.

The French Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty. Every year is now adding varieties of most exquisite tint and shade; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published January 1.

If ordered by mail, add 5 cents per dozen for postage.

# GLOXINIAS

*Ready in November*

Gloxinias are among the most beautiful of greenhouse plants, the flowers being remarkable for the intensity and variety of their coloring, and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mould and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large-sized, and of the erect flowering strain.

## CRINUMS

Splendid large-flowering bulbs, closely allied to the *Amaryllis*. The most suitable soil is a compost of turfy loam, cow manure and some sand. They should be grown in large pots or in tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a coolhouse and allowed to rest till new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure water during the growing season. They may be placed outside when warm weather begins and will flower all through the summer, making splendid lawn or veranda plants.

Each

<b>Giganteum, Giant White.</b> Immense bulbs; large white flowers; blooms all summer; very fragrant; they should be watered plentifully while growing.....	\$2 00
<b>Amabile, Giant Pink.</b> Extra large, bright pink, with white stripe; splendid flower; enormous bulb. This and the Giant White are unsurpassed for growing in tubs, blooming profusely outside all summer.....	2 00
<b>Grandiflorum.</b> Very large white flowers, with red stripe running through the center of the petals.....	3 00
<b>Kirki.</b> Large umbels of beautiful pure white flowers; pure white, with purple stripe in center of each petal.....	75
<b>Powellii.</b> It produces long stems bearing at the top five to eight large, dark rose, bell-shaped flowers 3 to 4 inches long.....	40
" <b>album.</b> Pure white.....	1 00
" <b>intermedium.</b> Light rose; hardy.....	3 00

Ixias.

## IXIAS (Ready in October)

The Named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

Erythronium.

## ERYTHRONIUMS

(DOG'S-TOOTH VIOLETS.) Ready in September

Very ornamental, hardy, bulbous plants, of neat and dwarf habit. They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in sheltered positions on rockeries, or in mixed flower or shrubby borders.

Each Per doz. 100

<b>Giganteum</b> (Giant Dog's-Tooth Violet). Very large, straw-colored flowers, with orange center, borne on long, slender stems; the foliage is richly mottled in dark brown and its elegant habit makes a very attractive pot-plant for window decoration....	\$0 05	\$0 40	\$2 50

	05	40	2 50
	05	30	1 50

Mixed

**Dens-canis** (Dog's-Tooth Violet). Mixed colors; very pretty; leaves blotched in brown and white.....

# IRIS (FLEUR-DE-LIS)

*Ready in October and November*

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together in the flowers. Irises are of easy culture, requiring very little attention after once being planted. They do best in a light, rich, sandy soil, and in a sunny situation. Good drainage is very important. The newer varieties of *Iris Kaempferi*, recently introduced from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 or 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms, measuring 8 to 10 inches across, and of the most delicate and beautiful colors, markings and combinations; no other flowers excel them in richness. These require a liberal supply of water, when growing. With the exception of *Morea pavonia* and *Tuberosa*, all varieties are hardy.

## SUPERB COLLECTION OF LARGE-FLOWERED JAPAN IRISES

(*Iris Kaempferi*)

We are importing from Japan a large supply of the following twenty newest and best of these magnificent Irises, which excel in size, perfection of form and richness of color, any ever shown. They come in large, extra-strong clumps.

## LACHENALIAS

*Ready in September*

Very pretty, spring-flowering, greenhouse, bulbous plants, with brightly colored flowers and elegant habit. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mould and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air, and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging baskets.

	Each	Per doz.
<b>Luteola</b> . Pale yellow flowers, flushed with green. ....	\$0 20	\$2 00
<b>Pendula</b> . Very handsome, large and showy species, with broad foliage and rich red flowers, tipped with black. ....	20	2 00

<b>Tricolor</b> . Red, yellow and green. ....	10	1 00
<b>Versicolor</b> . Foliage heavily spotted brown; flowers yellow, tipped with green and red; very pretty for massing. ....	12	1 25
<b>Hybrids Mixed</b> . ....	10	1 00

## MONTBRETIAS

*Ready in November*

Hardy, summer-flowering, bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties:

	Each	Per doz.	100
<b>Bouquet Parfait</b> . Large, bright vermilion flowers, with deep yellow center. ....	\$0 05	\$0 40	\$2 25
<b>Crocsmiaeflora</b> . Large; bright orange, tinged scarlet. ....	05	30	1 50
<b>Drap d'Or</b> . Rich yellow; very large, handsome flowers. ....	05	40	2 25
<b>Eldorado</b> . Large, golden yellow flowers; very floriferous; dwarf habit. ....	05	40	2 25
<b>Elegans</b> . Bright yellow, outside streaked with vermilion; extra fine. ....	05	40	2 25
<b>Etoile de Feu</b> . Bright vermilion, with deep yellow center; large flowers. ....	08	60	3 50
<b>Golden Sheaf</b> . Bright yellow. ....	05	40	2 25
<b>Pottsii</b> . Orange and scarlet; very free-flowering. ....	05	25	1 25

Montbretias.

## ORNITHOGALUM

*Ready in September*

	Each	Per doz.	100
<b>Arabicum</b> . White, with black center; valuable for forcing. ....	\$0 05	\$0 45	\$3 00
<b>Pyramidale</b> . Showy spikes of white flowers. ....	25	2 50	
<b>Umbellatum</b> (Star of Bethlehem). Outside green and white striped, inside satiny white; flowers in umbels; very showy. ....	05	30	1 50

# NERINE

*Ready in October and November*

Very beautiful greenhouse bulbous plants, succeeding best in pots, in light soil—say a compost of loam, leaf-mould and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die they should be kept quite dry in a cool place until they begin to grow again.

*Nerine Japonica.*

	Each	Per doz.
<b>Crispa.</b> Very handsome scarlet flowers.....	\$1 00	
<b>Flexuosa.</b> Bright crimson-scarlet, tinged with orange.....	1 00	
<b>Fothergillii.</b> Bright, glittering scarlet, in a many-flowered umbel .....	1 00	
“ <b>major.</b> A magnificent plant for house or conservatory. The flowers are of the most intense shining scarlet, and by artificial light the crystalline cells of the petals sparkle like jewels. It flowers very freely..	1 25	
<b>Japonica</b> (Japan Spider Lily). Purplish red; very beautiful.....	08	\$0 75
<b>Sarniensis</b> (True Guernsey Lily). Flowers brilliant crimson, in large clusters. The best known sort.....	35	3 50
<b>Undulata.</b> Rosy purple, wavy flowers; very handsome.....	75	

# OXALIS

*Ready in September*

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging baskets. They are easily grown in sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

	Each	Per doz.	100
<b>Buttercup.</b> A splendid winter-blooming plant for pot culture. The flowers are pure bright yellow, and produced in great abundance. It is very easily cultivated, and, being a strong grower, only one or two bulbs should be planted in a 5- or 6-inch pot .....	\$0 05	\$0 40	\$2 00
<b>Giant Pink.</b> New. Bushy plants, about a foot high, covered with large clusters of waxy-pink geranium-like flowers. A fine pot-plant.....	10	1 00	6 00

<b>Versicolor.</b> Crimson and white.....	2 for 5 cts..	25	1 25
<b>Mixed.</b> .....	2 for 5 cts..	20	1 00

# PAEONIES

*Ready in October*

The old-fashioned double Pæonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Pæonies rank about first for lawn or flower-border or shrubbery decoration. They are all hardy.

	Each	Per doz.
<b>Chinensis, Double White</b> .....	\$0 30	\$3 00
“ “ <b>Crimson</b> .....	20	2 00
“ “ <b>Pink</b> .....	20	2 00
“ “ <b>Mixed</b> .....	15	1 50
<b>Arborea</b> (Tree Pæony). Very handsome.....	2 00	
<b>Tenuifolia, Single.</b> Bright red.....	20	1 75
“ <b>Double.</b> Bright red.....	30	3 00

*Pæonies.*

# RANUNCULUS

*Ready in September*

The main soil for these should be loam or clay, with a good dressing of rotten manure and leaf-mould; if heavy, add a little sand. The soil should be well drained, cool, deep, rich and moist. Plant late in the autumn, claws downward, from 4 to 6 inches apart and 3 inches deep, covering with fine, pulverized soil.

If ordered by mail, add 3 cents per doz. for postage.

## PERSIAN VARIETIES

## RICHARDIAS, or CALLAS

*Ready in September and October*

Tall-growing, bulbous perennials of exceedingly graceful habit and very handsome foliage and flowers. They are easily cultivated in pots, requiring only a rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting in September.

	Each	Per doz.	100
<b>White Calla, or Lily-of-the-Nile</b> ( <i>Calla Æthiopica</i> ). Large, white, trumpet-shaped flowers of great substance. One of the most popular and ornamental of house and greenhouse plants. Largest size bulbs.....	\$0 20	\$2 00	\$15 00
<b>"Little Gem" Calla.</b> Very neat, dwarf habit; makes an excellent pot-plant.....	06	50	3 50
<b>Nana compacta</b> ( <i>Improved Little Gem</i> ). Very dwarf and compact.....	10	60	4 00
<b>Spotted Calla</b> ( <i>C. Æthiopica alba maculata</i> ). An extremely ornamental pot-plant, with pure white flowers and handsome, deep green leaves, spotted with white.....	10	60	4 00
<b>Black Calla.</b> See <i>Arum Palæstinum sanctum</i> .....	20	2 00	12 00
<b>Red Calla</b> ( <i>Arum cornutum</i> ). Flowers red, spotted black; stems mottled; a handsome pot-plant.....	25	2 50	

White Calla.

Scilla Sibirica.

## SCILLAS

*Ready in September*

No garden can be complete without these beautiful flowers. *S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years.

If ordered by mail, add 5 cents per dozen for postage, except those marked with a star (\*), to which add 2 cents each.

**Sibirica.** The effect in early spring of the intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the Snowdrop and the varied hues of the Crocus, can hardly be overestimated; are most valuable for permanent edging. 30 cts. per doz., \$2 per 100.

Each Per doz. 100

**Sibirica alba.** White-flowered variety

of the above.....\$0 08 \$0 60 \$3 50

**Bifolia.** Blue; hardy.....05 35 2 00

**Campanulata** (Wood Hyacinth). Blue... c5 30 1 50

“ **rosea.** Rose.....06 50 3 00

Each Per doz. 100

**Nutans Coerulea** (Nodding Squills).

Blue.....\$0 05 \$0 35 \$2 00

“ **alba.** White.....06 50 3 00

“ **rosea.** Rose.....06 50 3 00

\***Peruviana alba** (White Cuban Lily).... 20 2 00

“ **lutea** (Yellow Cuban Lily).... 40 4 00

“ **coerulea** (Blue Cuban Lily).... 15 1 50

## SNOWDROPS

(*GALANTHUS NIVALIS*)

*Ready in September*

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest-flowering of its varieties is the common single sort, which is also very graceful

and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms.

If ordered by mail, add 3 cents per dozen, or 25 cents per 100 for postage.

Per doz. 100 1,000

**Single-flowering Snowdrops.**.....\$0 15 \$1 00 \$7 50

**Double-flowering Snowdrops.**.....25 1 75 14 00

**Giant Snowdrop of Asia Minor** (*Galanthus Elwesii*)..... 15 1 00 7 50

Snowdrops.

Dwarf Double Pearl Tuberose.

## TUBEROSES

*Ready in December*

The purity of color and rich perfume of the Tuberose are well known. In this latitude May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich, warm soil and in a sunny situation. Cut off about a quarter of an inch from the bottom of the bulb before planting and set so that the top will be one inch below the soil.

Each Per doz. 100

**Dwarf Double Pearl.** Dwarf habit; large fine flowers of

great substance.....\$0 05 \$0 35 \$1 50

**Albino.** Purest white, single flowers.....05 40 2 00

**Variegated Leaf.** Foliage striped white and green; single

white flowers.....05 45 3 00

## SPIRÆA, or ASTILBE

*Ready in November*

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

**Japonica** (Hoteia). Excellent pot-plant for winter blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting 10 cts. each, \$1 per doz., \$6 per 100.

**Japonica fol. aurea reticulata**. Beautiful gold-striped foliage; large panicles of pure white flowers. 15 cts. each, \$1.50 per doz., \$10 per 100.

**Japonica compacta multiflora**. The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.25 per doz., \$7 per 100.

**Astilboides floribunda**. Very large, pure white plumes; neat habit; very abundant bloomer. 15 cts. each, \$1.25 per doz., \$7 per 100.

**Palmata**. Crimson; strong clumps. 15 cts. each, \$1.25 per doz., \$7 per 100.

**Hybrida Gladstone**. The best of all for forcing. Splendid plumes of snow-white flowers on long stems. 20 cts. each, \$2 per doz.

*Spiræa Astilboides floribunda.*

## TRILLIUMS

(AMERICAN WOOD LILY, or INDIAN SHAMROCK)

Hardy herbaceous perennials, succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are natives of North America, and are known by various common names in different localities. They have violently emetic roots.

Each Per doz. 100

<b>Grandiflorum</b> ("Giant American Wood Lily," or "Wake Robin"). Large white flowers, changing to rose; quite hardy, and easily grown in shaded positions.....	\$0 05	\$0 40	\$2 50
<b>Erectum</b> ("Birthroot"). Dark purple flowers; erect habit; about 1 foot high .....	05	50	3 00
<b>Erectum album</b> . A white-flowered variety of the above.....	08	60	4 00
<b>Ovatum</b> . White, changing to purple..	10	75	5 00
<b>Sessile Californicum</b> . Handsome, pure white flowers; prettily mottled foliage.....	10	1 00	6 00
" <b>rubrum</b> . Reddish purple flowers.....	10	1 00	6 00
" <b>Snow Queen</b> . The finest of all. Broad petals tinged cream color.....	10	1 00	6 00

*Trillium sessile Californicum.*

Schizostylis coccinea.

Hemerocallis.

## Miscellaneous Bulbs and Roots

*Those marked with an asterisk (\*) will not be ready till October*

	Each	Per doz.	100
*Achimenes, Mixed. Lovely greenhouse pot-plants .....	\$0 08	\$0 75	\$5 00
Aconite. See Eranthis, page 33.			
Allium. Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.			
“ Azureum. Beautiful sky-blue flowers in large umbels; fine for pots or garden.....	08	75	5 00
“ Neapolitanum. Large umbels of pure white flowers, borne on long stems; valuable for forcing for winter cut-flowers, as well as for summer garden decoration.....	05	25	1 25
“ Moly luteum. Golden yellow flowers in large umbels; very showy and attractive; fine for growing in the garden in groups or for naturalizing in masses.....	05	25	1 25
“ Hermettii grandiflorum. Makes a splendid pot-plant for winter blooming in the house, the handsome, large, pure white flowers being produced abundantly and for a long time; largely used by florists for forcing for cut-flowers .....	05	30	1 50
“ Ostrowskianum. Deep carmine .....	05	40	2 25
Alstroemeria, Mixed. Tall plant, with beautiful flowers; for pots or frames .....	10	85	5 50
Anomatheca cruenta. Rich crimson flowers; neat, dwarf habit; excellent for window-garden.....	05	25	1 25
Anthericum. Very ornamental border plants, and also excellent for pot culture. They do best in light, rich soil, and require plenty of water while growing.			
“ Liliago (St. Bernard's Lily). Pure white flowers; 1½ feet high .....	10	1 00	6 00
“ Liliastrium major (St. Bruno's Lily). Much larger flowers than the above; flowers white, with petals delicately tipped green; 2 feet high.....	12	1 25	7 00
“ Ramosum. Of branching habit; white flowers; 2 feet high.....	12	1 25	7 00
Antholyza, Mixed. Like Gladioli. Take up in fall.....	12	1 25	8 00
Apios tuberosa. Hardy climber, with clusters of fragrant purple flowers.....	05	50	3 00
Asphodelus ramosus. Hardy perennial; large, white flowers; very pretty.....	40	4 00	
Babiana. Mixed colors; charming for pots .....	05	35	2 00
Bessera elegans (Coral Drops). Bright coral-scarlet, with white cups.....	05	50	3 50
*Bravoa geminiflora. Orange and scarlet; twin-flowered.....	15	1 50	
Bulbocodium vernum. A very pretty little bulbous plant, with rosy purple, crocus-like flowers; it is one of the earliest of spring plants, blooming even before the Crocus....	12	1 25	8 00
*Caladium esculentum (Elephant's Ear). Large-sized bulbs.....	25	2 50	
Callas. See Richardia, page 29.			
Camassia Cusickii. Superb new variety, with very large leaves and lovely pale sky-blue flowers, produced in racemes 2 to 3 feet long.....	15	1 50	

## MISCELLANEOUS BULBS AND ROOTS, continued

	Each	Per doz.	1900
<i>Camassia esculenta</i> . Pretty violet-blue flowers; fine for cutting .....	\$0 05	\$0 30	\$1 50
“ <i>Leichtlinii</i> . Splendid, tall, purple variety .....	10	80	5 00
“ “ Cream-colored. Very pretty .....	12	1 25	8 00
<i>Chionodoxa gigantea</i> . Very large lilac-blue flowers, with large white eye .....	05	35	2 00
“ <i>Luciliæ</i> (“Glory of the Snow”). Porcelain-blue, white eye .....	05	30	1 50
“ <i>Sardensis</i> . Lovely deep blue flowers, produced in great numbers .....	05	30	1 50
<i>Clematis coccinea</i> . A hardy herbaceous perennial climber; flowers rich scarlet .....	15	1 50	10 00
<i>Colchicum Agrippinæ</i> . From Asia Minor .....	15	1 50	
“ <i>autumnale</i> fl. pl. (Meadow Saffron) .....	12	1 25	8 00
“ Mixed. Many bright colors .....	10	75	5 00
<i>Cooperia Drummondii</i> (Evening Star). White; take up in fall .....	05	35	2 00
“ <i>pedunculata</i> . Beautiful white fragrant flowers .....	05	35	2 00
<i>Crocsmia aurea</i> (Tritonia). Half-hardy; orange flower .....	05	45	3 00
<i>Cyclobothra flava</i> (Yellow Shell-flower). Golden yellow cup, with fine black dots; pretty ..	05	40	2 50
<i>Cypella Herberti</i> . Bright orange-yellow; half-hardy .....	20	2 00	
* <i>Dicentra spectabilis</i> (Dielytra, Bleeding-Heart). Hardy; also for forcing .....	20	2 00	12 00
<i>Dodecatheon Hendersoni</i> . Rose-purple, with yellow band .....	06	50	3 00
<i>Eranthis hyemalis</i> (Winter Aconite). Yellow .....	05	30	1 50
<i>Eucharis Amazonica</i> . Fine white-flowered greenhouse plant .....	75		
* <i>Funkia alba marginata</i> . Beautiful white-bordered Day Lily .....	12	1 25	7 00
<i>Galanthus Elwesii</i> (Asia Minor Giant Snowdrops) .....	per 1,000, \$7.50..	05	15 1 00
* <i>Haemanthus albiflos</i> . White; fine for pots .....	1 25		
“ <i>coccineus</i> . Scarlet; for pots .....	1 50		
“ <i>puniceus</i> . Orange-red; for pots .....	1 50		
“ <i>tigrinus</i> . Crimson; for pots .....	2 00		
* <i>Helleborus niger major</i> (Christmas Rose). Perfectly hardy, but most valuable for forcing ..	30	3 00	
* <i>Hemerocallis flava</i> . Clear yellow .....	10	1 00	6 00
“ <i>fulva</i> . Coppery orange, shaded crimson .....	10	1 00	6 00
“ <i>Kwanso flore pleno</i> . Coppery orange; double .....	10	1 00	6 00
“ <i>Sieboldii</i> . Reddish orange .....	10	1 00	6 00
* <i>Hyacinthus candicans</i> . A snow-white summer-flowering giant Hyacinth .....	05	45	3 00
<i>Incarvillea Delavayi</i> . Large; rosy purple; splendid hardy perennial, with handsome foliage ..	25	2 50	
* <i>Ismene calathinum</i> . White; sweet-scented; hardy .....	20	2 00	
“ <i>undulata</i> . Fragrant white flowers, with beautifully fringed petals .....	15	1 50	
<i>Leucojum æstivum</i> . Summer-flowering white Snowflake .....	05	45	3 00
“ <i>vernum</i> . Spring-flowering dwarf Snowflake .....	05	35	2 00
<i>Milla biflora</i> . Pure waxy white flowers, over 2 inches in diameter .....	05	40	2 50
* <i>Pancretium calathinum</i> (Basket-flower). Very fragrant white flowers .....	20	2 00	
“ <i>Illyricum</i> . Half-hardy; large, fragrant white flowers .....	50	5 00	
“ <i>maritimum</i> (Sea Daffodil). Delightfully fragrant; white .....	15	1 50	10 00
“ <i>undulatum</i> . White .....	15	1 50	9 00
<i>Pentlandia miniata</i> . Beautiful crimson flowers; for greenhouse .....	20	2 00	
* <i>Schizostylis coccinea</i> . Scarlet gladiolus-like flowers in spikes .....	08	60	3 50
<i>Solomon's Seal</i> ( <i>Polygonatum multiflorum</i> ) .....	10	1 00	6 00
<i>Sparaxis</i> . Finest mixed .....	05	20	1 00
<i>Tricyrtis hirta</i> . Beautiful; fall-flowering; hardy; from Japan .....	10	1 00	5 00
<i>Triteleia uniflora</i> . Pure white, shaded with blue; hardy .....	05	20	80
* <i>Tritoma uvaria grandiflora</i> (Red-Hot-Poker Plant). Half-hardy .....	12	1 25	8 00
“ <i>MacOwani</i> . New dwarf variety; bright orange-red .....	12	1 25	8 00
“ <i>corallina</i> .....	25	2 50	
“ <i>Pfitzeri</i> . Large spikes of intense flame-colored flowers. In beds it makes a gorgeous display. It should be planted in the spring .....	15	1 50	12 00
* <i>Tritonia crocata</i> . Mixed .....	05	40	2 50
* <i>Trollius Europæus</i> . Yellow .....	20	1 75	12 00
“ <i>giganteus</i> . Yellow .....	20	1 75	12 00
“ <i>Japonicus</i> . Orange; semi-double .....	20	1 75	12 00
* <i>Tropaeolum tricolorum</i> Jarrattii. Fine greenhouse climber; for pots .....	20	2 00	
“ <i>pentaphyllum</i> .....	60	6 00	
“ <i>speciosum</i> (Flame-flowered Nasturtium). Brilliant scarlet .....	15	1 50	
* <i>Zephyranthes Atamasco</i> . Pure white .....	05	40	2 50
“ Pink. Fine large-flowered variety from Bermuda .....	05	50	3 00

Pansies. (See page 37)

## Hardy Annual and Perennial Flower Seeds

### For Autumn Sowing

Many varieties of Flower Seeds, ANNUALS as well as BIENNIALS and PERENNIALS, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring.

## STRAWBERRY PLANTS

Those marked (P) have pistillate, or imperfect flowers, and must be planted near perfect-flowering kinds, in order that the flowers may be fertilized. The varieties not so marked are bi-sexual, or perfect-flowering, and can be planted alone. Layer plants ready in September. Pot-grown plants ready now. Of the layer plants we do not sell less than 50 of a kind.

	Layers per 100	Pot-grown 1,000 per 100
<b>Brandywine.</b> Mid-season to late, very large, dark scarlet, solid, of good shape; very productive and continues bearing for a long time.....	\$1 00	\$5 00 \$3 00
<b>Bubach</b> (P). Mid-season, very large and productive, good quality, ripens very evenly; excellent for family use.....	1 00	5 00 3 00
<b>Excelsior.</b> Extra-early, dark red, large and firm and of fine quality; a good shipper.....	1 00	5 00 3 00
<b>Gandy.</b> Late. Large, bright, glossy crimson, vigorous and productive; firm flesh of finest quality.....	1 00	5 00 3 00
<b>Glen Mary.</b> Early, of large size. Bright, glossy crimson, of fine flavor; plant is strong and healthy, very prolific, and on good soil the berries are large to the end of the season. Good for family or near-by market.....	1 00	6 00 3 50
<b>Kansas</b> (P). Mid-season to late, size medium to large, very shapely, bright crimson color, very firm and an excellent shipper. One of the best for canning.....	1 00	5 00 3 00
<b>Lady Garrison.</b> Early. Large, bright, glossy red; strong grower, and extra heavy yielder. Does well in good, rich soil.....	1 00	5 00 3 00
<b>Lester Lovett.</b> Late. Exceedingly productive; extra large and perfect in shape. Continues to bear later in the season than any other sort. Finest flavor.....	1 50	11 00 4 00

**Marshall.** Mid-season, very large, dark crimson, good shape and quality. The plant is vigorous, but needs rich soil and careful culture..... 1 00 | 6 00 3 50 |

**McKinley.** Mid-season, large, roundish, crimson; extra fine quality and exceedingly productive..... 1 00 | 6 00 3 50 |

**New York.** Mid-season, very large, dark scarlet; colors evenly all over; strong grower, exceedingly productive and of the finest possible flavor. .... 1 00 | 6 00 3 50 |

**Nick Ohmer.** Mid-season, very large, dark, glossy red, firm and perfect in shape. It is an enormous yielder and of excellent flavor..... 1 00 | 6 00 3 50 |

**President** (P). Mid-season. A new variety of strong growth. Very productive, uniformly round in shape and extra large in size. Rich crimson color, very solid flesh of fine quality..... 1 50 | 12 00 5 00 |

**Wm. Belt.** Mid-season, large size, conical shape, bright red, ripening evenly all over. Vigorous grower and very productive..... 1 00 | 6 00 3 50 |

**Sample** (P). Mid-season to late, medium size, and very uniform in shape; extremely productive, rich, crimson color through and through..... 1 00 | 6 00 3 50 |

## Grass Seeds for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the end of September, so that the young grass may become well rooted before winter sets in. Our new-crop seed of the leading sorts is ready now.

### THE THORBURN LAWN GRASS

The **Thorburn Lawn Grass Mixture** is composed exclusively of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich greensward in three or four weeks from the time of sowing. It should be sown at the rate of four to five bushels to the acre (15 lbs. to the bushel). Per qt., 25 cts.;  $\frac{1}{2}$  pk., 65 cts.; pk., \$1; bus. \$3.50.

### THORBURN'S LAWN-RESTORING GRASS SEED

A mixture of grasses peculiarly suited to take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-Restoring Grass Seed** should be sown on thin places before every rain. Per qt., 30 cts.; bus. of 24 lbs., \$5.

### THORBURN'S LAWN GRASS FOR THE SOUTH

A mixture of grasses that stand extremes of heat and drought well and that are therefore peculiarly adapted for southern lawns. Per bushel of 20 lbs., \$5.

### THORBURN'S MIXTURE FOR SHADY SPOTS

A mixture of grasses that thrive in shaded situations, under trees, or close to walls where there is little sun. Price, per quart, 35 cts.; peck, \$1.75; bushel of 24 lbs., \$6.

### PERMANENT GRASS SEED FOR GOLF LINKS

We have given much attention to this subject, and have seeded most of the finest golf links in the country, among which we may mention the following celebrated links: St. Andrews, Baltusrol, Shinnecock Hills, Garden City, Nassau County, Philadelphia Country Club, Montclair Golf Club, Apawamis, Fox Hills, etc.

**Golf Links Mixture.** For the grounds in general. Per bushel of 20 lbs., \$2.50.

**Putting-green Mixture.** A mixture of extra fine grasses, that will make a close, firm, green and lasting turf, which will improve with trampling. Per quart, 30 cts.; peck, \$1.75; bushel of 24 lbs., \$6.

### GRASS SEED MIXTURES FOR MEADOWS AND PASTURES

For over a hundred years our house has made a specialty of grasses. The formation of permanent pastures and meadows has for many years been a subject of careful study with us, and the following mixtures for seeding grass-lands have received universal recognition.

#### MEADOW MIXTURES FOR ONE ACRE

No. 1. For good land, neither too dry nor too wet. Price per acre (40 lbs.), \$5.50.

No. 2. For high and dry land. Price per acre (40 lbs.), \$6.50.

No. 3. For wet, late land. Price per acre (40 lbs.), \$6.

#### PASTURE MIXTURES FOR ONE ACRE

No. 4. For good land, neither too dry nor too wet. Price per acre (40 lbs.), \$6.50.

No. 5. For dry land. Price per acre (40 lbs.), \$7.

No. 6. For wet land. Price per acre (40 lbs.), \$6.50.

**N. B.** We shall be pleased to make special mixtures for particular purposes, or to suit exceptional conditions of soil, situation or climate—for very sandy or clayey ground, for very dry or wet situations, for steep slopes, terraces, tennis-courts, croquet greens, polo-grounds, etc. We invite consultation about any difficulties experienced in getting the right turf for any purpose or in any place.

### MUSHROOM SPAWN

We have always on hand fresh spawn of the very highest grade. Cultural directions will be found in our General Catalogue. Any one requiring fuller details should get Mr. Wm. Falconer's book on Mushroom Culture, which we can send, postpaid, for \$1.

**English Spawn.** Per lb., 15 cts.; 10 lbs., \$1; 100 lbs., \$9.

**French Spawn.** Per lb., 35 cts.; 100 lbs., \$30.

Mushrooms.

# Insecticides and Remedies for Plant Diseases

## BUG DEATH

This is a fungicide, insecticide and plant-food combined. 1-lb. package, 15 cts.; 3-lb. package, 35 cts.; 5-lb. package, 50 cts.; 12½-lb. package, \$1; 100-lb. package, \$7.

Perfection Shaker for applying above, 65 cts. each.

## COPPERDINE

A combined fungicide and insecticide, used simply by adding water in proportion of one pound of the paste to 16 gallons of water. 1-lb. box, 25 cts., makes 16 gallons spray; 5-lb. box, \$1, makes 80 gallons spray.

## FIR-TREE OIL

For greenhouse and house plants. It destroys all plant insects without injuring the plant. It is the best insecticide for scale, aphids, red spider, mealy bug, thrip and worms. Dilute in the proportion of 1 pint to 20 gallons of water. Apply with vaporizer or syringe. ½ pt., 40 cts.; pt., 75 cts.; qt., \$1.25; ½ gal., \$2.25; gal., \$4.

## FIR-TREE OIL SOAP

This is the same as the Fir-Tree Oil, but in soap form. Mix at the rate of 1 ounce to a gallon of water, and apply with bellows or syringe. ½-lb. tin, 25 cts.; 2-lb. tin, 75 cts.

## DALMATIAN INSECT POWDER

Effective against almost all kinds of insects. Per ½-lb. box, 30 cts.; per 1-lb. box, 50 cts.

## GISHURST'S COMPOUND

A certain remedy for greenfly, scale, mealy bug, etc. Excellent for greenhouse use. Per 1-lb. box, 50 cts.

## HAMMOND'S GRAPE DUST

For the prevention of mildew on roses, grapes, gooseberries, etc. Apply with bellows. 5-lb. package, 35 cts.; 10-lb. package, 60 cts.; 100-lb. keg, \$5.

## HELLEBORE, POWDERED

An excellent protection from currant worms, grape slugs, caterpillars, etc. May be applied dry or mixed in water—1 oz. to 3 gallons. Per 2-lb. box, 35 cts.; per 1-lb. box, 20 cts.; ½-lb. box, 12 cts.

## LEMON OIL

For destroying scale, caterpillar, mealy bug, red spider, greenfly, etc. Directions on can. ¼ pt., 25 cts.; pt., 40 cts.; qt., 75 cts.; gal., \$2.

## LITTLE'S ANTIPEST

A sure destroyer of all insect pests. Qt., 60 cts.; ½ gal. can, \$1; gal. can, \$2.

## NICOTICIDE

For fumigating or spraying. Used effectually for greenfly, mealy bug, red spider and thrips. Does not

damage the foliage or flowers of the most tender plant. Sold in cans as follows: No. 1, containing 1 pt., sufficient for 32,000 cubic feet of space, \$2.50 each; No. 2, containing ¼ pt., sufficient for 16,000 cubic feet of space, \$1.25; No. 3, containing ¼ lb., sufficient for 8,000 cubic feet of space, 70 cts. Per gal., \$18.

## NICOTICIDE FUMIGATORS

Consisting of pan, wire-frame and the lamp, are very durable, and will last for years. Price, 50 cts.

Full directions for using both compound and fumigators are printed on each can.

## PARIS GREEN

Mixed at the rate of 1 lb. to 200 gallons of water, it will prove effective against all chewing insects. Per 1-lb. can, 35 cts.; ½-lb. can, 20 cts.; ¼-lb. can, 15 cts. This article is liable to fluctuate in price.

## SLUG-SHOT (HAMMOND'S)

Excellent for destroying cabbage, turnip and beet fly, potato bugs, currant worms, etc. 5-lb. package, 30 cts.; 10-lb. package, 50 cts.; 100 lbs. \$4.

## SULPHUR, POWDERED

Valuable for protecting against mildew on grapes, roses, etc. Per lb., 10 cts.; 10 lbs., 60 cts.; 100 lbs., \$4.

## SULPHO-TOBACCO SOAP

Dissolve in proportion of 2 ounces to a gallon of water, and apply with a syringe or atomizer. It will destroy rose slugs, aphides, greenfly, bark-lice, etc. Per 3-oz. box, 10 cts.; 8-oz. box, 20 cts.; 10-lb. box, \$3.

## TOBACCO DUST

If dusted on *while the foliage is moist* it destroys rose lice, cabbage and turnip fleas, etc. Spread upon the ground, it keeps off all earth insects. Per 1-lb. box, 10 cts.; 5-lb., 30 cts.; 10-lb., 50 cts.; per 100 lbs., \$2.50.

## TOBACCO STEMS

For fumigating plants infested with greenfly. Per bag of about 100 lbs., \$1.50; 200 lbs., \$2.75; 400 lbs., \$4.50.

## "ROSE LEAF" TOBACCO EXTRACT

A perfectly pure, highly concentrated extract of tobacco, most effective for destroying all insects and scale on plants. Pint cans, 30c.; qt., 50c.; gal., \$1.25.

## WHALE-OIL SOAP

For washing trees and destroying all insects on the bark. Per 1-lb. box, 15 cts.; 5 lbs., 50 cts.; 10 lbs., 90 cts.; 100-lb. keg, \$7.

## BORDEAUX MIXTURE, or FUNGIROID

For all fungous diseases. Dry, 1-lb. box, 20 cts.; 4 lbs. and over at 15 cts. per lb.; 50-lb. keg, \$6; liquid, 1 gallon, \$1.25.

# Thorburn's High-Grade Fertilizers

## THORBURN'S LAWN FERTILIZER

Per ton, \$48; single bags of 167 lbs., \$4.50; per bag of 100 lbs., \$3; 50 lbs., \$1.75; 25 lbs., \$1; 10 lbs., 50 cts.

## CLAY'S CELEBRATED FERTILIZER

Undoubtedly one of the best manures for all horticultural purposes, either in greenhouse or garden. 1 cwt. (112 lbs.), \$7; ½ cwt. (56 lbs.), \$4; ¼ cwt. (28 lbs.), \$2.25; ⅛ cwt. (14 lbs.), \$1.25.

## PULVERIZED SHEEP MANURE

A very rich, pure natural manure. It is excellent as a top-dressing for lawns. There is nothing better for mixing with the soil for greenhouse plants—one part manure and six parts soil. 5-lb. package, 30 cts.; 10 lbs., 50 cts.; 50 lbs., \$1.25; 100 lbs., \$2; ton, \$30.

## PURE GROUND BONE MEAL

This finely pulverized ground bone is excellent for rose culture. It decomposes very rapidly, and is more quickly effective than the coarser grade. It is excellent for mixing with the soil for potting. 5 lbs., 25 cts.; 50 lbs., \$1.25; 100 lbs., \$2; per ton, \$32.

## CANADA HARD-WOOD ASHES

We quote only the very highest grade, extra-scrubbed, unleached, analysis guaranteed. For top-dressing for lawns, especially if the soil is inclined to be stiff or sour, there is nothing better. Besides the high fertilizing value, the 30 per cent of lime in these ashes sweetens the soil and keeps away insects. In barrels of 200 lbs., \$3; per ton, \$20.

**ALBERT'S PLANT-FOOD***The Best Fertilizer for House Plants*

This celebrated plant food, made in Germany, is a scientific preparation containing in a highly concentrated and easily soluble form the food elements re-

quired by plants. It is odorless, clean to handle, quick in its action and unequaled in its effects. It is put up in attractive tins with full directions for use printed on each, and containing inside a small spoon holding the exact quantity required for dissolving in a quart of water. By its application plants acquire a sturdier growth, fuller development and a manifold increase in bloom.

For palms, ferns, India-rubber plants, bulbs and all kinds of pot-plants, it is by far the most complete, most effective, most economical and easiest applied fertilizer made. 15 cts. per tin; by mail, 8 cts. extra.

**CEDAR FLOWER OR TREE TUBS**

These are made of Virginia white cedar, painted green, with hoops, handles and leg-castings painted black. The bottoms are perforated and are removable.

# Thorburn's Special Collections of Choice Bulbs

 THESE ASSORTMENTS ARE MADE UP OF THE FINEST STANDARD SORTS  
AND MAY BE RELIED UPON TO GIVE SATISFACTION

## No. 1. Collection of Choice Bulbs for House Culture

**Price, \$2.50.**

If ordered by mail, add 40 cents for postage

6 White Roman Hyacinths	6 Trumpet Narcissus, Princeps
6 Fine Named Dutch Hyacinths	6 Double Narcissus, Van Sion
6 Fine Mixed Dutch Hyacinths	6 Poet's Narcissus
12 Fine Mixed Single Tulips	12 Mixed Spanish Iris
12 Fine Mixed Double Tulips	6 Campernelle Jonquils
30 Mixed Crocus	6 Freesia refracta
6 Polyanthus Narcissus	

## No. 2. Collection of Choice Bulbs for House Culture

**Price, \$4.75. Postage or Expressage extra**

Consists of the same varieties as Collection *No. 1*, but with double the number of each sort.

## No. 3. Collection of Choice Bulbs for House Culture

**Price, \$9. Postage or Expressage extra.**

Consists of the same varieties as Collection *No. 1*, but with four times the number of each sort.

## No. 4. Collection of Hardy Bulbs for Outdoor Culture

**Price, \$2.**

If ordered by mail, add 40 cents for postage

6 Mixed Double Red Hyacinths	12 Mixed Double Anemones
6 Mixed Single Blue Hyacinths	1 Crown Imperial
6 Mixed Single White Hyacinths	12 Spanish Iris
24 Mixed Early Tulips	6 Double White Narcissus
50 Mixed Crocus	6 Butter-and-Eggs Narcissus

## No. 5. Collection of Hardy Bulbs for Outdoor Culture

**Price, \$3.75. Postage or Expressage extra.**

Consists of the same varieties as Collection *No. 4*, but with double the number of each sort.

## No. 6. Collection of Hardy Bulbs for Outdoor Culture

**Price, \$7. Postage or Expressage extra**

Consists of the same varieties as Collection *No. 4*, but with four times the number of each sort.

CATALOGUE OF

## *Bulbs and Flowering Roots for Fall Planting*

August 15, 1906

**T**HE growing of bulbs for winter and spring flowering is very interesting and very easy. If the directions given in this Catalogue are observed, there need be no disappointment with the results. Many of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of flowers may be had from December till May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. There is nothing more refreshing than the first Snowdrop of spring. It appears before the snow is right off the ground, and is quickly followed by the Chionodoxa, or "Glory-of-the-Snow," the bright and variously colored Crocuses and Scillas and the lovely Daffodils. Then come the gorgeous lawn displays of Hyacinths and Tulips. All these are produced from bulbs planted in the fall.

We invite special attention to the collections of bulbs offered on the second page of cover, both for indoor and outdoor cultivation. They contain only sorts that will insure satisfaction. The cultural directions found under the respective headings are also worthy of careful attention.

Our Bulbs are all selected, and from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation and often sold at auction, and otherwise, at very low prices.

**NAME and ADDRESS.** We often receive orders with either the name or the address of the sender omitted. As we can do nothing with them, the customer thinks his order is being neglected. We, therefore, beg our correspondents to write on each order their name and full address.

**ORDERS** should be sent as soon as possible after receipt of this Catalogue. The bulbs will be sent in proper time for planting. They are ready from September to November, according to the time of ripening and the country from which they come. Orders booked earliest are surest of being filled as ordered. If left too late, the supply of some of the varieties may be exhausted.

Please address all orders and remittances to

J. M. THORBURN & CO.

NEW YORK

# HYACINTHS

*Ready for delivery in September*

The Hyacinth is one of the most popular and beautiful of spring-flowering plants for indoor and outdoor decorations. By careful management in keeping up a succession, they may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground they are unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

Group of Hyacinths

**OUTSIDE CULTURE.**—October is the month to plant Hyacinths outside. They succeed best in a light soil and in a sunny situation. If the soil is naturally heavy, some sand should be mixed with it; and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly.

Care must be taken not to press the earth too firmly

around and over the bulbs; some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has become frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field mice, which may burrow in it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibry loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until the pots are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be always applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.**—Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

Persons unacquainted with the different varieties will do well to leave the selections to us, only specifying in their orders whether the bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortments of named Hyacinths of our selection offered on page 4, and to the Hyacinth Glasses which are described at the end of the Catalogue.

The names of our Hyacinths and Tulips are those given to them by the originators in Holland, and are not sold under fancy names manufactured in this country.

## SELECT NAMED HYACINTHS

N. B. *Our selected named Hyacinths are the cream of the Holland Nurseries under their original names. For forcing in pots or for outdoor beds they far surpass the class of bulbs usually sold.*

The single-flowered varieties are generally more effective than the Double ones. They also, as a rule, succeed better in glasses. The Double varieties are distinguished by an asterisk (\*) and those of them that do well in water by two asterisks (\*\*).

*If ordered by mail, please add 15 cts. per dozen for postage. Three of a kind sold at the dozen rate.*

## GROUPS OF HYACINTHS FOR DESIGN BEDDING

To obviate the disappointment resulting from selecting unsuitable varieties for design beds, we give the following groups of some of the sorts that bloom about the same time and grow to the same height. They will all form most effective combinations. We recommend **named** sorts for design bedding as decidedly better than mixtures.

{ Baron Thuyll, Red.  
Alba Superbissima, White.  
Charles Dickens, Blue.

{ Gigantea, Red.  
Grandeur a Merveille, White.  
Baron van Thuyll, Blue.

{ Robert Steiger, Red.  
Mad. Vanderhoop, White.  
Marie, Blue.

{ General Pelissier, Red.  
Baroness van Thuyll, White.  
Grand Maitre, Blue.

{ Norma, Red.  
La Franchise, White.  
La Peyrouse, Blue.

Single Hyacinths.

## MIXED HYACINTHS IN SEPARATE COLORS

*The very largest size. Suitable either for forcing or bedding*

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all of the largest size. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

*If ordered by mail, add 10 cents per dozen for postage. Three of a color at dozen rates, 25 of a color at 100 rates.*

## ROMAN HYACINTHS

Extensively used by florists for forcing for cut-flowers. For this purpose they are the best and most popular of bulbs. The flowers are pure white, delightfully fragrant, and each bulb will throw up from three to four

spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early, and by making successive plantings they may be had in flower all through the winter. The blue and rose Roman Hyacinths flower from one to two weeks later than the white variety.

## ITALIAN HYACINTHS

These are grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are hardier than the Romans, and may also be planted outside in the fall for flowers for early spring cutting.

## MINIATURE HYACINTHS

These are also known as “Dutch Roman” and “Pan Hyacinths.” They are very suitable for growing in groups in pots or earthen pans. We offer them in separate colors, and also mixed, as follows:

Pure White, Cream-White, Dark Red, Rosy Red, Light Blue, Dark Blue and Yellow. 40c. per doz., \$2.75 per 100.  
Mixed, All Colors. 40 cts. per doz., \$2.50 per 100.

Roman Hyacinths.

# TULIPS

*Tulips are ready for delivery in September*

For beauty of form and brilliancy of coloring, Tulips are unequaled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers can select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers, they are also invaluable.

**CULTURE.**—The cultural directions given for hyacinths, on page 2, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the

## TULIPS, continued

bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November, before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open border.

A, B and C indicate season of flowering. A and B may be planted to flower about the same time in the open ground; C flowers later.

## SINGLE EARLY TULIPS

If ordered by mail, add 5 cents per dozen or 30 cents per 100 for postage. Six of a kind at dozen rates, 25 of a kind at 100 rates.

Pales. Soft lilac .....	08	60	3 50
Mixed Darwins. All sorts .....	per 1,000, \$12.....05	35	2 00

## PARROT TULIPS

For outdoor cultivation. The petals of these have feathered edges, and in addition to other colors combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant color, and form very effective groups for the flower border. To get the best results they must have the full effect of the sun. Very late in flowering.

If ordered by mail, add 6 cents per dozen for postage.

## MIXED TULIPS

For bedding. Planted in large masses, these make a magnificent show, and, being inexpensive, should be largely used. Our special mixtures of Early Single and Early Double Tulips are made up of the finest bulbs and the brightest colors. If planted in large beds, they will produce an exceedingly beautiful and lively effect.

If ordered by mail, add 6 cents per dozen for postage.

No. 4. Eight each, same 12 varieties as in Collection No. 1 (96 named bulbs).....2 25

# NARCISSUS

*Narcissi are Ready for Delivery in September*

The very beautiful species and varieties of *Narcissus* are among the most popular and largely grown of spring-flowering bulbs, and that deservedly, too, for they are certainly "the fairest among them all." Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them. To know them is to love them, and to love them is a liberal education.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, or lakes, or ponds, and in mixed flower or shrubbery borders. They are also suitable for naturalizing in the grass, by the side of woodland walks or in open spaces between trees and shrubs. With the exception of the *Polyanthus* section, they are all perfectly hardy.

*Narcissi* are also very suitable for growing in pots, requiring about the same treatment as hyacinths, with 3 or 4 bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers.

## SINGLE NARCISSUS, or DAFFODILS

*If ordered by mail, add 13 cents per dozen for postage.*

	Each	Doz.	100
<b>Ard Righ</b> (Irish King). Magnificent golden yellow trumpet; very large and graceful. One of the earliest and finest for forcing.....	\$0 10	\$0 85	\$5 00
<b>Barri Conspicuus</b> . Lovely shape; broad sulphur petals, heavily stained orange-scarlet. Very long-stemmed and graceful; fine for cutting.....	05	40	2 00
<b>Bicolor Horstfieldii</b> . "Queen of Daffodils." Rich golden yellow trumpet; pure white and well-expanded perianth; a magnificent flower; fine forcer.....	06	50	3 00
<b>Bicolor Empress</b> . One of the largest and most beautiful; white perianth and rich golden yellow trumpet; an excellent forcer.....	06	50	3 25

“ <b>Poetarum</b> . Pure white, with very bright orange-scarlet eye.....	05	45	2 50
<b>Princeps</b> . Sulphur-yellow perianth and deep yellow trumpet; long, handsome flower; valuable for forcing or outdoor culture. A splendid variety.....	05	30	1 50
<b>Single Van Sion</b> . Yellow.....	05	40	2 00
<b>Tenuior</b> (Silver Jonquil). Handsome dwarf variety; sulphur-white. 5c. each, 45 cts. per doz., \$2.25 per 100.			
<b>Trumpet Major</b> . Large, early; deep golden yellow; earliest for forcing. 5c. each, 45c. per doz., \$2.25 per 100.			
<b>Mixed Early Single</b> . All sorts. 5c. each, 25 cts. per doz., \$1 per 100.			

DOUBLE NARCISSUS,  
or DAFFODILS

If ordered by mail, add 12 cents per dozen for postage.

**Albus plenus odoratus**. Double, pure white, very sweet-scented; for outdoors. 5 cts. each, 30 cts. per doz., \$1.25 per 100.

**Incomparabilis** (Butter and Eggs). Lemon and orange; fine for forcing or outdoors. 5 cts. each, 35 cts. per doz., \$1.75 per 100.

**Orange Phoenix** (Eggs and Bacon). Very large double white and orange flower of great beauty; splendid for pot culture. 5 cts. each, 45 cts. per doz., \$2 25 per 100.

**Sulphur Crown**, or **Silver Phoenix**. Most beautiful, pure white; very double. 8 cts. each, 65c. per doz., \$4 per 100.

**Tazetta** (Roman). Very early; double yellow; for forcing and pot culture. 5 cts. each, 45 cts. per doz., \$2.50 per 100.

**Van Sion**. The largest double yellow trumpet variety; extra fine for forcing, and most largely grown by florists for winter cut-flowers. Our bulbs are Dutch-grown, of the pure golden yellow variety, and the largest size. 5 cts. each, 45 cts. per doz., \$2.50 per 100, \$17 per 1,000.

**Van Sion, Double-nosed Bulbs**. 6 cts. ea., 60 cts. per doz., \$3.50 per 100, \$24 per 1,000.

Single and Double Narcissi

## POLYANTHUS NARCISSUS

Invaluable for forcing. All very early; flowers exceedingly fragrant; may be grown in glasses or pots. If planted in open borders, must be protected over winter by a covering of litter.

If ordered by mail, add 20 cents per dozen for postage.

**Bazelman Major.** Broad white perianth, deep yellow cup; largest of all. 20 cts. each, \$2 per doz.

Paper White Narcissus

**Bathurst.** Yellow. 8 cts. each, 75 cts. per doz., \$4.50 per 100.

**Gloriosus.** White perianth, deep orange cup; very striking. 8 cts. each, 65 cts. per doz., \$4 per 100.

**Grand Monarque.** White, with yellow cup; very large flower; vigorous grower. 8 cts. each, 65 cts. per doz., \$4 per 100.

**Grand Soleil d'Or.** Yellow, with orange cup; very free-blooming. 6 cts. each, 60 cts. per doz., \$3.50 per 100.

**Grand Primo.** White, lemon cup. 6 cts. each, 60 cts. per doz., \$3.50 per 100.

**Jaune Supreme.** Primrose, orange cup. 10 cts. each, 85 cts. per doz., \$5 per 100.

**Lord Canning.** Yellow; extra fine; profuse bloomer. 8 cts. ea., 75c. per doz., \$4.50 per 100.

**Muzart Orientalis.** White, orange cup. 6 cts. each, 60 cts. per doz., \$3.50 per 100.

**Mont Cenis.** Very large handsome flowers, pure white, with yellow cup. 10 cts. each, \$1 per doz., \$6.50 per 100.

**Newton.** Pure yellow, with orange cup; extra fine. 8 cts. ea., 75c. per doz., \$4.50 per 100.

**Paper White, Large-flowering.** Very early, and largely forced for cut-flowers. Beautiful clusters of large pure white flowers. 5 cts. each, 45 cts. per doz., \$2.50 per 100.

**Paper White, grandiflorus multiflorus.** Very large and free-flowering. 6 cts. each, 50 cts. per doz., \$3 per 100.

**Queen of the Netherlands.** White, yellow cup. 8 cts. each, 75 cts. per doz., \$4.50 per 100.

**Queen Victoria.** White, with yellow cup; large, handsome flower. 8 cts. each, 75 cts. per doz., \$4.50 per 100.

**Staten General.** White, with primrose yellow cup; free bloomer. 6 cts. each, 60 cts. per doz., \$3.50 per 100.

**White Pearl.** Perianth pure white, cup primrose; fine for cutting. 6 cts. each, 60 cts. per doz., \$3.50 per 100.

**Mixed.** All sorts. 5 cts. each, 40 cts. per doz., \$2.50 per 100.

## JONQUILS

A class related to the Narcissus, and suitable alike for pot culture or planting out. The culture required is the same as for Hyacinths.

If ordered by mail, add 6 cents per dozen for postage.

	Each	Doz.	100	1,000
Single Yellow Sweet-scented.....2 for 5 cts..		\$0 20	\$0 85	\$6 00
Large Single (Campernelle). Yellow.....	\$0 05	20	1 00	7 00
Odorus rugulosus. An improved Campernelle; deep yellow, large, crinkled flowers; fragrant.....	05	25	1 25	
Large Double. Deep golden yellow, very double, delightfully fragrant; fine for forcing..	05	40	2 00	
Silver Jonquil ( <i>Narcissus tenuior</i> ).....	05	45	2 25	

# LILIES

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a rich, deep loam, they all do best in a light, well-drained soil. Some peat or leaf-mould may be used to advantage. *L. auratum* cannot bear manure, but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

*Lilium Harrisii* and *Lilium candidum* ready in August; others not until November.

## LILIUM HARRISII (BERMUDA EASTER LILY)

*Bulbs ready now; large sizes very scarce*

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, and last a long time

after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decoration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

*If ordered by mail, add from 10 to 20 cents per dozen for postage, according to size.*

5 to 7 inches in circumference, 10 cts. each, \$1 per doz., \$6.50 per 100.

7 to 9 inches in circumference, 25 cts. each, \$2.50 per doz., \$15 per 100.

9 to 11 inches in circumference, 60 cts. each, \$6 per doz.

## LILIUM LONGIFLORUM

*If ordered by mail, add 3 cents each for postage*

Owing to the very unfavorable season in Bermuda, *Harrisii* Lilies are very scarce. We are, therefore, importing a large quantity of Japan longiflorums, a similar and very beautiful Lily, to help cover the shortage on *Harrisii*.

6 to 8 inches in circumference, 10 cts. each, 85 cts. per doz., \$5.50 per 100.

7 to 9 inches in circumference, 15 cts. each, \$1.50 per doz., \$9 per 100.

8 to 10 inches in circumference, 20 cts. each, \$2 per doz., \$12 per 100.

**Multiflorum.** 6 to 8 inches in circumference, 12 cts. each, \$1 per doz., \$6 per 100.

7 to 9 inches in circumference, 15 cts. each, \$1.50 per doz., \$9 per 100.

**Multiflorum giganteum.** 6 to 8 inches in circumference, 20 cts. each, \$1.75 per doz., \$10 per 100.

7 to 9 inches in circumference, 25 cts. each, \$2.25 per doz., \$14 per 100.

## BEAUTIFUL JAPAN LILIES

These do not generally arrive until November and December. We import our supply direct from Japan every year. Every garden should have some of these most beautiful and easily grown Lilies.

*Postage on these varieties from 2 to 10 cents on each, according to size.*

**Auratum** (Gold-banded Lily). The grandest of all hardy Lilies; flowers white, spotted with maroon, having a bright yellow band through the center of each petal. The plant grows from 3 to 6 feet high.

8 to 9 inches in circumference, 12 cts. each, \$1.25 per doz., \$8 per 100.

9 to 11 inches in circumference, 20 cts. each, \$2 per doz., \$12 per 100.

11 to 13 inches in circumference, 35 cts. each, \$3.50 per doz., \$20 per 100.

**Auratum macranthum, or platyphyllum.** A splendid variety of the above, with much larger flowers; of perfect form and great substance; 5 to 8 feet, 40 cts. each, \$4 per doz.

*Lilium Harrisii*

Types of Lilies

## VARIOUS LILIES

If ordered by mail, add 3 cents each for those marked (\*); others 2 cents each, for postage.

- \***Atrosanguineum (Fulgens).** Dark crimson, black spots. 25 cts. each, \$2.25 per doz.
- \***Brownii.** Most beautiful flowers of immense size, inside creamy white, outside shaded chocolate-purple; a splendid pot-plant;  $2\frac{1}{2}$  to  $3\frac{1}{2}$  feet high. 50 cts. each, \$5.50 per doz.
- Canadense.** Our native "Meadow Lily." Graceful, drooping, bright yellow flowers, spotted red;  $1\frac{1}{2}$  to 3 feet. 10 cts. each, \$1 per doz.
- Canadense rubrum.** Red flowers. 15 cts. each, \$1.50 per doz.
- \***Candidum** (Madonna Lily; St. Joseph's Lily). The common garden Lily. Large, pure white, very sweet-scented flowers; valuable for forcing; 2 to 3 feet. 15 cts. each, \$1.50 per doz., \$9 per 100.
- \***Candidum flore pleno.** Double white. 50c. each, \$5 per doz.
- Chalcedonicum** (The true Scarlet Turk's Cap Lily). Brilliant scarlet, recurved flowers; 3 feet. 60 cts. each, \$6 per doz.
- \***Colchicum (Monadelphum).** Citron, black spots; a splendid Lily; 2 feet. 70 cts. each.
- Excelsum (Testaceum).** Lovely cream-colored flowers, tinged with apricot; very fragrant; 5 feet. 70 cts. each, \$7 per doz.
- \***Giganteum.** A magnificent species, growing 6 to 10 ft. high, and bearing many large funnel-shaped flowers 5 to 6 in. long; color white, with purple throat; extra large. \$4 ea,

## JAPAN LILIES, continued

**Auratum rubro-vittatum.** Enormous flowers, sometimes measuring 10 inches across; pure white, beautifully spotted, and with a deep crimson stripe through center of each petal; very fragrant. 65 cts. each, \$7 per doz.

**Auratum pictum.** Flowers like those of the common Auratum, with yellow band through each petal. It is beautifully spotted with rich crimson. 40 cts. each, \$4 per doz.

**Auratum Wittei.** Very large, pure white flowers, with raised spots of satiny white; a grand Lily; 4 to 6 feet. 75 cts. ea., \$8 per doz.

**Auratum Virginal.** Very large, pure white flowers, with yellow band through center of each petal; a magnificent variety, growing from 4 to 6 feet high. 50c. each, \$5 per doz.

**Speciosum album Kraetzeri.** Beautiful pure white flowers of large size; 2 to 4 feet high; one of the handsomest and easiest grown Lilies we have. 8 to 9 inches, 20 cts. each, \$2 per doz.

9 to 11 inches, 30c. each, \$3 per doz.

**Speciosum rubrum.** White, shaded rose and spotted deep red; 2 to 4 feet high. 9 to 11 inches, 20 cts. each, \$2 per doz.

**Speciosum rubrum Melpomene.** Very dark crimson-spotted flowers of large size and striking appearance; 2 to 4 feet high. 9 to 10 inches, 25c. each, \$2.50 per doz.

**Batemanni.** Richly colored, unspotted flowers of bright apricot tint; a most beautiful variety; 3 to 4 feet high. 25 cts. each, \$2.50 per doz.

**Krameri.** White, slightly tinged with red; sweet-scented. 20 cts. each, \$2 per doz.

**Leichtlinii.** Orange-red, with crimson spots; 2 to 3 feet high. 25 cts. each, \$2.50 per doz.

*Lilium auratum*

## LILY - OF - THE - VALLEY (CONVALLARIA MAJALIS)

Ready in November

One of the most beautiful and admired spring-flowering plants, and universally sought for, its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent.

It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them.

**Clumps.** Fine large clumps, with many flowering pips on each. Fine for planting outside in shaded positions, and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per dozen.

**Pips for forcing.** 50 cts. per bundle of 25, \$1.75 per 100, \$14 per 1,000.

CHINESE SACRED LILY  
(THE WATER FAIRY FLOWER)

Ready in September.

If ordered by mail, add 5 cts. each or 25 cts. per dozen for postage.

A variety of the *Polyanthus Narcissus*, imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs entirely, and place in a sunny window in a cool room.

Price, 10 cts. each, 80 cts. per doz.

Lily-of-the-Valley

## ANEMONE, or WINDFLOWER

Very ornamental hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

*If ordered by mail, add 15 cents per 100 for postage.*

*Anemone Japonica*

Amaryllis

## AMARYLLIS

Ready in October

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mould or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to

preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

	Each	Doz.
<b>Aulica</b> (Lily-of-the-Palace). Very large, handsome flowers; crimson, shaded with green.....	\$1 00	
<b>Belladonna major</b> . Violet and white; flowers in large umbels; fragrant....	25	\$2 50

## ARUMS

Ready for shipment in September and October

A genus of curious and ornamental perennials, with peculiar and distinct foliage and flowers. They make handsome pot-plants, and are also very effective in subtropical gardening. *A. Dracunculus* is hardy, and may be left in the ground over winter, with a little covering. The others should be potted in the autumn and kept dormant till spring. They are all of easy cultivation, requiring rich soil and plenty of water during the growing season. A compost of rich loam, with a third of well-rotted manure and some sand, is very suitable.

If ordered by mail, add 3 cents each for postage.

	Each	Doz.
<b>Crinitum</b> . Marble stems; broad, flesh-colored, spotted flowers, covered with hairs...\$0 30		\$3 00
<b>Cornutum</b> (Red Calla). Flowers red, spotted black, stems mottled; handsome pot-plant; flowers without water or soil.....	15	1 50
<b>Dracunculus</b> (Dragon-flower). A striking and very ornamental plant for pots or garden. It grows to a height of 3 feet, with mottled stem and handsome foliage.....	15	1 50
<b>Italicum</b> . A hardy species from the Channel Islands, with creamy white flowers.....	05	50
<b>Maculatum</b> . A fine decorative plant; flowers white; green foliage, spotted black.....	10	1 00
<b>Palaestinum sanctum</b> (Black Calla). From the Lebanon mountains. A splendid pot- and chamber-plant, with fine dark green foliage, large black spathe and black spadix.....	per 100, \$12..	20 2 00

Arum Palaestinum sanctum

# BEGONIA GRANDIFLORA, TUBEROUS-ROOTED

Ready in November and December

Splendid pot-plants for the house or greenhouse, and especially valuable for bedding, flowering in the greatest profusion throughout the summer. For bedding they should be started in hotbed in March and April. The hollow end of the bulb should be up and but slightly covered. They should get very little water until the plants are growing.

## BRODIAEAS

Ready in September

Very pretty, hardy, bulbous plants from the Pacific coast. They have narrow, grassy leaves, slender stems, and a head or umbel of lily-like flowers. Suitable for forcing or outdoor culture. They do best in rich, sandy loam. If grown in pots, a compost of loam, leaf-mold and sand is recommended.

## CROWN IMPERIALS

(Fritillaria imperialis)

A stately-growing plant, with dark green foliage, and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring, and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil; the flowers will be larger and of fine coloring, as well as more enduring.

Crown Imperial

# CROCUS

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted close,—say 2 inches apart,—and 3 inches deep, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful.

For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

If ordered by mail, add 15 cents per 100 for postage.

## HYBRID NAMED CROCUS

Composed of the most beautiful varieties; remarkable for richness of color and immense size. These varieties are best for forming letters or designs on the lawn, for which purpose they may be planted without disturbing the grass, by the use of a dibble or a narrow trowel. The flowers are produced very early, and the mowing later on will not seriously injure the Crocus bulbs.

If ordered by mail, add 25 cents per 100 for postage.

## CALOCHORTUS

(Mariposa Lily, or Butterfly Tulip)

Ready in September

Very handsome bulbous plants from California. They are remarkable for the brilliancy and variety of their coloring, and their gracefulness of habit. They grow freely in light, sandy loam; though hardy, they should be protected during winter with litter. They may also be successfully grown in frames and in pots

If ordered by mail, add 5 cents per dozen for postage

## CYCLAMEN

Most of them ready in November

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The *C. giganteum* is an improved strain of the old *C. persicum*, having much larger and more brilliantly colored flowers, and producing them more abundantly. We offer seed of our superb strain of these at the end of this Catalogue.

*Fritillaria recurva*

## FREESIA

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in a light, sandy soil, in a frame or greenhouse, and are excellent for window culture in winter; one plant will perfume a large room, but not in the persistent manner of a tuberose. The plant has tooth-shaped bulbs and flat, spreading leaves. For the information of all not acquainted with these bulbs, we may say that they are quite small, and produce large blooms in comparison to their size

**Freesia refracta alba.** Pure white and sweet-scented; very largely forced. The flowers are 2 inches long, and about the same in width, shaped like miniature gladioli, and in clusters of 6 to 10, on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. The fragrance is remarkable and very lasting.

*Freesia refracta alba*

MESSRS J. M. THORBURN & CO., New York.

Gentlemen.—I duly received the hyacinths and calla bulbs sent by you some time ago, and the amaryllis sent on the 2d inst., and am greatly pleased with the size and quality of the bulbs, and with the care and attention displayed in attending to my order, as well as former orders which you have filled. I shall take pleasure in recommending your firm. I am, gentlemen,

Very truly yours,

STANSTEAD PLAIN, QUEBEC, November 8, 1904.

(Signed) CHARLES M. THOMAS.

# GLADIOLUS

*Ready in November*

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse, except *Byzantinus*, which is hardy, and may be planted out; it is best, however, to give it slight protection. Some varieties are successfully forced.

The French Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty. Every year is now adding varieties of most exquisite tint and shade; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published January 1.

*If ordered by mail, add 5 cents per dozen for postage.*

	Each	Doz.	100
<b>Autumn Giant.</b> ( <i>New</i> ). Bright scarlet to deep crimson flowers, with large deep yellow throat. Grows 3 to 4 feet high, with spikes of bloom sometimes 2 feet long. # GLOXINIAS

*Ready in November*

Gloxinias are among the most beautiful of greenhouse plants, the flowers being remarkable for the intensity and variety of their colorings, and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mould and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large-sized, and of erect flowering strain.

## CRINUMS

Splendid large flowering bulbs, closely allied to the *Amaryllis*. The most suitable soil is a compost of turfy loam, cow manure and some sand. They should be grown in large pots or in tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a coolhouse and allowed to rest till new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure water during the growing season. They may be placed outside when warm weather begins, and will flower all through the summer, making splendid lawn or veranda plants.

	Each
<b>Giganteum, Giant White.</b> Immense bulbs; large white flowers; blooms all summer; very fragrant. They should be watered plentifully while growing.....	\$2 00
<b>Amabile, Giant Pink.</b> Extra large, bright pink, with white stripe; splendid flower; enormous bulb. This and the Giant White are unsurpassed for growing in tubs, blooming profusely outside all summer.....	2 00

“ <b>album.</b> Pure white.....	70

Ixias

## IXIAS Ready in October

The Named Hybrid *Ixias* are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the *Ixias* attract much attention.

Erythronium

## ERYTHRONIUMS

(DOG'S-TOOTH VIOLETS) Ready in September

Very ornamental, hardy, bulbous plants, of neat and dwarf habit. They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in sheltered positions on rockeries, or in mixed flower or shrubby borders.

	Each	Doz.	100
<b>Californicum.</b> Cream-yellow, with maroon band at base; leaves very richly mottled. The finest of all.....	\$0 08	\$0 65	\$4 50
<b>Californicum, White Beauty.</b> Flowers more nearly white than <i>Californicum</i> ; leaves richly mottled.....	10	80	5 00
<b>Giganteum</b> (Giant Dog's-tooth Violet). Very large, straw-colored flowers, with orange center, borne on long, slender stems; the foliage is richly mottled in dark brown and its elegant habit makes a very attractive pot-plant for window decoration.....	08	65	4 50
<b>Citrinum.</b> Leaves mottled; flowers yellow....	08	65	4 50
<b>Grandiflorum.</b> Leaves unmottled; flowers bright yellow, with recurved petals.....	08	65	4 50

<b>Dens-canis</b> (Dog's-tooth Violet). Mixed colors; very pretty; leaves blotched in brown and white.....	05	30	1 50

IRIS (FLEUR-DE-LIS) Ready in October and November

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light, rich, sandy soil, and in a sunny situation. Good drainage is important. The newer varieties of *Iris Kämpferi*, from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 or 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms, measuring 8 to 10 inches across, and of the most delicate and beautiful colors, markings and combinations. These require a liberal supply of water when growing. With the exception of *Morea pavonia* and *Tuberosa*, all varieties are hardy.

SUPERB COLLECTION OF LARGE-FLOWERED JAPAN IRISES

(*Iris Kämpferi*)

We are importing from Japan a large supply of the following twenty-four newest and best of these magnificent Irises, which excel in size, perfection of form and richness of color, any ever shown. They come in large extra-strong clumps.

	Each	Doz.	100

<b>Mixed Common Small-flowered Japan Iris, Single and Double</b> .....	08	60	3 00

SPANISH IRIS (*Iris Hispanica*)

Very profitable for florists, who are planting them largely for cut-flowers. Plant in beds in the open as soon as received in the autumn, and protect slightly in the winter months. In the beginning of April cover the beds with glass, so as to have the flowers ready for cutting in May.

## LACHENALIAS

*Ready in September*

Very pretty, spring-flowering, greenhouse, bulbous plants, with brightly colored flowers and elegant habit. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mould and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air, and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging baskets.

	Each	Doz.
<b>Luteola.</b> Pale yellow flowers, flushed with green.....	\$0 25	\$2 50
<b>Pendula.</b> Very handsome, large and showy species, with broad foliage and rich red flowers, tipped with black.....	25	2 50
<b>Quadricolor.</b> Bright green, red and yellow flowers; very pretty.....	25	2 50

<b>Versicolor.</b> Foliage heavily spotted brown; flowers yellow, tipped with green and red; very pretty for massing.....	15	1 50
<b>Hybrids Mixed</b> .....	12	1 25

## MONTBRETIAS

*Ready in November*

Hardy, summer-flowering, bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties:

	Each	Doz.	100
<b>Aurea.</b> Golden yellow.....	\$0 05	\$0 40	\$2 50
<b>Bouquet Parfait.</b> Large, bright vermillion flowers, with deep yellow center.....	\$0 05	\$0 40	\$2 00
<b>Crocasmiaeflora.</b> Large; bright orange, tinged scarlet.....	05	30	1 50
<b>Eldorado.</b> Large, golden yellow flowers; very floriferous; dwarf habit.....	05	40	2 25

<b>Arabicum.</b> White, with black center; valuable for forcing.....	\$0 05	\$0 45	\$3 00
<b>Pyramidale.</b> Showy spikes of white flowers.....	20	2 00	
<b>Umbellatum</b> (Star of Bethlehem). Outside green and white striped, inside satiny white; flowers in umbels; very showy....	05	30	1 50

Montbretias

NERINE

Ready in October and November

Very beautiful greenhouse bulbous plants succeeding best in pots, in light soil—say a compost of loam, leaf-mould and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die they should be kept quite dry in a cool place until they begin to grow again.

	Each	Doz.
<b>Corusca.</b> Brilliant scarlet flowers.....	\$0 75	
<b>Crispa.</b> Very handsome scarlet flowers.....	1 00	
<b>Flexuosa.</b> Bright crimson-scarlet, tinged with orange.....	1 25

<b>Japonica</b> ( <i>Lycoris radiata</i> ).....	per 100, \$5..	10 \$0 80
<b>Sarniensis</b> (True Guernsey Lily). Flowers brilliant crimson, in large clusters. The best known sort.....	50	4 50
<b>Undulata.</b> Rosy purple, wavy flowers; very handsome.....	75	

OXALIS

Ready in September

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging baskets. They are easily grown in a sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

	Each	Doz.	100
<b>Buttercup.</b> A splendid winter-blooming plant for pot culture. The flowers are pure bright yellow, and produced in great abundance. It is very easily cultivated, and, being a strong grower, only one or two bulbs should be planted in a 5- or 6-inch pot..... 1st size..	\$0 05	\$0 35	\$1 75

<b>Versicolor.</b> Red, violet and white.....	2 for 5 cts..	25	1 25
<b>Mixed</b> .....	3 for 5 cts..	15	75

PÆONIES

Ready in October

The old-fashioned double Pæonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Pæonies rank about first for lawn or flower-border or shrubbery decoration. They are all hardy.

HERBACEOUS CHINESE PÆONIES

<b>Atro-rubra plena.</b> Dark red.....	20	2 00
<b>Mutabilis plena.</b> Tender rose, passing to white.....	20	2 00

## RANUNCULUS

*Ready in September*

The main soil for these should be loam or clay, with a good dressing of rotten manure and leaf-mould; if heavy, add a little sand. The soil should be well drained, cool, deep, rich and moist. Plant late in the autumn, claws downward, from 4 to 6 inches apart and 3 inches deep, covering with fine, pulverized soil.

*If ordered by mail, add 3 cents per doz. for postage*

White Calla

**New Yellow-flowered, Spotted Leaf.** Grows about 2 feet high, with immense dark green leaves spotted and blotched with silvery white; flowers of medium size, pure bright yellow, with a black-purple blotch at base. Fine for spring planting. Blooms outside all summer .....

## RICHARDIAS, or CALLAS

*Ready in September and October*

Tall-growing, bulbous perennials of exceedingly graceful habit and very handsome foliage and flowers. They are easily cultivated in pots, requiring only a rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully replotting in September.

Each Doz. 100

<b>White Calla, or Lily-of-the-Nile</b> ( <i>Calla Æthiopica</i> ). Large, white, trumpet-shaped flowers of great substance. One of the most popular and ornamental of house and greenhouse plants. Largest size bulbs .....	\$0 25	\$2 25	\$14 00

	35	3 00	18 00

Scilla Sibirica

## SCILLAS

Ready in September

No garden can be complete without these beautiful flowers. *S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years. The effect in early spring of the intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the Snowdrop and the varied hues of the Crocus, can hardly be overestimated; are most valuable for permanent edging, or planted in bunches of a dozen or so.

If ordered by mail, add 5 cents per dozen for postage, except those marked with a (\*), to which add 2 cents each.

	Each	Doz.	100
<b>Sibirica.</b> Blue .....	\$0 05	\$0 35	\$1 75

“ <b>coerulea</b> (Blue Cuban Lily) .....	15	1 50

## SNOWDROPS

(GALANTHUS NIVALIS)

Ready in September

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms. Should be planted 2 to 3 inches deep, in a shady location.

Snowdrops

If ordered by mail, add 3 cents per dozen, or 25 cents per 100 for postage.

	Doz.	100	1,000
<b>Single-flowering Snowdrops</b> .....	\$0 20	\$1 00	\$8 00
<b>Double-flowering Snowdrops</b> .....	35	2 00	15 00
<b>Giant Snowdrops of Asia Minor</b> ( <i>Galanthus Elwesii</i> ).....	20	1 00	8 00

## TUBEROSES

Ready in December

The purity of color and rich perfume of the Tuberoses are well known. In this latitude May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich, warm soil and in a sunny situation. Cut off about a quarter of an inch from the bottom of the bulb before planting, and set so that the top will be one inch below the soil.

	Each	Doz.	100
<b>Dwarf Double Pearl.</b> Dwarf habit; large fine flowers of great substance.....	\$0 06	\$0 40	\$2 00
<b>Albino.</b> Purest white, single flowers .....	08	45	2 50
<b>Variegated Leaf.</b> Foliage striped white and green; single white flowers .....	10	60	3 00

Dwarf Double Pearl Tuberose

## SPIRÆA, or ASTILBE

*Ready in November*

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

**Japonica (Hoteia).** Excellent pot-plant for winter blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting. 15 cts. each, \$1.25 per doz., \$6 per 100.

**Japonica fol. aurea reticulata.** Beautiful gold-striped foliage; large panicles of pure white flowers. 15 cts. each, \$1.50 per doz., \$10 per 100.

**Japonica compacta multiflora.** The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.25 per doz., \$6.50 per 100.

**Astilboides floribunda.** Very large, pure white plumes; neat habit; very abundant bloomer. 15 cts. each, \$1.50 per doz., \$7 per 100.

**Palmata.** Crimson; strong clumps. 15 cts. each, \$1.50 per doz., \$7 per 100.

**Arunceus.** Handsome plant, with large plumes of pure white flowers. 25 cts. each, \$2 per doz.

**Hybrida Gladstone.** A new hybrid Spiræa, which excels all others in its profusion of snow-white plumes borne on strong stems one and a half feet long, standing erect above the foliage. The plant is perfectly symmetrical in shape, the foliage very handsome and the flowers exquisitely fragrant. The best of all for forcing. 20 cts. each, \$1.50 per doz., \$10 per 100.

**Spiræa Astilboides floribunda****Trillium sessile Californicum**

## TRILLIUMS

(AMERICAN WOOD LILY, or INDIAN SHAMROCK)

Hardy herbaceous perennials, succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are natives of North America, and are known by various common names in different localities. They have violently emetic roots.

	Each	Doz.	100
<b>Grandiflorum</b> ("Giant American Wood-Lily," or "Wake Robin"). Large white flowers, changing to rose; quite hardy, and easily grown in shaded positions .....	\$0 06	\$0 45	\$3 00
<b>Erectum</b> ("Birthroot"). Dark purple flowers; erect habit; about 1 foot high...	06	50	3 50
<b>Erectum album.</b> A white-flowered variety of the above .....	08	65	4 50
<b>Erythrocarpum.</b> Large, white flowers; grows about 1 foot high .....	15	1 50	
<b>Petiolatum.</b> A rare and very odd variety from Oregon, with each leaf on a separate petiole .....	15	1 50	
<b>Sessile Californicum.</b> Handsome, pure white flowers; prettily mottled foliage	12	1 25	7 00
<b>Sessile rubra.</b> Beautiful reddish purple petals .....	15	1 50	

# Miscellaneous Bulbs and Roots

Those marked with an asterisk (\*) will not be ready till October.

	Each	Doz.	100
	\$0 08	\$0 75	\$5 00
* <b>Achimenes</b> . Mixed. Lovely greenhouse pot-plants .....			
<b>Acidanthera bicolor</b> . A gladiolus-like plant, growing two feet high; flower-spikes pure white and sweet-scented, with a large triangular blotch in the center. Blooms during July and August. The bulbs must be kept warm and dry over winter.....	30	3 00	
<b>Aconite</b> . See <i>Eranthis</i> , page 33.			
<b>Allium</b> . Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.			
“ <b>Azureum</b> . Beautiful sky-blue flowers in large umbels; fine for pots or garden .....	08	60	4 00

# Hardy Annual and Perennial Flower Seeds

For Autumn Sowing

Many varieties of Flower Seeds, ANNUALS as well as BIENNIALS and PERENNIALS, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring.

The Gem Lawn Cleaner

A revolving fan with metal teeth creates an air current which carries into the canvas basket all leaves, dead grass, stones, etc., that the rake encounters. It straightens up crab grass and other running weeds so that they may be cut by the lawn mower. Price, \$14.

## LAWN SWEEPER, "MODEL NO. 1"

Designed for use on ordinary lawns, small parks, tennis courts, etc. It is 25 inches wide over all, weighs 28 pounds, and carries a 21-inch brush. The brush is fan-shaped, and revolves very rapidly in the same direction as the drive wheels, throwing the litter backward from the under surface. Price, \$11.

# Grass Seeds for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the end of September, so that the young grass may become well rooted before winter sets in. Our new-crop seed of the leading sorts is ready now.

## THE THORBURN LAWN GRASS (UNIVERSAL PARK MIXTURE)

Practically all the finest lawns in America were produced from this mixture. It is composed exclusively of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich green sward in three or four weeks from the time of sowing. The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture. It should be sown at the rate of 4 to 5 bushels to the acre (15 pounds to the bushel). Per qt., 25 cts.; 2 qts., 40 cts.;  $\frac{1}{2}$  pk., 65 cts.; pk., \$1; bus., \$3.50.

## THORBURN'S SPECIAL LAWN GRASS MIXTURE

This extra-choice mixture contains a large proportion of the finer and more expensive species, such as Rhode Island Bent, Crested Dog's-Tail, Creeping Bent, in extra-heavy samples, bringing the weight up to 20 lbs. per bushel, and producing a turf of the closest and finest texture possible. Price per bushel of 20 lbs., \$5.

## THORBURN'S LAWN-RESTORING GRASS SEED

A mixture of grasses peculiarly suited to take firm hold and grow quickly on hard, worn-out or burned spots. The best time to resow them is very early in spring, but seed may also be sown in the fall from first of September to first of October. Some **Lawn-restoring Grass Seed** should also be sown before every summer rain on thin places. Price per qt., 30 cts.; per bus. of 24 lbs., \$5.

## THORBURN'S LAWN GRASS FOR THE SOUTH

A mixture of grasses that stand extremes of heat and drought well and that are therefore peculiarly adapted for southern lawns. Per bushel of 20 lbs., \$5.

## THORBURN'S GRASS MIXTURE FOR SHADY SPOTS ON LAWNS

A mixture of grasses that thrive in shaded situations, under trees, or close to walls where there is little sun. Price per quart, 35 cts.; peck, \$1.75; bushel of 24 lbs., \$6.

# Also Permanent Grass Seed for Golf Links, Tennis Courts and Polo Grounds

We have devoted much attention to the seeding and preservation of golf links, tennis courts and polo grounds, and offer the following mixtures, which have been used on most of the finest links, etc., in the country with very satisfactory results.

### FAIR GREEN MIXTURE

For the grounds in general. Per bus. of 20 lbs., \$2.50.

### TENNIS COURT MIXTURE

A mixture of extra fine grasses peculiarly adapted for tennis courts. This mixture will make a firm, green and lasting turf of the finest texture that will improve with tramping. Per qt., 30 cts.; peck, \$1.75; bushel of 24 lbs., \$6.

### PUTTING GREEN MIXTURE

A mixture of extra-fine grasses that will make a close, firm, green and lasting turf, which will improve with tramping. Per qt., 30 cts.; peck, \$1.75; per bushel of 24 lbs., \$6.

### POLO GROUNDS MIXTURE

A mixture of fine-leaved and deep-rooting grasses, forming a strong and lasting turf that will stand hard usage. Per bushel of 20 pounds, \$2.50.

## GRASS SEED MIXTURES FOR MEADOWS AND PASTURES

For over a hundred years our house has made a specialty of grasses. The formation of permanent pastures and meadows has for many years been a subject of careful study with us, and the following mixtures for seeding grass-lands have received universal recognition.

### MEADOW MIXTURES

Sow at the rate of 2 bushels to the acre

No. 1. For good land, neither too dry nor too wet. Per bushel of 20 lbs., \$2.60.

No. 2. For high and dry land. Per bus. of 20 lbs., \$3.

No. 3. For wet, late land. Per bus. of 20 lbs., \$2.70.

### PASTURE MIXTURES

Sow at the rate of 2 bushels to the acre

No. 4. For good land, neither too dry nor too wet. Per bushel of 20 lbs., \$3.

No. 5. For dry land. Per bushel of 20 lbs., \$3.25.

No. 6. For wet land. Per bushel of 20 lbs., \$3.

## MUSHROOM SPAWN

We have always on hand fresh spawn of the very highest grade. Cultural directions will be found in our General Catalogue. Any one requiring fuller details should get Mr. Wm. Falconer's book on Mushroom Culture, which we can send postpaid, for \$1.

**English Spawn.** In bricks. Per lb., 15 cts.; 10 lbs., \$1; 100 lbs., \$9.

**French Spawn.** In bulk. Per lb., 30 cts.; 10 lbs., \$2.50; 100 lbs., \$22.

**American Spawn.** In bricks. Per lb., 15 cts.; 10 lbs., \$1.25; 100 lbs., \$10.

Mushrooms

# Insecticides and Remedies for Plant Diseases

## BUG DEATH

This is a fungicide, insecticide and plant-food combined. 1-lb. package, 15 cts.; 3-lb. package, 35 cts.; 5-lb. package, 50 cts.; 12½-lb. package, \$1; 100-lb. package, \$7.

## FIR-TREE OIL

For greenhouse and house-plants. It destroys all plant insects without injuring the plant. It is the best insecticide for scale, aphids, red spider, mealy bug, thrip and worms. Dilute in the proportion of 1 pint to 20 gallons of water. Apply with vaporizer or syringe. ½ pt., 40 cts.; pt., 75 cts.; qt., \$1.25; ½ gal., \$2.25; gal., \$4.

## FIR-TREE OIL SOAP

This is the same as the Fir-Tree Oil, but in soap form. Mix at the rate of 1 ounce to a gallon of water, and apply with bellows or syringe. ½-lb. tin, 25 cts.; 2-lb. tin, 75 cts.

## DALMATIAN INSECT POWDER

Effective against almost all kinds of insects. Per ½-lb. box, 30 cts.; per 1-lb. box, 50 cts.

## GISHURST'S COMPOUND

A certain remedy for greenfly, scale, mealy bug, etc. Excellent for greenhouse use. Per 1-lb. box, 50 cts.

## HAMMOND'S GRAPE DUST

For the prevention of mildew on roses, grapes, gooseberries, etc. Apply with bellows. 5-lb. package, 35 cts.; 10-lb. package, 60 cts.; 100-lb., \$5.

## HELLEBORE, POWDERED

An excellent protection from currant worms, grape slugs, caterpillars, etc. May be applied dry or mixed in water—1 oz. to 3 gallons. Per 2-lb. box, 35 cts.; per 1-lb. box, 20 cts.; ½-lb. box, 12 cts.

## KEROSENE EMULSION

For cabbage worms, scale on trees, caterpillars, melon louse, rose bugs, greenfly and lice of all kinds, either on plants or animals. Dilute 25 to 50 parts. Qt. 40 cts., gal., \$1.

## LEMON OIL

For destroying scale, caterpillar, mealy bug, red spider, greenfly, etc. Directions on can. ½ pt., 25 cts.; pt., 40 cts.; qt., 75 cts.; gal., \$2.

## ANTIPEST

A sure destroyer of all insect pests. Qt. 60 cts.; ½ gal. can, \$1; gal. can, \$2.

## NICOTINE

For fumigating or spraying. Used effectually for greenfly, mealy bug, red spider and thrips. Does not damage the foliage or flowers of the most tender plant. Sold in cans as follows: No. 1, containing 1 pt., sufficient for 32,000 cubic feet of space, \$2.50 each; No. 2, containing ½ pt., sufficient for 16,000 cubic feet of space, \$1.25; No. 3, containing ¼ lb., sufficient for 8,000 cubic feet of space, 70 cts. Per gal., \$16. Fumigators for same, 50 cts. each.

## "NICO-FUME" TOBACCO-PAPER

For fumigating greenhouses. "Nico-Fume" is the strongest Tobacco-Paper on the market; does not injure blooms. Packed in special friction-top tins and sold as follows: 24 sheets, 75 cts.; 144 sheets, \$3.50; 288 sheets, \$6.50.

## NICO-FUME LIQUID

For spraying or fumigating. Effective against greenfly, mealy bug, etc. Does not stain nor injure blooms, and leaves no disagreeable odor. For spraying, 1 to 2 teaspoonfuls to a gallon of water. Four ounces (¼ pint) vaporized in house 100 x 20 will produce a strong fumigation. ¼ pt., 50 cts.; pt., \$1.50; ½ gal., \$5.50; gal., \$10.50.

## PARIS GREEN

Mixed at the rate of 1 lb. to 200 gallons of water, it will prove effective against all chewing insects. Per 1-lb. can, 35 cts.; ½-lb. can, 20 cts.; ¼-lb. can, 15 cts. This article is liable to fluctuate in price.

## SLUG-SHOT (HAMMOND'S)

Excellent for destroying cabbage, turnip and beet fly, potato bugs, currant worms, etc. 5-lb. package, 30 cts.; 10-lb. package, 50 cts.; 100 lbs., \$4.

## SULPHUR, POWDERED

Valuable for protecting against mildew on grapes, roses, etc. Per lb., 10 cts.; 10 lbs., 60 cts.; 100 lbs., \$4.

## SULPHO-TOBACCO SOAP

Dissolve in proportion of 2 ounces to a gallon of water, and apply with a syringe or atomizer. It will destroy rose slugs, aphides, greenfly, bark-lice, etc. Per 3-oz. box, 10 cts.; 8-oz. box, 20 cts.; 10-lb. box, \$3.

## TOBACCO DUST

If dusted on while the foliage is moist it destroys rose lice, cabbage and turnip fleas, etc. Spread upon the ground, it keeps off all earth insects. Per 1-lb. box, 10 cts.; 5-lb., 30 cts.; 10-lb., 50 cts.; per 100 lbs., \$2.50.

## TOBACCO STEMS

For fumigating plants infested with greenfly. Per bale of about 100 lbs., \$1.50; 200 lbs., \$2.75; 400 lbs., \$4.50.

## "ROSE LEAF" TOBACCO EXTRACT

A perfectly pure, highly concentrated extract of tobacco, most effective for destroying all insects and scale on plants. Pint cans, 30 cts.; qt., 50 cts.; gal., \$1.25.

## WHALE-OIL SOAP

For washing trees and destroying all insects on the bark. Per 1-lb. box, 15 cts.; 5 lbs., 50 cts.; 10 lbs., 90 cts.; 100 lbs., \$7.

## BORDEAUX MIXTURE, or FUNGIROID

For all fungous diseases. Dry, 1-lb. box, 20 cts.; 5 lbs. and over at 18 cts. per lb.; 50 lbs., \$7; liquid, qt., 40 cts.; gal., \$1.25.

## LIME, SULPHUR AND SALT MIXTURE (CALIFORNIA WASH)

One of the best remedies for San José scale. One gallon makes 25 by simply adding water. Qt., 40 cts.; gal., \$1.

# Thorburn's High-Grade Fertilizers

## THORBURN'S LAWN FERTILIZER

Per ton, \$48; single bags of 167 lbs., \$4.50; per bag of 100 lbs., \$3; 50 lbs., \$1.75; 25 lbs., \$1; 10 lbs., 50 cts.

## CLAY'S CELEBRATED FERTILIZER

One of the best manures for all horticultural purposes. 1 cwt. (112 lbs.), \$7; ½ cwt. (56 lbs.), \$4; ¼ cwt. (28 lbs.), \$2.25; ⅛ cwt. (14 lbs.), \$1.25.

## THOMPSON'S VINE MANURE

Per cwt. (112 lbs.), \$7; ½ cwt. (56 lbs.), \$4.

## PULVERIZED SHEEP MANURE

A very rich, pure natural manure. Is excellent as a top-dressing for lawns. There is nothing better for mixing with the soil for greenhouse plants—one part manure and six parts soil. 5-lb. package, 30 cts.; 10 lbs., 50 cts.; 50 lbs., \$1.25; 100 lbs., \$2; ton, \$30.

## PURE GROUND BONE MEAL

This finely pulverized ground-bone is excellent for rose culture. It is excellent for mixing with the soil for potting. 5 lbs., 25 cts.; 50 lbs., \$1.25; 100 lbs., \$2; per ton, \$32.

## CANADA HARD-WOOD ASHES

Highest grade, extra-screened, unleached, analysis guaranteed. For top-dressing for lawns, especially if the soil is inclined to be stiff or sour, there is nothing better. In barrels of 200 lbs., \$3; per ton, \$20.

## ALBERT'S PLANT FOOD

The best fertilizer for house plants. Full directions on each tin. 15 cts. per tin; by mail, 25 cts.

## CYPRESS FLOWER OR TREE TUBS

## J. M. THORBURN & CO.

CATALOGUE OF

### *Bulbs and Flowering Roots for Fall Planting*

*August 12, 1907.*

HE growing of bulbs for winter and spring flowering is very interesting and very easy. If the directions given in this Catalogue are observed, there need be no disappointment with the results. Many of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months when flowers are most appreciated. By successive plantings a constant supply of flowers may be had from December till May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. There is nothing more refreshing than the first Snowdrop of spring. It appears before the snow is right off the ground and is quickly followed by the Chionodoxa, or "Glory-of-the-Snow," the bright and variously colored Crocuses and Scillas and the lovely Daffodils. Then come the gorgeous lawn displays of Hyacinths and Tulips. All these are produced from bulbs planted in the fall.

We invite special attention to the collections of bulbs offered on the cover page opposite, both for indoor and outdoor cultivation. They contain only sorts that will insure satisfaction. The cultural directions found under the respective headings are also worthy of careful attention.

Our bulbs are all selected, coming from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation and often sold at auction, and otherwise, at very low prices.

**NAME and ADDRESS.** *We often receive orders with either the name or the address of the sender omitted. As we can do nothing with them, the customer thinks his order is being neglected. We, therefore, beg our correspondents to write on each order their name and full address.*

**ORDERS** should be sent as soon as possible after receipt of this Catalogue. The bulbs will be sent in proper time for planting. They are ready from August to November, according to the time of ripening and the country from which they come. Orders booked earliest are surest of being filled as ordered. If left too late, the supply of some of the varieties may be exhausted.

Please address all orders and remittances to

# HYACINTHS

READY FOR DELIVERY IN SEPTEMBER

The Hyacinth is one of the most popular and beautiful of spring-flowering plants for indoor and outdoor decorations. By careful management in keeping up a succession, they may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground they are unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to any one suitable sorts, when desired.

BED OF HYACINTHS

**OUTSIDE CULTURE.**—In this section, October is the month to plant Hyacinths outside. They succeed best in a light soil and in a sunny situation. If the soil is naturally heavy, some sand should be mixed with it; and, if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs; some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has been frozen in early winter, cover with

a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field mice, which may burrow in it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibry loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be always applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.**—Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

Persons unacquainted with the different varieties will do well to leave the selections to us, only specifying in their orders whether the bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortments of named Hyacinths of our selection offered on page 4, and to the Hyacinth glasses which are described at the end of the Catalogue.

The names of our Hyacinths and Tulips are those given to them by the originators in Holland, and are not sold under fancy names manufactured in this country.

## SELECT NAMED HYACINTHS

N. B. *Our selected named Hyacinths are the cream of the Holland Nurseries under their original names. For forcing in pots or for outdoor beds they far surpass the class of bulbs usually sold.*

The single-flowered varieties are generally more effective and better for forcing than the Double ones. They also, as a rule, succeed better in glasses. The Double varieties are distinguished by an asterisk (\*) and those of them that do well for forcing in water by two asterisks (\*\*).

If ordered by mail, please add 15 cts. per dozen for postage. Three of a kind sold at the dozen rate.

## GROUPS OF HYACINTHS FOR DESIGN BEDDING

To obviate the disappointment resulting from selecting unsuitable varieties for design beds, we give the following groups of some of the sorts that bloom about the same time and grow to the same height. They will all form most effective combinations. We recommend **named** sorts for design bedding as decidedly better than mixtures.

{ **Baron van Thuyll, Red.**  
 { **Alba Superbissima, White.**  
 { **Charles Dickens, Blue.**

{ **Robert Steiger, Red.**  
 { **Mad. Vanderhoop, White.**  
 { **Marie, Blue.**

{ **Gigantea, Red.**  
 { **Grandeur a Merveille, White.**  
 { **Baron van Thuyll, Blue.**

{ **General Pelissier, Red.**  
 { **Baroness van Thuyll, White.**  
 { **Grand Maitre, Blue.**

{ **Norma, Red.**  
 { **La Franchise, White.**  
 { **La Peyrouse, Blue.**

## MIXED HYACINTHS IN SEPARATE COLORS

*The very largest size. Suitable either for forcing or bedding*

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all of the largest size. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

If ordered by mail, add 10 cents per dozen for postage. Three of a color at dozen rates, 25 of a color at 100 rates.

## FRENCH ROMAN HYACINTHS

Extensively used by florists for forcing for cut-flowers. For this purpose they are the best and most popular of bulbs. The flowers are pure white, delightfully fragrant, and each bulb will throw up from three to four

spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early, and by making successive plantings they may be had in flower all through the winter. The blue and rose Roman Hyacinths flower from one to two weeks later than the white variety.

If by mail, add 10 cts. per dozen for postage.

## MINIATURE HYACINTHS

These are also known as "Dutch Roman" and "Pan Hyacinths." They are very suitable for growing in groups in pots or earthen pans. We offer them in separate colors, and also mixed, as follows: Pure White, Cream-White, Dark Red, Rosy Red, Light Blue and Dark Blue. 40 cts. per doz., \$2.75 per 100. Mixed Colors. 40 cts. per doz., \$2.50 per 100.

## ITALIAN HYACINTHS

These are grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are harder than the Romans, and may also be planted outside in the fall for flowers for early spring cutting.

ROMAN HYACINTHS

## TULIPS

### TULIPS ARE READY FOR DELIVERY IN SEPTEMBER

For beauty of form and brilliancy of coloring Tulips are unequalled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers can select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers, they are also invaluable.

**CULTURE.**—The cultural directions given for hyacinths, on page 2, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the

## TULIPS, continued

bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open border.

A, B and C indicate season of flowering. A and B may be planted to flower about the same time in the open ground; C flowers later.

## SINGLE EARLY TULIPS

If ordered by mail, add 5 cents per dozen or 30 cents per 100 postage. Six of a kind at dozen rates, 25 of a kind at 100 rates.

## DARWIN TULIPS

They grow very tall, with large flowers of fine form. Being borne on very long stems, they are excellent for cutting to put in vases for house decoration. They are all single, self-colored, and of great brilliancy.

Named sorts as follows, all 8 cts. each, 70 cts. per doz., \$4.50 per 100

**Asa Gray.** Dark carmine.  
**Bridesmaid.** Rose; extra fine.  
**Donders.** Dark vermilion; violet center.  
**Dream.** Lilac. Very large flower.  
**Europe.** Fiery salmon-scarlet.  
**General de Cordous.** Glowing scarlet.  
**Giovanni.** Carmine-rose.

**Glow.** Vermilion; blue center, white margin.  
**Loveliness.** Satiny rose, shaded blush.  
**Nora Ware.** Heliotrope.  
**Pales.** Soft lilac.  
**Romano.** Soft cherry-red.

**Mixed Darwins.** 5 cts. each, 45 cts. per doz., \$3 per 100,  
 \$16 per 1,000.

## PARROT TULIPS

For outdoor cultivation. The petals of these have feathered edges, and in addition to other colors combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant color, and form very effective groups for the flower border. To get the best results they must have the full effect of the sun. Very late in flowering.

If ordered by mail, add 6 cents per dozen for postage.

	Each	Doz.	100
<b>Cafe Brown.</b> Brown and yellow striped.....	\$0 05	\$0 30	\$1 75

## MIXED TULIPS

For bedding. Planted in large masses, these make a magnificent show, and, being inexpensive, should be largely used. Our special mixtures of Early Single and Early Double Tulips are made up of the finest bulbs and the brightest colors. If planted in large beds, they will produce an exceedingly beautiful and lively effect.

If ordered by mail, add 6 cents per dozen for postage. Not less than 6 at dozen rate

No. 4. Eight each, same 12 varieties as in Collection No. 1 (96 named bulbs) .....2 25

TYPES OF NARCISSUS

## NARCISSUS

**NARCISSUS ARE READY FOR DELIVERY  
IN SEPTEMBER**

The very beautiful species and varieties of Narcissus are among the most popular and largely grown of spring-flowering bulbs, and that deservedly, too. Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, or lakes, or ponds, and in mixed flower or shrubby borders. They are also suitable for naturalizing in the grass, by the side of woodland walks or in open spaces between trees and shrubs. With the exception of the Polyanthus section, they are all perfectly hardy.

Narcissus are also very suitable for growing in pots, requiring about the same treatment as hyacinths, with 3 or 4 bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers.

### SINGLE NARCISSUS, or DAFFODILS

If ordered by mail, add 13 cents per dozen for postage.

	Each	Doz.	100
<b>Ard Righ</b> (Irish King). Magnificent golden yellow trumpet; very large and graceful. One of the earliest and finest for forcing .....	\$0 10	\$0 90	\$6 00

## PAPER WHITE NARCISSUS

**Paper White, Large-flowering**. Very early, and largely forced for cut-flowers. Beautiful clusters of large pure white flowers. 5 cts. each, 40 cts. per doz., \$2.50 per 100.

**Paper White, grandiflorus multiflorus**. Very large and free-flowering. 6c. each, 50 cts. per doz., \$3 per 100.

DOUBLE NARCISSUS,  
or DAFFODILS

If ordered by mail, add 12 cents per dozen for postage

**Albus plenus odoratus**. Double, pure white, very sweet-scented; for outdoors. 5 cts. each, 30 cts. per doz., \$1.25 per 100.

**Incomparabilis** (Butter and Eggs). Lemon and orange; fine for forcing or outdoors. 5c. each, 30c. per doz., \$1.75 per 100.

**Orange Phoenix** (Eggs and Bacon). Very large double white and orange flower of great beauty; one of the handsomest and splendid for pot culture. 5 cts. each, 35 cts. per doz., \$2 per 100.

**Sulphur Crown**, or **Silver Phoenix**. Most beautiful, pure white; very double, 7 cts. each, 60c. per doz., \$4 per 100.

**Tazetta** (Roman). Very early; double yellow; for forcing and pot culture only. 5 cts. each, 40 cts. per doz., \$2.50 per 100.

**Van Sion**. The largest double yellow trumpet variety; extra fine for forcing, and most largely grown by florists for winter cut-flowers. Our bulbs are Dutch-grown, of the pure golden yellow variety, and the largest size. 5 cts. each, 40 cts. per doz., \$2.50 per 100, \$18 per 1,000.

**Van Sion, Double-nosed Bulbs**. 7 cts. each, 60 cts. per doz., \$3.75 per 100, \$25 per 1,000.

SINGLE AND DOUBLE NARCISSUS

## POLYANTHUS NARCISSUS

Invaluable for forcing. All very early; flowers exceedingly fragrant; may be grown in glasses or pots. If planted in open borders, must be protected over winter by a covering of litter.

If ordered by mail, add 20 cents per dozen for postage.

**Bazelman Major.** Broad white perianth, deep yellow cup; largest of all. 20 cts. each, \$2 per doz.

**Bathurst.** Yellow. 8 cts. each, 65 cts. per doz., \$4 per 100.

**Gloriosus.** White perianth, deep orange cup; very striking. 8 cts. each, 65 cts. per doz., \$4 per 100.

**Grand Monarque.** White, with yellow cup; very large flower; vigorous grower. 8 cts. each, 65 cts. per doz., \$4 per 100.

**Grand Soleil d'Or.** Yellow, with orange cup; very free-blooming. 7 cts. each, 60 cts. per doz., \$3.50 per 100.

**Grand Primo.** White, lemon cup. 7 cts. each, 60 cts. per doz., \$3.50 per 100.

**Jaune Supreme.** Primrose, orange cup. 10 cts. each, 85 cts. per doz., \$5 per 100.

**Lord Canning.** Yellow; extra fine; profuse bloomer. 10 cts. each, 85c. per doz., \$5 per 100.

**Luna.** White perianth; white cup. 10 cts. each, 85 cts. per doz., \$5 per 100.

**Masterpiece.** Yellow and orange. 10 cts. each, 85 cts. per doz., \$5 per 100.

**Muzart Orientalis.** White, orange cup. 8 cts. each, 65 cts. per doz., \$4 per 100.

**Mont Cenis.** Very large handsome flowers, pure white, with yellow cup. 10 cts. each, 90 cts. per doz., \$6 per 100.

**Newton.** Pure yellow, with orange cup; extra fine. 8 cts. each, 75c. per doz., \$4.50 per 100.

**Queen of the Netherlands.** White, yellow cup. 10 cts. each, 85 cts. per doz., \$5 per 100.

**Queen Victoria.** White, with yellow cup; large, handsome flower. 8 cts. each, 65 cts. per doz., \$4 per 100.

**Staten General.** White, with primrose-yellow cup; free bloomer. 7 cts. each, 60 cts. per doz., \$3.50 per 100.

**White Pearl.** Perianth pure white, cup primrose; fine for cutting. 8 cts. each, 65 cts. per doz., \$4 per 100.

**Mixed Sorts.** 5 cts. each, 40 cts. per doz., \$2.50 per 100.

## JONQUILS

A class related to the Narcissus, and suitable alike for pot culture or planting out. The culture required is the same as for Hyacinths.

If ordered by mail, add 6 cents per dozen for postage.

LILIUM HARRISII

## LILIES

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a deep, rich loam, they all do best in a light, well-drained soil. Some peat or leaf-mold may be used to advantage. *L. auratum* cannot bear manure, but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

**Lilium Harrisii and Lilium candidum ready in August; others not until November**

### LILIUM HARRISII (BERMUDA EASTER LILY)

#### BULBS NOW READY

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, and last a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decoration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

If ordered by mail, add from 10 to 20 cents per dozen for postage, according to size

9 to 11 inches in circumference.....	50	5 00	

### LILIUM LONGIFLORUM (WHITE TRUMPET LILY)

If ordered by mail, add 3 cents each for postage

This is among the most beautiful and valuable of garden Lilies. It grows from 1 to 3 feet high and bears many trumpet-shaped, sweetly scented, waxy white flowers of great substance. A well-drained light loam enriched with leaf-mold suits it best.

LILY-OF-THE-VALLEY (*Convallaria majalis*)

READY IN NOVEMBER

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them. They may also be planted in moss fiber in vases.

**Clumps.** Fine large clumps, with many flowering pips on each. Fine for planting outside in shaded positions, and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per dozen

**Pips for forcing.** 50 cts. per bundle of 25, \$1.75 per 100, \$14 per 1,000.

## CHINESE SACRED LILY

(THE WATER FAIRY FLOWER)

READY IN SEPTEMBER

If ordered by mail, add 5 cts. each or 25 cts. per dozen for postage.

A variety of the *Polyanthus Narcissus*, imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs entirely, and place in a sunny window in a cool room.

Price, 10 cts. each, \$1 per doz.

LILY-OF-THE-VALLEY

## ANEMONE, or WINDFLOWER

Very ornamental hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

If ordered by mail, add 15 cents per 100 for postage

ANEMONE JAPONICA

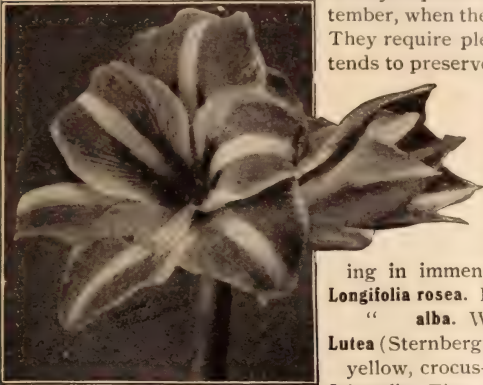

## AMARYLLIS

READY IN OCTOBER

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mold or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is

to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

Each Doz.

## ARUMS

Ready for shipment in September and October

A genus of curious and ornamental perennials, with peculiar and distinct foliage and flowers. They make handsome pot-plants, and are also very effective in subtropical gardening. *A. Dracunculus* is hardy, and may be left in the ground over winter, with a little covering. The others should be potted in the autumn and kept dormant till spring. They are all of easy cultivation, requiring rich soil and plenty of water during the growing season. A compost of rich loam, with a third of well-rotted manure and some sand, is very suitable.

If ordered by mail, add 3 cents each for postage

	Each	Doz.

CROWN IMPERIALS

(Fritillaria imperialis)

A stately-growing plant, with dark green foliage, and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring, and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

CROWN IMPERIAL

## CROCUS

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted close,—say 2 inches apart,—and 3 inches deep, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful.

For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

If ordered by mail, add 15 cts. per 100 for postage.

## HYBRID NAMED CROCUS

Composed of the most beautiful varieties; remarkable for richness of color and immense size. These varieties are best for forming letters or designs on the lawn, for which purpose they may be planted without disturbing the grass, by the use of a dibble or a narrow trowel. The flowers are produced very early, and the mowing later on will not seriously injure the Crocus bulbs.

# CALOCHORTUS

(Mariposa Lily, or Butterfly Tulip)

READY IN SEPTEMBER

Very handsome bulbous plants from California. They are remarkable for the brilliancy and variety of their coloring, and their gracefulness of habit. They grow freely in light, sandy loam; though hardy, they should be protected during winter with litter. They may also be successfully grown in frames and in pots.

If ordered by mail, add 5 cents per dozen for postage

# CYCLAMEN

MOST OF THEM READY IN NOVEMBER

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The soil best suited to them is a fresh turfy loam with a fourth to a fifth of well-rotted horse manure to which add some clean sand if the soil is heavy. Plant so as to leave the top of the bulb just below the surface. We offer seed of our superb strain of *C. giganteum* at the end of this Catalogue.

<b>Meleagris</b> (Guinea-fowl Flower). Mixed colors .....	05	35	2 00

**Fritillaria imperialis.** See Crown Imperials, on page 20.

FRITILLARIA RECURVA

FREESIA REFRACTA ALBA

## FREESIA

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in a light, sandy soil, in a frame or greenhouse, and are excellent for window culture in winter. For the information of all not acquainted with these bulbs, we may say that they are quite small, and produce large blooms in comparison to their size.

**Freesia refracta alba.** Pure white and sweet scented; very largely forced. The flowers are 2 inches long, and about the same in width, shaped like miniature gladioli, and in clusters of 6 to 10, on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. Their fragrance is remarkable and very lasting.

	Doz	100	1,000
<b>Monster Size Bulbs</b> .....	\$0 35	\$2 00	\$14 00
<b>First Size Bulbs</b> .....	25	1 25	9 00

----	------

J. M. THORBURN & Co., New York City.

Gentlemen:—The lilies received safely, many thanks. These and the bulbs sent some little time ago have given me great satisfaction.

Yours truly,

DENVER, COLO.

HENRY HOUSELEY.

CRINUMS

IXIAS

Splendid large-flowering bulbs, closely allied to the Amaryllis. The most suitable soil is a compost of turfy loam, cow manure and some sand. They should be grown in large pots or in tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a cool-house and allowed to rest till new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure water during the growing season. They may be placed outside when warm weather begins, and will flower all through the summer, making splendid lawn or veranda plants.

Each

<b>Giganteum, Giant White.</b> Immense bulbs; large white flowers; bloom all summer; very fragrant. They should be watered plentifully while growing .....	\$2 00
<b>Amabile, Giant Pink.</b> Extra large, bright pink, with white stripe; splendid flower; enormous bulb. This and the Giant White are unsurpassed for growing in tubs, blooming profusely outside all summer .....	2 00
<b>Kirki.</b> Large umbels of beautiful pure white flowers, with purple stripe in center of each petal .....	65
<b>Powellii.</b> It produces long stems bearing at the top five to eight large, dark rose, bell-shaped flowers 3 to 4 inches long .....	40
“ <b>album.</b> Pure white .....	70
“ <b>intermedium.</b> Light rose .....	3 00

IXIAS

Ready in October

The Named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

	Each	Doz.	100

<b>Mixed</b> .....	05	30	1 50
<b>Dens-canis</b> (Dog's-tooth Violet). Mixed colors; very pretty; leaves blotched in brown and white.	05	30	1 50

ERYTHRONIUM

## GLADIOLUS

Ready in November

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse, except *Byzantinus*, which is hardy, and may be planted out; it is best, however, to give it slight protection. Some varieties are successfully forced.

The French Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty. Every year is now adding varieties of most exquisite tint and shade; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published January 1.

If ordered by mail add 3 cts. per doz. for postage

	Each	Doz.	100
<b>AUTUMN GIANT.</b> Bright scarlet to deep crimson flowers, with large deep yellow throat. Grows 3 to 4 feet high, with spikes of bloom sometimes 2 feet long. If planted in the open ground in spring, it blooms in Sept. and Oct., when other Gladioli are gone....	\$0 30	\$3 00	\$18 00

GRAPE HYACINTHS

## GLOXINIAS

Ready in November

Gloxinias are among the most beautiful of greenhouse plants, being remarkable for the intensity and variety of their colorings, and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mold and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large-sized, and of erect-flowering strain.

# IRIS (FLEUR-DE-LIS)

Ready in October and November

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light, rich, sandy soil, and in a sunny situation. Good drainage is important. The varieties of *Iris Kaempferi*, from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 or 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms, measuring 8 to 10 inches across. These require a liberal supply of water when growing. With the exception of *Morea pavonia* and *Tuberosa*, all varieties are hardy.

## SUPERB COLLECTION OF LARGE-FLOWERED JAPAN IRISES

(*Iris Kaempferi*)

We are importing from Japan a large supply of the following eighteen of the best of these magnificent Irises, which excel in size, perfection of form and richness of color, any ever shown. They come in large clumps.

30 cts. each, \$3 per doz., \$20 per 100

<b>Gekka-no-nami</b> (Waves on Moonlight). Dense pure white, yellow blotches.	<b>Yezo-nishiki</b> (Yezo-Embroidery). Deep rich crimson, mottled and blotched white.
<b>Shishi-odori</b> (Dancing Lion). Purple and white.	<b>Yedo-jiman</b> . Royal blue.
<b>Kumoma-no-sora</b> (Sky Amidst the Cloud). White, sky-blue and yellow.	<b>Shirataki</b> (White Waterfall). Great fine white petals, primrose blotches.
<b>Kumo-no-obi</b> (Band of Cloud). Dark purple, yellow blotches.	<b>Kagaribi</b> . Brilliant ruby, yellow blotches.
<b>Ho-o-jo</b> (Ho-o-castle). Ruby-crimson, primrose blotches.	<b>Shimoyo-no-tuski</b> (Frost Moonlight). Gray-lavender, yellow blotches.
<b>Manadzuru</b> (Crane). White, yellow blotches.	<b>Tora-odori</b> (Dancing Tiger). Gray, overlaid with lavender-blue, yellow blotches.
<b>Hana-no-nishiki</b> (Floral Embroidery). Brilliant claret-red, pencilled white, orange blotches.	<b>Tsuru-no-kegoromo</b> (Crane's Feather). Large, pure white flowers, yellow blotches.
<b>Yomo-no-umi</b> (Boundless Sea). Lavender-blue, yellow blotches.	<b>Momiji-no-taki</b> (Maple Waterfall). Crimson-purple, suffused white.
<b>Koma-funjin</b> (Excited Bear). Purple, overlaid with navy-blue, orange blotches.	<b>Mixed Common, Small-flowered Japan Iris, Single and Double</b> . 6 cts. each, 50 cts. per doz., \$2.50 per 100.
<b>Taiheiraku</b> (Peace). Purple, yellow blotches, tipped blue.	

## SPANISH IRIS (*Iris Hispanica*)

Very profitable for florists, who are planting them largely for cut-flowers. Plant in beds in the open as soon as received in the autumn, and protect slightly in the winter months. In the beginning of April cover the beds with glass, so as to have the flowers ready for cutting in May.

	Each	Doz.	100
<b>Belle Chinoise</b> . Yellow; extra.....	\$0 05	\$0 25	\$1 00

## LACHENALIAS

READY IN SEPTEMBER

Very pretty, spring-flowering, greenhouse bulbous plants with brightly colored flowers and elegant habit. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mold and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air, and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging baskets.

	Each	Doz.
<b>Luteola.</b> Pale yellow flowers, flushed with green.....	\$0 25	\$2 50
<b>Nelsoni.</b> Deep golden yellow; fine .....	25	2 50
<b>Pendula.</b> Very handsome, large and showy species, with broad foliage and rich red flowers, tipped with black .....	25	2 50
<b>Quadricolor.</b> Bright green, red and yellow flowers; very pretty .....	25	2 50
<b>Tricolor.</b> Red, yellow and green.....	20	2 00
<b>Versicolor.</b> Foliage heavily spotted brown; flowers yellow, tipped with green and red; very pretty for massing.....	20	2 00
<b>Hybrids Mixed</b> .....	15	1 50

## MONTBRETIAS

READY IN NOVEMBER

Hardy, summer-flowering, bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties:

	Each	Doz.	100
<b>Bouquet Parfait.</b> Large, bright vermilion flowers, with deep yellow center.....	\$0 05	\$0 40	\$2 00

<b>Umbellatum</b> (Star of Bethlehem). Outside green and white striped, inside satiny white; flowers in umbels; very showy....	05	35	2 00

## NERINE

READY IN OCTOBER AND NOVEMBER

Very beautiful greenhouse bulbous plants succeeding best in pots, in light soil—say a compost of loam, leaf-mold and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die they should be kept quite dry in a cool place until they begin to grow again.

	Each	Doz.
<b>Corusca.</b> Brilliant scarlet flowers.....	\$0 85	
<b>Crispa.</b> Very handsome scarlet flowers.....		1 00
<b>Flexuosa.</b> Bright crimson-scarlet, tinged with orange.....		1 40
<b>Fothergillii.</b> Bright, glittering scarlet, in a many-flowering umbel .....		1 25
“ <b>major.</b> A magnificent plant for house or conservatory. The flowers are of the most in- tense shining scarlet, and by artificial light the crystalline cells of the petals sparkle like jewels. It flowers very freely.....		2 00
<b>Japonica (Lycoris radiata)</b> .....	per 100, \$5..	10 \$0 80
<b>Sarniensis</b> (True Guernsey Lily). Flowers brilliant crimson, in large clusters. The best known sort.		75
<b>Undulata.</b> Rosy purple, wavy flowers; very handsome.....		1 25

## OXALIS

READY IN SEPTEMBER

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging baskets. They are easily grown in a sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

	Each	Doz.	100
<b>Buttercup.</b> A splendid winter-blooming plant for pot culture. The flowers are pure bright yellow, and produced in great abundance. It is very easily cultivated, and, being a strong grower, only one or two bulbs should be planted in a 5- or 6-inch pot..... 1st size..	\$0 05	\$0 35	\$1 75
Second size.....		25	1 50
Mammoth .....	06	50	3 00
<b>Bowiei.</b> Crimson .....	05	35	1 75

<b>Versicolor.</b> Red, violet and white.....		25	1 25
..... 2 for 5 cts...			
<b>Mixed</b> .....		15	75
..... 3 for 5 cts...			

## PEONIES

READY IN OOTOBER

The old-fashioned double Peonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their merits, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Peonies rank about first for lawn or flower-border or shrubbery decoration. They are all hardy.

### HERBACEOUS CHINESE PEONIES (*Pæonia Sinensis*)

	Each	Doz.
<b>Alba superba.</b> (Potsii.) Creamy white center, rosy borders .....	\$0 30	\$3 00
<b>Asa Gray.</b> Rosy carmine.....	65	6 50
<b>Charlemagne.</b> Creamy white, center lilac and chamois.....	30	3 00
<b>Comte de Niepperg.</b> Bright carmine; very early .....	30	3 00
<b>Edulis.</b> Bright rose .....	20	2 00
<b>Festiva Maxima.</b> White .....	60	6 00

<b>L'Elegante.</b> Dark rose; very large flower.....	40	4 00
<b>Madame Geissler.</b> Rosy lilac; large flower; early.....	60	6 00
<b>Marie Deroux.</b> Rose and flesh-color .....	60	6 00
<b>Reine des Fleurs.</b> Rose, tops of petals nearly white.....	30	3 00
<b>Rubens.</b> Crimson.....	50	5 00
<b>Thorbecki.</b> Tender rose, center deep rose .....	30	3 00
<b>Double Mixed White.</b> .....	30	3 00
" " <b>Crimson</b> .....	30	3 00
" " <b>Pink</b> .....	30	3 00
" " <b>Many Colors.</b> .....	25	2 50

### JAPANESE TREE PEONIES (*Pæonia arborea*)

These are very beautiful and free-flowering, and bloom two or three weeks earlier than the herbaceous sorts. We are importing an assortment of the following fine named varieties.

\$1.50 each

<b>Comtesse de Tuder.</b> Rosy white; very double.	<b>Glory of Shanghai.</b> Cherry; anemone-flower shape.
<b>Elizabeth.</b> Brilliant pink; very large flower.	<b>Guillaume Tell.</b> (William Tell.) Bright carmine; large flower.
<b>Fragans maxima plena.</b> Salmon-rose; very large and very double flower.	

### PAEONIA TENUIFOLIA

Very elegant plants with narrow-leaved feathery foliage.

	Each	Doz.
<b>Double-flowering.</b> Rich crimson .....	\$0 40	\$4 00
<b>Single-flowering.</b> Rich crimson.....	25	2 50

### PAEONIA OFFICINALIS

	Each	Doz.
<b>Anemoneiflora.</b> Crimson; single anemone-flower shape.....	\$0 40	\$4 00
<b>Atro-rubra plena.</b> Dark red; double.....	25	2 50
<b>Mutabilis plena.</b> Tender rose, passing to white; double .....	30	3 00
<b>Splendens.</b> Dark red; half-double flower .....	30	3 00

## RANUNCULUS

READY IN SEPTEMBER

The main soil for these should be loam or clay, with a good dressing of rotten manure and leaf-mold; if heavy, add a little sand. The soil should be well drained, cool, deep, rich and moist. Plant late in the autumn, claws downward, from 4 to 6 inches apart and 3 inches deep, covering with fine, pulverized soil.

If ordered by mail, add 3 cents per dozen for postage

### PERSIAN RANUNCULUS

	Each	Doz.	100
<b>Belladonna.</b> White .....	\$0 05	\$0 40	\$2 50
<b>Commodore Napier.</b> Yellow and brown border.	05	40	2 50
<b>California Gold.</b> Yellow .....	10	75	4 00
<b>Favorite des Dames.</b> Striped.....	05	45	3 00
<b>Jaune Supreme.</b> Splendid yellow .....	05	45	3 00
<b>Kiskoy.</b> Purple .....	06	50	3 50
<b>Mont Blanc.</b> White .....	05	40	2 50

<b>Viridiflora.</b> Scarlet, green center .....	05	35	2 00
<b>Mixed Turban</b> .....	2 for 5 cts...	25	1 25

RANUNCULUS

## RICHARDIAS, or CALLAS

READY IN SEPTEMBER AND OCTOBER

WHITE CALLA

Tall-growing, bulbous perennials of exceedingly graceful habit and very handsome foliage and flowers. They are easily cultivated in pots, requiring only a rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting in September.

	Each	Doz.	100
<b>White Calla, or Lily-of-the-Nile</b> ( <i>Calla Æthiopica</i> ). Large, white, trumpet-shaped flowers of great substance. One of the most popular and ornamental of house and greenhouse plants. Largest size bulbs.....	\$0 20	\$2 00	\$14 00
<b>Pearl of Stuttgart.</b> A new dwarf variety of sterling merit. The flowers are of medium size and perfect form, and are produced by strong plants in remarkable profusion. Even very small plants will give good blooms.....	30	3 00	
<b>"Little Gem" Calla.</b> Very neat, dwarf habit; makes an excellent pot-plant .....	06	60	3 50
<b>Spotted Calla</b> ( <i>C. Æthiopica alba maculata</i> ). An extremely ornamental pot-plant, with pure white flowers and handsome, deep green leaves, spotted with white .....	10	75	5 00
<b>Black Calla.</b> See <i>Arum Palæstinum sanctum</i> ....	20	2 00	12 00
<b>Red Calla</b> ( <i>Arum cornutum</i> ). Flowers red, spotted black; stem mottled; a handsome pot-plant .....	15	1 50	9 00
<b>YELLOW-FLOWERED, SPOTTED LEAF.</b> Grows about 2 feet high, with immense dark green leaves spotted and blotched with silvery white; flowers of medium size, pure bright yellow, with a black-purple blotch at base. Fine for spring planting. Blooms outside all summer .....	25	2 50	15 00

SCILLAS

READY IN SEPTEMBER

SCILLA SIBIRICA

No garden can be complete without these beautiful flowers. *S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years. The effect in early spring of the intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the Snowdrop and the varied hues of the Crocus, can hardly be overestimated; are most valuable for permanent edging, or planted in bunches of a dozen or so.

If ordered by mail, add 5 cents per dozen for postage, except those marked with a (\*), to which add 2 cents each

	Each	Doz.	100
Sibirica. Blue .....	\$0 05	\$0 35	\$1 75
“ alba. White-flowered variety of the above .....	06	45	3 00
Bifolia. Blue .....	05	35	2 00

“ lutea (Yellow Cuban Lily) .....	50	5 00
“ coerulea (Blue Cuban Lily) .....	15	1 50

SNOWDROPS

(*Galanthus nivalis*)

READY IN SEPTEMBER

Perhaps no spring flower is a more general favorite than the Snow-drop. The earliest flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms. Should be planted 2 to 3 inches deep in a shady location.

If ordered by mail, add 3 cents per dozen, or 25 cents per 100 for postage

Single-flowering Snowdrops. 20 cts.	
per doz., \$1.25 per 100, \$9 per 1,000.	
Double-flowering Snowdrops. 35 cts.	
per doz., \$2 per 100, \$15 per 1,000.	
Giant Snowdrops of Asia Minor ( <i>Galanthus Elwesii</i> ). 20 cts. per doz.,	
\$1.25 per 100, \$9 per 1,000.	

SNOWDROPS

DWARF DOUBLE PEARL TUBEROSE]

TUBEROSES

READY IN DECEMBER

The purity of color and rich perfume of the Tuberose are well known. In this latitude, May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich, warm soil and in a sunny situation. Cut off about a quarter of an inch from the bottom of the bulb before planting, and set so that the top will be one inch below the surface of the soil.

	Each	Doz.	100
Dwarf Double Pearl. Dwarf habit; large, fine flowers of great substance .....	\$0 06	\$0 40	\$2 00
Albino. Purest white; single flowers .....	08	50	3 00
Variiegated Leaf. Foliage striped white and green; single white flowers .....	08	50	3 00

## SPIRAEA, or ASTILBE

READY IN NOVEMBER

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

**Japonica** (Hoteia). Excellent pot-plant for winter blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting. 15 cts. each, \$1.25 per doz., \$6 per 100.

**Japonica fol. aurea reticulata**. Beautiful gold-striped foliage; large panicles of pure white flowers. 20 cts. each, \$2 per doz., \$12 per 100.

**Japonica compacta multiflora**. The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.25 per doz., \$6.50 per 100.

**Astilboides floribunda**. Very large, pure white plumes; neat habit; very abundant bloomer. 15 cts. each, \$1.50 per doz., \$7 per 100.

**Palmata**. Crimson; strong clumps. 15 cts. each, \$1.50 per doz., \$7 per 100.

**Aruncus**. Handsome plant, with large plumes of pure white flowers. 20 cts. each, \$2 per doz.

**Gladstone**. A hybrid Spirea with beautiful snow-white plumes borne on strong stems one and a half feet long, standing erect above the foliage. The plant is perfectly symmetrical in shape, the foliage very handsome and the flowers exquisitely fragrant. Fine forcer. 20 cts. each, \$1.75 per doz., \$10 per 100.

SPIREA

**Washington**. New. A splendid decorative plant, producing extra-large flowers. A strong-grower and a fine forcing variety. 15 cts. each, \$1.50 per doz., \$8 per 100.

**QUEEN ALEXANDRA, PINK**. A splendid new pink variety, in habit similar to the well-known Gladstone, but flowering two weeks later. It is a very free bloomer and bears its flowers well above the strong, dark green foliage. When forced it must be shaded as soon as it starts to show color. It is a splendid outdoor plant, being as hardy as the old *Spirea Japonica*. Its color won't fade even in the brightest weather. 70 cts. each, \$7 per doz.

TRILLIUM SESSILE CALIFORNICUM

## TRILLIUMS

(American Wood-Lily, or Indian Shamrock)

Hardy herbaceous perennials, succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are native of North America, and are known by various common names in different localities. They have violently emetic roots.

	Each	Doz.	100
<b>Grandiflorum</b> ("Giant American Wood-Lily," or "Wake Robin"). Large white flowers, changing to rose; quite hardy, and easily grown in shaded positions .....	\$0 10	\$0 75	\$4 00
<b>Sessile Californicum</b> . Handsome, pure white flowers; prettily mottled foliage .....	12	1 25	6 50
<b>Sessile, Snow Queen</b> . Of same type as Californicum, but the flowers are pure white and with broader petals .....	15	1 50	9 00

## Miscellaneous Bulbs and Roots

Those marked with an asterisk (\*) will not be ready till October.

	Each	Doz.	100
* <b>Achimenes</b> . Mixed. Lovely greenhouse pot-plants .....	\$0 10	\$0 75	\$5 00
<b>ACIDANTHERA BICOLOR</b> . Ready in November. A gladiolus-like plant, growing two feet high; flower-spikes pure white and sweet-scented, with a large triangular blotch in the center. Blooms during July and August. The bulbs must be kept warm and dry over winter ....			
	35	3 50	
<b>Aconite</b> . See <i>Eranthis</i> , page 33.			
<b>Allium</b> . Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.			
" <b>Azureum</b> . Beautiful sky-blue flowers in large umbels; fine for pots or garden .....	08	60	4 00
" <b>Neapolitanum</b> . Large umbels of pure white flowers, borne on large stems; valuable for forcing for winter cut-flowers, as well as for summer garden decoration.....	05	25	1 25
" <b>Moly luteum</b> . Golden yellow flowers in large umbels; very showy and attractive; fine for growing in the garden in groups or for naturalizing in masses.....2 for	05	20	1 00
" <b>Hermettii grandiflorum</b> . Makes a splendid pot-plant for winter blooming in the house, the handsomest, large, pure white flowers being produced abundantly and for a long time; largely used by florists for forcing for cut-flowers .....	05	30	1 50
" <b>Ostrowskianum</b> . Deep carmine .....	05	40	2 25
<b>Alstroemeria aurea</b> . Golden yellow....	12	1 00	
" <b>Brasiliensis</b> . Deep red, with black spots.....	15	1 25	
" Mixed. Tall plant, beautiful flowers; for pots or frames	10	85	5 50
<b>Amorphophallus Rivieri</b> . A species of arum with ornamental leaves; flowering without soil or water .....	50	5 00	
<b>Anomatheca cruenta</b> . Rich crimson flowers; neat, dwarf habit; excellent for window-garden .....	05	25	1 25
<b>Anthericum</b> . Ornamental border plants, also fine for pot culture. Do best in light, rich soil, and require plenty of water while growing.			
" <b>Liliago</b> (St. Bernard's Lily). Pure white flowers; 1½ feet high.....	15	1 00	
" <b>liliastrum major</b> (St. Bruno's Lily). Pure white, fragrant	15	75	
" <b>Ramosum</b> . Of branching habit; white flowers; 2 feet high.....	15	1 25	
<b>Antholyza</b> , Mixed. Like Gladioli. Take up in fall.....	15	1 25	8 00
<b>Apios tuberosa</b> . Hardy climber, with clusters of fragrant purple flowers..	05	50	3 00
<b>Asphodelus ramosus</b> . Hardy perennial; large, white flowers; pretty	35	3 50	
" <b>luteus</b> . Bright yellow.....	10	1 00	
<b>Babiana</b> . Mixed colors; for pots ....	05	35	2 00
* <b>Bessera elegans</b> (Coral Drops). Bright coral-scarlet, with white cups.....	08	60	4 00
<b>Bloomeria aurea</b> . Light yellow .....	10	75	5 00
<b>Bravoa geminiflora</b> . Orange and scarlet; twin-flowered.....	15	1 50	
<b>Bulbocodium vernum</b> . A very pretty little bulbous plant, with rosy purple, crocus-like flowers; it is one of the earliest spring plants, blooming even before the Crocus.....	15	1 25	8 00
<b>Callas</b> . See <i>Richardia</i> , page 29.			
<b>Camassia Cusickii</b> . Superb variety with very large leaves and lovely pale sky-blue flowers, produced in racemes 2 to 3 feet long.....			
	20	2 00	
" <b>esculenta</b> . Pretty violet-blue flowers; fine for cutting .....	05	30	1 50
" <b>Leichtlinii</b> . Fine cream white variety .....	15	1 25	8 00

# Hardy Annual and Perennial Flower Seeds

## FOR AUTUMN SOWING

Many varieties of Flower Seeds, ANNUALS as well as BIENNIALS and PERENNIALS, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring.

THE GEM LAWN CLEANER

A revolving fan with metal teeth creates an air-current which carries into the canvas basket all leaves, dead grass, stones, etc., that the rake encounters. It straightens up crab grass and other running weeds so that they may be cut by the lawn mower. Price, \$16.

## LAWN SWEEPER, "MODEL NO. 1"

Designed for use on ordinary lawns, small parks, tennis courts, etc. It is 25 inches wide over all, weighs 28 pounds, and carries a 21-inch brush. The brush is fan-shaped, and revolves very rapidly in the same direction as the drive wheels, throwing the litter backwards from the under surface. Price, \$11.

## Grass Seeds for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the end of September, so that the young grass may become well rooted before winter sets in. Our new-crop seed of the leading sorts is ready now.

### The Thorburn Lawn Grass (UNIVERSAL PARK MIXTURE)

Practically all the finest lawns in America were produced from this mixture. It is composed exclusively of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich green sward in three or four weeks from the time of sowing. The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture. It should be sown at the rate of 4 to 5 bushels to the acre (15 pounds to the bushel). Per qt., 25 cts.; 2 qts., 40 cts.;  $\frac{1}{2}$  pk., 65 cts.; pk., \$1; bus., \$3.50.

### Thorburn's Special Lawn Grass Mixture

This extra-choice mixture contains a large proportion of the finer and more expensive species, such as Rhode Island Bent, Crested Dog's-Tail, Creeping Bent, in extra-heavy samples, bringing the weight up to 20 lbs. per bushel, and producing a turf of the closest and finest texture possible. Price per bushel of 20 lbs., \$5.

### Thorburn's Lawn-Restoring Grass Seed

A mixture of grasses peculiarly suited to take firm hold and grow quickly on hard, worn-out or burned spots. The best time to resow them is very early in the spring, but seed may also be sown in the fall from first of September to first of October. Some **Lawn-restoring Grass Seed** should also be sown before every summer rain on thin places. Price per qt., 30 cts.; per bus. of 24 lbs., \$5.

### Thorburn's Lawn Grass for the South

A mixture of grasses that stand extremes of heat and drought well and that are therefore peculiarly adapted for southern lawns. Per bushel of 20 lbs., \$5.

### Thorburn's Grass Mixture for Shady Spots on Lawns

A mixture of grasses that thrive in shaded situations, under trees, or close to walls where there is little sun. Price per qt., 35 cts.; pk., \$1.75; bus. of 24 lbs., \$6.

## Also Permanent Grass Seed for Golf Links, Tennis Courts and Polo Grounds

We have devoted much attention to the seeding and preservation of golf links, tennis courts and polo grounds, and offer the following mixtures, which have been used on most of the finest links, etc., in the country with very satisfactory results.

#### Fair Green or Golf Links Mixture

For the grounds in general. Per bushel of 20 lbs., \$2.50.

#### Tennis Court Mixture

A mixture of extra fine grasses peculiarly adapted for tennis courts. This mixture will make a firm, green and lasting turf of the finest texture that will improve with tramping. Per qt., 30 cts.; peck, \$1.75; bushel of 24 lbs., \$6.

#### Putting-Green Mixture

A mixture of extra-fine grasses that will make a close, firm, green and lasting turf, which will improve with tramping. Per qt., 30 cts.; peck, \$1.75; per bushel of 24 lbs., \$6.

#### Polo Grounds Mixture

A mixture of fine-leaved and deep-rooting grasses, forming a strong and lasting turf that will stand hard usage. Per bushel of 20 pounds, \$2.50.

## Grass Seed Mixtures for Meadows and Pastures

For over a hundred years our house has made a specialty of grasses. The formation of permanent pastures and meadows has for many years been a subject of careful study with us, and the following mixtures for seeding grass-lands have received universal recognition.

#### Meadow Mixtures

Sow at the rate of 2 bushels to the acre

No. 1. For good land, neither too dry nor too wet. Per bushel of 20 lbs., \$2.60.

No. 2. For high and dry land. Per bus. of 20 lbs., \$3.

No. 3. For wet, late land. Per bus. of 20 lbs., \$2.70.

#### Pasture Mixtures

Sow at the rate of 2 bushels to the acre

No. 4. For good land, neither too dry nor too wet. Per bushel of 20 lbs., \$3.

No. 5. For dry land. Per bushel of 20 lbs., \$3.25.

No. 6. For wet land. Per bushel of 20 lbs., \$3.

## Mushroom Spawn

We have always on hand fresh spawn of the very highest grade. Cultural directions will be found in our General Catalogue. Any one requiring fuller details should get Wm. Falconer's book on Mushroom Culture, which we send postpaid, for \$1.

**English Spawn.** In bricks. Per lb., 15 cts.; 10 lbs., \$1; 100 lbs., \$9.

**French Spawn.** In bulk. Per lb., 30 cts.; 10 lbs., \$2.50; 100 lbs., \$22.

**American Spawn.** In bricks. Per lb., 15 cts.; 10 lbs., \$1.25; 100 lbs., \$10.

MUSHROOMS

## Insecticides and Remedies for Plant Diseases

### Bug Death

This is a fungicide, insecticide and plant-food combined. 1-lb. package, 15 cts.; 3-lb. package, 35 cts.; 5-lb. package, 50 cts.; 12½-lb. package, \$1; 100-lb. package, \$7.50.

### Fir-Tree Oil

For greenhouse and house plants. Destroys all insects without injuring the plant. Dilute in the proportion of 1 pint to 20 gallons of water. Apply with vaporizer or syringe. ½pt., 40 cts.; pt., 75 cts.; qt., \$1.25; ½gal., \$2.25; gal., \$4.

### Fir-Tree Oil Soap

This is the same as the Fir-Tree Oil, but in soap form. Mix at the rate of 1 ounce to a gallon of water, and apply with bellows or syringe. ½-lb. tin, 25 cts.; 2-lb. tin, 75 cts.

### Dalmatian Insect Powder

Effective against almost all kinds of insects. Per ½-lb. box, 30 cts.; per 1-lb. box, 50 cts.

### Gishurst's Compound

A certain remedy for greenfly, scale, mealy bug, etc. Excellent for greenhouse use. Per 1-lb. box, 50 cts.

### Hammond's Grape Dust

For the prevention of mildew on roses, grapes, gooseberries, etc. Apply with bellows. 5-lb. package, 35 cts.; 10-lb. package, 60 cts.; 100 lbs., \$5.

### Hellebore, Powdered

An excellent protection from currant worms, grape slugs, caterpillars, etc. May be applied dry or mixed in water—1 oz. to 3 gallons. Per 2-lb. box, 35 cts.; per 1-lb. box, 20 cts.; ½-lb. box, 12 cts.

### Kerosene Emulsion

For cabbage worms, scale on trees, caterpillars, melon louse, rose bugs, greenfly, etc., either on plants or animals. Dilute 25 to 50 parts. Qt., 40 cts.; gal., \$1.

### Lemon Oil

For destroying scale, caterpillar, mealy bug, etc. Directions on can. ½pt., 25 cts.; pt., 40 cts.; qt., 75 cts.; gal., \$2.

### Antipest

A sure destroyer of all insect pests. Qt., 60 cts.; ½gal. can, \$1; gal. can, \$2.

### Nicoticide

For fumigating or spraying. Used effectually for greenfly, mealy bug, etc. Does not damage foliage or flowers. Sold in cans as follows: No. 1, containing 1 pt., sufficient for 32,000 cubic feet of space, \$2.50 each; No. 2, containing ½ pt., sufficient for 16,000 cubic feet of space, \$1.25; No. 3, containing ¼ lb., sufficient for 8,000 cubic feet of space, 70 cts. Per gal., \$16. Fumigators for same, 50 cts. each.

### "Nico-Fume" Tobacco-Paper

For fumigating greenhouses. "Nico-Fume" is the strongest Tobacco-Paper on the market; does not injure blooms. Packed in special friction-top tins. 24 sheets, 75 cts.; 144 sheets, \$3.50; 288 sheets, \$6.50.

### Nico-Fume Liquid

For fumigating or spraying. Effective against greenfly, mealy bug, etc. Does not stain nor injure blooms, and leaves no disagreeable odor. For spraying, 1 to 2 teaspoonfuls to a gallon of water. ¼pt., 50 cts.; pt., \$1.50; ½gal., \$5.50; gal., \$10.50.

### Paris Green

Mixed at the rate of 1 lb. to 200 gallons of water, it will prove effective against all chewing insects. Per 1-lb. can, 45 cts.; ½-lb. can, 25 cts.; ¼-lb. can, 15 cts. This article is liable to fluctuate in price.

### Slug-Shot (Hammond's)

Excellent for destroying cabbage, turnip and beet fly, potato bugs, currant worms, etc. 5-lb. package, 30 cts.; 10-lb. package, 50 cts.; 100 lbs., \$4.

### Sulphur, Powdered

Valuable for protecting against mildew on grapes, roses, etc. Per lb., 10 cts.; 10 lbs., 60 cts.; 100 lbs., \$4.

### Sulpho-Tobacco Soap

Dissolve in proportion of 2 ounces to a gallon of water, and apply with a syringe or atomizer. It will destroy rose slugs, aphides, greenfly, bark-lice, etc. Per 3-oz. box, 10 cts.; 8-oz. box, 20 cts.; 10-lb. box, \$3.

### Tobacco Dust.

If dusted on *while the foliage is moist* it destroys rose lice, cabbage and turnip fleas, etc. Spread upon the ground, it keeps off all earth insects. Per 1-lb. box, 10 cts.; 5-lb., 30 cts.; 10-lb., 50 cts.; per 100 lbs., \$2.50.

### Tobacco Stems

For fumigating plants infested with greenfly. Per bale of about 100 lbs., \$1.50; 200 lbs., \$2.75; 400 lbs., \$4.50.

### "Rose Leaf" Tobacco Extract

A perfectly pure, highly concentrated extract of tobacco, most effective for destroying all insects and scale on plants. Pint-cans, 30 cts.; qt., 50 cts.; gal., \$1.25.

### Whale-Oil Soap

For washing trees and destroying all insects on the bark. Per 1-lb. box, 15 cts.; 5 lbs., 50 cts.; 10 lbs., 90 cts.; 100 lbs., \$7.

### Bordeaux Mixture, or Fungiroid

For all fungous diseases. Dry, 1-lb. box, 20 cts.; 5 lbs. and over at 18 cts. per lb.; 50 lbs., \$7; liquid, qt., 40 cts.; gal., \$1.25.

## FOR SAN JOSE SCALE

**Horicum** (Hammond's). A lime, sulphur and salt mixture, entirely free from grit. 1 gallon makes 25 by adding sufficient water. Qt., 40 cts.; ½ gal., 75 cts.; gal., \$1.25.

**California Wash.** (Lime, sulphur and salt.) One gallon makes 25 by adding sufficient water. Qt., 40 cts.; gal., \$1.

**Scalecide.** Petroleum oil that mixes at once with water and stays mixed. No hot water necessary. Add 1 gallon for every 15 to 20 gallons water. Gal., \$1; 5 gals., \$3.25.

## Thorburn's High-Grade Fertilizers

### Thorburn's Lawn Fertilizers

Per ton, \$48; single bags of 167 lbs., \$4.50; per bag of 100 lbs., \$3; 50 lbs., \$1.75; 25 lbs., \$1; 10 lbs., 50 cts.

### Thorburn's Complete Manure

Ton, \$38; single bag of 167 lbs., \$3.50; bag of 100 lbs., \$2.25; 50 lbs., \$1.50; 25 lbs., \$1; 10 lbs., 50 cts.

### Clay's Celebrated Fertilizer

One of the best manures for all horticultural purposes. 1 cwt. (112 lbs.), \$7; ½ cwt. (56 lbs.), \$4; ¼ cwt. (28 lbs.), \$2.25; ⅛ cwt. (14 lbs.), \$1.25.

### Pulverized Sheep Manure

Excellent as a top-dressing for lawns. Nothing better for mixing with soil for greenhouse plants—one part manure and six parts soil. 5-lb. package, 35 cts.; 10 lbs., 60 cts.; 50 lbs., \$1.50; 100 lbs., \$2.50; ton, \$35.

### Thompson's Vine Manure

Per cwt. (112 lbs.), \$7; ½ cwt. (56 lbs.), \$4.

### Pure Ground Bone Meal

This finely pulverized ground-bone is excellent for rose culture. It is excellent for mixing with the soil for potting. 5 lbs., 25 cts.; 50 lbs., \$1.25; 100 lbs., \$2.25; per ton, \$33.

### Canada Hard-Wood Ashes

Highest grade, extra-screened, unleached, analysis guaranteed. For top-dressing for lawns, especially if the soil is inclined to be stiff or sour, there is nothing better. In barrels of 200 lbs., \$3; per ton, \$22.

### Albert's Plant Food

The best fertilizer for house plants. Full directions on each tin. 15 cts. per tin; by mail, 25 cts.

## Horticultural Implements, Etc.

## J. M. THORBURN & CO.'S CATALOGUE OF BULBS AND FLOWERING ROOTS FOR FALL PLANTING

Many of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of flowers may be had from December till May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn.

We invite special attention to the collections of bulbs offered on the cover page opposite, both for indoor and outdoor cultivation. They contain only sorts that will insure satisfaction. The cultural directions found under the respective headings are also worthy of careful attention.

Our bulbs are all selected, coming from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation and often sold at auction, and otherwise, at very low prices.

**NAME and ADDRESS.** We often receive orders with either the name or the address of the sender omitted. As we can do nothing with them, the customer thinks his order is being neglected. We, therefore, beg our correspondents to write on each order their name and full address.

**ORDERS** should be sent as soon as possible after receipt of this Catalogue. The bulbs will be sent in proper time for planting. They are ready from August to November, according to the time of ripening and the country from which they come. Orders booked earliest are surest of being filled as ordered. If left too late, the supply of some of the varieties may be exhausted.

Please address all orders and remittances to

J. W. BRUGGERHOF, President.  
E. E. BRUGGERHOF, Vice-Pres. and Treas.  
J. J. WILSON, Secretary.

# HYACINTHS

**THESE BULBS ARE READY FOR DELIVERY IN SEPTEMBER**

The Hyacinth is one of the most popular and beautiful spring-flowering plants for indoor and outdoor decorations. By careful management in keeping up a succession, they may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground they are unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to any one suitable sorts, when desired.

**OUTSIDE CULTURE.** In this section, October is the month to plant Hyacinths outside. They succeed best in a light soil and a sunny situation. If the soil is naturally heavy, some sand should be mixed with it, and, if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs; some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has been frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field mice which may burrow in it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibry loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.** Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

Persons unacquainted with the different varieties will do well to leave the selections to us, only specifying in their orders whether the bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortments of named Hyacinths of our selection offered on page 4, and to the Hyacinth glasses which are described at the end of the Catalogue.

The names of our Hyacinths and Tulips are those given to them by the originators in Holland, and they are not sold under fancy names manufactured in this country.

## SELECT NAMED HYACINTHS

N. B. *Our selected Named Hyacinths are the cream of the Holland Nurseries under their original names. For forcing in pots or for outdoor beds they far surpass the class of Bulbs usually sold.*

The single-flowered varieties are generally more effective and better for forcing than the double ones. They also, as a rule, succeed better in glasses. The double varieties are distinguished by an asterisk (\*) and those of them that do well for forcing in water by two asterisks (\*\*).

Three of a kind sold at the dozen rate

## GROUPS OF HYACINTHS FOR DESIGN BEDDING

To obviate the disappointment resulting from selecting unsuitable varieties for design beds, we give the following groups of some of the sorts that bloom about the same time and grow to the same height. They will all form most effective combinations. We recommend **named** sorts for designed bedding as decidedly better than mixtures.

{ **Baron van Thuyll, Red.**  
**Alba superbissima, White.**  
**Charles Dickens, Blue.**

{ **Gigantea, Red.**  
**Grandeur a Merveille, White.**  
**Baron van Thuyll, Blue.**

{ **Robert Steiger, Red.**  
**Mad. Vanderhoop, White.**  
**Marie, Blue.**

{ **General Pelissier, Red.**  
**Baroness van Thuyll, White.**  
**Grand Maitre, Blue.**

{ **Norma, Red.**  
**La Franchise, White.**  
**La Peyrouse, Blue.**

SINGLE HYACINTHS

MIXED HYACINTHS IN SEPARATE COLORS

*The very largest size. Suitable either for forcing or bedding*

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all of the largest size. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

FRENCH ROMAN HYACINTHS

Extensively used by florists for forcing for cut-flowers. The flowers are pure white, delightfully fragrant, and each bulb will throw up from three to four

spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early, and by making successive plantings they may be had in flower all through the winter. The blue and rose Roman Hyacinths flower from one to two weeks later than the white variety.

MINIATURE HYACINTHS

These are also known as “Dutch Roman” and “Pan Hyacinths.” They are very suitable for growing in groups in pots or earthen pans. We offer them in separate colors, and also mixed, as follows: Pure White, Cream-White, Dark Red, Rosy Red, Light Blue and Dark Blue, 45 cts. per doz., \$2.50 per 100. Mixed Colors. 40 cts. per doz., \$2.25 per 100.

ITALIAN HYACINTHS

These are grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are hardier than the Romans, and may also be planted outside in the fall for flowers for early spring cutting.

## TULIPS

**TULIPS ARE READY FOR DELIVERY IN SEPTEMBER**

For beauty of form and brilliancy of coloring Tulips are unequaled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers can select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers, they are also invaluable.

**CULTURE.**—The cultural directions given for hyacinths, on page 2, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the

## TULIPS, continued

bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open border.

A, B and C indicate season of flowering. A and B may be planted to flower about the same time in the open ground; C flowers later.

# STRAWBERRY PLANTS.

Those marked (P.) have pistillate, or imperfect flowers, and must be planted near perfect-flowering kinds, in order that the flowers may be fertilized. The varieties not so marked are bi-sexual, or perfect-flowering, and can be planted alone.

## POT GROWN PLANTS

(Ready about July 15th)

	per 25	per 50	per 100
<b>Brandywine.</b> Large, roundish conical, glossy crimson, firm and solid; of fine aromatic flavor. Plant vigorous and productive; succeeds on any soil. Midseason to late.....	\$1 25	\$2 00	\$3 25

PARROT TULIPS

For outdoor cultivation. The petals of these have feathered edges, and in addition to other colors combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant color, and form very effective groups for the flower border. To get the best results they must have the full effect of the sun. Very late in flowering.

## DARWIN TULIPS

They grow very tall, with large flowers of fine form. Being borne on very long stems, they are excellent for cutting to put in vases for house decoration. They are all single, self-colored, and of great brilliancy.

Named sorts as follows, all 8 cts. each, 60 cts. per doz., \$4 per 100

**Anton de Bury.** Dark violet.  
**Asa Gray.** Dark carmine.  
**Donders.** Dark vermilion; violet center.  
**Dream.** Lilac; Very large flower.  
**General de Cordous.** Glowing scarlet.  
**Glow.** Vermilion; blue center, white margin.  
**Kate Greenaway.** White, shaded lilac.

**Laurentia.** Fiery scarlet.  
**Loveliness.** Satiny rose, shaded blush.  
**Nora Ware.** Heliotrope.  
**Pales.** Soft lilac.  
**Portales.** Scarlet.  
**Mixed Darwins.** 5 cts. each, 40 cts. per doz., \$2 per 100,  
 \$14 per 1,000.

## MIXED TULIPS

For bedding. Planted in large masses, these make a magnificent show, and, being inexpensive, should be largely used. Our special mixtures of Early Single and Early Double Tulips are made up of the finest bulbs and the brightest colors. If planted in large beds, they will produce an exceedingly beautiful and lively effect.

SINGLE AND DOUBLE NARCISSUS

# NARCISSUS

**NARCISSUS ARE READY FOR DELIVERY IN SEPTEMBER**

The very beautiful species and varieties of Narcissus are among the most popular and largely grown of spring-flowering bulbs, and that deservedly, too. Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, or lakes, or ponds, and in mixed flower or shrubbery borders. They are also suitable for naturalizing in the grass, by the side of woodland walks, or in open spaces between trees and shrubs. With the exception of the Polyanthus section, they are all perfectly hardy.

Narcissus are also very suitable for growing in pots, requiring about the same treatment as hyacinths, with three or four bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers.

## SINGLE NARCISSUS, or DAFFODILS

	Each	Doz.	100	
<b>Ard Righ</b> (Irish King). Magnificent golden yellow trumpet; very large and graceful. One of the earliest and finest for forcing .....	\$0 10	\$0 90	\$5 50	—If ordered by mail, add 12 cts. per dozen for postage—

## LILIES

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a deep, rich loam, they all do best in a light, well-drained soil. Some peat or leaf-mold may be used to advantage. *L. auratum* cannot bear manure, but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

**Lilium Harrisii** and **Lilium candidum** ready in August; others not until November

LILIUM HARRISII (BERMUDA EASTER LILY)  
BULBS NOW READY

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white trumpet-shaped flowers are very sweet-scented and of great substance, and last a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window deco-

JONQUILS

## LILIIUM HARRISII, continued

ration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

If ordered by mail, add from 10 to 20 cents per dozen for postage, according to size

## BEAUTIFUL JAPAN LILIES

These do not generally arrive until November and December. We import our supply direct from Japan every year. Every garden should have some of these most beautiful and easily grown Lilies.

Postage on these varieties from 2 to 10 cents each, according to size

**Auratum** (Gold-banded Lily). The grandest of all hardy Lilies; flowers white, spotted with maroon, having a bright yellow band through the center of each petal. The plant grows from 3 to 6 feet high.

8 to 9 inches in circumference, 10c. each, \$1 per doz.; \$7 per 100; 9 to 11 inches in circumference, 20c. each, \$1.75 per doz.; \$11 per 100; 11 to 13 inches in circumference, 35 cts. each, \$3.25 per doz.; \$20 per 100.

**Auratum macranthum**, or **platyphyllum**. A splendid variety of the above, with much larger flowers; of perfect form and great substance. 5 to 8 feet, 35 cts. each, \$3.50 per doz.

**Auratum rubro-vittatum**. Enormous flowers, sometimes measuring 10 inches across; pure white, beautifully spotted, and with a deep crimson stripe through center of each petal; very fragrant. 7 to 9 inches, 60 cts. each, \$6 per doz.; 9 to 11 inches, \$1 each, \$9 per doz.

**Auratum pictum**. Flowers like those of the common *Auratum*, with yellow band through each petal. It is beautifully spotted with rich crimson. 60 cts. each, \$5 per doz.

**Auratum Wittei**. Very large, pure white flowers, with raised spots of satiny white; a grand Lily. 4 to 6 feet, 75 cts. each, \$8 per doz.

**Washingtonianum.** A lovely native variety of very stately habit; large, trumpet-shaped flowers pure white, tinged purple or lilac; very fragrant; 4 to 7 feet high. 35 cts. each, \$3.50 per doz.

## LILY-OF-THE-VALLEY

(*Convallaria majalis*)

**READY IN NOVEMBER AND DECEMBER**

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them. They may also be planted in moss fiber in vases.

**Clumps.** Fine large clumps, with many flowering pips on each. Fine for planting outside in shaded positions, and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per doz.

**Pips for forcing.** 50 cts. per bundle of 25, \$1.75 per 100, \$14 per 1,000.

LILY-OF-THE-VALLEY

## CHINESE SACRED LILY (THE WATER FAIRY FLOWER)

**READY IN SEPTEMBER**

If ordered by mail, add 5 cts. each or 25 cts. per dozen for postage

A variety of the Polyanthus Narcissus, imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs entirely, and place in a sunny window in a cool room.

**Price, 10 cts. each, \$1 per doz.**

## ANEMONE, or WINDFLOWER

Very ornamental hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

If ordered by mail, add 15 cents per 100 for postage

## AMARYLLIS

## READY IN OCTOBER

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mold or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Estab-

lished bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

*Belladonna major*. Violet and white; flowers in large umbels; fragrant. 25 cts. each, \$2.50 per doz.

*Formosissima* (Jacobæan Lily). 15 cts. each, \$1.50 per doz.

*Josephine* (Gigantea). Very fine scarlet; flowering in immense umbels; these are extra-sized bulbs. \$6 each.

*Longifolia rosea*. Rose; hardy. 25 cts. each, \$2.50 per doz.

*Longifolia alba*. White; hardy. 25 cts. each, \$2.50 per doz.

*Lutea* (Sternbergia). Hardy autumn-flowering variety, with bright yellow, crocus-like flowers. 12 cts. each, \$1.25 per doz., \$7 per 100.

*Orientalis*. Fine; rare variety. \$4.50 each.

*Ornatum*. White, finely striped rose. \$3.50 each

*Hippeastrum Aulica* (Lily-of-the-Palace) Very large, handsome flowers; crimson, shaded with green. \$1.25 each.

*Hippeastrum Cleopatra*. Red, with white margin. \$4 ea.

ANEMONE JAPONICA

## AMARYLLIS, continued

- Hippeastrum Crocea grandiflora.** Bright orange, white-striped. \$2.50 each.
- Hippeastrum Graveana.** Dark orange. \$1.75 each.
- Hippeastrum Johnsonii** (Spice Lily). Beautiful flowers; crimson, striped white; very large bulbs. 70 cts. each, \$7 per doz.
- Hippeastrum, Prince of Orange.** Bright orange; beautiful. \$2.50 each.
- Hippeastrum reticulata striatifolia.** Violet, striped white. \$3 each.
- Hippeastrum, Mixed Hybrids.** Beautifully colored hybrids; large bulbs. 70 cts. each, \$7 per doz.
- Vittata Mixed Hybrids.** 60 cts. each, \$6 per doz.

**Begonia grandiflora,**

## TUBEROUS-ROOTED

## READY IN NOVEMBER AND DECEMBER

Splendid pot-plants for the house or greenhouse and especially valuable for bedding, flowering in the greatest profusion throughout the summer. For bedding they should be started in hotbed in March and April. The hollow end of the bulb should be up and but slightly covered. They should get very little water until the plants are growing.

**BEGONIA CRISPA** (Single-fringed Begonias)

These new Begonias have beautifully shaped, gracefully fringed and crested flowers borne above the foliage on long and erect stems. A fine strain with a great future. **Red, Rose, White, Yellow and Salmon.** 35 cts. each, \$3.50 per doz.

BEGONIA CRISPA

**BRODIAEA** **READY IN SEPTEMBER**

Pretty, hardy, bulbous plants from the Pacific coast. They have narrow, grassy leaves, slender stems, and umbels of lily-like flowers. For forcing or outdoor culture. Do best in rich, sandy loam. If grown in pots, a compost of loam, leaf-mold and sand is best.

**Bridgesii.** Rich reddish purple flowers. 8 cts. each, 65 cts. per doz., \$4 per 100.

**Californica.** Often 2 feet high, with large pinkish purple flowers. Fine. 8c. each, 65c. per doz., \$4 per 100.

**Candida.** Pale blue flowers in spreading umbels; exceedingly beautiful. 12 cts. each, \$1 per doz., \$6 per 100.

**Coccinea** (Floral Fire Cracker). Rich blood-crimson, tipped white. 6 cts. each, 50 cts. per doz., \$3.50 per 100.

**Congestia.** Tall-growing; purple flowers. 5 cts. each, 30 cts. per doz., \$1.75 per 100.

**Grandiflora.** Deep purple flowers; large and showy. 5 cts. each, 40 cts. per doz., \$2.50 per 100.

**Ixioides splendens.** Large, light yellow flowers. 5 cts. each, 45 cts. per doz., \$3 per 100.

**Lactea.** White, with green stripes. 5 cts. each, 40 cts. per doz., \$2.50 per 100.

**Laxa.** Tall, with large blue flowers. 5 cts. each, 40 cts. per doz., \$2.50 per 100.

**Peduncularis.** Porcelain-white flowers in immense umbels. 8 cts. each, 65 cts. per doz., \$4 per 100.

**Stellaris.** Intense purple flowers, with white center, borne on short stems and forming a starry clump. 8 cts. each, 65 cts. per doz., \$4 per 100.

**Mixed Sorts.** 5 cts. each, 30 cts. per doz., \$1.50 per 100.

CALOCHORTUS

(Mariposa Lily, or Butterfly Tulip)

READY IN SEPTEMBER

CALOCHORTUS

Very handsome bulbous plants from California. They are remarkable for the brilliancy and variety of their coloring, and their gracefulness of habit. They grow freely in light, sandy loam; though hardy, they should be protected during winter with litter. They may also be successfully grown in frames and in pots.

CROWN IMPERIALS

(Fritillaria imperialis)

A stately-growing plant, with dark green foliage, and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring, and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

CROWN IMPERIAL

If ordered by mail, add 5 cents per dozen for postage

## CROCUS

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted close,—say 2 inches apart,—and 3 inches deep, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful.

For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

If ordered by mail, add 15 cts. per 100 for postage.

## HYBRID NAMED CROCUS

Remarkable for richness of color and immense size. These varieties are best for forming letters or designs on lawns for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. The flowers are produced very early, and the mowing later on will not seriously injure the Crocus bulbs.

CYCLAMEN GIGANTEUM

## CYCLAMEN

### MOST OF THEM READY IN NOVEMBER

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The soil best suited to them is a fresh turfy loam with a fourth to a fifth of well-rotted horse manure to which add some clean sand if the soil is heavy. Plant so as to leave the top of the bulb just below the surface. We offer seed of our superb strain of *C. giganteum* at the end of this Catalogue.

**Coum.** Crimson, round-leaved. 15 cts. each, \$1.50 per doz.

**Europaeum roseum.** Very showy, rosy red. Hardy. 15 cts. each, \$1.50 per doz.

**Giganteum, Rose.** 20 cts. each, \$2 per doz.

" **Dark Crimson.** 20 cts. each, \$2 per doz.

" **White "Mont Blanc."** 20 cts. each, \$2 per doz.

" **Mixed.** 20 cts. each, \$1.75 per doz.

**Hederaefolium album.** Autumn-flowering. 30 cts. each, \$3 per doz.

" **rubrum.** Autumn-flowering. 20c. each, \$2 per doz.

**Neapolitanum.** The Ivy-leaved Cyclamen. Hardy. 15 cts. each, \$1.50 per doz.

**Repandum.** Rosy red, with purple eye. 15 cts. each, \$1.50 per doz.

## FREESIA

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water.

## CRINUMS

Splendid large-flowering bulbs, closely allied to the Amaryllis. The most suitable soil is a compost of turfy loam, cow manure and some sand. They should be grown in large pots or tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a cool-house and allowed to rest till new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure water during the growing season. They may be placed outside when warm weather begins, and will flower all through the summer, making splendid lawn or veranda plants.

**Giganteum, Giant White.** Immense bulbs; large white flowers; bloom all summer; very fragrant. They should be watered plentifully while growing. \$2 each.

**Amabile, Giant Pink.** Extra large, bright pink, with white stripe; splendid flower; enormous bulb. This and the Giant White are unsurpassed for growing in tubs, blooming profusely outside all summer. \$2 each.

**Kirki.** Large umbels of beautiful pure white flowers, with purple stripe in center of each petal. 70 cts. each.

**Powellii.** It produces long stems bearing at the top five to eight large, dark rose, bell-shaped flowers 3 to 4 inches long. 40 cts. each.

**Powellii album.** Pure white. 70 cts. each.

" **intermedium.** Light rose. \$1 each.

FREESIA REFRACTA ALBA

## FREESIA, continued

They are easily grown or forced in good loamy soil, with an admixture of leaf-mould and sand, in a frame or greenhouse, and are excellent for window culture in winter. For the information of all not acquainted with these bulbs, we may say that they are quite small, but produce large blooms in comparison to their size.

**Freesia refracta alba.** The body of the flower is pure white, with lower segments spotted lemon-yellow. Their fragrance is remarkable and very lasting.

	Doz.	100	1 000
Monster Size Bulbs.....	\$0 35	\$2 00	\$14 00
First Size Bulbs.....	25	1 10	8 50
Second Size Bulbs.....	20	75	5 50

**Freesia, "Purity."** Magnificent glistening pure white flowers of large size, borne on strong, lengthy stems, each truss bearing 8 to 10 buds, five to six of which are frequently open at the same time. Of recent introduction. 60 cts. per doz., \$4 per 100.

**Freesia alba major.** Pure white; splendid new sort with large pure white flowers of good substance. 50 cts. per doz., \$2.75 per 100.

**Freesia Leichtlinii.** Creamy white, shaded to yellow, with orange blotch; distinct in color. 45 cts. per doz., \$2.50 per 100.

**Freesia rosea, New Pink.** Perhaps the most valuable introduction of recent years. It differs little in growth from the well known *F. refracta alba*, except that it throws its scapes higher above the foliage, which is finer than that of the older variety. The color is a beautiful soft pink, entirely distinct. 20 cts. each, \$2 per doz.

IXIA

## ERYTHRONIUMS

## (DOG'S-TOOTH VIOLETS) READY IN SEPTEMBER

Very ornamental, hardy, bulbous plants, of neat and dwarf habit.

They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in sheltered positions on rockeries, or in mixed flower or shrubbery borders.

	Each	Doz.	100
<b>Californicum.</b> Cream-yellow, with maroon band at base; leaves very richly mottled. The finest of all .....	\$0 07	\$0 60	\$3 50
<b>Californicum, White Beauty.</b> Flowers more nearly white than Californicum; leaves richly mottled. ....	08	65	4 00
<b>Giganteum</b> (Giant Dog's-Tooth Violet). Very large, straw-colored flowers, with orange center, borne on long, slender stems; the foliage is richly mottled in dark brown and its elegant habit makes a very attractive pot-plant for window decoration .....	06	50	3 00
<b>Citrinum.</b> Leaves mottled; flowers yellow.....	08	65	4 00

<b>Dens-canis</b> (Dog's-tooth Violet). Mixed colors; very pretty; leaves blotched in brown and white. ....	05	30	1 50

## IXIAS READY IN OCTOBER

The Named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them.

They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

	Each	Doz.	100
<b>Azurea.</b> Blue, with purple center; very beautiful .....	\$0 05	\$0 40	\$2 50
<b>Barbara.</b> Creamy white, black center .....	05	35	2 00

<b>Lanceolata.</b> Tall flowers, with large, greenish bells, mottled with yellow and purple.....	12	1 25	7 50
<b>Liliacea.</b> Flowers white; easily grown.....	12	1 25	7 50
<b>Persica.</b> Purplish brown; handsome .....	30	2 75	17 00
<b>Pluriflora.</b> Large, strong-growing plant, with beautiful reddish purple flowers blooming very early. 12	1 00	7 00	
<b>Pudica.</b> Clear yellow flowers on short stems .....	12	1 00	7 00
<b>Recurva.</b> Very fine. The flowers are between tubular and bell-shaped, and of a brilliant orange-scarlet color .....	08	60	4 00
<b>Meleagris</b> (Guinea-fowl Flower). Mixed colors .....	05	35	2 00

**Fritillaria imperialis.** See Crown Imperials, on page 20.

## GLADIOLUS READY IN NOVEMBER

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse, except *Byzantinus*, which is hardy, and may be planted out; it is best, however, to give it slight protection. Some varieties are successfully forced.

The French Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty. Every year is adding varieties of most exquisite tint and shade; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published January 1.

	Each	Doz.	100
<b>AUTUMN GIANT.</b> Bright scarlet to deep crimson flowers, with large deep yellow throat. Grows 3 to 4 feet high, with spikes of bloom sometimes 2 feet long. If planted in the open ground in spring, it blooms in Sept. and Oct., when other <i>Gladiolus</i> are gone...\$0 20	\$2 00	\$12 00

<b>Mixed Lemoines</b> .....	05	40	2 50
<b>Mixed French Hybrids</b> .....	05	40	2 50

## GLOXINIAS READY IN NOVEMBER

Gloxinias are among the most beautiful of greenhouse plants, being remarkable for the intensity and variety of their colorings, and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mould and peat in equal parts, with a little sand added. When growing plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large-sized, and of erect-flowering strain.

	Each	Doz.	100
<b>Crassifolia erecta, Red</b> .....	\$0 12	\$1 00	\$6 00
“ “ <b>White</b> .....	12	1 00	6 00

—If ordered by mail, add 3 cts. per doz. for postage—

LARGE-FLOWERED JAPAN IRIS

## IRIS (FLEUR-DE-LIS)

READY IN OCTOBER AND NOVEMBER

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light, rich, sandy soil, and in a sunny situation. Good drainage is important. The varieties of *Iris Kaempferi*, from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 or 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms, measuring 8 to 10 inches across. These require a liberal supply of water when growing. With the exception of *Morea pavonia* and *Tuberosa*, all varieties are hardy.

### SUPERB COLLECTION OF LARGE-FLOWERED JAPAN IRIS

(*Iris Kaempferi*)

We are importing from Japan a large supply of the following twenty of the best of these magnificent Irises, which excel in size, perfection of form and richness of color. These are most valuable for cut-flowers and table decoration—as handsome as orchids. Flowers should be cut in the early morning or after sunset. They come in large clumps. *The descriptions given are those furnished us by the growers in Japan.*

25 cts. each, \$2.50 per doz., \$18 per 100

**Datedogu.** Rich claret-red, orange, blue and white.  
**Gekka-no-nami** (Waves on Moonlight). Dense pure white, yellow blotches.  
**Shishi-odori** (Dancing Lion). Purple and white.  
**Kumoma-no-sora** (Sky Amidst the Cloud). White, sky-blue and yellow.  
**Kumo-no-obi** (Band of Cloud). Purple and yellow.  
**Ho-o-jo** (Ho-o-castle). Ruby-crimson, primrose blotches.  
**Hana-aoi** (Hollyhock). Gray, yellow and navy-blue.  
**Hana-no-nishiki** (Floral Embroidery). Brilliant claret-red, penciled white, orange blotches.  
**Yomo-no-umi** (Boundless Sea). Gray, blue and yellow.  
**Kuma-funjin** (Excited Bear). Purple, overlaid with navy-blue, orange blotches.  
**Senjo-no-hora** (Angel's Den). Vinous purple, speckled gray, primrose blotches.

**Komochi-guma** (Bear with young). Violet, double, blooming several close together at the head.  
**Yezo-nishiki** (Yezo-Embroidery). Crimson and white.  
**Shirataki** (White Waterfall). White and primrose.  
**Kagaribi**. Brilliant ruby, yellow blotches.  
**Shimoyo-no-tuski** (Frost Moonlight). Gray-lavender, yellow blotches.  
**Tora-odori** (Dancing Tiger). Gray, overlaid with lavender-blue, yellow blotches.  
**Tsuru-no-kegoromo** (Crane's Feather). Large, pure white flowers, yellow blotches.  
**Momiji-no-taki** (Maple Waterfall). Crimson-purple, suffused white.  
**Yedo-kagami**. Claret-orange, blue and red-violet.  
**Mixed Common, Small-flowered Japan Iris, Single and Double.** 6 cts. each, 50 cts. per doz., \$2.50 per 100.

SPANISH IRIS (*Iris Hispanica*)

Very profitable for florists, who are planting them largely for cut-flowers. Plant in beds in the open as soon as received in the autumn, and protect slightly in the winter months. In the beginning of April cover the beds with glass, so as to have the flowers ready for cutting in May.

## LACHENALIAS

READY IN SEPTEMBER

Very pretty, spring-flowering greenhouse bulbous plants with brightly colored flowers and elegant habit. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mould and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air, and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging baskets.

	Each	Doz.
<b>Luteola.</b> Pale yellow flowers, flushed with green .....	\$0 35	\$3 50
<b>Pendula.</b> Very handsome, large and showy species, with broad foliage and rich red flowers, tipped with black.....	30	3 00

## LACHENALIAS, continued

	Each	Doz.
<b>Quadricolor.</b> Bright green, red and yellow flowers; very pretty .....	\$0 25	\$2 50
<b>Tricolor.</b> Red, yellow and green .....	25	2 50
<b>Versicolor.</b> Foliage heavily spotted brown; flowers yellow, tipped with green and red; very pretty for massing .....	25	2 50
<b>Hybrids Mixed</b> .....	20	2 00

## MONTBRETIAS

## READY IN NOVEMBER

Hardy, summer-flowering, bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties:

	Each	Doz.	100
<b>Bouquet Parfait.</b> Large; bright vermilion flowers, with deep yellow center .....	\$0 05	\$0 40	\$2 00
<b>Crocsmiaeflora.</b> Large; bright orange, tinged scarlet .....	05	30	1 50

<b>Sunbeam.</b> Rich yellow, spotted brown; large flowers .....	05	40	2 00
<b>Mixed Seedlings</b> .....	05	30	1 50

## NERINE

## READY IN OCTOBER AND NOVEMBER

Very beautiful greenhouse bulbous plants succeeding best in pots in light soil—say a compost of loam, leaf-mould and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die they should be kept quite dry in a cool place until they begin to grow again.

	Each
<b>Corusca.</b> Brilliant scarlet flowers .....	\$1 75
<b>Crispa.</b> Very handsome scarlet flowers .....	1 00
<b>Flexuosa.</b> Bright crimson-scarlet, tinged with orange .....	1 40
<b>Fothergilli.</b> Bright, glittering scarlet, in a many-flowering umbel .....	1 25
“ <b>major.</b> A magnificent plant for house or conservatory. The flowers are of the most intense shining scarlet, and by artificial light the crystalline cells of the petals sparkle like jewels. It flowers very freely .....	2 00
<b>Sarniensis</b> (True Guernsey Lily). Flowers brilliant crimson, in large clusters. The best known sort .....	75
<b>Undulata.</b> Rosy purple, wavy flowers; very handsome .....	1 25

## OXALIS

## READY IN SEPTEMBER

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging baskets. They are easily grown in a sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

	Each	Doz.	100
<b>Buttercup.</b> A splendid winter-blooming plant for pot culture. The flowers are pure bright yellow, and produced in great abundance. It is very easily cultivated, and, being a strong grower, only one or two bulbs should be planted in a 5- or 6-inch pot. First size .....	\$0 05	\$0 35	\$1 75

PÆONIES

READY IN OCTOBER

The old-fashioned double Pæonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Pæonies rank about first for lawn or flower-border or shrubbery decoration. They are all hardy. The roots we offer have not less than three strong eyes each.

HERBACEOUS PÆONY

HERBACEOUS  
CHINESE PÆONIES

(*Paeonia Sinensis*)

- Alba plena.** Pure white; fragrant. 30 cts. each, \$3 per doz.
- Alba superba.** (Potsii.) Creamy white center, rosy border. 30 cts. each, \$3 per doz.
- Asa Gray.** Rosy carmine. 65 cts. each, \$6.50 per doz.
- Charlemagne.** Creamy white, center lilac and chamois. 35 cts. each, \$3.50 per doz.
- Comte de Niepperg.** Bright carmine; very early. 35c. each, \$3.50 per doz.
- Delachei.** Purplish red; sweet-scented. 30 cts. each, \$3 per doz.
- Edulis.** Bright rose; fragrant. 25 cts. each, \$2.50 per doz.
- Festiva Maxima.** White. 50 cts. each, \$5 per doz.
- Gigantea.** Fine pink; early; fragrant. 50 cts. each, \$5 per doz.
- Hamlet.** Pink flowers on very long stems. 40 cts. each, \$4 per doz.
- Humei Carnea.** Pale rose, passing to white. 30 cts. each, \$3 per doz.
- Jeanne d'Arc.** Rose, sulphur and rosy white center. 30 cts. each, \$3 per doz.
- King of the Reds.** Crimson. 30 cts. each, \$3 per doz.
- Madame Geissler.** Rosy lilac; large flower; early. 50c. each, \$5 per doz.

<b>Splendens.</b> Dark red; half-double flower.....	40	4 00

## RANUNCULUS READY IN SEPTEMBER

The main soil for these should be loam or clay, with a good dressing of rotted manure and leaf-mold; if heavy, add a little sand. The soil should be well drained, cool, deep, rich and moist. Plant late in the autumn, claws downward, from 4 to 6 inches apart and 3 inches deep, covering with fine, pulverized soil.

## RICHARDIAS, or CALLAS

**READY IN SEPTEMBER AND OCTOBER**

Tall-growing, bulbous perennials of exceedingly graceful habit and very handsome foliage and flowers. They are easily cultivated in pots, requiring only a rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting in September.

**White Calla, or Lily-of-the-Nile** (*Calla Æthiopica*). Large, white, trumpet-shaped flowers of great substance. One of the most popular and ornamental of house and greenhouse plants. Largest size bulbs. 20 cts. each, \$2 per doz., \$14 per 100.

**Pearl of Stuttgart.** A dwarf variety of sterling merit. The flowers are of medium size and perfect form, and are produced by strong plants in remarkable profusion. Even very small plants will give good blooms....

**"Little Gem" Calla.** Very neat, dwarf habit; makes an excellent pot-plant.....

**Spotted Calla** (*C. Æthiopica alba maculata*). An extremely ornamental pot-plant, with pure white flowers and handsome, deep green leaves, spotted with white .....

**Black Calla.** See *Arum Palæstinum sanctum*.....

**Red Calla** (*Arum cornutum*). Flowers red, spotted black; stem mottled; a handsome pot-plant .....

**YELLOW-FLOWERED, SPOTTED LEAF.** Grows about 2 feet high, with immense dark green leaves spotted and blotched with silvery white; flowers of medium size, pure bright yellow, with a black-purple blotch at base. Fine for spring planting. Blooms outside all summer.....

## SCILLAS READY IN SEPTEMBER

*S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years. The effect in early spring of the intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the Snowdrop and the varied hues of the Crocus, can hardly be overestimated; are most valuable for permanent edging, or planted in bunches of a dozen or so.

If ordered by mail, add 5 cents per dozen for postage, except those marked with a (\*) to which add 2 cents each

SCILLA SIBIRICA

WHITE CALLA

SNOWDROPS

## SNOWDROPS (*Galanthus nivalis*)

READY IN SEPTEMBER

Perhaps no spring flower is a more general favorite than the Snow-drop. The earliest flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms. Should be planted 2 to 3 inches deep in a shady location.

If ordered by mail, add 3 cents per dozen, or 25 cents per 100 for postage

**Single-flowering Snowdrops.** 20 cts. per doz., \$1 per 100, \$7 per 1,000.

**Double-flowering Snowdrops.** 35 cts. per doz., \$2 per 100, \$15 per 1,000.

**Giant Snowdrops of Asia Minor (*Galanthus Elwesii*).** 20 cts. per doz., \$1.25 per 100, \$8 per 1,000.

## SPIRAEA, or ASTILBE

READY IN NOVEMBER

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

**Japonica (Hoteia).** Excellent pot-plant for winter blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting. 15 cts. each, \$1.25 per doz., \$6 per 100.

**Japonica fol. aurea reticulata.** Beautiful gold-striped foliage; large panicles of pure white flowers. 20 cts. each, \$2 per doz., \$12 per 100.

**Japonica compacta multiflora.** The neat, compact habit and profusion of

large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.25 per doz., \$6.50 per 100.

**Astilboides floribunda.** Very large, pure white plumes; neat habit; very abundant bloomer. 15 cts. each, \$1.25 per doz., \$6.50 per 100.

**Palmata.** Crimson; strong clumps. 15 cts. each, \$1.50 per doz., \$8 per 100.

**Aruncus.** Handsome plant, with large plumes of pure white flowers. 20c. each, \$2 per doz.

**Gladstone.** A hybrid Spirea with beautiful snow-white plumes borne on strong stems one and a half feet long, standing erect above the foliage. The plant is perfectly symmetrical in shape, the foliage very handsome and the flowers exquisitely fragrant. Fine forcer. 20 cts. each, \$1.75 per doz., \$10 per 100.

**Washington.** A splendid decorative plant, producing extra-large flowers. Strong-grower; fine for forcing. 15 cts. each, \$1.50 per doz., \$8 per 100.

**QUEEN ALEXANDRA, PINK.** A splendid new pink variety, in habit similar to the well-known Gladstone, but flowering two weeks later. It is a very free bloomer and bears its flowers well above the strong, dark green foliage. When forced it must be shaded as soon as it starts to show color. It is a splendid outdoor plant, being as hardy as the old *Spirea Japonica*. Its color won't fade even in the brightest weather. 60 cts. each, \$6 per doz.

SPIRAEA

## TRILLIUMS (American Wood-Lily, or Indian Shamrock)

Hardy herbaceous perennials, succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are native of North America, and are known by various common names in different localities. They have violently emetic roots.

<b>Grandiflorum</b> ("Giant American Wood-Lily," or "Wake Robin"). Large white flowers, Each Doz. 100			
changing to rose; quite hardy, and easily grown in shaded positions.....	\$0 10	\$0 75	\$4 00
<b>Sessile Californicum</b> . Handsome, pure white flowers, with purple centers; prettily mottled foliage.....	12	1 25	6 50
<b>Sessile, Snow Queen</b> . Of the same type as Californicum, but the flowers are pure white and with broader petals .....	15	1 50	8 00

## TUBEROSES

### READY IN DECEMBER

The purity of color and rich perfume of the Tuberose are well known in this latitude. May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich, warm soil and a sunny situation. Cut off about a quarter of an inch from the bottom of the bulb before planting, and set so that the top will be one inch below the surface of the soil.

<b>Dwarf Double Pearl</b> . Dwarf habit; large, fine flowers of great substance .....	Each \$0 06	Doz. \$0 40	100 \$2 00
<b>Albino</b> . Purest white; single flowers .....	08	50	3 00
<b>Variegated Leaf</b> . Foliage striped white and green; single white flowers.....	08	50	3 00

## Miscellaneous Bulbs and Roots

Those marked with an asterisk (\*) will not be ready till October or November

* <b>Achimenes</b> . Mixed. Lovely greenhouse pot-plants.....	Each \$0 10	Doz. \$0 75	100 \$5 00
<b>ACIDANTHERA BICOLOR</b> . Ready in November. A gladiolus-like plant, growing 2 feet high; flower-spikes pure white and sweet-scented, with a large triangular blotch in the center. Blooms during July and August. The bulbs must be kept warm and dry over winter....	35	3 50	
<b>Aconite</b> . See Eranthis, page 32.			
<b>Allium</b> . Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.			
" <b>Azureum</b> . Beautiful sky-blue flowers in large umbels; fine for pots or garden .....	08	60	4 00
" <b>Neapolitanum</b> . Large umbels of pure white flowers, borne on large stems; valuable for forcing for winter cut-flowers, as well as for summer garden decoration .....	05	25	1 25
" <b>Moly luteum</b> . Golden yellow flowers in large umbels; very showy and attractive; fine for growing in the garden in groups or for naturalizing in masses.....2 for 5 cts...		20	1 00

# Hardy Annual and Perennial Flower Seeds

## FOR AUTUMN SOWING

Many varieties of Flower Seeds, ANNUALS as well as BIENNIALS and PERENNIALS, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerously than if sown in the spring.

THE GEM LAWN CLEANER

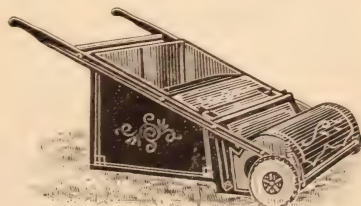

which carries into the canvas basket all leaves, dead grass, stones, etc., that the rake encounters. It straightens up crab grass and other running weeds so that they may be cut by the lawn mower. Price, \$16.

## LAWN SWEEPER, "MODEL NO. 1"

Designed for use on ordinary lawns, small parks, tennis courts, etc. It is 25 inches wide over all, weighs 28 pounds, and carries a 21-inch brush. The brush is fan-shaped, and revolves very rapidly in the same direction as the drive-wheels, throwing the litter backwards from the under surface. Price, \$12.

## THE GEM LAWN CLEANER

A revolving fan with metal teeth creates an air-current

# Insecticides and Remedies for Plant Diseases

## Bug Death

This is a fungicide, insecticide and plant-food combined. 1-lb. package, 15 cts.; 3-lb. package, 35 cts.; 5-lb. package, 50 cts.; 12½-lb. package, \$1; 100-lb. package, \$7.50.

## Fir-Tree Oil

For greenhouse and house plants. Destroys all insects without injuring the plant. Dilute in the proportion of 1 pint to 20 gallons of water. Apply with vaporizer or syringe. ½pt., 40 cts.; pt., 75 cts.; qt., \$1.25; ½gal., \$2.25; gal., \$4.

## Fir-Tree Oil Soap

This is the same as the Fir-Tree Oil, but in soap form. Mix at the rate of 1 ounce to a gallon of water, and apply with bellows or syringe. ½-lb. tin, 25 cts.; 2-lb. tin, 75 cts.

## Dalmatian Insect Powder

Effective against almost all kinds of insects. Per ½-lb. box, 30 cts.; per 1-lb. box, 50 cts.

## Gishurst's Compound

A certain remedy for greenfly, scale, mealy bug, etc. Excellent for greenhouse use. Per 1-lb. box, 50 cts.

## Hammond's Grape Dust

For the prevention of mildew on roses, grapes, gooseberries, etc. Apply with bellows. 5-lb. package, 35 cts.; 10-lb. package, 60 cts.; 100 lbs., \$5.

## Hellebore, Powdered

An excellent protection from currant worms, grape slugs, caterpillars, etc. May be applied dry or mixed in water—1 oz. to 3 gallons. Per 2-lb. box, 35 cts.; per 1-lb. box, 20 cts.; ½-lb. box, 12 cts.

## Kerosene Emulsion

For cabbage worms, scale on trees, caterpillars, melon louse, rose bugs, greenfly, etc., either on plants or animals. Dilute 25 to 50 parts. Qt. 40 cts., gal. \$1.

## Lemon Oil

For destroying scale, caterpillar, mealy bug, etc. Directions on can. ½pt., 25 cts.; pt., 40 cts.; qt., 75 cts.; gal., \$2.

## Antipest

A sure destroyer of all insect pests. Qt., 60 cts.; ½gal. can, \$1; gal. can, \$2.

## Nicoticide

For fumigating or spraying. Used effectually for greenfly, mealy bug, etc. Does not damage foliage or flowers. Sold in cans as follows: No. 1, containing 1 pt., sufficient for 32,000 cubic feet of space, \$2.50 each; No. 2, containing ½pt., sufficient for 16,000 cubic feet of space, \$1.25; No. 3, containing 4 ozs. (¼pt.), sufficient for 8,000 cubic feet of space, 70 cts. Per gal., \$15; ½gals., \$8.25 each; qts., \$4.50 each. Fumigators for same, 50 cts. each.

## "Nico-Fume" Tobacco-Paper

For fumigating greenhouses. "Nico-Fume" is the strongest Tobacco-Paper on the market; does not injure blooms. Packed in special friction-top tins. 24 sheets, 75 cts.; 144 sheets, \$3 50; 288 sheets, \$6.50.

## Nico-Fume Liquid

For fumigating or spraying. Effective against greenfly, mealy bug, etc. Does not stain nor injure blooms, and leaves no disagreeable odor. For spraying, 1 to 2 teaspoonfuls to a gallon of water. ¼pt., 50 cts.; pt., \$1.50; ½gal., \$5 50; gal., \$10.50.

## Paris Green

Mixed at the rate of 1 lb. to 200 gallons of water, it will prove effective against all chewing insects. Per 1-lb. can, 45 cts.; ½-lb. can, 25 cts.; ¼lb. can, 18 cts. This article is liable to fluctuate in price.

## Slug-Shot (Hammond's)

Excellent for destroying cabbage, turnip and beet fly, potato bugs, currant worms, etc. 5-lb. package, 30 cts.; 10-lb. package, 50 cts.; 100 lbs., \$4.

## Sulphur, Powdered

Valuable for protecting against mildew on grapes, roses, etc. Per lb., 10 cts.; 10 lbs., 60 cts.; 100 lbs., \$2.

## Sulpho-Tobacco Soap

Dissolve in proportion of 2 ounces to a gallon of water, and apply with a syringe or atomizer. It will destroy rose slugs, aphides, greenfly, bark-lice, etc. Per 3-oz. box, 10 cts.; 8-oz. box, 20 cts.; 10-lb. box, \$3.

## Tobacco Dust

If dusted on *while the foliage is moist* it destroys rose lice, cabbage and turnip fleas, etc. Spread upon the ground, it keeps off all earth insects. Per lb., 10c.; 5 lbs., 30 cts.; 10-lb. 60 cts.; per 100 lbs., \$2.75.

## Tobacco Stems

For fumigating plants infested with greenfly. Per bale of about 100 lbs., \$1.50; 200 lbs., \$2.75; 400 lbs., \$4.50.

## "Rose Leaf" Tobacco Extract

A perfectly pure, highly concentrated extract of tobacco, most effective for destroying all insects and scale on plants. Pint cans, 30 cts.; qt. 50 cts.; gal., \$1.25.

## Whale-Oil Soap

For washing trees and destroying all insects on the bark. Per 1-lb. box, 15 cts.; 5 lbs., 50 cts.; 10 lbs., 90 cts.; 100 lbs., \$7.

## Bordeaux Mixture, or Fungicoid

For all fungous diseases. Dry, 1-lb. box, 20 cts.; 5 lbs. and over at 18 cts. per lb.; 50 lb., \$7; liquid, qt., 40 cts.; gal., \$1.25.

## FOR SAN JOSÉ SCALE

**Horicum** (Hammond's). A lime, sulphur and salt mixture, entirely free from grit. 1 gallon makes 25 by adding sufficient water. Qt., 40 cts.; ½gal., 75 cts.; gal., \$1.25.

**California Wash.** (Lime, sulphur and salt.) One gallon makes 25 by adding sufficient water. Qt., 40 cts.; gal., \$1.

**Scalecide.** Petroleum oil that mixes at once with cold water and stays mixed. No hot water necessary. Add 1 gallon for every 15 to 20 gallons water. Qt., 40 cts.; gal., \$1; 5 gals., \$3.25.

## Thorburn's High-Grade Fertilizers

### Thorburn's Lawn Fertilizer

Per ton, \$50; single bags of 167 lbs., \$5; per bag of 100 lbs., \$3.25; 50 lbs., \$2; 25 lbs., \$1.25; 10 lbs., 75 cts.

### Thorburn's Complete Manure

Ton, \$40; single bag of 167 lbs., \$4; bag of 100 lbs., \$2.75; 50 lbs., \$1.65; 25 lbs., \$1; 10 lbs., 50 cts.

### Clay's Celebrated Fertilizer

One of the best manures for all horticultural purposes. 1 cwt. (112 lbs.), \$7; ½ cwt. (56 lbs.), \$4; ¼ cwt. (28 lbs.), \$2.25; ⅓ cwt. (14 lbs.), \$1.25.

### Albert's Plant Food

The best fertilizer for house-plants. Full directions on each tin. 15 cts. per tin; by mail, 25 cts.

### Pure Ground Bone Meal

This finely pulverized ground-bone is excellent for rose culture. It is fine for mixing with the soil for potting. 5 lbs., 25 cts.; 50 lbs., \$1.25; 100 lbs., \$2.25; per ton, \$32.

### Canada Hard-Wood Ashes

Highest grade, extra-screened, unleached, analysis guaranteed. For top-dressing for lawns, especially if the soil is inclined to be stiff or sour, there is nothing better. In barrels of about 200 lbs., \$3; per ton, \$22.

### Pulverized Sheep Manure

Excellent as a top-dressing for lawns. Nothing better for mixing with soil for greenhouse plants—one part manure and six parts soil. 5-lb. package, 30 cts.; 10 lbs., 50 cts.; 50 lbs., \$1.25; 100 lbs., \$2; ton, \$30.

## Horticultural Implements, Etc.

**Mastica.** For glazing greenhouses, sashes, etc. Per qt., 40 cts.; ½ gal., 70 cts., gal., \$1.25.

**Mastica Glazing Machines.** Each, \$1.25.

**Mats.** For covering sashes. Made of jute, stitched through; hemmed with canvas and thickly padded; size 76 inches by 76 inches; one mat covers two sashes.

No. 1. Both sides jute. Each, \$1.50; per doz., \$16.

No. 2. One side jute, the other side waterproof duck. Each, \$1.80; per doz., \$21.

**Pruners.** Waters' Long-handled Tree. 4 feet, 75 cts. each; 6 feet, 80 cts. each; 8 feet, \$1 each; 10 feet, \$1.10 each.

**Little Giant Pruner and Saw combined.** \$1.50.

**Shears, Pruning, Perfection.** Nos. 1 to 4, \$1.75 to \$3 each.

**Sulphur Vaporizer (Campbell's Patent).** Designed to vaporize sulphur in greenhouses without danger of the sulphur taking fire or disfiguring foliage. Useful for killing mildew and other fungous diseases.

No. 1. For houses up to 5,000 cubic feet of space, \$6.

No. 2. For houses up to 10,000 cubic feet of space, \$7.50.

**Thermometers.** Hotbed and mushroom bed. Boxwood, brass tips; made for plunging. Each, \$1 and \$1.75.

## Grass Seeds for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the end of September, so that the young grass may become well rooted before winter sets in.

### The Thorburn Lawn Grass

(UNIVERSAL PARK MIXTURE)

Practically all the finest lawns in America were produced from this mixture. It is composed exclusively of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich green sward in three or four weeks from the time of sowing. The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture. It should be sown at the rate of 4 to 5 bushels to the acre. Per qt., 25 cts.; 2 qts., 40 cts.;  $\frac{1}{2}$  pk., 65 cts.; pk., \$1; bus. of 15 lbs., \$3.50.

### Thorburn's Special Lawn Grass Mixture

This extra-choice mixture contains a large proportion of the finer and more expensive species, such as Rhode Island Bent, Crested Dog's-Tail, Creeping Bent, in extra-heavy samples, bringing the weight up to 20 lbs. per bushel, and producing a turf of the closest and finest texture possible. Per qt., 30 cts.; 2 qts., 50 cts.;  $\frac{1}{2}$  pk., 85 cts.; pk., \$1.50; bus. of 20 lbs., \$5.

### Thorburn's Lawn-Restoring Grass Seed

A mixture of grasses peculiarly suited to take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-restoring Grass Seed** should be sown before every summer rain on thin places. Per qt., 30 cts.; 2 qts., 50 cts.;  $\frac{1}{2}$  pk., 85 cts.; pk., \$1.50; bus. of 24 lbs., \$5.

### Thorburn's Lawn Grass for the South

A mixture of grasses that stand extremes of heat and drought and that are therefore peculiarly adapted to southern lawns. Per qt., 35 cts.; 2 qts., 60 cts.;  $\frac{1}{2}$  pk., \$1; pk., \$1.75; bus. of 20 lbs., \$6.

### Thorburn's Grass Mixture for Shady Spots on Lawns

A mixture of grasses that thrive in shaded situations, under trees, or close to walls where there is little sun. Per qt., 35 cts.; 2 qts., 60 cts.;  $\frac{1}{2}$  pk., \$1; pk., \$1.75; bus. of 24 lbs., \$6.

## Also Permanent Grass Seed for Golf Links, Tennis Courts and Polo Grounds

We have devoted much attention to the seeding and preservation of golf links, tennis courts and polo grounds, and offer the following mixtures, which have been used on most of the finest links, etc., in the country with very satisfactory results.

### Fair Green or Golf Links Mixture

For the grounds in general. Per bushel of 20 lbs., \$3.

### Tennis Court Mixture

A mixture of extra-fine grasses peculiarly adapted to tennis courts.

This mixture will make a firm, green and lasting turf of the finest texture that will improve with tramping. Per qt., 35 cts.; 2 qts., 60 cts.;  $\frac{1}{2}$  pk., \$1; pk., \$1.75; bus. of 24 lbs., \$7.

### Putting-Green Mixture

A mixture of extra-fine grasses that will make a close, firm, green and lasting turf, which will improve with tramping. Per qt., 35 cts.; 2 qts., 60 cts.;  $\frac{1}{2}$  pk., \$1; pk., \$1.75; bus. of 24 lbs., \$7.

### Polo Grounds Mixture

A mixture of fine-leaved and deep-rooting grasses, forming a strong and lasting turf that will stand hard usage. Per bus. of 20 lbs., \$3.25.

## Grass Seed Mixtures for Meadows and Pastures

The formation of permanent pastures and meadows has for many years been a subject of careful study with us, and the following mixtures for seeding grass-lands have received universal recognition.

### Meadow Mixtures

Sow at the rate of 2 bushels to the acre

No. 1. For good land, neither too dry nor too wet. Per bushel of 20 lbs., \$3.

No. 2. For high and dry land. Per bus. of 20 lbs., \$3.50.

No. 3. For wet, late land. Per bus. of 20 lbs., \$3.

### Pasture Mixtures

Sow at the rate of 2 bushels to the acre

No. 4. For good land, neither too dry nor too wet. Per bushel of 20 lbs., \$3.50.

No. 5. For dry land. Per bushel of 20 lbs., \$4.

No. 6. For wet land. Per bushel of 20 lbs., \$3.50.

# *J. M. Thorburn & Co.'s Catalogue*

## OF BULBS AND FLOWERING ROOTS FOR FALL PLANTING

We invite special attention to the collections of bulbs offered on the cover page opposite, both for indoor and outdoor cultivation. They contain only sorts that will insure satisfaction.

Many of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of flowers may be had from December till May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. The cultural directions found under the respective headings are worthy of careful attention.

Our bulbs are all selected, coming from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation and often sold at auction and otherwise, at very low prices.

**NAME AND ADDRESS.** *We often receive orders with either the name or the address of the sender omitted. As we can do nothing with such orders, the customer thinks his order is being neglected. We therefore beg our correspondents to be careful to write on each order their name and full address.*

**ORDERS** should be sent as soon as possible after receipt of this Catalogue. The bulbs will be sent in proper time for planting. They are ready from August to November, according to the time of ripening and the country from which they come. Orders booked earliest are surest of being filled as ordered. If left too late, the supply of some of the varieties may be exhausted.

Please address all orders and remittances to

F. W. BRUGGERHOF, President  
E. E. BRUGGERHOF, Vice-Pres. and Treas.

# HYACINTHS

THESE BULBS ARE READY FOR DELIVERY IN SEPTEMBER

The Hyacinth is one of the most popular and beautiful spring-flowering plants for indoor and outdoor decoration. By careful management in keeping up a succession, it may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground it is unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to any one suitable sorts, when desired.

**OUTSIDE CULTURE.** In this section, October is the month to plant Hyacinths outside. They succeed best in a light soil and a sunny situation. If the soil is naturally heavy, some sand should be mixed with it, and, if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs; some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has been frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field mice which may burrow in it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibry loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.** Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

Persons unacquainted with the different varieties will do well to leave the selection to us, only specifying in their order whether bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortments of named Hyacinths of our selection offered on page 4, and to the Hyacinth glasses which are described at the end of the Catalogue.

*The names of our Hyacinths and Tulips are those given to them by the originators in Holland, and they are not sold under fancy names manufactured in this country*

## SELECT NAMED HYACINTHS

*N. B.* Our selected Named Hyacinths are the cream of the Holland Nurseries under their original names. For forcing in pots or for outdoor beds they far surpass the class of Bulbs usually sold.

The single-flowered varieties are generally more effective and better for forcing than the double ones. They also, as a rule, succeed better in glasses. The double varieties are distinguished by an asterisk (\*) and those of them that do well for forcing in water by two asterisks (\*\*).

Three of a kind sold at the dozen rate

GROUPS OF HYACINTHS FOR DESIGN BEDDING

To obviate the disappointment resulting from selecting unsuitable varieties for design beds, we give the following groups of some of the sorts that bloom about the same time and grow to the same height. They will all form most effective combinations. We recommend **named** sorts for designed bedding as decidedly better than mixtures.

<ul style="list-style-type: none"> <li>Baron van Thuyll, Red.</li> <li>Alba superbissima, White.</li> <li>Charles Dickens, Blue.</li> </ul>	<ul style="list-style-type: none"> <li>Robert Steiger, Red.</li> <li>Mad. <ul style="list-style-type: none"> <li>Gigantea, Red.</li> <li>Grandeur a Merveille, White.</li> <li>Baron van Thuyll, Blue</li> </ul>		<ul style="list-style-type: none"> <li>Norma, Red.</li> <li>La Franchise, White.</li> <li>La Peyrouse, Blue.</li> </ul>

SINGLE HYACINTHS

MIXED HYACINTHS IN SEPARATE COLORS

The very largest size. Suitable either for forcing or bedding

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all of the largest size. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

FRENCH ROMAN HYACINTHS

Extensively used by florists for forcing for cut-flowers. For this purpose they are the best and most popular of bulbs. The flowers are pure white, delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early, and by making successive plantings they may be had in flower all through the winter. The blue and rose Roman Hyacinths flower from one to two weeks later than the white variety.

MINIATURE HYACINTHS

These are also known as “Dutch Roman” and “Pan Hyacinths.” They are very suitable for growing in groups in pots or earthen pans. We offer them in separate colors, and also mixed, as follows:

Pure White, Cream-White, Dark Red, Rosy Red, Light Blue and Dark Blue, 45 cts. per doz., \$2.50 per 100.  
Mixed Colors. 40 cts. per doz., \$2.25 per 100.

ITALIAN HYACINTHS

These are grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are hardier than the Romans, and may also be planted outside in the fall for flowers for early spring cutting.

TULIPS

TULIPS ARE READY FOR DELIVERY IN SEPTEMBER

For beauty of form and brilliancy of coloring Tulips are unequaled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers can select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers, they are also invaluable.

CULTURE.—The cultural directions given for hyacinths, on page 2, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep

If ordered by mail, add 10 cts. per dozen for postage

SINGLE TULIPS

## TULIPS, continued

enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open border.

A, B and C indicate season of flowering. A and B may be planted to flower about the same time in the open ground; C flowers later.

## Single Late or May-Flowering Tulips

6 of a kind at dozen rate, 25 of a kind at 100 rate

These are all tall-growing May-flowering Tulips, with very large, most brilliantly colored flowers of perfect form. They will be found invaluable for garden work. The named Bizarres and Bybloems are the sorts grown by florists for show purposes. Splendid for cutting rather than for design bedding.

		Doz.	100
Bizarres. Crimson, violet-purple, etc., on yellow ground (25 named varieties).....each	8c.	\$0 70	\$4 50
Bybloems. Rosy on white (25 named varieties).....each	10c.	80	5 50

Sweet Nancy. White, suffused rose. 7 cts. each, 60 cts. per doz., \$3.50 per 100.			
Yellow Queen. Large; deep yellow. 8 cts. each, 65 cts. per doz., \$4 per 100.			

PARROT TULIPS

## PARROT TULIPS (May-flowering)

6 of a kind at dozen rate, 25 of a kind at 100 rate

For outdoor cultivation. The petals of these have feathered edges, and in addition to other colors combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant color, and form very effective groups for the flower border. To get the best results they must have the full effect of the sun. Very late in flowering.

## DOUBLE TULIPS

6 of a kind at dozen rate, 25 of a kind at 100 rate

The Double Tulips come into bloom a little later than the single varieties. They are splendid for bedding, and the flowers last longer in bloom than the single sorts. Some of the sorts are quite dwarf.

If ordered by mail, add 6 cts. per dozen for postage

## MIXED TULIPS

For bedding. Planted in large masses, these make a magnificent show, and, being inexpensive, should be largely used. Our special mixtures of Early Single and Early Double Tulips are made up of the finest bulbs and the brightest colors. If planted in large beds, they will produce an exceedingly beautiful and lively effect.

## NARCISSUS

**NARCISSUS ARE READY FOR DELIVERY  
IN SEPTEMBER**

Narcissus are among the most popular and largely grown of spring-flowering bulbs, and deservedly, too. Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, lakes, or ponds, and in mixed flower or shrubbery borders. They are also suitable for naturalizing in the grass, by the side of woodland walks, or in open spaces between trees and shrubs.

For growing in pots, they require about the same treatment as hyacinths, three or four bulbs in a 5-inch pot and they are valuable for this purpose. Some of the varieties are grown in large numbers by florists for winter cut-flowers. With the exception of the Polyanthus section, they are all perfectly hardy.

### SINGLE NARCISSUS, or DAFFODILS

**Ard Righ** (Irish King). Magnificent golden yellow trumpet; very large and graceful. One of the earliest and finest for forcing..... \$0 10 \$0 90 \$5 50

Large Double. Deep golden yellow, very double, delightfully fragrant; fine for forcing.....	05	40	2 50
Silver Jonquil ( <i>Narcissus tenuior</i> ).....	07	60	3 50

LILIES

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a deep, rich loam; they all do best in a light, well-drained soil. Some peat or leaf-mold may be used to advantage. *L. auratum* cannot bear manure, but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand is recommended.

Lilium Harrisii and Lilium candidum ready in August;  
others not until November

LILIUM HARRISII (BERMUDA EASTER LILY)

BULBS NOW READY

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white trumpet-shaped flowers are very sweet-scented and of great substance, and last a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decoration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

If ordered by mail, add from 10 to 20 cents per dozen for postage, according to size

	Each	Doz.	100
5 to 7 inches in circumference.....	\$0 10	\$1 00	\$7 00

9 to 11 inches in circumference.....	40	4 00	30 00

LILIUM LONGIFLORUM (WHITE TRUMPET LILY)

If ordered by mail, add 3 cents each for postage

This is among the most beautiful and valuable of garden Lilies. It grows from 1 to 4 feet high and bears many trumpet-shaped, sweetly scented, waxy white flowers of great substance. A well-drained light loam enriched with leaf-mold suits it best.

	Each	Doz.	100
6 to 8 inches in circumference.....	\$0 10	\$0 85	\$5 00

## BEAUTIFUL JAPAN LILIES

These do not generally arrive until November and December. We import our supply direct from Japan every year. Every garden should have some of these most beautiful and easily grown Lilies.

Postage on these varieties from 2 to 10 cents each, according to size

**Auratum** (Gold-banded Lily). The grandest of all hardy Lilies; flowers white, spotted with maroon, having a bright yellow band through the center of each petal. The plant grows from 3 to 6 feet high.

8 to 9 inches in circumference, 12 cts. each, \$1.25 per doz., \$8 per 100; 9 to 11 inches in circumference, 20 cts. each, \$1.75 per doz., \$12 per 100; 11 to 13 inches in circumference, 35 cts. each, \$3.25 per doz., \$22 per 100.

**Auratum macranthum** or **platyphyllum**. A splendid variety of the above, with much larger flowers of perfect form and great substance. 5 to 8 feet, 35 cts. each, \$3.50 per doz.

**Auratum rubro-vittatum**. Enormous flowers, sometimes measuring 10 inches across; pure white, beautifully spotted, and with a deep crimson stripe through center of each petal; very fragrant. 7 to 9 inches, 60 cts. each, \$6 per doz.; 9 to 11 inches, \$1 each, \$9 per doz.

**Auratum pictum**. Flowers like those of the common Auratum, with yellow band through each petal. It is beautifully spotted with rich crimson

LILIAM HARRISII (see page 14)

**Umbellatum grandiflorum.** Orange-red. 15 cts. each, \$1.50 per doz.

**Umbellatum, Mixed.** 12 cts. each, \$1.25 per doz.

**Wallacei.** Orange-red, with maroon spots; late-flowering. 15 cts. each, \$1.50 per doz.

**Washingtonianum.** A lovely native variety of very stately habit; large, trumpet-shaped flowers pure white, tinged purple or lilac; very fragrant; 4 to 7 feet high. 35 cts. each, \$3.50 per doz.

## LILY-OF-THE-VALLEY

*Convallaria majalis*)

## READY IN NOVEMBER AND DECEMBER

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them. They may also be planted in moss fiber in vases.

**Clumps.** Fine large clumps, with many flowering pips on each. Fine for planting outside in shaded positions, and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per doz.

**Pips for forcing.** 50 cts. per bundle of 25, \$1.75 per 100, \$14 per 1,000.

LILY-OF-THE-VALLEY

## CHINESE SACRED LILY (THE WATER FAIRY FLOWER)

## READY IN SEPTEMBER

If ordered by mail, add 5 cts. each or 25 cts. per dozen for postage

A variety of the Polyanthus Narcissus, imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs entirely and place in a sunny window in a cool room.

**Price, 10 cts. each, \$1 per doz.; Mammoth Size Bulbs, 15 cts. each, \$1.50 per doz.**

## ANEMONE or WINDFLOWER

Very ornamental hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

If ordered by mail, add 15 cts. per 100 for postage

## ANEMONE SPECIES

### READY IN NOVEMBER

**Apennina, Blue Star.** Very charming clear blue, star-shaped flowers; excellent for naturalizing; early flowering. 5 cts. each, 30 cts. per doz., \$1.50 per 100.

**Apennina, White.** A variety of the above. 5 cts. each, 30 cts. per doz., \$1.50 per 100.

**Fulgens.** Dazzling vermilion or scarlet; flowers very early in the spring. It does best in a good loam and in a moist situation. A fine pot-plant for house decoration. 6 cts. each, 50 cts. per doz., \$3 per 100.

**Japonica alba.** Large, pure white flowers; invaluable for cutting. 6 cts. each, 50 cts. per doz., \$3 per 100.

**Japonica rosea.** Large, rosy carmine flowers, 2 to 2½ inches. 7 cts. each, 60 cts. per doz., \$3.50 per 100.

**Japonica, Queen Charlotte.** Light pink; semi-double. 9 cts. each, 75 cts. per doz., \$5 per 100.

**Japonica, Lady Ardilaun.** A greatly improved Alba, with larger flowers of greater substance. 10 cts. each, 85 cts. per doz., \$6 per 100.

**Japonica, Whirlwind.** It bears in profusion large, semi-double, pure white flowers of great substance. This is a splendid variety for cut-flowers. 6 cts. each, 50 cts. per doz., \$3 per 100.

**Sylvestris (Snowdrop Windflower).** Very beautiful pure white. 8 cts. each, 65 cts. per doz., \$4 per 100.

ANEMONE JAPONICA

AMARYLLIS

## AMARYLLIS

### READY IN OCTOBER

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mold, or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

**Belladonna major.** Violet and white; flowers in large umbels; fragrant. 25 cts. each, \$2.25 per doz.

**Formosissima (Jacobæan Lily).** 25 cts. each, \$2.50 per doz.

## AMARYLLIS, continued

### TUBEROUS-ROOTED

#### READY IN NOVEMBER AND DECEMBER

Splendid pot-plants for the house or greenhouse and especially valuable for bedding, flowering in the greatest profusion throughout the summer. For bedding they should be started in hotbed in March and April. The hollow end of the bulb should be up and but slightly covered. They should get very little water until the plants are growing.

CALOCHORTUS

[(Mariposa Lily or Butterfly Tulip)]

READY IN SEPTEMBER

Very handsome bulbous plants from California. They are remarkable for the brilliancy and variety of their coloring, and their gracefulness of habit. They grow freely in light, sandy loam; though hardy, they should be protected during winter with litter. They may also be successfully grown in frames and pots.

CROWN IMPERIALS

(Fritillaria imperialis)

A stately-growing plant, with dark green foliage, and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring, and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

CROWN IMPERIAL

If ordered by mail, add 5 cents per dozen for postage—

## CROCUS

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted closely,—say 2 inches apart,—and 3 inches deep, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful.

For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

If ordered by mail, add 15 cts. per 100 for postage.

Mixed Colors .....	10	45	3 50

For Autumn-flowering Crocus, see below

## HYBRID NAMED CROCUS

Remarkable for richness of color and immense size. These varieties are best for forming letters or designs on lawns for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. The flowers are produced very early, and the mowing later on will not seriously injure the Crocus bulbs.

If ordered by mail, add 25 cents per 100 for postage

# CRINUMS

Splendid large-flowering bulbs, closely allied to the Amaryllis. The most suitable soil is a compost of turfy loam, cow manure and some sand. They should be grown in large pots or tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a cool-house and allowed to rest until new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure-water during the growing season. They may be placed outside when warm weather begins, and will flower all through the summer, making splendid lawn or veranda plants.

- Giganteum, Giant White.** Immense bulbs; large white flowers; bloom all summer; very fragrant. They should be watered plentifully while growing.....\$2 00
- Amabile, Giant Pink.** Extra large, bright pink, with white stripe; splendid flower; enormous bulb. This and the Giant White are unsurpassed for growing in tubs, blooming profusely outside all summer..... 2 00
- Kirki.** Large umbels of beautiful pure white flowers, with purple stripe in center of each petal ..... 75
- Powellii.** It produces long stems bearing at the top five to eight large, dark rose, bell-shaped flowers 3 to 4 inches long.....\$0 40
- “ **album.** Pure white..... 60
- “ **intermedium.** Light rose..... 1 00

## MOST OF THEM READY IN NOVEMBER

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white and of much elegance of form in flower and plant. The soil best suited to them is a fresh turfy loam with a fourth to a fifth of well-rotted horse manure to which add some clean sand if the soil is heavy. Plant so as to leave the top of the bulb just below the surface. We offer seed of our superb strain of *C. giganteum* at the end of this Catalogue.

- Coum.** Crimson; round-leaved. 15 cts. each, \$1.50 per doz.
- Europaeum roseum.** Very showy, rosy red. Hardy. 15 cts. each, \$1.50 per doz.
- Giganteum, Rose.** 20 cts. each, \$2 per doz.
- “ **Dark Crimson.** 20 cts. each, \$2 per doz.
- “ **White “Mont Blanc.”** 20 cts. each, \$2 per doz.
- “ **Mixed.** 20 cts. each, \$1.75 per doz.
- Hederaefolium album.** Autumn-flowering. 30 cts. each, \$3 per doz.
- “ **rubrum.** Autumn-flowering. 20 cts. each, \$2 per doz.
- Neapolitanum.** The Ivy-leaved Cyclamen. Hardy. 15 cts. each, \$1.50 per doz.
- Repandum.** Rosy red, with purple eye. 15 cts. each, \$1.50 per doz.

ERYTHRONIUM

**Freesia Leichtlinii major.** Creamy white, shaded to yellow, with orange blotch; distinct in color. 45 cts. per doz., \$2.50 per 100.

**FREESIA, NEW HYBRIDS.** Hybrids of Armstrongi and Purity and selected strains of *F. refracta alba*, showing a varied range of coloring, pink and light purple predominating. All are free bloomers and are well worthy of extensive cultivation. 35 cts. each, 3 for \$1, 6 for \$1.85, \$3.50 per doz.

## FREESIA

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in good loamy soil, with an admixture of leaf-mould and sand, in a frame or greenhouse, and are excellent for window culture in winter. For the information of all not acquainted with these bulbs, we may say that they are quite small, but produce large blooms in comparison to their size.

**Freesia refracta alba.** The body of the flower is pure white, with lower segments spotted lemon-yellow. Their fragrance is remarkable and very lasting.

	Doz.	100	1,000
MONSTER SIZE BULBS .....	\$0 35	\$1 75	\$13 00
FIRST SIZE BULBS .....	25	1 00	8 00

**Freesia, "Purity."** Magnificent glistening pure white flowers of large size, borne on strong, lengthy stems, each truss bearing 8 to 10 buds, five to six of which are frequently open at the same time. Of recent introduction. 60 cts. per doz., \$4 per 100.

**Freesia alba major, Pure White.** Splendid sort with large pure white flowers of good substance. 50 cts. per doz., \$2.75 per 100.

## ERYTHRONIUMS (DOG'S-TOOTH VIOLETS)

### READY IN SEPTEMBER

Very ornamental, hardy, bulbous plants, of neat and dwarf habit. They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in sheltered positions on rockeries, or in mixed flower or shrubby borders.

**Californicum.** Cream-yellow, with maroon band at base; leaves very richly mottled. The finest of all. Each Doz. 100

.....\$0 07 \$0 60 \$3 50

**Californicum, WhiteBeauty.** Flowers more nearly white than Californicum; leaves richly mottled. 08 75 5 00

**Giganteum** (Giant Dog's-Tooth Violet). Very large, straw-colored flowers, with orange center, borne on long, slender stems; the foliage is richly mottled in dark brown and its elegant habit makes it a very attractive pot-plant for window decoration ..... 08 65 4 50

**Citrinum.** Leaves mottled; flowers yellow ..... 08 65 4 00

**Grandiflorum.** Leaves unmottled; flowers bright yellow, with recurved petals ..... 08 65 4 00

**Hartwegii.** Fine variety; light yellow flowers like those of *E. giganteum*, but each borne on a separate stalk ..... Each Doz. 100

.....\$0 07 \$0 60 \$3 50

**Hendersonii.** Flowers pink, with very dark purple center; leaves beautifully mottled in dark brown; petals strongly recurved; rare..... 08 65 4 50

**Mixed** ..... 05 40 2 50

**Dens-canis** (Dog's-tooth Violet). Mixed colors; very pretty; leaves blotched in brown and white..... 05 30 1 50

## IXIAS READY IN OCTOBER

The Named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

	Each	Doz.	100
<b>Azurea.</b> Blue, with purple center; very beautiful....	\$0 05	\$0 40	\$2 25

IXIAS

FRITILLARIAS **READY IN SEPTEMBER**

Graceful, hardy, spring-flowering, bulbous plants, thriving in good, rich, well-drained soil. They are effective in mixed flower borders, and they also make excellent pot-plants.

	Each	Doz.	100
<b>Biflora.</b> Strong plants, with large, dark brown, nearly black flowers .....	\$0 12	\$1 25	\$7 50
<b>Coccinea.</b> Narrow, tubular flowers of a deep, glowing red color .....	10	90	6 00
<b>Lanceolata.</b> Tall flowers, with large, greenish bells, mottled with yellow and purple .....	12	1 25	7 50
<b>Lilacea.</b> Flowers white; easily grown .....	12	1 25	7 50
<b>Persica.</b> Purplish brown; handsome .....	30	2 75	17 00
<b>Pluriflora.</b> Large, strong-growing plant, with beautiful reddish purple flowers blooming very early .....	12	1 25	7 50
<b>Pudica.</b> Clear yellow flowers on short stems .....	12	1 25	7 50
<b>Recurva.</b> Very fine. The flowers are between tubular and bell-shaped, and of a brilliant orange-scarlet color .....	08	65	4 50
<b>Meleagris</b> (Guinea-fowl Flower). Mixed colors .....	05	30	1 75
<b>Fritillaria imperialis.</b> See Crown Imperials, on page 20.			

GLADIOLUS **READY IN NOVEMBER**

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse, except *Byzantinus*, which is hardy, and may be planted out; it is best, however, to give it slight protection. Some varieties are successfully forced.

The French Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty. Every year is adding varieties of most exquisite tint and shade; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published January 1.

<b>AUTUMN GIANT.</b> Bright scarlet to deep crimson flowers, with large deep yellow throats. Grows 3 to 4 feet high, with spikes of bloom sometimes 2 feet long. If planted in the open ground in spring, it blooms in Sept. and Oct., when other <i>Gladiolus</i> are gone.	Each \$0 20	Doz. \$2 00	100 \$12 00

<b>Mixed Lemoines</b> .....	05	40	2 25
<b>Mixed French Hybrids.</b> .....	05	40	2 25

GLOXINIAS **READY IN NOVEMBER**

Gloxinias are among the most beautiful of greenhouse plants, being remarkable for the intensity and variety of their colorings, and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mould and peat in equal parts, with a little sand added. When growing plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large-sized, and of erect-flowering strain:

	Each	Doz.	100
<b>Crassifolia erecta, Red</b> .....	\$0 12	\$1 00	\$6 00

“ “ <b>Mixed</b> .....	10	85	5 50

—If ordered by mail, add 3 cts. per doz. for postage—

LARGE-FLOWERED JAPAN IRIS

## IRIS (FLEUR-DE-LIS)

READY IN OCTOBER AND NOVEMBER

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light, rich, sandy soil, and in a sunny situation. Good drainage is important. The varieties of *Iris Kaempferi*, from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 or 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms, measuring 8 to 10 inches across. These require a liberal supply of water when growing. With the exception of *Morea pavonia* and *Tuberosa*, all varieties are hardy.

### SUPERB COLLECTION OF LARGE-FLOWERED JAPAN IRIS

(*Iris Kaempferi*) READY IN NOVEMBER

We are importing from Japan a large supply of the following eighteen of the best of these magnificent Irises, which excel in size, perfection of form and richness of color. These are most valuable for cut-flowers and table decoration—as handsome as orchids. Flowers should be cut in the early morning or after sunset. They come in large clumps. *The descriptions given are those furnished us by the growers in Japan.*

25 cts. each, \$2.50 per doz., \$18 per 100

**Datedogu.** Rich claret-red, orange, blue and white.  
**Gekka-no-nami** (Waves on Moonlight). Dense pure white, yellow blotches.  
**Shishi-odori** (Dancing Lion). Purple and white.  
**Kumoma-no-sora** (Sky Amidst the Cloud). White, sky-blue and yellow.  
**Kuma-no-obi** (Band of Cloud). Purple and yellow.  
**Ho-o-jo** (Ho-o-castle). Ruby-crimson, primrose blotches.  
**Hana-aoi** (Hollyhock). Gray, yellow and navy-blue.  
**Hana-no-nishiki** (Floral Embroidery). Brilliant claret-red, penciled white, orange blotches.  
**Yomo-no-umi** (Boundless Sea). Gray, blue and yellow.  
**Senjo-no-hora** (Angel's Den). Vinous purple, speckled gray, primrose blotches.  
**Shirataki** (White Waterfall). White and primrose.

**Komochi-guma** (Bear with young). Violet, double, blooming several close together at the head.  
**Shichiukwa.** Ruby-crimson, with white halo and primrose blotches.  
**Kagaribi.** Brilliant ruby, yellow blotches.  
**Shimoyo-no-tuski** (Frost Moonlight). Gray-lavender, yellow blotches.  
**Shippo** (Cloisonné). Rich tyrian-blue, edged purple and feathered white; yellow blotches.  
**Taiheiraku** (Peace). Rich purple, yellow blotches, tipped blue.  
**Tora-odori** (Dancing Tiger). Gray, overlaid with lavender-blue, yellow blotches.  
**Mixed Common, Small-flowered Japan Iris, Single and Double.** 6 cts. each, 50 cts. per doz., \$2.50 per 100.

SPANISH IRIS (*Iris Hispanica*)

Very profitable for florists, who are planting them largely for cut-flowers. Plant in beds in the open as soon as received in the autumn, and protect slightly in the winter months. In the beginning of April cover the beds with glass, so as to have the flowers ready for cutting in May.

## LACHENALIAS

READY IN SEPTEMBER

Very pretty, spring-flowering, greenhouse bulbous plants of elegant habit and with brightly colored flowers. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mould and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air, and keep near the glass to ensure sturdy growth. Lachenalias are also excellent subjects for hanging baskets.

	Each	Doz.
<b>Luteola.</b> Pale yellow flowers, flushed with green.....	\$0 30	\$3 00
<b>Nelsoni.</b> Rich golden yellow; very fine.....	40	4 00

## LACHENALIAS, continued

<b>Pendula.</b> Very handsome, large and showy species. with broad foliage and rich red flowers tipped with black .....	Each	Doz.	100
	\$0 40	\$4 00	
<b>Quadricolor.</b> Bright green, red and yellow flowers; very pretty.....	35	3 50	
<b>Tricolor.</b> Red, yellow and green.....	35	3 50	
<b>Versicolor.</b> Foliage heavily spotted brown; flowers yellow, tipped with green and red; very pretty for massing.....	45	4 50	
<b>Hybrids Mixed</b> .....	25	2 50	

## MONTBRETIAS

## READY IN NOVEMBER

Hardy, summer-flowering, bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties:

	Each	Doz.	100
<b>Bouquet Parfait.</b> Large; bright vermillion flowers, with deep yellow centers.....	\$0 05	\$0 40	\$2 00
<b>Crocsmiaeflora.</b> Large; bright orange, tinged scarlet .....	05	40	2 00
<b>Elegans.</b> Bright yellow, outside streaked with vermillion; extra fine.....	05	40	2 00
<b>Etoile de Feu.</b> Bright vermillion, with deep yellow center; large flowers.....	05	40	2 00
<b>Germania.</b> Very large; orange-scarlet. The best of the <i>newer</i> varieties .....	10	75	5 00
<b>Golden Sheaf.</b> Bright yellow .....	05	40	2 00
<b>Pottsii.</b> Orange and scarlet; very free-flowering.....	05	40	2 00
<b>Soleil couchant</b> (Sunset). Golden yellow.....	05	40	2 00
<b>Sunbeam.</b> Rich yellow, spotted brown; large flowers.....	05	40	2 00
<b>Mixed Seedlings</b> .....	05	30	1 50

## NERINE

## READY IN OCTOBER AND NOVEMBER

Very beautiful greenhouse bulbous plants succeeding best in pots in light soil—say a compost of loam, leaf-mould and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die they should be kept quite dry in a cool place until they begin to grow again.

	Each	Doz.	100
<b>Corusca.</b> Brilliant scarlet flowers.....	\$1 50		
<b>Crispa.</b> Very handsome scarlet flowers.....	1 00		
<b>Flexuosa.</b> Bright crimson-scarlet, tinged with orange .....	1 40		
<b>Fothergilli.</b> Bright, glittering scarlet, in many-flowering umbels.....	1 25		
“ <b>major.</b> A magnificent plant for house or conservatory. The flowers are of the most intense shining scarlet, and by artificial light the crystalline cells of the petals sparkle like jewels. It flowers very freely .....	1 75		
<b>Sarniensis</b> (True Guernsey Lily). Flowers brilliant crimson, in large clusters. The best known sort.....	50		
<b>Undulata.</b> Rosy purple, wavy flowers; very handsome .....	1 00		

## OXALIS

## READY IN SEPTEMBER

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging baskets. They are easily grown in a sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

	Each	Doz.	100
<b>Buttercup.</b> A splendid winter-blooming plant for pot culture. The flowers are pure bright yellow, and produced in great abundance. It is very easily cultivated, and, being a strong grower, only one or two bulbs should be planted in a 5- or 6-inch pot. First size.....	\$0 05	\$0 35	\$1 75
<b>Bowiei.</b> Crimson .....	05	40	2 00
<b>Grand Duchesse, grandiflora alba.</b> White .....	05	40	2 00

<b>Versicolor.</b> Red, violet and white .....	2 for 5 cts..	25	1 00
<b>Mixed</b> .....	3 for 5 cts..	15	75

# PÆONIES

READY IN OCTOBER

The old-fashioned double Pæonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Pæonies rank about first for lawn or flower-border or shrubbery decoration. They are all hardy. The roots we offer have not less than three strong eyes each.

## HERBACEOUS CHINESE PÆONIES

(*Paeonia Sinensis*)

	Each	Doz.		Each	Doz.

## JAPANESE TREE PÆONIES (*Paeonia arborea*)

These are very beautiful and free-flowering, and bloom two or three weeks earlier than the herbaceous sorts.

We are importing an assortment of the following fine named varieties.

**\$1.50 each**

**Comtesse de Tuder.** Tender rosy white; very double. Fine shaped flower.

**Guillaume Tell.** Bright carmine; large flower.

**Mont Vesuve.** Bright cherry.

**Rubra odorata plenissima.** Rose and wine color; very double.

**Triomphe de Gand.** Bright rose with white border; large flower; very early.

## PÆONIA TENUIFOLIA

Very elegant plants with narrow-leaved feathery foliage.

**Double-flowering.** Rich crimson. 40 cts. each, \$4 per doz.

**Single-flowering.** Rich crimson. 25 cts. each, \$2.50 per doz.

## PÆONIA OFFICINALIS

**Anemoneiflora.** Crimson; single anemone-flower shape. 40 cts. each, \$4 per doz.

**Atro-rubra plena.** Dark red; double. 25 cts. each, \$2.50 per doz.

**Mutabilis plena.** Tender rose, passing to white; double. 35 cts. each, \$3.50 per doz.

**Splendens.** Dark red; half-double flower. 40 cts. each, \$4 per doz.

HERBACEOUS PÆONY

## RANUNCULUS READY IN SEPTEMBER

The main soil for these should be loam or clay, with a good dressing of rotted manure and leaf-mould; if heavy, add a little sand. The soil should be well drained, cool, deep, rich and moist. Plant late in the autumn, claws downward, from 4 to 6 inches apart and 3 inches deep, covering with fine, pulverized soil.

If ordered by mail, add 3 cts. per dozen for postage

SPOTTED-LEAF CALLA

## RICHARDIAS or CALLAS

READY IN OCTOBER AND NOVEMBER

Tall-growing, bulbous perennials of exceedingly graceful habit, and very handsome foliage and flowers. They are easily cultivated in pots, requiring only a rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting in September.

<b>White Calla or Lily-of-the-Nile</b> ( <i>Calla Æthiopica</i> ). Large, white, trumpet-shaped flowers of great substance. One of the most popular and ornamental house and greenhouse plants. Largest size bulbs.....	Each \$0 20	Doz. \$2 25	100 \$16 00

<b>Red Calla</b> ( <i>Arum cornutum</i> ). Flowers red, spotted black; stem mottled; a handsome pot-plant.....	20	2 00	12 00

### YELLOW-FLOWERED, SPOTTED LEAF.

Grows about 2 feet high with immense dark green leaves spotted and blotched with silvery white; flowers of medium size, pure, bright yellow, with a black-purple blotch at base. Fine for spring planting. Blooms outside all summer.....

<b>ELLIOTTIANA.</b> Yellow, spotted leaf. On same style as the preceding, but the color is a deeper yellow. Both are exceedingly desirable.....	20	2 00	12 00
	60	6 00	

SCILLA SIBIRICA

## SCILLAS READY IN SEPTEMBER

*S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years. The effect in early spring of the intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the Snowdrop and the varied hues of the Crocus, can hardly be overestimated; are most valuable for permanent edging, or planted in bunches of a dozen or so.

If ordered by mail, add 5 cents per dozen for postage, except those marked with an (\*) to which add 2 cents each

	Each	Doz.	100

## SNOWDROPS (*Galanthus nivalis*)

READY IN SEPTEMBER

Perhaps no spring flower is a more general favorite than the Snow-drop. The earliest flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms. Should be planted 2 to 3 inches deep in a shady location.

If ordered by mail, add 3 cents per dozen, or 25 cents per 100 for postage

**Single-flowering Snowdrops.** 20 cts. per doz., \$1 per 100, \$7 per 1,000.

**Double-flowering Snowdrops.** 35 cts. per doz., \$2 per 100, \$15 per 1,000.

**Giant Snowdrops of Asia Minor (*Galanthus Elwesii*).** 20 cts per doz., \$1.25 per 100, \$8 per 1,000.

## SPIRAEA or ASTILBE

READY IN NOVEMBER

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

**Japonica (Hoteia).** Excellent pot-plant for winter blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting. 15 cts. each, \$1.25 per doz., \$6 per 100.

**Japonica fol. aurea reticulata.** Beautiful gold-striped foliage; large panicles of pure white flowers. 20 cts. each, \$2 per doz., \$12 per 100.

**Japonica compacta multiflora.** The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.50 per doz., \$7 per 100.

**Astilboides floribunda.** Very large, pure white plumes; neat habit; very abundant bloomer. 15 cts. each, \$1.50 per doz., \$7 per 100.

SNOWDROPS

SPIRAEA

per doz., \$7 per 100.

**Palmata.** Crimson; strong clumps. 15 cts. each, \$1.50 per doz., \$8 per 100.

**Aruncus.** Handsome plant, with large plumes of pure white flowers. 20c. each, \$2 per doz.

**GLADSTONE.** A hybrid Spiraea with beautiful snow-white plumes borne on strong stems  $1\frac{1}{2}$  feet long, standing erect above the foliage. The plant is perfectly symmetrical in shape, the foliage very handsome and the flowers exquisitely fragrant. Fine forcer. 20 cts. each, \$1.75 per doz., \$11 per 100.

**WASHINGTON.** A splendid decorative plant, producing extra-large flowers. Strong grower; fine for forcing. 15 cts. each, \$1.50 per doz., \$8 per 100.

**QUEEN ALEXANDRA, PINK.** A splendid pink variety, in habit similar to the well-known Gladstone, but flowering two weeks later. It is a very free bloomer and bears its flowers well above the strong, dark green foliage. When forced it must be shaded as soon as it starts to color. It is a splendid outdoor plant, being as hardy as the old *Spiraea Japonica*. Its color won't fade even in the brightest weather. 55 cts. each, \$5.50 per doz.

## TRILLIUMS (American Wood-Lily, or Indian Shamrock)

Hardy herbaceous perennials, succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are native of North America, and are known by various common names in different localities. They have violently emetic roots.

<b>Grandiflorum</b> ("Giant American Wood-Lily," or "Wake Robin"). Large white flowers, Each Doz. 100 changing to rose; quite hardy, and easily grown in shaded positions.....\$0 08 \$0 60 \$3 50
<b>Sessile Californicum</b> . Handsome, pure white flowers, with purple centers; prettily mottled foliage.....12 1 25 6 50
<b>Sessile, Snow Queen</b> . Of the same type as Californicum, but the flowers are pure white and with broader petals.....15 1 50 8 00

## TUBEROSES READY IN DECEMBER

The purity of color and rich perfume of the Tuberose are well known in this latitude. May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich, warm soil and a sunny situation. Cut off about a quarter of an inch from the bottom of the bulb before planting, and set so that the top will be one inch below the surface of the soil.

	Each	Doz.	100
<b>Dwarf Double Pearl.</b> Dwarf habit; large, fine flowers of great substance.....	\$0 06	\$0 40	\$2 00
<b>Albino.</b> Purest white; single flowers.....	08	50	3 00
<b>Variegated Leaf.</b> Foliage striped white and green; single white flowers.....	08	50	3 00

## Miscellaneous Bulbs and Roots

Those marked with an asterisk (\*) will not be ready till Oct. or Nov.

	Each	Doz.	100
* <b>Achimenes</b> . Mixed. Lovely greenhouse pot-plants ....	\$0 10	\$0 75	\$5 00
* <b>ACIDANTHERA BICOLOR</b> . Ready in November. A gladiolus-like plant, growing 2 feet high; flower-spikes pure white and sweet scented, with a large triangular blotch in the center. Blooms during July and August. The bulbs must be kept warm and dry over winter.....	35	3 50	

**Aconite**. See Eranthis, page 32.

**Allium**. Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.

	Each	Doz.	100
for winter cut-flowers.			
<b>Allium Azureum.</b> Beautiful sky-blue flowers in large umbels; fine for pots or garden.....	\$0 10	\$0 90	\$6 00

WATSONIA

## Hardy Annual and Perennial Flower Seeds

## FOR AUTUMN SOWING

Many varieties of Flower Seeds, ANNUALS as well as BIENNIALS and PERENNIALS, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring.

## LAWN SWEEPER, "MODEL NO. 1"

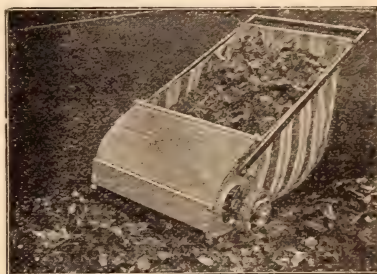

Designed for use on ordinary lawns, small parks, tennis courts, etc. It is 25 inches wide over all, weighs 28 pounds, and carries a 21-inch brush. The brush is fan-shaped, and revolves very rapidly in the same direction as the drive-wheels, throwing the litter backwards from the under surface. Price, \$12.

LAWN SWEEPER, "MODEL NO. 1"

## THE GEM LAWN CLEANER

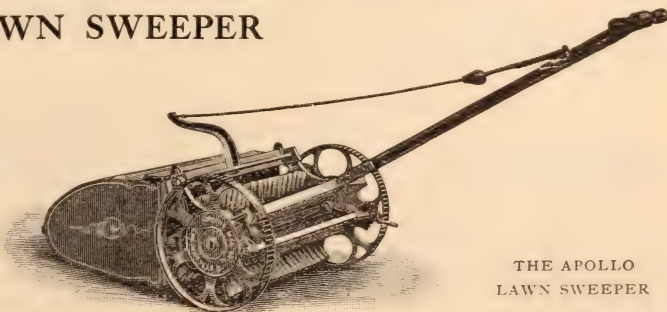

A revolving fan with metal teeth creates an air-currant which carries into the canvas basket all leaves, dead grass, stones, etc., that the rake encounters. It straightens up crab grass and other running weeds so that they may be cut by the lawn mower. Price, \$16.

THE GEM LAWN CLEANER

## THE APOLLO LAWN SWEEPER

The machine consists of a revolving brush which throws the sweepings forward into the large grass box attachment, which, when full, is dumped by merely pulling a cord. It removes all cut grass, leaves, twigs, etc., and by setting it low it is excellent for taking out crab grass. It is also valuable for sweeping garden walks, stables, etc. Price, 20-inch sweep, \$12 each; 28-inch sweep, \$14 each.

THE APOLLO  
LAWN SWEEPER

## MUSHROOM SPAWN

Cultural directions in our General Catalogue. Any one requiring fuller details should get Wm. Falconer's book on Mushroom Culture, sent postpaid, for \$1.

**English Spawn.** In bricks. Per lb., 15 cts.; 10 lbs., \$1; 100 lbs., \$9.

**American Spawn.** In bricks. Per brick, 18 cts.; 10 bricks, \$1.50; 100 bricks, \$10.

**French Spawn.** In bulk. Per lb., 30 cts.; 10 lbs., \$2.50.

## Insecticides and Remedies for Plant Diseases

If wanted by mail, add 16 cents per lb. to cover postage

**BUG DEATH.** This is a fungicide, insecticide and plant-food combined. 1-lb. package, 15 cts.; 3-lb. package, 35 cts.; 5-lb. package, 50 cts.; 12½-lb. package, \$1; 100-lb. package, \$7.50.

**FIR-TREE OIL.** For greenhouse and house plants. Destroys all insects without injuring the plant. Dilute in the proportion of 1 pint to 20 gallons of water. Apply with vaporizer or syringe. ¼ pt., 40 cts.; pt., 75 cts.; qt., \$1.25; ½ gal., \$2.25, gal. \$4.

**FIR-TREE OIL SOAP.** This is the same as the Fir-Tree Oil, but in soap form. Mix at the rate of 1 ounce to a gallon of water, and apply with a bellows or syringe. ½ lb. tin, 25 cts.; 2-lb. tin, 75 cts.

**DALMATIAN INSECT POWDER.** Effective against almost all kinds of insects. ½ lb. box, 30c.; 1-lb. box, 50c.

**GISHURST'S COMPOUND.** A certain remedy for greenfly, scale, mealy bug, etc. Excellent for greenhouse use. 1-lb. box, 50 cts.

**HAMMOND'S GRAPE DUST.** For the prevention of mildew on roses, grapes, gooseberries, etc. Apply with bellows. 5-lb. pkg, 35c.; 10-lb. pkg., 60c.; 100 lbs., \$5.

**HELLEBORE, POWDERED.** An excellent protection from currant worms, grape slugs, caterpillars, etc. May be applied dry or mixed in water—1 oz. to 3 gallons. 2-lb. box, 35 cts.; 1-lb. box, 20 cts.; ½ lb. box, 12 cts.

**KEROSENE EMULSION.** For cabbage worms, scale on trees, caterpillars, melon louse, rose bugs, greenfly, and lice of all kinds, either on plants or animals. Dilute 25 to 50 parts. Qt., 40 cts.; gal., \$1.

**LEMON OIL.** For destroying scale, caterpillar, mealy bug, etc. Directions on can. ½ pt., 25 cts.; pt., 40 cts.; qt., 75 cts.; gal., \$2.

**ANTIPEST.** A sure destroyer of all insect pests. Qt., 60 cts.; ½ gal. can, \$1; gal. can, \$2.

**NICOTICIDE.** For fumigating or spraying. Used effectively for greenfly, mealy bug, etc. Does not damage foliage or flowers. Sold in cans as follows: No. 1, containing 1 pt., sufficient for 32,000 cubic feet of space, \$2.50 each; No. 2, containing ½ pt., sufficient for 16,000 cubic feet of space, \$1.25; No. 3, containing 4 oz. (¼ pt.), sufficient for 8,000 cubic feet of space, 70 cts. Per gal., \$15; ½ gals., \$8.25 each; qts., \$4.50 each. Fumigators for same, 50 cts. each.

**"NICO-FUME" TOBACCO-PAPER.** For fumigating greenhouses. "Nico-Fume" is the strongest Tobacco-Paper on the market; does not injure blooms. Packed in special friction-top tins. 24 sheets, 75 cts.; 144 sheets, \$3.50; 288 sheets, \$6.50.

**NICO-FUME LIQUID.** For fumigating or spraying. Effective against greenfly, mealy bug, etc. Does not stain or injure blooms, and leaves no disagreeable odor. For spraying, 1 to 2 teaspoonfuls to a gallon of water. ¼ pt., 50 cts.; pt., \$1.50; ½ gal., \$5.50; gal., \$10.50.

**PARIS GREEN.** Mixed at the rate of 1 lb. to 200 gallons of water, it will prove effective against all chewing insects. 1-lb. can, 40 cts.; ¼-lb. can, 25 cts.; ½-lb. can, 18 cts. This article is liable to fluctuate in price.

**SLUG-SHOT (HAMMOND'S).** Excellent for destroying cabbage, turnip and beet fly, potato bugs, currant worms, etc. 5-lb. package, 30 cts.; 10-lb. package, 50 cts.; 100-lb. package, \$4.50.

**SULPHUR, POWDERED.** Valuable for protecting against mildew on grapes, roses, etc. Lb., 10 cts.; 10 lbs., 60 cts.; 100 lbs., \$4.

**SULPHO-TOBACCO SOAP.** Dissolve in proportion of 2 ounces to a gallon of water, and apply with a syringe or atomizer. It will destroy rose slugs, aphides, greenfly, bark-lice, etc. 3-oz. box, 10 cts.; 8-oz. box, 20 cts.; 10-lb. box, \$3.

**TOBACCO DUST.** If dusted on *while the foliage is moist* it destroys rose lice, cabbage and turnip fleas, etc. Spread upon the ground, it keeps off all earth insects. Lb., 10c.; 5 lbs., 35c.; 10 lbs., 60c.; 100 lbs., \$2.75.

**TOBACCO STEMS.** For fumigating plants infested with greenfly. Bale of about 100 lbs., \$1.50; 200 lbs., \$2.75; 400 lbs., \$4.50.

**"ROSE LEAF" TOBACCO EXTRACT.** A perfectly pure, highly concentrated extract of tobacco, most effective for destroying all insects and scale on plants. Pint cans, 30 cts.; qt., 50 cts.; gal., \$1.25.

**WHALE-OIL SOAP.** For washing trees and destroying all insects on the bark. 1-lb. box, 15 cts.; 5 lbs., 50 cts.; 10 lbs., 90 cts.; 100 lbs., \$7.

**BORDEAUX MIXTURE or FUNGIROID.** For all fungous diseases. Dry, 1-lb box, 20 cts.; 5 lbs and over at 18 cts. per lb.; 50 lbs., \$7; liquid, qt., 40 cts.; gal., \$1.25.

**X. L. ALL LIQUID INSECTICIDE.** For spraying. English preparation; purely nicotine; harmless to very delicate plants; kills mealy bug, red spider, and all insect pests. Pt., 65 cts.; qt., \$1; ½ gal., \$1.75; gal., \$3.50.

## FOR SAN JOSÉ SCALE

**Horicum** (Hammond's). A lime, sulphur and salt mixture, entirely free from grit. 1 gallon makes 25 by adding sufficient water. Qt., 40 cts.; ½ gal., 75 cts.; gal., \$1.25.

**California Wash.** (Lime, sulphur and salt.) One gallon makes 25 by adding sufficient water. Qt., 40 cts.; gal., \$1.

**Scalecide.** Petroleum oil that mixes at once with cold water and stays mixed. No hot water necessary. Add 1 gallon for every 15 to 20 gallons of water. Qt., 40 cts.; gal., \$1; 5 gals., \$3.25.

## COOPER'S TREE SPRAY FLUIDS

The most effective remedies yet discovered for San José scale and kindred troubles. **No sediment to clog nozzles.** Can be mixed instantly with cold water.

**VI FLUID.** For winter or spring use on dormant trees. Kills San José scale, oyster shell scale, eggs of insects, spores of fungi, mosses and lichens.

**V2 FLUID.** For summer use when trees are in bud or leaf. Kills codling worms, oyster-shell scale insect, woolly and all forms of aphids, pear and apple psylla without injury to leaf or blossom.

One gallon of either fluid mixed with cold water makes 100 gallons of mixture.

Price of either fluid, qt., \$1; ½ gal., \$1.75; gal., \$3; 5 gals., \$14

## Thorburn's High-Grade Fertilizers

### Thorburn's Lawn Fertilizer

Per ton, \$50; single bags of 167 lbs., \$5; per bag of 100 lbs., \$3.25; 50 lbs., \$2; 25 lbs., \$1.25; 10 lbs., 75 cts.

### Thorburn's Complete Manure

Ton, \$40; single bag of 167 lbs., \$4; bag of 100 lbs., \$2.75; 50 lbs., \$1.65; 25 lbs., \$1; 10 lbs., 50 cts.

### Clay's Celebrated Fertilizer

One of the best manures for all horticultural purposes. 1 cwt. (112 lbs.), \$7; ½cwt. (56 lbs.), \$4; ¼cwt. (28 lbs.), \$2.25; ⅓cwt. (14 lbs.), \$1.25.

### Pure Ground Bone Meal

Finely pulverized; excellent for rose culture and for mixing with the soil for potting. 5 lbs., 25 cts.; 50 lbs., \$1.25; 100 lbs., \$2.25; per ton, \$32.

### Bowker's Ammoniated Food for Flowers

The best dressing for potted plants. Small package, 15 cts. each; by mail, 25 cts. Large package, 25 cts. each; by mail, 45 cts.

### Canada Hard-Wood Ashes

Highest grade, extra-screened, unleached. For top-dressing for lawns, especially if the soil is inclined to be stiff or sour. In barrels of about 200 lbs., \$3; per ton, \$22.

### Pulverized Sheep Manure

Excellent as a top-dressing for lawns. Nothing better for mixing with soil for greenhouse plants—one part manure and six parts soil. 5-lb. package, 30 cts.; 10 lbs., 50 cts.; 50 lbs., \$1.25; 100 lbs., \$2; ton, \$30.

**Sulphur Vaporizer (Campbell's Patent).** Designed to vaporize sulphur in greenhouses without danger of the sulphur taking fire or disfiguring foliage. Useful for killing mildew and other fungous diseases.

No. 1. For houses up to 5,000 cubic feet of space, \$6.

No. 2. For houses up to 10,000 cubic feet of space, \$7.50

**Thermometers.** Hotbed and mushroom bed. Boxwood, brass tips; made for plunging. Each, \$1 and \$1.75.

## Grass Seeds for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the end of September, so that the young grass may become well rooted before winter sets in.

### The Thorburn Lawn Grass (UNIVERSAL PARK MIXTURE)

Practically all the finest lawns in America were produced from this mixture. It is composed exclusively of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich green sward in three or four weeks from the time of sowing. The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture. It should be sown at the rate of 4 to 5 bushels to the acre. Per qt., 25 cts.; 2 qts., 40 cts.;  $\frac{1}{2}$ pk., 65 cts.; pk., \$1; bus. of 15 lbs., \$3.50.

### Thorburn's Special Lawn Grass Mixture

This extra-choice mixture contains a large proportion of the finer and more expensive species, such as Rhode Island Bent, Crested Dog's Tail, Creeping Bent, in extra-heavy samples, bringing the weight up to 20 lbs. per bushel, and producing a turf of the closest and finest texture possible. Per qt., 30 cts.; 2 qts., 50 cts.;  $\frac{1}{2}$ pk., 85 cts.; pk., \$1.50; bus. of 20 lbs., \$5.

### Thorburn's Lawn-Restoring Grass Seed

A mixture of grasses peculiarly suited to take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-restoring Grass Seed** should be sown before every summer rain on thin places. Per qt., 30 cts.; 2 qts., 50 cts.;  $\frac{1}{2}$ pk., 85 cts.; pk., \$1.50; bus. of 24 lbs., \$5.50.

### Thorburn's Lawn Grass for the South

A mixture of grasses that stand extremes of heat and drought and that are therefore peculiarly adapted to southern lawns. Per qt., 35 cts.; 2 qts., 60 cts.;  $\frac{1}{2}$ pk., \$1; pk., \$1.75; bus. of 20 lbs., \$6.50.

### Thorburn's Grass Mixture for Shady Spots on Lawns

A mixture of grasses that thrive in shaded situations, under trees, or close to walls where there is little sun. Per qt., 35 cts.; 2 qts., 60 cts.;  $\frac{1}{2}$ pk., \$1; pk., \$1.75; bus. of 24 lbs., \$6.50.

## Also Permanent Grass Seed for Golf Links, Tennis Courts and Polo Grounds

We have devoted much attention to the seeding and preservation of golf links, tennis courts and polo grounds, and offer the following mixtures, which have been used on most of the finest links, etc., in the country with very satisfactory results.

### Fair Green or Golf Links Mixture

For the grounds in general. Per bus. of 20 lbs. \$3.25.

### Tennis Court Mixture

A mixture of extra-fine grasses peculiarly adapted to tennis courts.

This mixture will make a firm, green and lasting turf of the finest texture that will improve with tramping. Per qt., 35 cts.; 2 qts., 60 cts.;  $\frac{1}{2}$ pk., \$1; pk., \$1.75; bus. of 24 lbs., \$7.

### Putting-Green Mixture

A mixture of extra-fine grasses that will make a close, firm, green and lasting turf, which will improve with tramping. Per qt., 35 cts.; 2 qts., 60 cts.;  $\frac{1}{2}$ pk., \$1; pk., \$1.75; bus. of 24 lbs., \$6.50.

### Polo Grounds Mixture

A mixture of fine-leaved and deep-rooting grasses, forming a strong and lasting turf that will stand hard usage. Per bus. of 20 lbs., \$3.25.

## Grass Seed Mixtures for Meadows and Pastures

The formation of permanent pastures and meadows has for many years been a subject of careful study with us, and the following mixtures for seeding grass-lands have received universal recognition.

### Meadow Mixtures

Sow at the rate of 2 bushels to the acre

No. 1. For good land, neither too dry nor too wet. Per bushel of 20 lbs., \$3.

No. 2. For high and dry land. Per bus. of 20 lbs., \$3.50.

No. 3. For wet late land. Per bus. of 20 lbs., \$3.

### Pasture Mixtures

Sow at the rate of 2 bushels to the acre

No. 4. For good land, neither too dry nor too wet. Per bushel of 20 lbs., \$3.50.

No. 5. For dry land. Per bushel of 20 lbs., \$4.

No. 6. For wet land. Per bushel of 20 lbs., \$3.50.

## OF BULBS AND FLOWERING ROOTS FOR FALL PLANTING

Many of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of flowers may be had from December till May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. The cultural directions found under the respective headings are worthy of careful attention.

**Our bulbs are all selected**, coming from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation and often sold at auction and otherwise, at very low prices.

**NAME AND ADDRESS.** *We often receive orders with either the name or the address of the sender omitted. As we can do nothing with such orders, the customer thinks his order is being neglected. We therefore beg our correspondents to be careful to write on each order their name and full address.*

**ORDERS** should be sent as soon as possible after receipt of this Catalogue. The bulbs will be sent in proper time for planting. They are ready from August to November, according to the time of ripening and the country from which they come. Orders booked earliest are surest of being filled as ordered. If left too late, the supply of some of the varieties may be exhausted.

**We invite special attention to the collections of bulbs offered on the cover page opposite, both for indoor and outdoor cultivation. They contain only sorts that will insure satisfaction.**

The prices quoted do *not* include transportation charges, which are extra.

Please address all orders and remittances to

# HYACINTHS

**THESE BULBS ARE READY FOR DELIVERY IN SEPTEMBER**

**The Hyacinth** is one of the most popular and beautiful spring-flowering plants for indoor and outdoor decoration. By careful management in keeping up a succession, it may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground it is unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to any one suitable sorts, when desired.

**OUTSIDE CULTURE.** In this section, October is the month to plant Hyacinths outside. They succeed best in a light, soil and a sunny situation. If the soil is naturally heavy, some sand should be mixed with it, and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs; some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has been frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field mice which may burrow in it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibry loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.** Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

**Persons unacquainted** with the different varieties will do well to leave the selection to us, only specifying in their order whether bulbs are wanted for pot, glass or garden culture.

**We invite special attention** to the assortments of Named Hyacinths of our selection offered on page 4, and to the Hyacinth glasses which are described at the end of the Catalogue.

**The names of our Hyacinths and Tulips are those given to them by the originators in Holland and they are not sold under fancy names manufactured in this country**

## SELECT NAMED DUTCH HYACINTHS

*N. B. Our selected Named Hyacinths are the cream of the Holland Nurseries under their original name. For forcing in pots or for outdoor beds they far surpass the class of Bulbs usually sold.*

The single-flowered varieties are generally more effective and better for forcing than the double ones. They also, as a rule, succeed better in glasses. The double varieties are distinguished by an asterisk (\*) and those of them that do well for forcing in water by two asterisks (\*\*).

Three of a kind sold at the dozen rate

GROUPS OF DUTCH HYACINTHS FOR DESIGN BEDDING

To obviate the disappointment resulting from selecting unsuitable varieties for design beds, we give the following groups of some of the sorts that bloom about the same time and grow to the same height. They will all form most effective combinations. We recommend **named** sorts for designed bedding as decidedly better than mixtures.

<div>Baron Van Thuyll, Red.</div> <div>Alba Superbissima, White.</div> <div>Charles Dickens, Blue.</div>	<div>Robert Steiger, Red.</div> <div>Mad. Vanderhoop, White.</div> <div>Marie, Blue.</div>	<div>General Pelissier, Red.</div> <div>Baroness van Thuyll, White.</div> <div>Grand Maitre, Blue.</div>
<div>Gigantea, Red.</div> <div>Grandeur a Merveille, White.</div> <div>Baron van Thuyll, Blue.</div>		<div>Norma, Red.</div> <div>La Franchise, White.</div> <div>La Peyrouse, Blue.</div>

If ordered by mail, add 15 cts. per dozen or 60 cts. per 100 for postage

SINGLE HYACINTHS

MIXED DUTCH HYACINTHS IN SEPARATE COLORS

The very largest size. Suitable either for forcing or bedding

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all of the largest size. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

FRENCH ROMAN HYACINTHS

Extensively used by florists for forcing for cut-flowers. For this purpose they are the best and most popular of bulbs. The flowers are pure white, delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable spot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early, and by making successive plantings they may be had in flower all through the winter. The blue and rose Roman Hyacinths flower from one to two weeks later than the white variety.

MINIATURE HYACINTHS

These are also known as "Dutch Roman" and "Pan Hyacinths." They are very suitable for growing in groups in pots or earthen pans. We offer them in separate colors, and also mixed, as follows:

Pure White, Bright Red, Light Blue and Dark Blue. 45 cts. per doz., \$2.50 per 100.  
Mixed Colors. 40 cts. per doz., \$2.25 per 100.

ITALIAN HYACINTHS

These are grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are hardier than the Romans, and may also be planted outside in the fall for flowers for early spring cutting.

TULIPS

TULIPS ARE READY FOR DELIVERY IN SEPTEMBER

For beauty of form and brilliancy of coloring Tulips are unequaled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers may select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers, they are also invaluable.

CULTURE.—The cultural directions given for hyacinths, on page 2, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep

Mr. C. W. BLOSE of Pennsylvania, writes under date of September 8, 1908: "The Hyacinths I got from you last fall were in very nice bloom this spring, so I had to send for some more."

If ordered by mail, add 10 cts. per dozen or 50 cts. per 100 for postage

SINGLE TULIPS

## TULIPS, continued

enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open border.

A, B, and C indicate season of flowering. A and B may be planted to flower about the same time in the open ground; C flowers later.

## SINGLE EARLY TULIPS

## Single Late- or May-Flowering Tulips

Six of a kind at dozen rate, 25 of a kind at 100 rate

These are all tall-growing May-flowering Tulips, with very large, most brilliantly colored flowers of perfect form. They will be found invaluable for garden work. The named Bizarres and Bybloems are the sorts grown by florists for show purposes. Splendid for cutting rather than for design bedding.

		Doz.	100
<b>Bizarres.</b> Crimson, violet-purple, etc., on yellow ground (25 named varieties).....	each 8c.	\$0 70	\$4 50

<b>Mixed Late Single.</b> 30 cts. per doz., \$1.40 per 100, \$10 per 1,000.			

## PARROT TULIPS (May-flowering)

Six of a kind at dozen rate, 25 of a kind at 100 rate

For outdoor cultivation. The petals of these have feathered edges, and in addition to other colors combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant color, and form very effective groups for the flower border. To get the best results they must have the full effect of the sun. Very late-flowering.

## DARWIN TULIPS (May-flowering)

If ordered by mail, add 7 cts. per dozen or 40 cts. per 100 for postage

They grow very tall, with large flowers of fine form. Being borne on very long stems, they are excellent for cutting to put in vases for house decoration. They are all single, self-colored, and of great brilliancy.

	Each	Doz.	100		Each	Doz.	100

## DOUBLE TULIPS

Six of a kind at dozen rate, 25 of a kind at 100 rate

The Double Tulips come into bloom a little later than the single varieties. They are splendid for bedding, and the flowers last longer in bloom than the single sorts. Some of the sorts are quite dwarf.

If ordered by mail, add 6 cts. per doz. or 35 cts. per 100 for postage

## MIXED TULIPS

For bedding. Planted in large masses, these make a magnificent show and, being inexpensive, should be largely used. Our special mixtures of Early Single and Early Double Tulips are made up of the finest bulbs and the brightest colors. If planted in large beds, they will produce an exceedingly beautiful and lively effect.

# NARCISSUS

**NARCISSUS ARE READY FOR DELIVERY IN SEPTEMBER**

Narcissus are among the most popular and largely grown of spring-flowering bulbs, and deservedly, too. Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, lakes or ponds, and in mixed flower or shrubbery borders. They are also suitable for naturalizing in the grass, by the side of woodland walks, or in open spaces between trees and shrubs.

For growing in pots they require about the same treatment as hyacinths, three or four bulbs in a 5-inch pot and they are valuable for this purpose. Some of the varieties are grown in large numbers by florists for winter cut-flowers. With the exception of the *Polyanthus* section, they are all perfectly hardy.

## SINGLE NARCISSUS, or DAFFODILS

**Ard Righ** (Irish King). Magnificent golden yellow trumpet; very large and graceful. One of the earliest and finest for forcing. 8 cts. each, 70 cts. per doz., \$4.50 per 100.

**Barri Conspicuus**. Lovely shape; broad sulphur petals, heavily stained orange-scarlet. Very long-stemmed and graceful. Fine for cutting. 5 cts. each, 30c. per doz., \$1.75 per 100.

**Bicolor Horsfieldii**. "Queen of Daffodils." Rich golden yellow trumpet; pure white and well-expanded perianth. A magnificent flower. Fine forcer. 5 cts. each, 35 cts. per doz., \$2 per 100.

JONQUILS

## LILIES

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous

LILIUM HARRISII

plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a deep, rich loam, they all do best in a light, well-drained soil. Some peat or leaf-mold may be used to advantage. *L. auratum* cannot bear manure, but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand is recommended.

**Lilium Harrisii and Lilium candidum ready in August; others not until November.**

### Lilium Harrisii (BERMUDA EASTER LILY)

**BULBS NOW READY**

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very-sweet-scented and of great substance, and last a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decoration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

If ordered by mail, add from 10 to 20 cents per dozen for postage, according to size

TYPES OF LILIES

## LILY-OF-THE-VALLEY (*Convallaria majalis*)

READY IN NOVEMBER AND DECEMBER

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them. They also may be planted in moss fiber in vases.

**Clumps.** Fine large clumps, with many flowering pips on each. Fine for planting outside in shaded positions and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per doz., \$20 per 100.

**Pips for Forcing.** 50 cts. per bundle of 25, \$1.75 per 100, \$14 per 1,000.

Above prices do not include cost of transportation

## CHINESE SACRED LILY

(The Water Fairy Flower)

READY IN SEPTEMBER

If ordered by mail, add 5 cts. each or 25 cts. per dozen for postage

A variety of the Polyanthus Narcissus, imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs entirely and place in a sunny window in a cool room.

Price, 10 cts. each, \$1 per doz.; Mammoth Size Bulbs, 15 cts. each, \$1.50 per doz.

LILY-OF-THE-VALLEY

## ANEMONE, or WINDFLOWER

Very ornamental hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

If ordered by mail, add 15 cts. per 100 for postage

ANEMONE JAPONICA

## ANEMONE SPECIES

If ordered by mail, add 15 cts.  
per 100 for postage

**READY IN NOVEMBER**

### Apennina, Blue Star.

Very charming clear blue, star-shaped flowers; excellent for naturalizing; early flowering. 5 cts. each, 30 cts. per doz., \$1.50 per 100.

### Apennina, White.

A variety of the above. 5 cts. each, 30 cts. per doz., \$1.50 per 100.

### Fulgens.

Dazzling vermilion or scarlet; flowers very early in the spring. It does best in a good loam and in a moist situation. A fine pot-plant for house decoration. 6c. each, 50 cts. per doz., \$3 per 100.

### Japonica alba.

Large, pure white flowers; invaluable for cutting. 6c. each, 50 cts. per doz., \$3 per 100.

### Japonica rosea.

Large, rosy carmine flowers, 2 to 2½ inches. 6 cts. each, 50 cts. per doz., \$3 per 100.

### Japonica, Queen Charlotte.

Light pink; semi-double. 7 cts. each, 60 cts. per doz., \$3.50 per 100.

**Japonica, Lady Ardilaun.** A greatly improved Alba, with larger flowers of greater substance. 10 cts. each, 75 cts. per doz., \$5 per 100.

**Japonica, Whirlwind.** It bears in profusion large, semi-double, pure white flowers of great substance. This is a splendid variety for cut-flowers, 6 cts. each, 50 cts. per doz., \$3 per 100.

**Sylvestris** (Snowdrop Windflower). Very beautiful, pure white. 7 cts. each, 60 cts. per doz., \$3.50 per 100.

## AMARYLLIS

**READY IN OCTOBER**

Cost of transportation not included in prices quoted

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mold, or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

**Belladonna Blanda.** Rosy white; smaller than type; very pretty. 50 cts. each, \$5 per doz.

**Belladonna major.** Violet and white; flowers in large umbels; fragrant. 20 cts. each, \$2 per doz.

**Belladonna speciosa purpurea.** Fine umbels of rich purple, with a pure white throat; exceedingly fine. 60 cts. each, \$6 per doz.

**Formosissima** (Jacobæan Lily). 15 cts. each, \$1 per doz.

These new Begonias have beautifully shaped, gracefully frilled and crested flowers borne above

CALOCHORTUS

(Mariposa Lily, or Butterfly Tulip)

READY IN SEPTEMBER

If wanted by mail, add 3 cts. per doz. or 15 cts. per 100 for postage

Very handsome bulbous plants from California. They are remarkable for the brilliancy and variety of their coloring, and their gracefulness of habit. They grow freely in light, sandy loam. Though hardy, they should be protected during winter with litter. They may also be successfully grown in frames and pots.

CROWN IMPERIALS

(*Fritillaria imperialis*)

A stately growing plant, with dark green foliage and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

READY IN SEPTEMBER

CROWN IMPERIAL

## CROCUS

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted closely—say 2 inches apart—and 3 inches deep, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful.

For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

If wanted by mail, add 4 cts. per doz. or 20 cts. per 100 for postage.

For Autumn-flowering Crocus, see below

## HYBRID NAMED CROCUS

Remarkable for richness of color and immense size. These varieties are best for forming letters or designs on lawns, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. The flowers are produced very early, and the mowing later on will not seriously injure the Crocus bulbs.

If wanted by mail, add 5 cts. per doz. or 25 cts. per 100 for postage

CYCLAMEN

- Kirki.** Large umbels of beautiful pure white flowers, with purple stripe in center of each petal. 75 cts. each.  
**Powelli.** It produces long stems, bearing at the top five to eight large, dark rose, bell-shaped flowers 3 to 4 inches long. 30 cts. each.  
**Powelli album.** Pure white. 50c. each.  
**Powelli intermedium.** Light rose. 75 cts. each.

Above prices do not include transportation charges

## CYCLAMEN

MOST OF THEM READY IN NOVEMBER

If wanted by mail, add 8 cts. per doz. for postage.

When well grown it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white and of much elegance of form in flower and plant. The soil best suited to them is a fresh, turfy loam, with a fourth to a fifth of well-rotted horse manure, to which add some clean sand if the soil is heavy. Plant so as to leave the top of the bulb just below the surface. We offer seed of our superb strain of *C. giganteum* at the end of this catalogue.

## ERYTHRONIUM

(DOG'S-TOOTH VIOLETS) READY IN SEPTEMBER

If wanted by mail, add 3 cts. per doz. or 15 cts. per 100 for postage

Very ornamental, hardy, bulbous plants, of neat, and dwarf habit. They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in a sheltered position on rockeries, or in mixed flower or shrubby borders.

	Each	Doz.	100
<b>Californicum.</b> Cream-yellow, with maroon band at base; leaves very richly mottled. The finest of all. ....	\$0 07	\$0 60	\$3 50
<b>Giganteum</b> (Giant Dog's-Tooth Violet). Very large, straw-colored flowers, with orange center, borne on long, slender stems; the foliage is richly mottled in dark brown and its elegant habit makes it a very attractive pot-plant for window decoration. ....	08	65	4 50

## CRINUM

Splendid large-flowering bulbs, closely allied to the Amaryllis. The most suitable soil is a compost of turfy loam, cow-manure and some sand. They should be grown in large pots or tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a cool-house and allowed to rest until new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure-water during the growing season. They may be placed outside when warm weather begins, and will flower all through the summer, making splendid lawn or veranda plants.

**Giganteum, Giant White.** Immense bulbs; large white flowers; bloom all summer; very fragrant. Water plentifully while growing. \$2 each.

**Amabile, Giant Pink.** Extra-large, bright pink, with white stripe; splendid flower; enormous bulb. This and the Giant White are unsurpassed for growing in tubs, blooming profusely outside all summer. \$2 each.

ERYTHRONIUMS

## ERYTHRONIUMS, continued

**Citrinum.** Leaves mottled; flowers yellow. 8 cts. each, 65 cts. per doz., \$4.50 per 100.

**Grandiflorum.** Leaves unmottled; flowers bright yellow, with recurved petals. 7 cts. each, 60 cts. per doz., \$4 per 100.

**Hartwegii.** Fine variety; light yellow flowers like those of *E. giganteum*, but each borne on a separate stalk. 6 cts. each, 50 cts. per doz., \$3 per 100.

**Purpurascens.** Bright yellow, turning to purple; flowers from 6 to 12 inches high. 8 cts. each, 65 cts. per doz., \$4.50 per 100.

**Mixed.** 5 cts. each, 40 cts. per doz., \$2.50 per 100.

**Dens-canis** (Dog's-Tooth Violet). Mixed colors very pretty; leaves blotched in brown and white. 3 for 10 cts., 25 cts. per doz., \$1.25 per 100.

## FREESIA

If wanted by mail, add 3 cts. per doz. or 15 cts. per 100 for postage

The justly popular *Freesias* are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in good loamy soil, with an admixture of leaf-mould and sand, in a frame or greenhouse, and are excellent for window culture in winter. For the information of all not acquainted with these bulbs, we may say that they are quite small, but produce large blooms in comparison to their size.

***Freesia refracta alba.*** The body of the flower is pure white, with lower segments spotted lemon-yellow. Their fragrance is remarkable and very lasting.

	Doz.	100	1,000
Monster Size Bulbs.	\$0 30	\$1 50	\$12 00
First Size Bulbs.	25	1 25	10 00
Second Size Bulbs.	20	1 00	8 00

***Freesia*, "Purity."** Magnificent glistening pure white flowers of large size, borne on strong, lengthy stems, each truss bearing 8 to 10 buds, five to six of which are frequently open at the same time. \$0 60 \$3 50

***Freesia alba major*, Pure White.** Splendid sort, with large, pure white flowers of good substance. 50 2 75

***Freesia Leichtlinii major.*** Creamy white, shading to yellow, with orange blotch; distinct in color. 45 2 50

FREESIA REFRACTA ALBA

Doz. 100

## IXIAS READY IN OCTOBER

If wanted by mail, add 3 cts. per doz. or 15 cts. per 100

The Named Hybrid *Ixias* are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the *Ixias* attract much attention.

<b>Fritillaria imperialis.</b> See Crown Imperials, on page 20.			

## GLADIOLUS READY IN NOVEMBER

If wanted by mail, add 5 cts. per doz. or 30 cts. per 100 for postage

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse, except *Byzantinus*, which is hardy, and may be planted out; it is best, however, to give it slight protection. Some varieties are successfully forced.

The French Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty. Every year is adding varieties of most exquisite tint and shade; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published January 1.

	Each	Doz.	100
<b>Byzantinus.</b> Delicate purple; hardy.....	\$0 05	\$0 35	\$2 00

## GLOXINIAS READY IN NOVEMBER

If wanted by mail, add 8 cts. per doz. for postage

Gloxinias are among the most beautiful of greenhouse plants, being remarkable for the intensity and variety of their colorings, and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mould and peat in equal parts, with a little sand added. When growing plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large-sized, and of erect-flowering strain:

# IRIS (FLEUR-DE-LIS)

READY IN OCTOBER AND NOVEMBER

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light rich, sandy soil, and in a sunny situation. Good drainage is important. The varieties of *Iris Kampferi*, from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 or 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms, measuring 8 to 10 inches across. These require a liberal supply of water when growing. With the exception of *Morea pavonia* and *Tuberosa*, all varieties are hardy.

## SUPERB COLLECTION OF LARGE-FLOWERED JAPAN IRIS

(*Iris Kaempferi*) READY IN NOVEMBER

We are importing from Japan a large supply of the following eighteen of the best of these magnificent Irises, which excel in size, perfection of form and richness of color. These are most valuable for cut-flowers and table decoration—as handsome as orchids. Flowers should be cut in the early morning or after sunset. They come in large clumps. *The descriptions given are those furnished us by the growers in Japan.*

25 cts. each, \$2.50 per doz., \$18 per 100. Transportation charges extra.

**Datedogu.** Rich claret-red, orange, blue and white.  
**Hana-aoi** (Hollyhock). Gray, yellow and navy-blue.  
**Ho-o-jo** (Ho-o-castle). Ruby-crimson, primrose blotches.

**Kakujakuro.** Blue and purple, feathered white; yellow blotches.

**Kimi-no-megumi.** Gray, feathered and penciled violet, with yellow blotches.

**Koki-no-iro.** Red-purple, suffused blue; orange blotches.

**Komochi-guma.** (Bear with young). Violet, double, blooming several close together at head.

**Kuma-fungin** (Excited Bear). Purple and blue, with large orange blotches.

**Kumo-no-uye.** Purple, with a sky-blue halo surrounding the primrose blotches; very double.

**Manadzuru** (Crane). White, with yellow blotches, radiating sky-blue. This variety will at times give a creamy white flower.

**Osho-kun.** Intense tyrian blue; yellow blotches.

**O-torige.** Light purple, with blue halo surrounding the orange blotches, claret standards, tipped white.

**Oyodo.** Immense, violet-blue petals, large standards.

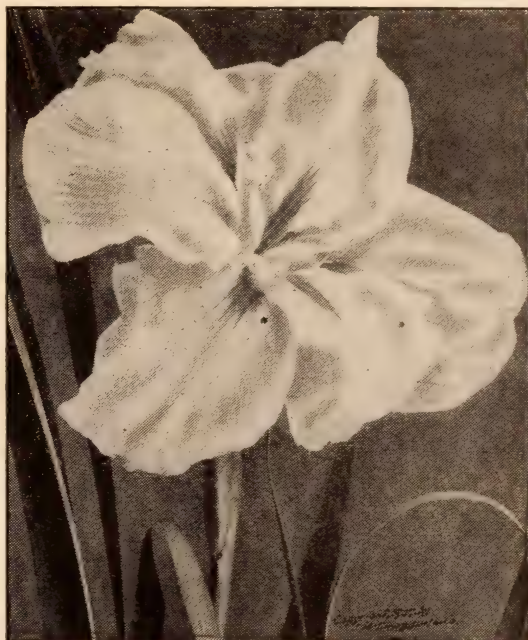

**Shiga-no-uranami.** Red-lavender, with white halo surrounding yellow blotches.

**Shippo** (Cloissone). Rich tyrian-blue, edged purple and feathered white; yellow blotches.

**Tsuru-no-kegoromo** (Crane's Feather). Large, pure white flowers, yellow blotches.

**Uji-no-hotaru.** Purple and sky-blue, with orange blotches.

**Yedo-jiman.** Royal-blue; large petals; standards purple.

LARGE-FLOWERED JAPAN IRIS

## SPANISH IRIS (*Iris Hispanica*)

If wanted by mail, add 5 cts. per doz. or 30 cts. per 100 for postage

Very profitable for florists, who are planting them largely for cut-flowers. Plant in beds in the open as soon as received in the autumn, and protect slightly in the winter months. In the beginning of April cover the beds with glass, so as to have the flowers ready for cutting in May.

## LACHENALIA READY IN SEPTEMBER

If wanted by mail, add 5 cts. per doz. for postage

Very pretty, spring-flowering, greenhouse bulbous plants of elegant habit and with brightly colored flowers. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mould and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air and keep near the glass to ensure sturdy growth. Lachenalias are also excellent subjects for hanging baskets.

	Each	Doz.
<b>Luteola.</b> Pale yellow flowers flushed with green.....	\$0 30	\$3 00
<b>Luteola maculata</b> .....	40	4 00
<b>Nelsoni.</b> Rich golden yellow; very fine.....	45	4 50

## MONTBRETIA

READY IN NOVEMBER

If wanted by mail, add 5 cts. per doz. or 30 cts. per 100 for postage

Hardy, summer-flowering bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties.

	Each	Doz.	100
<b>Bouquet Parfait.</b> Large; bright vermilion flowers, with deep yellow centers.....	\$0 05	\$0 40	\$2 00

<b>Hyacinthus candicans.</b> A snow-white, summer-flowering giant Hyacinth.....	06	50	3 00

GRAPE HYACINTHS

## NERINE

READY IN OCTOBER AND NOVEMBER

If wanted by mail, add 4 cts. each for postage

Very beautiful greenhouse bulbous plants succeeding best in pots in light soil—say a compost of loam, leaf-mould and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die they should be kept quite dry in a cool place until they begin to grow again.

	Each
<b>Corusea major.</b> Brilliant scarlet flowers.....	\$1 50
<b>Crispa.</b> Very handsome scarlet flowers.....	1 00
<b>Flexuosa.</b> Bright crimson-scarlet, tinged with orange.....	1 40
<b>Fothergilli.</b> Bright glittering scarlet, in many-flowering umbels.....	1 40
“ <b>major.</b> A magnificent plant for house or conservatory. Intense shining scarlet, by artificial light the crystalline cells of the petals sparkle like jewels. Flowers freely.....	\$1 40
<b>Sarniensis</b> (True Guernsey Lily). Flowers brilliant crimson, in large clusters. The best known sort.....	50
<b>Undulata.</b> Rosy purple, wavy flowers; very handsome.....	75

## OXALIS

READY IN SEPTEMBER

If wanted by mail, add 3 cts. per doz. or 15 cts. per 100 for postage

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging baskets. They are easily grown in a sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

	Each	Doz.	100
<b>Buttercup.</b> A splendid winter-blooming plant for pot-culture. The flowers are pure bright yellow, and produced in great abundance. It is very easily cultivated and, being a strong grower, only one or two bulbs should be planted in a 5- or 6-inch pot. First-size..	\$0 05	\$0 40	\$2 00

<b>Mixed</b> .....	3 for 5 cts...	15	75

# PAEONIES

READY IN OCTOBER

If wanted by mail, add 5 cts. each for postage

The old-fashioned double Paeonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Paeonies rank about first for lawn or flower-border or shrubbery decoration. They are all hardy. We offer only strong, flowering roots.

## HERBACEOUS CHINESE PAEONIES (*Paeonia Chinensis*)

## JAPANESE TREE PAEONIES (*Paeonia arborea*)

These are very beautiful and free-flowering, and bloom two or three weeks earlier than the herbaceous sorts. We are importing an assortment of the following fine named varieties:

\$1.50 each

**Athlete.** White, purple center; large flower.

**Atropurpurea.** Half-double flower; purple.

**Berenice.** Rosy lilac; enormous flower.

**Comata.** White and lilac mixed.

**Comtesse de Tuder.** Tender rosy white; very double. Fine shaped flower.

**Elisabeth.** Brilliant pink; one of the largest flowers.

## PAEONIA TENUIFOLIA

Very elegant plants with narrow-leaved feathery foliage.

**Double-flowering.** Rich crimson. 40 cts. each, \$4 per doz.

**Single-flowering.** Rich crimson. 25c. each, \$2.50 per doz.

## PAEONIA OFFICINALIS

**Anemoneaeflora.** Crimson; single anemone-flower shape. 40 cts. each, \$4 per doz.

**Atro-rubra plena.** Dark red; double. 25 cts. each, \$2.50 per doz.

**Mutabilis plena.** Tender rose, passing to white; double. 30 cts. each, \$3 per doz.

**Splendens.** Dark red; half-double flower. 35 cts. each, \$3.50 per doz.

## RANUNCULUS READY IN SEPTEMBER

If wanted by mail, add 3 cts. per doz. or 15 cts. per 100 for postage

The main soil for these should be loam or clay, with a good dressing of rotted manure and leaf-mould; if heavy, add a little sand. The soil should be well drained, cool, deep, rich and moist. Plant late in the autumn, claws downward, from 4 to 6 inches apart and 3 inches deep, covering with fine, pulverized soil.

## RICHARDIA (Calla)

**READY IN OCTOBER AND NOVEMBER**

Add 3 cts. each or 20 cts. per doz. for postage, if wanted by mail

Tall-growing, bulbous perennials of graceful habit, and handsome foliage and flowers. They are easily cultivated in pots, requiring only rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting in September.

**White Calla, or Lily of the Nile** (*Calla Æthiopica*). Large, white, trumpet-shaped flowers of great substance. One of the most popular ornamental house and greenhouse plants. Largest size bulbs, 25 cts. each, \$2.25 per doz., \$15 per 100.

**"Little Gem" Calla.** Very neat, dwarf habit; makes an excellent pot plant. 8 cts. each, 65 cts. per doz., \$4 per 100.

**Black Calla.** See *Arum Palæstinum sanctum*. 20 cts. each, \$1.75 per doz., \$10 per 100.

**Red Calla** (*Arum cornutum*). Flowers red, spotted black; stem mottled; a handsome pot-plant. 20 cts. each, \$1.75 per doz., \$10 per 100.

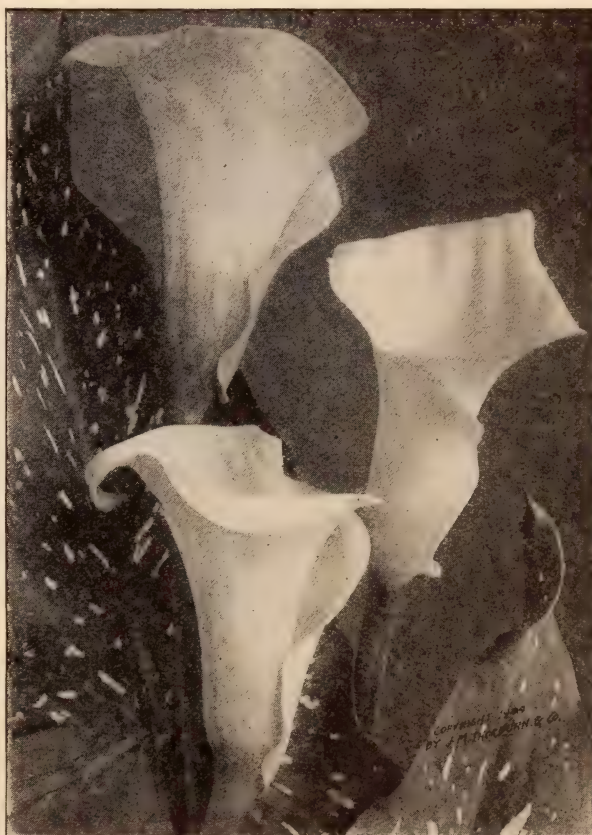

**ELLIOTTIANA, Yellow, Spotted Leaf.** Dark green leaves, spotted silvery white. 40 cts. each, \$4 per doz.

## SCILLAS READY IN SEPTEMBER

*S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years. The effect in early spring of the intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the Snowdrop and the varied hues of the Crocus, is very striking; most valuable for permanent edging, or planted in bunches of a dozen or so.

If ordered by mail, add 5 cts. per doz. for postage, except *Peruviana*, for which add 2 cts. each

YELLOW SPOTTED-LEAF CALLA

## SNOWDROPS (*Galanthus nivalis*)

READY IN SEPTEMBER

If wanted by mail, add 3 cts. per doz. or 15 cts. per 100 for postage

Perhaps no spring flower is a more general favorite than the Snow-drop. The earliest flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms. Should be planted 2 to 3 inches deep in a shady location.

**Single-flowering Snowdrops.** 20c. per doz., \$1 per 100, \$7 per 1,000.

**Double-flowering Snowdrops.** 35c. per doz., \$2 per 100, \$15 per 1,000.

**Giant Snowdrops of Asia Minor (*Galanthus Elwesii*).** 20 cts. per doz., \$1 per 100, \$6.50 per 1,000.

## SPIRAEA or ASTILBE

READY IN NOVEMBER

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

**Japonica (Hoteia).** Excellent pot-plant for winter-blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting. 15 cts. each, \$1.25 per doz., \$6 per 100.

**Japonica compacta multiflora.** The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.50 per doz., \$7 per 100.

**Astilboides floribunda.** Very large, pure white plumes; neat habit; very abundant bloomer. 15 cts. each, \$1.50 per doz., \$8 per 100.

**Palmata.** Crimson; strong clumps. 15 cts. each, \$1.50 per doz., \$8 per 100.

SNOWDROPS

SPIRAEA

**Aruncus.** Handsome plant with large plumes of pure white flowers. 20c. each, \$2 per doz.

**GLADSTONE.** A hybrid Spirea with beautiful snow-white plumes borne on strong stems 1½ feet long, standing erect above the foliage. The plant is perfectly symmetrical in shape, the foliage very handsome and the flowers exquisitely fragrant. Fine forcer. 20 cts. each, \$2 per doz., \$12 per 100.

**WASHINGTON.** A splendid decorative plant, producing extra-large flowers. Strong grower; fine for forcing. 15 cts. each, \$1.50 per doz., \$8 per 100.

**QUEEN ALEXANDRA, PINK.** A splendid pink variety, in habit similar to the well-known Gladstone, but flowering two weeks later. It is a very free bloomer and bears its flowers well above the strong, dark green foliage. When forced it must be shaded as soon as it starts to color. It is a splendid outdoor plant, being as hardy as the old *Spiraea Japonica*. Its color won't fade even in the brightest weather. 35c. each, \$3.50 per doz.

Transportation charges not included in above prices.

## TRILLIUM

(American Wood-Lily, or Indian Shamrock)

If wanted by mail, add 5c. per doz. or 30c. per 100 for postage

Hardy herbaceous perennials succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are native of North America, and are known by various common names in different localities. They have violently emetic roots.

**Grandiflorum** ("Giant American Wood-Lily," or "Wake-Robin"). Large, white flowers, changing to rose; quite hardy, and easily grown in shaded positions. 8 cts. each, 60 cts. per doz., \$3.50 per 100.

**Ovatum**. White, changing to rose. 10 cts. each, 75 cts. per doz., \$5 per 100.

**Sessile Californicum**. Handsome, pure white flowers, with purple centers; prettily mottled foliage. 12 cts. each, \$1.25 per doz., \$6.50 per 100.

**Sessile, Snow Queen**. Of the same type as Californicum, but the flowers are pure white and with broader petals. 12 cts. each, \$1.25 per doz., \$6.50 per 100.

TRILLIUM

## TUBEROSES READY IN DECEMBER

If wanted by mail, add 10 cts. per doz. for postage

The purity of color and rich perfume of the Tuberose are well known in this latitude. May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich, warm soil and a sunny situation. Cut off about a quarter of an inch from the bottom of the bulb before planting, and set so that the top will be one inch below the surface of the soil.

	Each	Doz.	100
<b>Dwarf Double Pearl</b> . Dwarf habit; large, fine flowers of great substance	\$0 06	\$0 40	\$2 00
<b>Albino</b> . Purest white; single flowers.	08	50	3 00
<b>Variegated Leaf</b> . Foliage striped white and green; single white flowers	08	50	3 00

## Miscellaneous Bulbs and Roots

Those marked with an asterisk (\*) will not be ready till October or November

	Each	Doz.	100
* <b>Achimenes</b> . Mixed. Lovely greenhouse pot-plants.....	\$0 10	\$0 70	\$4 00
<b>Aconite</b> . See Eranthis, page 32.			
<b>Allium</b> . Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.			
" <b>Azureum</b> . Beautiful sky-blue flowers in large umbels; fine for pots or garden..	10	90	6 00
" <b>Neapolitanum</b> . Large umbels of pure white flowers, borne on large stems; valuable for forcing for winter cut-flowers, as well as for summer garden decoration			
3 for 10 cts...		25	1 25
" <b>Moly luteum</b> . Golden yellow flowers in large umbels; very showy and attractive; fine for growing in the garden in groups or for naturalizing in masses.			
2 for 5 cts...		20	1 00
" <b>Hermettii grandiflorum</b> . Makes a splendid pot-plant for winter-blooming in the house, the handsome, large, pure white flowers being produced abundantly and for a long time; largely used by florists for cut-flowers....		25	1 25
3 for 10 cts...			
" <b>Ostrowskianum</b> . Deep carmine.....	05	40	2 00

WATSONIA

## Hardy Annual and Perennial Flower Seeds

## FOR AUTUMN SOWING

Many varieties of flower seeds, **Annals** as well as **Biennials** and **Perennials**, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring.

## LAWN SWEEPER. "MODEL NO. 1"

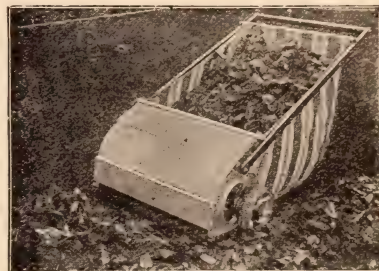

Designed for use on ordinary lawns, small parks, tennis courts, etc. It is 25 inches wide over all, weighs 28 pounds, and carries a 21-inch brush. The brush is fan-shaped, and revolves very rapidly in the same direction as the drive-wheels, throwing the litter backwards from the under-surface. Price, \$12.

LAWN SWEEPER, "MODEL NO. 1"

## THE GEM LAWN CLEANER

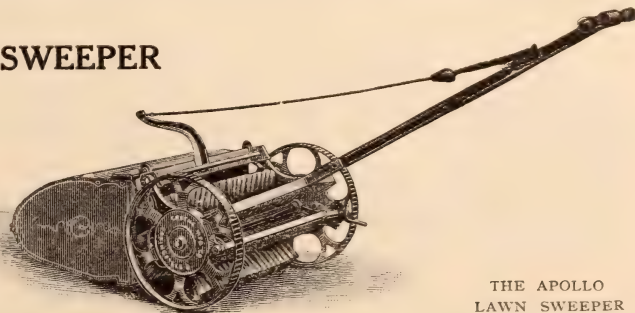

A revolving fan with metal teeth creates an air-current which carries into the canvas basket all leaves, dead grass, stones, etc., that the rake encounters. It straightens up crab grass and other running weeds so that they may be cut by the lawn-mower. Price, \$16.

THE GEM LAWN CLEANER

## THE APOLLO LAWN SWEEPER

The machine consists of a revolving brush which throws the sweepings forward into the large grass box attachment, which, when full, is dumped by merely pulling a cord. It removes all cut grass, leaves, twigs, etc., and by setting it low it is excellent for taking out crab grass. It is also valuable for sweeping garden walks, stables, etc. Price, 20-inch sweep, \$12 each; 28-inch sweep, \$14 each.

THE APOLLO  
LAWN SWEEPER

For complete list of Horticultural Implements and Garden Requisites, see pages 133 to 142 of Our General Catalogue

## Mushroom Spawn

Cultural directions in our General Catalogue. Any one requiring fuller details should get Wm. Falconer's book on Mushroom Culture, sent postpaid, for \$1.

**English Spawn.** In bricks. Per lb. 15 cts., 10 lbs. \$1, 100 lbs. \$9.

**American Spawn.** In bricks. Per brick, 18 cts., 10 bricks, \$1.50, 100 bricks, \$12.

**French Spawn.** In bulk. Per lb. 30 cts., 10 lbs. \$2.50.

## Insecticides and Remedies for Plant Diseases

If wanted by mail, add 16 cents per lb. to cover postage

**APHINE.** Has no equal for the destruction of green, black, or white fly, thrips, red spider, mealy bug, caterpillars, scale, etc. Used one part to forty parts of water. Does not injure the most tender plants. Qt. \$1, gal. \$2.50.

**BUG DEATH.** This is a fungicide, insecticide, and plant-food combined. 1-lb. package, 15 cts.; 3-lb. package, 35 cts.; 5-lb. package, 50 cts.; 12½-lb. package, \$1; 100-lb. package, \$7.50.

**FIR-TREE OIL.** For greenhouse and house plants. Destroys insects without injuring plant. Dilute 1 pint to 20 gallons water. Apply with vaporizer or syringe. ½pt. 40 cts., pt. 75 cts., qt. \$1.25, ½gal. \$2.25, gal. \$4.

**FIR-TREE OIL SOAP.** Mix at the rate of 1 ounce to a gallon of water, and apply with a bellows or syringe. ½lb. tin, 25 cts.; 2-lb. tin, 75 cts.

**DALMATIAN INSECT POWDER.** Effective against almost all kinds of insects. ½lb. box, 30 cts.; 1-lb. box, 50 cts.

**GISHURST'S COMPOUND.** A certain remedy for greenfly, scale, mealy bug, etc. Excellent for greenhouse use. 1-lb. box, 50 cts.

**HAMMOND'S GRAPE DUST.** For the prevention of mildew on roses, grapes, gooseberries, etc. Apply with bellows. 5-lb. pkg. 35 cts., 10-lb. pkg. 60 cts., 100 lbs. \$5.

**HELLEBORE, POWDERED.** Apply dry or mix in water—1 oz. to 3 gals. 2-lb. box 35 cts., 1-lb. box 20 cts., ½lb. box 12c.

**KEROSENE EMULSION.** For cabbage worms, scale on trees, caterpillars, melon louse, rose bugs, green fly, etc. Dilute 25 to 50 parts. Qt. 40 cts., gal. \$1.

**LEMON OIL.** For destroying scale, caterpillar, mealy bug, etc. Directions on can. ½pt. 25 cts., pt. 40 cts., qt. 75 cts., gal. \$2.

**ANTIPEST.** A sure destroyer of all insect pests. Qt. 60 cts., ½gal. can \$1, gal. can \$2.

**NICOTICIDE.** For fumigating or spraying. Effective against greenfly, mealy bug, etc. Does not damage foliage or flowers. Sold in cans as follows: No. 1, 1 pt., sufficient for 32,000 cubic feet of space, \$2.50 each; No. 2, ½pt., sufficient for 16,000 cubic feet of space, \$1.25; No. 3, 4 oz., sufficient for 8,000 cubic feet of space, 70 cts. Gals., \$15; each ½-gals. \$8.25 each; qts., \$4.50 each. Fumigators, 50 cts. each.

**"NICO-FUME" TOBACCO PAPER.** For fumigating greenhouses. Does not injure blooms. Packed in special friction-top tins. 24 sheets, 75 cts. 144 sheets, \$3.50; 288 sheets, \$6.50.

**NICO-FUME LIQUID.** For fumigating or spraying. Effective against greenfly, mealy bug, etc. Does not stain or injure blooms, and leaves no disagreeable odor. For spraying, 1 to 2 teaspoonfuls to a gallon of water. ¼pt. 50 cts., pt. \$1.50, ½gal. \$5.50, gal. \$10.50. Lamps, 50 cts. each.

**PARIS GREEN.** Mixed at the rate of 1 lb. to 200 gals. of water. Effective against all chewing insects. 1-lb. can, 35 cts., ½-lb. can 20 cts., ¼-lb. can 12 cts. Fluctuates in price.

**SLUG-SHOT (HAMMOND'S).** Excellent for destroying cabbage, turnip and beet fly, potato bugs, currant worms, etc. 5-lb. package, 30 cts., 10-lb. pkg. 50 cts., 100-lb. pkg. \$4.50.

**SULPHUR, POWDERED.** Valuable for protecting against mildew on grapes, roses, etc. Lb. 10 cts., 10 lbs. 60 cts., 100 lbs. \$4.

**SULPHO-TOBACCO SOAP.** Dissolve in proportion of 2 ounces to a gallon of water, and apply with a syringe or atomizer. It will destroy rose slugs, aphides, greenfly, bark-lice, etc. 3-oz. box, 10 cts.; 8-oz. box, 20 cts., 10-lb. box, \$3.

### TOBACCO DUST—

**Ordinary Kind.** For dusting. Lb. 10 cts., 5 lbs. 35 cts., 10 lbs. 60 cts., 100 lbs. \$2.75.

**Stoothoff's "Black Stuff."** For dusting. 50 lbs. \$2.25, 100 lbs. \$4.

**Stoothoff's "Fumigating Kind."** For burning. 50 lbs. \$2.25, 100 lbs. \$4.

**TOBACCO STEMS.** For fumigating plants infested with green fly. Bale of about 100 lbs., \$1.50; 200 lbs., \$2.75; 400 lbs., \$4.50.

**"ROSE-LEAF" TOBACCO EXTRACT.** Pure, concentrated extract of tobacco; effective against insects and scale on plants. Pint 30 cts., qt. 50 cts., gal. \$1.25.

**TREE TANGLEFOOT.** A sticky substance applied directly to the bark. For protecting trees against climbing insect pests in a simple economical and effective way. One application remains sticky, fully exposed to weather, three months. One pound will make a band 7 to 8 feet long. 1-lb. can 30 cts., 3 lbs. 85 cts., 10 lbs. \$2.65, 20 lbs. \$4.80.

**WHALE-OIL SOAP.** For washing trees and destroying all insects on the bark. 1-lb. box, 15 cts., 5 lbs. 50 cts., 10 lbs. 90 cts., 100 lbs. \$7.

**BORDEAUX MIXTURE, or FUNGIROID.** For all fungous diseases. Dry, 1-lb. box 20 cts., 5 lbs. and over at 18 cts. per lb.; 50 lbs. \$7; liquid, qt. 40 cts., gal. \$1.25.

**X. L. ALL LIQUID INSECTICIDE.** For spraying. English preparation; purely nicotine; harmless to very delicate plants; kills mealy bugs, red spider and all insect pests. Pt. 65 cts., qt. \$1, ½gal. \$1.75, gal. \$3.50.

## FOR SAN JOSÉ SCALE

**Horicum** (Hammond's). A lime, sulphur and salt mixture, entirely free from grit. 1 gallon makes 25 by adding sufficient water. Qt. 40 cts., ½gal. 75 cts., gal. \$1.25.

**California Wash** (Lime, sulphur and salt.) One gallon makes 25 by adding sufficient water. Qt. 40 cts., gal. \$1.

**Scalecide.** Petroleum oil that mixes at once with cold water and stays mixed. No hot water necessary. Add 1 gallon for every 15 to 20 gallons of water. Qt. 40 cts., gal. \$1, 5 gals. \$3.25.

## Cooper's Tree Spray Fluids

The most effective remedies yet discovered for San José scale and kindred troubles. **No sediment to clog nozzles.** Can be mixed instantly with cold water.

**V1 FLUID.** For winter or spring use on dormant trees. Kills San José scale, oyster shell scale, eggs of insects, spores of fungi, mosses and lichens.

**V2 FLUID.** For summer use when trees are in bud or leaf. Kills codling worms, oyster-shell scale, insect, woolly and all forms of aphids, pear and apple psylla without injury to leaf or blossom.

One gallon of either fluid mixed with cold water makes 100 gallons of mixture.

**Price of either fluid, qt., \$1; ½gal., \$1.75; gal., \$3; 5 gals., \$14**

## Thorburn's High-Grade Fertilizers

### Thorburn's Lawn Fertilizer

Per ton, \$50; single bags of 167 lbs., \$5; per bag of 100 lbs., \$3.25; 50 lbs., \$2; 25 lbs., \$1.25; 10 lbs., 75 cts.

### Thorburn's Complete Manure

Ton, \$40; single bag of 167 lbs., \$4; bag of 100 lbs., \$2.75; 50 lbs., \$1.65; 25 lbs., \$1; 10 lbs., 50 cts.

### Clay's Celebrated Fertilizer

One of the best manures for all horticultural purposes. 1 cwt. (112 lbs.), \$7;  $\frac{1}{2}$ cwt. (56 lbs.), \$4;  $\frac{1}{4}$ cwt. (28 lbs.), \$2.25;  $\frac{1}{8}$ cwt. (14 lbs.), \$1.25.

### Thompson's Vine Manure

Unrivalled for vines, tomatoes, cucumbers, fruit trees, and all foliage, flowering and fruit-bearing plants; also for vegetable and outdoor plants of every description. Splendid for lawns, tennis courts, putting greens, etc. Per cwt. (112 lbs.), \$7;  $\frac{1}{2}$ cwt. (56 lbs.), \$4.

### Pure Ground Bone Meal

Finely pulverized. 5 lbs., 25 cts.; 50 lbs., \$1.25; 100 lbs., \$2.25; per ton, \$32.

### Imported Scotch Soot

In bags of about 125 lbs., \$3.50 per bag.

### Bowker's Ammoniated Food for Flowers

The best dressing for potted plants. Small package, 15 cts. each; by mail, 25 cts. Large package, 25 cts. each; by mail, 45 cts.

### Canada Hard-Wood Ashes

Highest grade, extra-screened, unleached. In bags of about 100 lbs., \$1.50; per ton, \$22.

### Pulverized Sheep Manure

Excellent as a top-dressing for lawns, and for mixing with soil for greenhouse plants. 5-lb. package, 30 cts. 10 lbs., 50 cts.; 50 lbs. \$1.25; 100 lbs., \$2; ton, \$32.

## Horticultural Implements, Etc.

### Flower or Tree Tubs

**Flower Tubs, Columbia.** Made of cypress timber.

## Grass Seeds for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the end of September, so that the young grass may become well rooted before winter sets in.

### The Thorburn Lawn Grass

(UNIVERSAL PARK MIXTURE)

Practically all the finest lawns in America were produced from this mixture. It is composed exclusively of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich green sward in three or four weeks from the time of sowing. The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture. It should be sown at the rate of 4 to 5 bushels to the acre. Per qt. 25 cts., 2 qts. 40 cts.,  $\frac{1}{2}$ pk. 65 cts., pk. \$1, bus. of 15 lbs. \$3.50.

### Thorburn's Special Lawn Grass Mixture

This extra-choice mixture contains a large proportion of the finer and more expensive species, such as Rhode Island Bent, Crested Dog's Tail, Creeping Bent, in extra-heavy samples, bringing the weight up to 20 lbs. per bushel, and producing a turf of the closest and finest texture possible. Per qt. 30 cts., 2 qts. 50 cts.,  $\frac{1}{2}$ pk. 85 cts., pk. \$1.50, bus. of 20 lbs. \$5.

### Thorburn's Lawn-Restoring Grass Seed

A mixture of grasses peculiarly suited to take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-restoring Grass Seed** should be sown before every summer rain on thin places. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 24 lbs. \$6.

### Thorburn's Lawn Grass for the South

A mixture of grasses that stand extremes of heat and drought and that are therefore peculiarly adapted to southern lawns. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.50.

### Thorburn's Grass Mixture for Shady Spots on Lawns

A mixture of grasses that thrive in shaded situations, under trees, or close to walks where there is little sun. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$ pk. \$1.25, pk. \$2, bus. of 24 lbs., \$7.

## Also Permanent Grass Seed for Golf Links, Tennis Courts, Polo Grounds, Etc.

We have devoted much attention to the seeding and preservation of golf links, tennis courts and polo grounds, and offer the following mixtures, which have been used on most of the finest links, etc., in the country with very satisfactory results.

### Tennis Court Mixture

A mixture of extra-fine grasses peculiarly adapted to tennis courts.

This mixture will make a firm, green and lasting turf of the finest texture that will improve with tramping. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$ pk. \$1.25, pk. \$2, bus. of 24 lbs., \$7.

### Grass Mixture for Railroad Banks, Etc.

A mixture of grasses with long, interlacing, matting roots that will bind steep embankments, gravelly or sandy slopes, etc., preventing washouts by rainstorms and covering with permanently green turf. Per qt. 30 cts., 2 qts. 50 cts.,  $\frac{1}{2}$ pk. 85 cts., pk. \$1.50, bushel of 20 lbs., \$5

### Fair Green or Golf Links Mixture

For the grounds in general. Per bus. of 20 lbs. \$3.50.

### Putting-Green Mixture

A mixture of extra-fine grasses that will make a close firm, green and lasting turf, which will improve with tramping. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$ pk. \$1.25, pk. \$2, bus. of 24 lbs. \$7.

### Polo Grounds Mixture

A mixture of fine-leaved and deep-rooting grasses, forming a strong and lasting turf that will stand hard usage. Per bus. of 20 lbs., \$3.50.

## Grass Seed Mixtures for Meadows and Pastures

The formation of permanent pastures and meadows has for many years been a subject of careful study with us, and the following mixtures for seeding grass-lands have received universal recognition.

### Meadow Mixtures

Sow at the rate of 2 bushels to the acre

- No. 1. For good land, neither too dry nor too wet. Per bus. of 20 lbs., \$3.50.
- No. 2. For high and dry land. Per bus. of 20 lbs. \$4.
- No. 3. For wet late land. Per bus. of 20 lbs., \$3.50.

### Pasture Mixtures

Sow at the rate of 2 bushels to the acre

- No. 4. For good land, neither too dry nor too wet. Per bus. of 20 lbs., \$4.
- No. 5. For dry land. Per bus. of 20 lbs., \$4.50.
- No. 6. For wet land. Per bus. of 20 lbs., \$4.

## Grass Seed for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the middle of September, so that the young grass may become well rooted before winter sets in.

### The Thorburn Lawn Grass

Many of the finest lawns in America were produced from this mixture. It is composed of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich greensward in three or four weeks from the time of sowing. (The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture.) It should be sown at the rate of 4 to 5 bushels to the acre. Per qt. 25 cts., 2 qts. 45 cts.,  $\frac{1}{2}$ pk. 75 cts., pk. \$1.20, bus. of 15 lbs. \$4.

### Thorburn's Grass Mixture for Shady Spots on Lawns

A mixture of grasses that thrive in shaded situations under trees, or close to walks where there is little sun. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$ pk. \$1.25, pk. \$2, bus. of 24 lbs. \$7.

### Thorburn's Grass Mixture for Terraces

A mixture of fine stoloniferous grasses peculiarly adapted to terraces. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

## Also Permanent Grass Seed for Golf-Links, Tennis-Courts, Polo-Grounds, etc.

We have devoted much attention to the seeding and preservation of golf-links, tennis-courts and polo-grounds, and offer the following mixtures, which have been used on most of the finest links, etc., in the country with very satisfactory results.

### Tennis-Court Mixture

A mixture of extra-fine grasses peculiarly adapted to tennis-courts. This mixture will make a firm, green and lasting turf of the finest texture that will improve with tramping. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

### Grass Mixture for Railroad Banks, etc.

A mixture of grasses with long, interlacing, matting roots that will bind steep embankments, gravelly or sandy slopes, etc., preventing washouts by rain-storms and covering them with permanently green turf. Per qt. 30 cts., 2 qts. 50 cts.,  $\frac{1}{2}$ pk. 80 cts., pk. \$1.25, bus. of 18 lbs. \$4.50.

### Thorburn's Special Lawn Grass Mixture

This extra-choice mixture contains a large proportion of the finer and more expensive species, such as Rhode Island Bent, Crested Dog's-Tail, Creeping Bent, in extra-heavy samples, bringing the weight up to 20 lbs. per bushel, and producing a turf of the closest and finest texture possible. Per qt. 30 cts., 2 qts. 55 cts.,  $\frac{1}{2}$ pk. 90 cts., pk. \$1.60, bus. of 20 lbs. \$5.50.

### Thorburn's Lawn-Restoring Grass Seed

A mixture of grasses that will take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-restoring Grass Seed** should be sown before every summer rain on thin places. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

### Thorburn's Lawn Grass for the South

A mixture of grasses that stand extremes of heat and drought, and that are, therefore, peculiarly adapted to southern lawns. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.50.

### Fair-Green or Golf-Links Mixture

For the grounds in general. Per bus. of 20 lbs. \$4.

### Putting-Green Mixture

A mixture of extra-fine grasses that will make a close firm, green and lasting turf, which will improve with tramping. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$ pk. \$1.25, pk. \$2, bus. of 24 lbs. \$7.

### Polo-Grounds Mixture

A mixture of fine-leaved and deep-rooting grasses, forming a strong and lasting turf that will stand hard usage. Per bus. of 20 lbs. \$4.

# J. M. Thorburn & Co.'s Catalogue OF BULBS AND FLOWERING ROOTS FOR FALL PLANTING

LIBRARY  
NEW YORK  
BOTANICAL  
GARDEN

*Season 1912*

ANY of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of blooms can be had from December until May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. The cultural directions found under the respective headings are worthy of careful attention.

**Our bulbs are all selected,** coming from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation, and often sold at auction and otherwise, at very low prices.

**NAME AND ADDRESS.** *We often receive orders with either the name or the address of the sender omitted. As we can do nothing with such orders, the customer thinks his order is being neglected. We therefore beg our correspondents to be careful to write on each order their name and full address.*

**ORDERS** should be sent as soon as possible after receipt of this Catalogue. *The bulbs will be shipped in proper time for planting. They are ready from August to November, according to the time of ripening and the country from which they come. Orders received earliest are surest of being filled in full. If left too late, the supply of some of the varieties may be exhausted.*

The prices quoted do *not* include transportation charges, which are extra. In stipulating amounts to be sent for postage, it is understood to apply to the United States only.

Please address all orders and remittances to

F. W. BRUGGERHOF, President  
E. E. BRUGGERHOF, Vice-Pres. and Treas.

# HYACINTHS

**THESE BULBS ARE READY FOR DELIVERY IN SEPTEMBER**

**The Hyacinth** is one of the most popular and beautiful spring-flowering plants for indoor and outdoor decoration. By careful management in keeping up a succession, it may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground it is unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to any one suitable sorts, when desired.

**OUTSIDE CULTURE.** In this section, October is the month to plant Hyacinths outside. They succeed best in a light soil and a sunny situation. If the soil is naturally heavy, some sand should be mixed with it, and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs. Some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has been frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field mice which may burrow in it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibrous loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.** Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

**Persons unacquainted** with the different varieties will do well to leave the selection to us, only specifying in their order whether bulbs are wanted for pot, glass or garden culture.

**We invite special attention** to the assortments of Named Hyacinths of our selection offered on page 4, and to the Hyacinth Glasses which are described at the end of the Catalogue.

**The names of our Hyacinths and Tulips are those given to them by the originators in Holland, and they are not sold under fancy names manufactured in this country.**

## SELECT NAMED DUTCH HYACINTHS

*N. B. Our Select Named Hyacinths are the cream of the Holland Nurseries under their original names. For forcing in pots or for outdoor beds they far surpass the class of Bulbs usually sold.*

The single-flowered varieties are generally more effective and better for forcing than the double ones. They also, as a rule, succeed better in glasses. The double varieties are distinguished by an asterisk (\*) and those of them that do well for forcing in water by two asterisks (\*\*).

Three of a kind sold at the dozen rate

## GROUPS OF DUTCH HYACINTHS FOR DESIGN BEDDING

To obviate the disappointment resulting from selecting unsuitable varieties for design beds, we give the following groups of sorts that bloom about the same time and grow to the same height. They will all form effective combinations. We recommend **named** sorts for design bedding as decidedly better than mixtures.

<b>Fabiola.</b> Rose.	<b>Robert Steiger.</b> Red.	<b>General Pelissier.</b> Crimson.
<b>Alba Superbissima.</b> White.	<b>Mad. Vanderhoop.</b> White.	<b>Baroness Van Thuyll.</b> White.
<b>Charles Dickens.</b> Blue.	<b>Marie.</b> Blue.	<b>Grand Maitre.</b> Blue.
<b>Gigantea.</b> Blush-pink.		<b>Norma.</b> Pink.

## MIXED DUTCH HYACINTHS IN SEPARATE COLORS

*Largest bulbs. Suitable either for forcing or bedding*

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all of the largest size. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

## FRENCH ROMAN HYACINTHS

Extensively used by florists for forcing cut-flowers. For this purpose they are the best and most popular of bulbs. The flowers are delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable spot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early, and by making successive plantings they may be had in flower all through the winter. The blue and rose Roman Hyacinths flower from one to two weeks later than the white variety.

## MINIATURE HYACINTHS

These are also known as "**Dutch Roman**" and "**Pan Hyacinths.**" They are very suitable for growing in groups in pots or earthen pans. We offer them in separate colors, and also mixed, as follows:

**Pure White, Bright Red, Light Blue and Dark Blue.** 5 cts. each, 40 cts. per doz., \$2.50 per 100.  
**Mixed Colors.** 5 cts. each, 40 cts. per doz., \$2.50 per 100.

## ITALIAN HYACINTHS

Grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are harder than the Romans, and may also be planted outside in the fall for flowers for early spring cutting.

Single Hyacinths

# TULIPS

## TULIPS ARE READY FOR DELIVERY IN SEPTEMBER

For beauty of form and brilliancy of coloring, Tulips are unequaled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers may select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers they are also invaluable.

**CULTURE.**—The cultural directions given for hyacinths, on page 2, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open border.

**A, B, and C indicate seasons of flowering. A and B may be planted to flower about the same time in the open ground; C flowers later.**

Darwin Tulips

## SINGLE LATE-FLOWERING TULIPS (May-Flowering)

Six of a kind at dozen rate, 25 of a kind at 100 rate

These are all tall-growing, May-flowering Tulips, with very large, most brilliantly colored flowers of perfect form. They will be found invaluable for garden work. The named Bizarres and Bybloems are the sorts grown by florists for show purposes. Splendid for cutting rather than for design bedding.

If ordered by mail, add 5 cts. per dozen or 30 cts. per 100 for postage

	Doz.	100
<b>Bridesmaid</b> (Maid of Holland). Cherry-rose, flaked white.....	3 for 10c.	\$0 30 \$1 75
<b>Bouton d'Or</b> (Ida). Pure deep yellow; very beautiful; fine for cutting.....	3 for 10c.	30 1 75
<b>Gesneriana Major.</b> Scarlet, with blue base; effective in beds; fine for cutting.....	each 4c.	35 2 00
<b>Rosea.</b> Rosy carmine, black base.....	3 for 10c.	25 1 50
<b>Golden Crown.</b> Deep yellow, edged red; fine for cutting.....	3 for 10c.	25 1 50
<b>Golden Eagle, or Yellow Gesneriana.</b> Golden yellow.....	3 for 10c.	35 1 75
<b>Isabella</b> (Blushing Bride, or Shandon Bells). Cream, turning carmine-rose; fine late sort.....	3 for 10c.	30 1 75

<b>Picotee</b> (Maiden's Blush). White, with rose edge.....	3 for 10c.	30 1 75
<b>Rosalind.</b> Rose, with white base; very lovely.....	each 4c.	35 2 00
<b>Sweet Nancy.</b> White, edged rose.....	each 4c.	35 2 00
<b>Mixed Late Single</b> .....	per 1,000, \$10; 3 for 10c...	25 1 35

## PARROT TULIPS (May-Flowering)

Six of a kind at dozen rate, 25 of a kind at 100 rate

For outdoor cultivation. The petals of these have feathered edges, and, in addition to other colors, combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant color, and form very effective groups for the flower-border. To get the best results they must have the full effect of the sun. Very late flowering.

If ordered by mail, add 6 cts. per dozen or 35 cts. per 100 for postage

	Doz.	100
<b>Cafe Brun.</b> Purplish brown and yellow.....	3 for 10c.	\$0 30 \$1 75
<b>Constantinople.</b> Light red.....	3 for 10c.	30 1 75
<b>Lutea Major.</b> Large yellow flowers.....	3 for 10c.	30 1 75

<b>Perfecta.</b> Yellow, spotted red.....	3 for 10c.	30 1 75
<b>Mixed Colors</b> .....	per 1,000, \$8.50; 3 for 10c.	25 1 25

Single Tulips

## DOUBLE TULIPS

Six of a kind at dozen rate, 25 of a kind at 100 rate

The Double Tulips come into bloom a little later than the single varieties. They are splendid for bedding, and the flowers last longer in bloom than the single ones. Some of the sorts are quite dwarf.

If ordered by mail, add 6 cts. per dozen or 35 cts. per 100 for postage

## MIXED TULIPS

Not less than 6 at dozen rate

For bedding. Planted in large masses, these make a magnificent show and, being inexpensive, should be largely used. Our special mixtures of Early Single and Early Double Tulips are made up of the finest bulbs and the brightest colors. If planted in large beds, they will produce an exceedingly beautiful and lively effect.

If ordered by mail, add 6 cts. per dozen or 35 cts. per 100 for postage

Narcissus

## NARCISSUS

**Narcissus are ready for delivery in September**

Narcissus are among the most popular and largely grown of spring-flowering-bulbs, and deservedly, too. Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, lakes or ponds, and in mixed flower or shrubbery borders. They are also suitable for naturalizing in the grass, by the side of woodland walks, or in open spaces between trees and shrubs.

For growing in pots they require about the same treatment as hyacinths, three or four bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers. With the exception of the Polyanthus section, they are all perfectly hardy.

### SINGLE NARCISSUS, or DAFFODILS

If ordered by mail, add 12 cts. per dozen or 45 cts. per 100 for postage

**Ard Righ** (Irish King). Magnificent golden-yellow trumpet; very large and graceful. One of the earliest and finest for forcing. 8 cts. each, 75 cts. per doz., \$4.50 per 100.

Jonquils

LILIES

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a deep, rich loam, they all do best in a light, well-drained soil. Some peat or leaf-mold may be used to advantage. *L. auratum* cannot bear manure but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

**Lilium Harrisii and Lilium candidum ready in August; others not until November.**

Lilium Harrisii

LILIUM HARRISII (Bermuda Easter Lily)  
BULBS NOW READY

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, lasting a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decoration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

If ordered by mail, add from 10 to 20 cents per dozen for postage, according to size

9 to 11 inches in circumference.....	40	4 00	28 00

LILIUM LONGIFLORUM (White Trumpet Lily)

If ordered by mail, add 3 to 5 cents each for postage

This is among the most beautiful and valuable of garden Lilies. It grows from 1 to 4 feet high, and bears many trumpet-shaped, sweetly scented, waxy white flowers of great substance. A well-drained, light loam enriched with leaf-mold suits it best.

	Each	Doz.	100

MR. CHAS. H. BECKWITH, of New Jersey, writes under date of February 12, 1912: "I am pleased to say the bulbs I bought of you gave me the best of satisfaction."

## BEAUTIFUL JAPAN LILIES

Postage on these varieties from 2 to 10 cents each, according to size

These do not generally arrive until November and December. We import our supply direct from Japan every year. Every garden should have some of these most beautiful and easily grown Lilies.

### **Auratum** (Gold-banded Lily).

The grandest of all hardy Lilies, 3 to 6 feet high; flowers white, spotted maroon, having a bright yellow band through the center of each petal. 8 to 9 inches in circumference, 15 cts. each, \$1.40 per doz., \$9 per 100. 9 to 11 inches in circumference, 20 cts. each, \$2 per doz., \$14 per 100. 11 to 13 inches in circumference, 30 cts. each, \$3 per doz., \$20 per 100.

### **Auratum rubro-vittatum.**

Enormous flowers, sometimes measuring 10 inches across; pure white, beautifully spotted and with a deep crimson stripe through center of each petal; very fragrant. 8 to 9 inches. 65 cts. each, \$6.50 per doz.

### **Auratum pictum.**

Flowers like those of the common Auratum, with yellow band through each petal. It is beautifully spotted with rich crimson. 8 to 10 inches. 40 cts. each, \$4 per doz.

### **Speciosum album Kratzeri.**

Beautiful, pure white flowers of large size; 2 to 4 feet high; one of the handsomest and easiest grown Lilies we have. 8 to 9 inches, 20 each, \$1.75 per doz., \$12 per 100. 9 to 11 inches, 30 cts each, \$2.75 per doz., \$18 per 100.

**Speciosum rubrum Melpomene.** Very dark crimson-spotted flowers of large size and striking appearance; 2 to 4 feet high. 8 to 9 inches..... \$0 12 \$1 10 \$7 00  
9 to 11 inches..... 20 1 75 12 00  
11 to 13 inches..... 25 2 50

**Batemani.** Richly colored, unspotted flowers of bright apricot tint; a most beautiful variety; 3 to 4 feet high..... 25 2 25

**Krameri.** White, slightly tinged with red; sweet-scented..... 25 2 25

**Leichtlinii.** Orange-red, with crimson spots; 2 to 3 feet high..... 25 2 50

**Liliun auratum**

**Liliun candidum**

## VARIOUS LILIES

Lilium  
Washingtonianum

**Umbellatum grandiflorum.** Orange-red. 12 cts. each, \$1.25 per doz.

**Umbellatum, Mixed.** 10 cts. each, \$1 per doz.

**Wallacei.** Orange-red, with maroon spots; late-flowering. 15 cts. each, \$1.50 per doz.

**Washingtonianum.** A lovely native variety of very stately habit; large, trumpet-shaped flowers, pure white, tinged purple or lilac; very fragrant; 4 to 7 feet high. 8- to 9-in. bulbs. 40 cts. each, \$4 per doz.

## LILY-OF-THE-VALLEY

(*Convallaria majalis*)

### READY IN NOVEMBER AND DECEMBER

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them. They may also be planted in moss fiber in vases.

**Clumps.** Fine large clumps, with many flowering pips on each. Fine for planting outside in shaded positions and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per doz., \$20 per 100.

**Pips for Forcing.** 50 cts. per bundle of 25, \$1.65 per 100, \$14 per 1,000.

Above prices do not include cost of transportation

## CHINESE SACRED LILY

(The Water Fairy Flower)

READY IN SEPTEMBER

If ordered by mail, add 5 cts. each or 25 cts. per dozen for postage

A variety of the Polyanthus Narcissus, imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs entirely and place in a sunny window in a cool room. **10 cts. each, \$1 per doz.**

## AMARYLLIS READY IN OCTOBER

Cost of transportation not included in prices quoted

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mold, or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

Amaryllis

September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

#### BEGONIA CRISPA. Single, Fringed

These Begonias have beautifully shaped, gracefully frilled and crested flowers borne above the foliage on long and erect stems. A fine strain with a great future. **Red, Rose, White, Yellow, Orange and Salmon.** 8 cts. each, 75 cts. per doz., \$5 per 100.

## BRODIAEA

### READY IN SEPTEMBER

If wanted by mail, add 3 cts. per dozen or 15 cts. per 100 for postage

Pretty bulbous plants from the Pacific coast. They have narrow, grassy leaves, slender stems and umbels of lily-like flowers. For forcing or outdoor culture. Do best in rich, sandy loam. If grown in pots, a compost of loam, leaf-mold and sand is best. All are hardy except *Coccinea*, which should have some protection and partial shade.

	Each	Doz.	100
<b>Coccinea</b> (Floral Fire Cracker). Rich blood-crimson, tipped white.....	\$0 07	\$0 60	\$3 50
<b>Congesta</b> . Tall growing; purple flowers.....	05	35	2 00

## CALOCHORTUS (Mariposa Lily, or Butterfly Tulip)

### READY IN SEPTEMBER

If wanted by mail, add 3 cts. per dozen or 15 cts. per 100 for postage

Very handsome bulbous plants from California. They are remarkable for the brilliancy and variety of their coloring, and their gracefulness of habit. They grow freely in light, sandy loam. Though hardy, they should be protected during winter with litter. They may also be successfully grown in frames and pots.

	Each	Doz.	100
<b>Albus</b> . Pearly white; rich blotch.....	\$0 05	\$0 40	\$2 50
<b>Amabilis</b> . Very pretty golden yellow.....	05	40	2 50

“ <b>Globe Tulips</b> .....	05	40	2 50
“ <b>Eldorado Tulips</b> .....	07	60	3 50

## CROCUS

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted closely—say 2 inches apart—and 3 inches deep, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful. For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

Crocus

<b>Mad. Mina.</b> Violet and white.....	
<b>Mont Blanc.</b> White; free bloomer; fine for bedding.....	
<b>Non Plus Ultra.</b> Blue, edged white.....	
<b>President Lincoln.</b> Large; purple; early.....

## HYBRID NAMED CROCUS

Remarkable for richness of color and immense size. These varieties are best for forming letters or designs on lawns, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. Flowers are produced very early, and mowing later on will not seriously injure the bulbs.

If wanted by mail, add 5 cts. per dozen or 25 cts. per 100 for postage

CROWN IMPERIALS (*Fritillaria imperialis*)

A stately growing plant, with dark green foliage and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

## CRINUM

Splendid large-flowering bulbs, closely allied to the amaryllis. The most suitable soil is a compost of turfy loam, cow-manure and some sand. They should be grown in large pots or tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a cool house and allowed to rest until new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure-water

## CYCLAMEN

## MOST OF THEM READY IN NOVEMBER

If wanted by mail, add 8 cts. per dozen for postage

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white and of much elegance of form in flower and plant. The soil best suited to them is a fresh, turfy loam, with a fourth to a fifth of well-rotted horse manure, to which add some clean sand if the soil is heavy. Plant so as to leave the top of the bulb just below the surface. (We offer seed of our superb strain of *C. giganteum* at the end of this catalogue.)

Erythronium

## EREMURUS READY IN SEPTEMBER

Noble bulbous plants from northern India. They thrive admirably in deep, rich sandy loam with the addition of well-decayed cow manure. They need plenty of water in the flowering period, but require good drainage. When well established they should not be disturbed, as the roots are extremely brittle. The surface soil above the roots should be kept clean by hand weeding and enriched by occasional applications of old manure, leaf-mold and a little sand well mixed. Autumn planting is desirable, and the crown should be covered with a mound of ashes over winter, or with a box with a water-tight top and filled with dry leaves. Protect the stems from frost when coming into flower in spring.

**Himalaicus.** Beautiful white flowers on racemes 4 to 8 feet high. Blooms in May and June. 80 cts. each.

**Robustus.** Rosy lilac flowers on racemes 6 to 10 feet high, flowering in June. 75 cts. each.

## FREESIA

If wanted by mail, add 3 cts. per dozen or 15 cts. per 100 for postage

The justly popular *Freesias* are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in good loamy soil, with an admixture of leaf-mold and sand, in a frame or greenhouse, and are excellent for window culture in winter. For the information of all not acquainted with these bulbs, we may say that they are quite small, but produce large blooms in comparison to their size.

***Freesia refracta alba*.** The body of the flower is pure white, with lower segments spotted lemon-yellow. Their fragrance is remarkable and very lasting.

## GLADIOLUS

READY IN NOVEMBER

If wanted by mail, add 5 cts. per dozen or 30 cts. per 100 for postage

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse, except *Byzantinus*, which is hardy, and may be planted out; it is best, however, to give it slight protection. Some varieties are successfully forced.

The French Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty. Every year is adding varieties of most exquisite tint and shade; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published January 1.

	Each	Doz.	100

Large-flowered Japan Iris

stateliness of habit. Some of these send up 10 or 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms measuring 8 to 10 inches across. These require a liberal supply of water when growing.

## SUPERB COLLECTION OF LARGE-FLOWERED JAPAN IRIS

(*Iris Kaempferi*)

READY IN SPRING

We are importing from Japan a large supply of the following twenty of the best of these magnificent Irises, which excel in size, perfection of form and richness of color. These are most valuable for cut-flowers and table decoration—as handsome as orchids. Flowers should be cut in the early morning or after sunset. The roots come in large clumps. The descriptions given are those furnished us by the growers in Japan.

25 cts. each, \$2.50 per doz., \$17 per 100. Transportation charges extra

**Biwa-no-umi.** White, feathered purple, sky-blue at edges, primrose blotches; large flower. 3 petals.

**Boteki-no-Koe.** Pure white, heavily veined lavender, with pale primrose blotches; standards wine-color, lighter toward edges, stigmas lavender; striking. 3 large petals.

**Date-dogu.** Rich claret-red, yellow blotches. 3 petals.

**En-u-no-Sora.** Rosy lavender petals, light purple toward the center, large primrose blotches; standards white, veined and edged claret-red. 3 petals. Large and distinct.

**Gekka-no-nami** (Waves under Moonlight). Dense, pure white with yellow blotches, petaloid stigmas creamy. 6 petals.

**Hakubotan.** Large; pure white, with light primrose blotches; full flower.

**Ho-o-jo** (Ho-o-castle). Ruby-crimson, primrose blotches, standards white and lavender.

**Kagura-Jishi.** Blush-white, radiating to bright claret-red on outer edge of petals. Light yellow blotches.

**Osho-kun.** Intense Tyrian blue with yellow blotches radiating to white; petaloid stigmas dark violet. 6 petals.

**Ran.** Royal-purple, edged lavender, with large primrose blotches; standards wine-red, white at bases. 6 petals. Large and distinct.

**HARRISON'S IRIS MANUAL.** Paper cover; 30 pages. Full cultural directions and other valuable information. 25 cts. per copy, postpaid.

## SPANISH IRIS (*Iris Hispanica*)

If wanted by mail, add 5 cts. per dozen or 30 cts. per 100 for postage

Not less than one dozen of a kind at dozen rate

Very profitable for florists, who are planting them largely for cut-flowers. Plant in beds in the open as soon as received in the autumn, and protect slightly in the winter months. In the beginning of April cover the beds with glass, so as to have the flowers ready for cutting in May.

## GLOXINIAS

READY IN NOVEMBER

If wanted by mail, add 8 cts. per dozen for postage

Gloxinias are among the most beautiful of greenhouse plants, being remarkable for the intensity and variety of their colorings and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mold and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large, and of erect-flowering strain:

## IRIS (Fleur-de-lis)

READY IN OCTOBER AND NOVEMBER

Except Japan Iris which will not be ready until spring

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light, rich, sandy soil, and in a sunny situation. With the exception of *Moræa Pavonia*, all varieties are hardy. Good drainage is important. The varieties of *Iris Kaempferi*, from Japan, are remarkable for the beauty of their colors and their

**Sassa-no-Koe.** White, veined wine-red and blotched yellow; standards lavender, running to purple at edges. 3 petals.

**Shippo** (Cloisonne). Rich Tyrian blue, edged purple and veined white, yellow blotches; standards white and wine-color. Large flowers.

**Shiraito-no-Taki.** Sky-blue, radiating to light purple at edges, large yellow blotches; standards white, pale blue and purple; distinct. 3 petals.

**Shi-un.** Rich purple, with large primrose blotches; large, full flower. 6 petals.

**Sui-Ren.** Very pale lavender, darker at edges, with yellow blotches. 6 petals.

**Taki-no-shiose.** Large flower; pure white, with primrose blotches. 6 petals.

**Tatsuta-Gawa.** Blush-white, radiating to claret-red at edges; primrose blotches. 3 petals.

**Yamato-Nishiki.** Pale lavender, running to purple on outside of petals, blotched and flaked dark purple; large primrose blotches; immense flower. 3 petals.

**Yedo-Jiman.** Royal blue; large petals; standards purple. 3 petals.

**Yodokuruma.** Pale wine-color, veined darker, large orange blotches; standards very erect. Gigantic blooms. 3 petals.

## IXIAS READY IN OCTOBER

If wanted by mail, add 3 cts. per doz. or 15 cts. per 100

The Named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

## LACHENALIA

READY IN SEPTEMBER

If wanted by mail, add 5 cts. per dozen for postage

Very pretty, spring-flowering, greenhouse bulbous plants of elegant habit and with brightly colored flowers. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mold and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging baskets.

# PÆONIES

READY IN OCTOBER

If wanted by mail, add 5 cts. each for postage

The old-fashioned double Pæonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Pæonies rank about first for lawn or flower-border or shrubbery decoration. They are all hardy. We offer only strong, flowering roots, with not less than three eyes.

## RICHARDIA (Calla)

### READY IN OCTOBER AND NOVEMBER

Add 3 cts. each or 20 cts. per dozen for postage, if wanted by mail

Tall-growing, bulbous perennials of graceful habit, and handsome foliage and flowers. They are easily cultivated in pots, requiring only rich soil and plenty of water. A compost of one part good loam and one part cow-manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting in September.

**White Calla, or Lily of the Nile** (*Calla Ethiopica*).

Large, white, trumpet-shaped flowers of great substance. One of the most popular ornamental house and greenhouse plants. Largest-size bulbs ..... \$0 20 Doz. \$2 00 100 \$14 00

## SCILLA READY IN SEPTEMBER

If ordered by mail, add 5 cts. per dozen for postage, except Peruviana, for which add 2 cts. each

*S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years. The effect in early spring of the intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the snowdrop and the varied hues of the crocus, is very striking; most valuable for permanent edging, or planted in bunches of a dozen or so.

**Sibirica.** Blue. Extra-large bulbs. .... Each \$0 05 Doz. \$0 35 100 \$1 75

**" alba.** White-flowered variety of the above. .... 05 40 2 50

**Bifolia.** Blue. .... 05 35 1 75

**Campanulata** (Wood Hyacinth). Blue. .... 05 30 1 50

**" alba.** White. .... 05 35 1 75

**" rosea.** Rose. .... 05 35 1 75

**Nutans alba.** .... 05 35 2 00

**" cœrulea** (Nodding Squills). Blue. .... 05 35 2 00

**" rosea.** Rose. .... 05 35 2 00

**Peruviana alba** (White Cuban Lily). .... 15 1 50

**" cœrulea** (Blue Cuban Lily). .... 15 1 50

Snowdrops

## SNOWDROPS (*Galanthus nivalis*)

### READY IN SEPTEMBER

If wanted by mail, add 3 cts. per dozen or 15 cts. per 100 for postage

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms. Should be planted 2 to 3 inches deep in a shady location.

**Single-flowering Snowdrops.** 20 cts. per doz., \$1 per 100, \$7 per 1,000.

**Double-flowering Snowdrops.** 25 cts. per doz., \$1.50 per 100, \$13 per 1,000.

**Giant Snowdrops of Asia Minor** (*Galanthus Elwesii*). 20 cts. per doz.

\$1 per 100, \$6.50 per 1,000.

## SPIRÆA, or ASTILBE

### READY IN NOVEMBER

#### Transportation charges extra

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

Spiræa

stone, but flowering two weeks later. It is a very free bloomer and bears its flowers well above the strong, dark green foliage. When forced it must be shaded, as soon as it starts to color. It is a splendid outdoor plant, being as hardy as the old *Spiræa Japonica*. Its color will not fade even in the brightest weather. 25 cts. each, \$2.25 per doz., \$15 per 100.

Transportation charges NOT included in above prices

## TRILLIUM (American Wood-Lily, or Indian Shamrock)

If wanted by mail, add 5 cts. per dozen or 30 cts. per 100 for postage

Hardy herbaceous perennials succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are natives of North America, and are known by various common names in different localities. They have violently emetic roots.

**Erectum.** Dark purple; erect habit. 10 cts. each, 75 cts. per doz., \$5 per 100

**Grandiflorum** ("Giant American Wood-Lily," or "Wake-Robin"). Large, white flowers, changing to rose; quite hardy, and easily grown in shaded positions. 7 cts. each, 60 cts. per doz., \$3.50 per 100.

**Ovatum.** White, changing to rose. 10 cts. each, 75 cts. per doz., \$5 per 100.

**Sessile Californicum.** A strong plant, 1 ft. high, with the separate leaves  $5\frac{1}{2}$  inches long by  $4\frac{1}{2}$  inches wide and the petals  $3\frac{1}{2}$  inches long. Flowers pure white with purple centers; very fragrant. 12 cts. each, \$1 per doz., \$6.50 per 100.

" **rubra.** Same as *Californicum* with narrow petals; deep maroon-purple to reddish purple. 12 cts. each, \$1 per doz., \$6.50 per 100.

" **Snow Queen.** Flowers pure white with creamy centers and with broad petals. 12 cts. each, \$1 per doz., \$6.50 per 100.

## TUBEROSES READY IN DECEMBER

If wanted by mail, add 3 cts. each or 15 cts. per dozen for postage

The purity of color and rich perfume of the Tuberose are well known in this latitude. May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich, warm soil and a sunny situation. Cut off about a quarter of an inch from the bottom of the bulb before planting, and set so that the top will be one inch below the surface of the soil.

**Dwarf Double Pearl.** Dwarf habit; large, fine flowers of great substance. 5 cts. each, 35 cts. per doz., \$2 per 100, \$12 per 1,000.

**Albino.** Purest white; single flowers. 8 cts. each, 50 cts. per doz., \$3 per 100.

**Variegated-leaf.** Foliage striped white and green; single white flowers. 6 cts. each, 50 cts. per doz., \$3 per 100.

### SPIRÆA, continued

**Japonica** (*Hoteia*). Excellent pot-plant for winter-blooming. Large, branching panicles of pure white feathery flowers; fine for cutting. Clumps for forcing or outdoor planting. 12 cts. each, \$1 per doz., \$6 per 100.

**Japonica compacta multiflora.** The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.40 per doz., \$9 per 100.

**Astilboides floribunda.** Very large, pure white plumes; neat habit; very abundant bloomer. 15 cts. each, \$1.40 per doz., \$9 per 100.

**Palmata.** Crimson; strong clumps. 15 cts. each, \$1.50 per doz., \$10 per 100.

**Aruncus.** Handsome plant with large plumes of pure white flowers. 15 cts. each, \$1.50 per doz., \$10 per 100.

**GLADSTONE.** A hybrid *Spiræa* with beautiful snow-white plumes borne on strong stems  $1\frac{1}{2}$  feet long, standing erect above the foliage. The plant is perfectly symmetrical in shape, the foliage very handsome and the flowers exquisitely fragrant. Fine forcer. 15 cts. each, \$1.50 per doz., \$10 per 100.

**WASHINGTON.** A splendid decorative plant, producing extra-large flowers. Strong grower; fine for forcing. 15 cts. each, \$1.40 per doz., \$9 per 100.

**QUEEN ALEXANDRA, PINK.** A splendid pink variety, in habit similar to the well-known Glad-

Trillium

# Miscellaneous Bulbs and Roots

Those marked with an asterisk (\*) will not be ready till October or November

Transportation charges extra

	Each	Doz.	100
* <b>Achimenes.</b> Mixed. Lovely greenhouse pot-plants.....	\$0 07	\$0 60	\$3 50
<b>Aconite.</b> See <i>Eranthis</i> .			
<b>Allium.</b> Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.

<i>Zephyranthus</i> Atamasco. Pure white.....	06	50	3 00
" candida. White, greenish base.....	08	65	4 00

## Hardy Annual and Perennial Flower Seeds

## FOR AUTUMN SOWING

Many varieties of flower seeds, **Annals** as well as **Biennials** and **Perennials**, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring.

**No. 55.** The most popular 3-arm sprinkler on the market; made of brass, nickel-plated, with malleable iron runners. Will cover an area 30 feet in diameter. \$1.25.

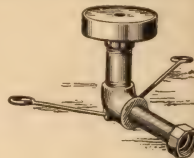

**Hotchkiss Lawn Sprinkler**

**No. 65.** This combination sprinkler and fountain is beautiful as well as useful. Brass and nickel-plated, with malleable iron runners. Will cover an area 40 feet in diameter. \$1.75.

**Shower Sprinkler.** Mounted on holder for sprinkling lawns—or can be attached directly to garden

hose for washing sidewalks, etc. Cannot clog or get out of order; will not rust. Standard  $\frac{3}{4}$ -in. hose connection. Holder and nozzle complete, \$2.

**Thermometers.** Hotbed and mushroom bed. Brass tips; made for plunging. Each, soft wood, \$1, boxwood, \$1.75.

Gem Lawn Cleaner

## THE GEM LAWN CLEANER

A revolving fan with metal teeth creates an air-current which carries into the canvas basket all leaves, dead grass, stones, etc., that the rake encounters. It straightens up crab grass and other running weeds so that they may be cut by the lawn mower. Price, \$16.

## Bucket Spray Pump

Being made of brass, it is not affected by the arsenites used for spraying. Easily operated; throws a solid stream 50 feet. It is provided with a combination nozzle and with a sprinkler for flowers. For spraying large trees, an 8-foot extension is supplied for 60 cts. extra. This pump is also valuable for washing windows. Price \$3.75.

## A few suggestions regarding the Selection of Bulbs for your early garden

**W**E have given a good deal of careful attention for many years to bulbs: their importing from Holland, their planting and care. The finest outdoor displays of the early spring months come from bulbs planted in the fall.

Our Bulb Catalog lists and illustrates a great number of beautiful flowers, but we have long appreciated the difficulty of making the best possible selection from it.

We have prepared therefore, a Special Assortment which is shown on the following page. This Assortment contains 204 bulbs of the seven varieties there illustrated.

It will be sent by us express prepaid on receipt of	-	-	-	-	-	\$2.50
Double the quantity (408 bulbs) will be sent for	-	-	-	-	-	4.75

The above prices are a material reduction from the catalog prices of each variety of bulbs if added together, and we strongly recommend your ordering a single or double assortment. We shall be pleased to quote prices for even larger quantities on request.

## Grass Seed for Autumn Sowing

**W**E all have (either consciously or unconsciously) our particular enthusiasms.

To make grass grow under adverse conditions has interested us greatly for many years and we have learned a good deal about it.

Some of our special varieties are:

Thorburn Lawn Grass  
Thorburn Special Lawn Mixture  
Thorburn Lawn Restoring Grass Seed  
Thorburn Lawn Grass for the South  
Thorburn Mixture for shady spots  
Thorburn Grass Seed for Golf Links, Tennis Courts, etc.  
Thorburn Grass Seed for Meadows and Pastures

We strongly recommend Autumn sowing which should be done in September so that the young grass may become well rooted before winter sets in.

Write us explaining the particular conditions in your case and we think we can offer seed especially adapted to your requirements, and some useful suggestions in regard to its use.

## Our Special Offer of Single Tulips

**T**HIS year we have selected six varieties of early single tulips for a special offer, as given below.

They are the most beautiful of their several colors. A number of them are shown in figure 4 on center page of this folder.

Artus, Bright scarlet  
L'Immaculee, Pure white  
Crysolora, Pure yellow  
Cottage Maid, Kose, flushed white  
Duchesse de Parme, Orange-scarlet  
with yellow border  
Thomas Moore, Terra-cotta shaded golden

We will be pleased to send this assortment at the following prices postage paid.

Two of each (twelve bulbs) . . . 40c.  
Four of each (twenty-four bulbs) . . . 75c.  
Eight of each (forty-eight bulbs) . . . \$1.35  
One dozen of any one variety . . . 35c.

This assortment may well be ordered in addition to the larger one shown on center page. We will ship both express prepaid in one package if desired.

## "Auto-Spray" Pump

A self-operating sprayer of simple construction, durable, easy to carry and to work. Made of galvanized iron or solid brass, with 4-ply rubber hose. For spraying trees, shrubs, cleaning windows, etc. A perfect pump. Price, with brass tank and stop-cock nozzle, \$6.75; galvanized iron tank and stop-cock nozzle, \$4.50. Brass extension pipe, 2 feet, 45 cts. extra. Fitted with "Auto-Pop" nozzle, \$1 extra. "Auto-Pop" nozzle if sold alone, \$1.50.

## The "Velvetlawn" Grass Seeder

18 inches wide

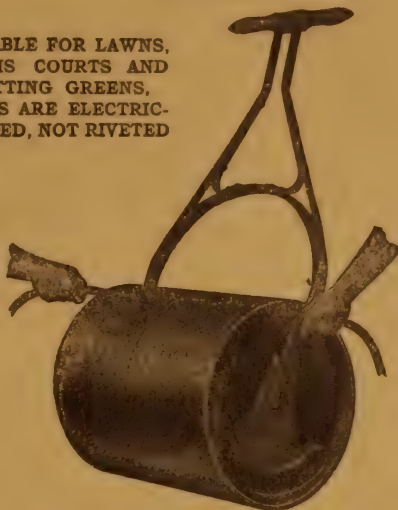

The seeding of new lawns, etc., the re-seeding of old lawns, the drilling of grass seed into putting greens, and the renewing of grass plots every month or so has proven a decided success wherever it has been tried. The machine to do this work is the "Velvetlawn" Grass Seeder. The "Velvetlawn" Grass Seeder puts the seed into the soil where birds, wind and rain cannot get at it. Operator can drill any quantity of seed desired, and as the seed is all planted at an even depth in the ground, uniform growth is assured. Price \$15, net cash.

## Water Ballast Roller

Roller Bearing. Can Be Filled without Turning on End, with Either Sand or Water

(Patented)

SUITABLE FOR LAWNS,  
TENNIS COURTS AND  
PUTTING GREENS.  
SEAMS ARE ELECTRIC-  
WELDED, NOT RIVETED

One or two-section "Water Weight" Rollers, without counterbalancing handle-weights.

## Grass Seed for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the middle of September, so that the young grass may become well rooted before winter sets in.

### **The Thorburn Lawn Grass**

Many of the finest lawns in America were produced from this mixture. It is composed of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich greensward in three or four weeks from the time of sowing. (The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture.) It should be sown at the rate of 4 to 5 bushels to the acre. Per pt. 15 cts., qt. 25 cts., 2 qts. 45 cts.,  $\frac{1}{2}$ pk. 75 cts., pk. \$1.20, bus. of 15 lbs. \$4.

### **Thorburn's Grass Mixture for Shady Spots on Lawns**

A mixture of grasses that thrive in shaded situations under trees, or close to walks where there is little sun. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$ pk. \$1.25, pk. \$2, bus. of 22 lbs. \$7.

### **Thorburn's Grass Mixture for Terraces**

A mixture of fine stoloniferous grasses peculiarly adapted to terraces. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

### **Thorburn's Special Lawn Grass Mixture**

This extra-choice mixture contains a large proportion of the finer and more expensive species, such as Rhode Island Bent, Crested Dog's-Tail, Creeping Bent, in extra-heavy samples, bringing the weight up to 20 lbs. per bushel, and producing a turf of the closest and finest texture possible. Per qt. 30 cts., 2 qts. 55 cts.,  $\frac{1}{2}$ pk. 90 cts., pk. \$1.60, bus. of 20 lbs. \$5.50.

### **Thorburn's Lawn-Restoring Grass Seed**

A mixture of grasses that will take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-restoring Grass Seed** should be sown before every summer rain on thin places. Per qt. 35c., 2 qts. 60c.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

### **Thorburn's Lawn Grass for the South**

A mixture of grasses that stand extremes of heat and drought, and that are, therefore, peculiarly adapted to southern lawns. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.50.

## Also Permanent Grass Seed for Golf-Links, Tennis-Courts, Polo-Grounds, etc.

We have devoted much attention to the seeding and preservation of golf-links, tennis-courts and polo-grounds, and offer the following mixtures, which have been used on most of the finest links, etc., in this country with very satisfactory results.

### **Tennis-Court Mixture**

A mixture of extra-fine grasses peculiarly adapted to tennis-courts. This mixture will make a firm, green and lasting turf of the finest texture, that will improve with trampling. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

### **Grass Mixture for Railroad Banks, etc.**

A mixture of grasses with long, interlacing, matting roots that will bind steep embankments, gravelly or sandy slopes, etc., preventing washouts by rain-storms and covering them with permanently green turf. Per qt. 30 cts., 2 qts. 50 cts.,  $\frac{1}{2}$ pk. 80 cts., pk. \$1.25, bus. of 18 lbs. \$4.50.

### **Fair-Green or Golf-Links Mixture**

For the grounds in general. Per bus. of 20 lbs. \$4.

### **Putting-Green Mixture**

A mixture of extra-fine grasses that will make a close firm, green and lasting turf, which will improve with trampling. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$ pk. \$1.25, pk. \$2, bus. of 24 lbs. \$7.

### **Polo-Grounds Mixture**

A mixture of fine-leaved and deep-rooting grasses, forming a strong and lasting turf that will stand hard usage. Per bus. of 20 lbs. \$4.

# J. M. THORBURN & Co.

## Catalogue of Bulbs and Flowering Roots for Fall Planting

MANY of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of blooms can be had from December until May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. The cultural directions found under the respective headings are worthy of careful attention.

Our bulbs are all selected, coming from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation, and often sold at auction and otherwise, at very low prices.

**NAME AND ADDRESS.** We often receive orders with either the name or the address of the sender omitted. As we can do nothing with such orders, the customer thinks his order is being neglected. We therefore beg our correspondents to be careful to write on each order their name and full address.

**ORDERS** should be sent as soon as possible after receipt of this Catalogue. The bulbs will be shipped in proper time for planting. They are ready from August to November, according to the time of ripening and the country from which they come. Orders received earliest are surest of being filled in full. If left too late, the supply of some of the varieties may be exhausted.

The prices quoted do not include transportation charges, which are extra. In stipulating amounts to be sent for postage, it is understood to apply to the United States only.

*Please address all orders and remittances to*

## *Hyacinths* **THESE BULBS ARE READY FOR DELIVERY IN SEPTEMBER**

The *Hyacinth* is one of the most popular and beautiful spring-flowering plants for indoor and outdoor decoration. By careful management in keeping up a succession, it may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground it is unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height, and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

**OUTSIDE CULTURE.** In this section, October is the month to plant *Hyacinths* outside. They succeed best in a light soil and a sunny situation. If the soil is naturally heavy, some sand should be mixed with it, and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs. Some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has been frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field-mice which may burrow in it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibrous loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.** Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

Persons unacquainted with the different varieties will do well to leave the selection to us, only specifying in their order whether bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortments of Named *Hyacinths* of our selection offered on page 4, and to the *Hyacinth Glasses* which are quoted at the end of the Catalogue.

The names of our *Hyacinths* and *Tulips* are those given to them by the originators in Holland, and they are not sold under fancy names manufactured in this country.

## Select Named Dutch Hyacinths

*N. B. Our Select Named Hyacinths are the cream of the Holland Nurseries—and are called top-roots—under their original names. For forcing in pots or for outdoor beds they far surpass the class of Bulbs usually sold.*

The single-flowered varieties are generally more effective and better for forcing than the double ones. They also, as a rule, succeed better in glasses. The double varieties are distinguished by an asterisk (\*) and those of them that do well for forcing in water by two asterisks (\*\*).

Six of one kind only sold at the dozen rate

**Italian Hyacinths**

Grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are hardier than the Romans, and may be planted outside in the fall for flowers for early spring cutting.

	Each	Doz.	100
<b>Single White, Early</b> .....	\$0 05	\$0 50	\$3 50

If ordered by mail, add 10 cts. per dozen, or 50 cts. per 100 for postage

## French Roman Hyacinths

Extensively used by florists for forcing cut-flowers. For this purpose they are the best and most popular of bulbs. The flowers are delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early, and by making successive plantings they may be had in flower all through the winter. The blue Roman Hyacinths flower from one to two weeks later than the white variety.

## Miniature Hyacinths

These are also known as "**Dutch Roman**" and "**Pan Hyacinths**." They are very suitable for growing in groups in pots or earthen pans. We offer them in separate colors, and also mixed, as follows:

**Pure White, Bright Red, Light Blue and Dark Blue.** 5 cts. each, 40 cts. per doz., \$2.50 per 100.

**Mixed Colors.** 5 cts. each, 40 cts. per doz., \$2.50 per 100.

If ordered by mail, add 10 cts. per dozen, or 50 cts. per 100 for postage

French Roman Hyacinths

Single Tulips

## Tulips

### READY FOR DELIVERY IN SEPTEMBER

For beauty of form and brilliancy of coloring, Tulips are unequalled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers may select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers they are also invaluable.

**CULTURE.**—The cultural directions given for hyacinths, on page 2, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open ground.

## Single Early Tulips

Six of a kind at dozen rate, 25 of a kind at 100 rate

A, B, and C indicate seasons of flowering. A and B may be planted to flower about the same time in the open ground; C flowers later.

## Parrot Tulips

Six of a kind at dozen rate, 25 of a kind at 100 rate

For outdoor cultivation. The petals of these have feathered edges, and, in addition to other colors, combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant colors, and form very effective groups for the flower-border. To get the best results they must have the full effect of the sun. *Very late flowering.*

If ordered by mail, add 6 cts. per dozen or 35 cts. per 100 for postage

Parrot Tulips

## Double Tulips

Six of a kind at doz. rate, 25 at 100 rate

The Double Tulips come into bloom a little later than the single varieties. They are splendid for bedding, and the flowers last longer in bloom than the single ones. Some sorts are quite dwarf.

If ordered by mail, add 6 cts. per dozen or 35 cts. per 100 for postage

# Narcissus

## NARCISSUS ARE READY FOR DELIVERY IN SEPTEMBER

Narcissus are among the most popular and largely grown of spring-flowering bulbs, and deservedly, too. Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, lakes or ponds, and in mixed flower or shrubby borders. They are also suitable for naturalizing in the grass, by the side of woodland walks, or in open spaces between trees and shrubs.

For growing in pots they require about the same treatment as hyacinths, three or four bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers. With the exception of the Polyanthus section, they are all perfectly hardy.

### Single Narcissus, or Daffodils

If ordered by mail, add 12 cts. per dozen or 45 cts. per 100 for postage

<b>Ard Righ</b> (Irish King). Magnificent golden yellow trumpet; very large and graceful. One of the earliest and finest for forcing.....	Each \$0 08	Doz. \$0 75	100 \$4 50

Jonquils

Lilium Harrisii

# Lilies

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a deep, rich loam, they all do best in a light, well-drained soil. Some peat or leaf-mold may be used to advantage. *L. auratum* cannot bear manure but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

**Lilium Harrisii and Lilium candidum ready in August; others not until November.**

## Lilium Harrisii (Bermuda Easter Lily) BULBS NOW READY

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, lasting a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decoration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

Lilium auratum

**Lily-of-the-Valley**

tirely and place in a sunny window in a cool room. **10 cts. each, \$1 per doz.**

## **Lily-of-the-Valley**

(*Convallaria majalis*)

### **READY IN NOVEMBER AND DECEMBER**

One of the most beautiful and admired spring-flowing plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf, and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in. each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them. They may also be planted in moss fiber in vases.

**Clumps.** Fine, large clumps, with many flowering pips on each. Fine for planting outside in shaded positions and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per doz., \$20 per 100.

**Pips for Forcing.** 50 cts. per bundle of 25, \$1.75 per 100, \$15 per 1,000.

**Above prices do not include cost of transportation**

## **Chinese Sacred Lily**

(*The Water Fairy Flower*)

### **READY IN SEPTEMBER**

*If ordered by mail, add 5 cts. each, or 25 cts. per doz. for postage*

A variety of the Polyanthus Narcissus, imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs en-

## **Amaryllis** **READY IN OCTOBER**

**Cost of transportation not included in prices quoted**

Extremely ornamental greenhouse plants, with large, fragrant, beautiful colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mold, or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

**Belladonna major.** Violet and white; flowers in large umbels; fragrant. 20c. ea., \$2 per doz.

**Josephine** (Gigantea). Very fine scarlet; flowering in immense umbels; these are extra-sized bulbs. \$5 each.

**Lady of the Palace.** Brilliant red, changing at the center to green tinted white. 75 cts. each, \$7.50 per doz.

**Lutea** (Sternbergia). Hardy, autumn-flowering; bright yellow, crocus-like flowers. 10 cts. each, \$1 per doz., \$4 per 100.

**Hippeastrum Johnsonii** (Spice Lily). Beautiful flowers; crimson, striped white; large bulbs. 60 cts. each, \$6 per doz.

**Hippeastrum, Mixed Hybrids.** 60 cts. each, \$6 per doz.

**Hippeastrum, Empress of India Seedlings,** 70 cts. each, \$7 per doz.

**Vallota purpurea** (Scarborough Lily). 25 cts. each, \$2.50 per doz.

## **Anemone, or Windflower**

Very ornamental hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

*If ordered by mail, add 15 cts. per 100 for postage*

**Amaryllis**

Single Tuberous Begonia

## Begonia crispa, Single, Fringed

These Begonias have beautifully shaped, gracefully frilled and crested flowers borne above the foliage on long and erect stems. A fine strain with a great future. **Red, Rose, White, Yellow, Orange** and **Salmon**. 10 cts. each, 75 cts. per doz., \$5 per 100.

## Brodiaea READY IN SEPTEMBER

If ordered by mail, add 3 cts. per doz., or 15c. per 100 for postage

Pretty bulbous plants from the Pacific Coast. They have narrow, grassy leaves, slender stems and umbels of lily-like flowers. For forcing or outdoor culture. Do best in rich, sandy loam. If grown in pots, a compost of loam, leaf-mold and sand is best. All are hardy except *Coccinea*, which should have some protection and partial shade.

Crocus

## Crocus

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted closely—say 2 inches apart—and 3 inches deep, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful. For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

If ordered by mail, add 3c. per doz., or 15c. per 100 for postage

	Doz.	100	1,000

<b>Cloth of Silver.</b> Light blue, striped.....	20	1 00	8 00
<b>Mixed Colors</b> .....	12	65	5 00

Not less than one dozen of a sort sold

## Hybrid Named Crocus

Remarkable for richness of color and immense size. These varieties are best for forming letters or designs on lawns, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. Flowers are produced very early and, mowing later on will not seriously injure the bulbs.

If ordered by mail, add 5 cts. per dozen, or 25 cts. per 100 for postage

(*Fritillaria imperialis*)

READY IN SEPTEMBER

A stately growing plant, with dark green foliage and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

If ordered by mail, add 3 cts. each for postage

	Each	Doz.
<b>Aurora, Red</b> .....	\$0 20	\$2 00

<b>Maximus, Red</b> .....	40	4 00
<b>Fine Mixed Varieties</b> ..... per 100, \$10...	15	1 50

## Crinum

Splendid, large-flowering bulbs, closely allied to the amaryllis. The most suitable soil is a compost of turfy loam, cow-manure and some sand. They should be grown in large pots or tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a coolhouse and allowed to rest until new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure-water during the growing season. They may be placed outside when warm weather begins, and will flower all through the summer, making splendid lawn or veranda plants.

	Each
<b>Giganteum, Giant White.</b> Immense bulbs; large white flowers; bloom all summer; very fragrant. Water plentifully while growing.....	\$2 00
<b>Amabile, Giant Pink.</b> Extra-large, bright pink, with white stripe; splendid flower; enormous bulbs. This and the Giant White are unsurpassed for growing in tubs, blooming profusely outside all summer.....	2 00
<b>Kirki.</b> Large umbels of beautiful pure white flowers, with purple stripe in center of each petal.....	75
<b>Powellii.</b> It produces long stems, bearing at the top five to eight large, dark rose, bell-shaped flowers 3 to 4 inches long.....	25
<b>Powellii album.</b> Pure white.....	50

Above prices do not include transportation charges

## Cyclamen

MOST OF THEM READY IN NOVEMBER

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white and of much elegance of form in flower and plant. The soil best suited to them is a fresh, turfy loam, with a fourth to a fifth of well-rotted horse manure, to which add some clean sand if the soil is heavy. Plant so as to leave the top of the bulb just below the surface. Given the proper conditions the Cyclamen is remarkably easy to grow. (We offer seed of our superb strain of *C. giganteum* at the end of this catalogue.)

If ordered by mail, add 8 cts. per dozen 'or postage

	Each	Doz.
<b>Coum.</b> Crimson; round-leaved.....	\$0 15	\$1 50

<b>Repandum.</b> Rosy red with purple eye.....	15	1 50

**Eremurus** READY IN SEPTEMBER

Noble bulbous plants from northern India. They thrive admirably in deep, rich, sandy loam with the addition of well-decayed cow manure. They need plenty of water in the flowering period, but require good drainage. When well established they should not be disturbed, as the roots are extremely brittle. The surface soil above the roots should be kept clean by hand-weeding and enriched by occasional applications of old manure, leaf-mold and a little sand well mixed. Autumn planting is desirable, and the crown should be covered with a mound of ashes over winter, or with a box with a water-tight top and filled with dry leaves. Protect the stems from frost when coming into flower in spring.

	Each	Doz.
<b>Himalaicus.</b> Beautiful white flowers on racemes 4 to 8 feet high. Blooms in May and June.....	\$0 85	
<b>Robustus.</b> Rosy lilac flowers on racemes 6 to 10 feet high, flowering in June.....	1 00	
<b>Mixed Seedlings.</b> White, Cream, and Rose.....		50

**Erythronium** (*Dog's-Tooth Violets*)

## READY IN SEPTEMBER

Very ornamental, hardy, bulbous plants of neat and dwarf habit. They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in a sheltered position on rockeries, or in mixed flower or shrubby borders.

*If ordered by mail, add 3 cts. per dozen or 15 cts. per 100 for postage*

	Each	Doz.	100
<b>Americanum.</b> Bright yellow flowers; mottled leaves; segments recurved.....	\$0 10	\$1 00	\$6 00

**Fritillaria** READY IN SEPTEMBER

Graceful, hardy, spring-flowering, bulbous plants, thriving in good rich, well-drained soil. They are effective in mixed flower borders, and they also make excellent pot-plants both for their ease of cultivation and the quaintness of their flowers.

*If ordered by mail, add 3 cts. per dozen or 15 cts. per 100 for postage*

	Each	Doz.	100

<b>Fritillaria imperialis.</b> See Crown Imperials, page 17.			

Gladioli primulinus hybrids (see page 19)

## Freesia

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in good, loamy soil, with an admixture of leaf-mold and sand, in a frame or greenhouse, and are excellent for window culture in winter. For the information of all not acquainted with these bulbs, we may say that they are quite small, but produce large blooms in comparison to their size.

*If ordered by mail, add 3 cts. per dozen, or 15 cts. per 100 for postage*

**Freesia refracta alba.** The body of the flower is a pure white, with lower segments spotted lemon-yellow. Their fragrance is remarkable and very lasting.

Mammoth-size bulbs. 35 cts. per doz., \$2 per 100, \$15 per 1,000.

First-size bulbs. 25 cts. per doz., \$1.50 per 100, and \$12 per 1,000.

Second-size Bulbs. 20 cts. per doz., \$1.25 per 100, \$9 per 1,000.

**Freesia, "Purity."** Magnificent, glistening pure white flowers of large size, borne on strong lengthy stems, each truss bearing eight to ten buds, five to six of which are frequently open at the same time. 35 cts. per doz., \$2 per 100, \$15 per 1,000.

**Freesia refracta, Red.** 25 cts. per doz., \$1.50 per 100, \$12 per 1,000.

**Freesia Leichtlinii major.** Creamy white, shading to yellow, with orange blotch; distinct. 40 cts. per doz., \$2.25 per 100.

## Gladiolus

### READY IN NOVEMBER

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse. Some varieties are successfully forced.

The Primulinus Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty and of most exquisite tints and shades; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published January 1.

*If ordered by mail, add 5 cts. per dozen, or 30 cts. per 100 for postage*

		<b>Freesia refracta alba</b>

## Gloxinias READY IN NOVEMBER

Gloxinias are among the most beautiful of greenhouse plants, being remarkable for the intensity and variety of their colorings and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mold and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large, and of erect-flowering strain:

Planting of Japan Iris

## *Iris* (*Fleur-de-lis*)

**READY IN OCTOBER AND NOVEMBER, EXCEPT JAPAN IRIS, WHICH WILL NOT BE READY UNTIL JANUARY AND INTO SPRING**

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light, rich, sandy soil, and in a sunny situation. With the exception of *Moræa Pavonia*, all varieties are hardy. Good drainage is important. The varieties of *Iris Kaempferi*, from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 to 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms measuring 8 to 10 inches across. These require a liberal supply of water when growing.

### *Superb Collection of Large-Flowered Japan Iris (Iris Kaempferi)*

**READY IN JANUARY AND INTO SPRING**

We are importing from Japan a large supply of the following twenty of the best of these magnificent Irises, which excel in size, perfection of form and richness of color. These are most valuable for cut-flowers and table decoration—as handsome as orchids. Flowers should be cut in the early morning or after sunset. The roots come in large clumps. The descriptions given are those furnished us by the growers in Japan. May be ordered by numbers.

**25 cts. each, \$2.50 per doz., \$16 per 100. Transportation charges extra**

- 14 **Shiraga.** Deep purple, heavily veined white; standards lavender, darker toward edges, yellow blotches. Large flowers. Six petals.
- 17 **Suibijin.** Claret-red, darker toward edges; standards white, veined and edged pale wine-color; stigmas wine-color; three petals.
- 44 **Ujigawa.** Rich, vinous purple; standards blush-pink; stigmas lavender, radiating to purple edges, canary-yellow blotches. Three immense petals.
- 50 **Ushio-no-Iro.** Violet, veined white; standards white, edged sky-blue, yellow blotches. Seven or 8 petals.
- 7 **Yamato-Nishiki.** Pale lavender, running to purple on outside of petals, blotched and flaked dark purple, large primrose blotches. Immense flower. Three petals.
- 8 **Yodokuruma.** Pale wine-color, veined darker, large, orange blotches; standards very erect. Gigantic blooms. Three petals.

*Spanish Iris (Iris Hispanica)*

Not less than one dozen of a kind at dozen rate

Very profitable for florists, who are planting them largely for cut-flowers. Plant in beds in the open as soon as received in the autumn, and protect during the winter months. In the beginning of April cover the beds with glass, so as to have the flowers ready for cutting in May.

If ordered by mail, add 5 cts. per dozen, or 30 cts. per 100 for postage

*Ixias* READY IN OCTOBER

The Named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

If ordered by mail, add 3 cts. per dozen, or 15 cts. per 100 for postage

### Lachenalia

READY IN SEPTEMBER

Very pretty, spring-flowering, greenhouse bulbous plants of elegant habit and with brightly colored flowers. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mold and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging baskets.

If ordered by mail, add 5 cts. per dozen for postage

	Each	Doz.
<b>Luteola.</b> Pale yellow flowers flushed with green.....	\$0 20	\$2 00
<b>Nelsoni.</b> Rich golden yellow; very fine.....	40	4 00
<b>Pendula.</b> Very handsome, large and showy species, with broad foliage and rich red flowers tipped with black.....	30	3 00
<b>Quadricolor.</b> Bright green, red and yellow flowers.....	30	3 00
<b>Tricolor.</b> Red, yellow and green.....	40	4 00

### Montbretia

READY IN NOVEMBER

Hardy, summer-flowering bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties.

If ordered by mail, add 5 cts. per dozen, or 30 cts. per 100 for postage

	Each	Doz.	100.
<b>Aurantiaea.</b> Deep golden yellow, fine spike.....	\$0 05	\$0 35	\$2 00

<b>Soleil couchant</b> (Sunset). Golden yellow.....	05	35	2 00
<b>Speciosa.</b> Copper, with yellow edge.....	05	35	2 00
<b>Sunbeam</b> (Rayon d'Or). Rich yellow, spotted brown; large flowers.....	05	35	2 00

### Muscari

Commonly called Grape, Nutmeg, Feathered, etc., Hyacinths

Very pretty hardy bulbous plants, well adapted for mixed borders and for naturalizing in sunny spots among short grass. They succeed in almost any soil and situation and require little care. Also suitable for growing in pots in the house, five or six bulbs in a pot.

If ordered by mail, add 5 cts. per dozen, or 30 cts. per 100 for postage

<b>Hyacinthus candicans.</b> A snow-white, summer-flowering giant Hyacinth.....	05	40	2 50

### Nerine

READY IN OCTOBER AND NOVEMBER

Very beautiful greenhouse bulbous plants succeeding best in pots in light soil—say a compost of loam, leaf-mold and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die, they should be kept quite dry in a cool place until they begin to grow again.

If ordered by mail, add 4 cts. each for postage

	Each
<b>Flexuosa.</b> Bright crimson-scarlet, tinged with orange.....	\$1 50
<b>Fothergilli major.</b> A magnificent plant for house or conservatory. Intense shining scarlet. By artificial light the crystalline cells of the petals sparkle like jewels. Flowers freely.....	1 50
<b>Sarniensis</b> (True Guernsey Lily). Flowers brilliant crimson, in large clusters. The best-known sort.....	50
<b>Undulata.</b> Rosy carmine, edged white; very handsome.....	90

### Oxalis

READY IN SEPTEMBER

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging baskets. They are easily grown in a sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

If ordered by mail, add 3 cts. per dozen, or 15 cts. per 100 for postage

## Paeonies

 READY IN OCTOBER

The old-fashioned double Paeonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Paeonies rank about first for lawn or flower-border or shrubbery decoration. They are all hardy. We offer only strong, flowering roots, **with not less than three eyes.**

If ordered by mail, add 5 cts. each for postage

## Japanese Tree Paeonies

(*Paeonia arborea*)

These are very beautiful and free-flowering, and bloom two or three weeks earlier than the herbaceous sorts. We are importing an assortment of the following fine named varieties. \$1.50 each.

<b>Berenice.</b> Rosy lilac; enormous flower.
<b>Blanche de Chateau Futu.</b> Pure white.
<b>Comtesse de Tuder.</b> Tender rosy white; very double, fine-shaped flower.
<b>Elisabeth.</b> Brilliant pink; one of the largest flowers.
<b>Guillaume Tell.</b> Bright carmine with white border; large flower.
<b>Madame Stuart Low.</b> Reddish salmon, white center large flower.

## Paeonia officinalis

### Herbaceous Chinese Paeonies

(*Paeonia chinensis*)

	Each	Doz.
<b>Alba nivea plena.</b> Flesh-color, center white.....	\$0 35	\$3 50
<b>Alba plena.</b> Pure white; fragrant.....	35	3 50
<b>Beaute Francaise.</b> Rose and carmine.....	35	3 50
<b>Boule de Neige.</b> Sulphury white; center leaves, with rosy borders.....	50	5 00
<b>Canary.</b> Sulphury white.....	50	5 00
<b>Charlemagne.</b> Creamy white, center lilac and chamois.....	50	5 00
<b>Comte de Niepperg.</b> Bright carmine; early.....	50	5 00
<b>Comtesse de Montalivet.</b> Blush, center white, carmine-spotted.....	50	5 00
<b>Cytherie.</b> (Calot.) Flesh-color, nearly white, carmine-spotted.....	50	5 00
<b>Duchesse d'Orleans.</b> Violet-pink.....	35	3 50
<b>Edulis superba.</b> Bright rosy pink.....	40	4 00

	Each	Doz.
<b>Anemonæflora.</b> Crimson; single anem-one-flower shape.....	\$0 50	\$5 00
<b>Atro-rubra plena.</b> Dark red.....	25	2 50
<b>Mutabilis plena.</b> Tender rose, passing to white; double.....	35	3 50
<b>Rosea plena.</b> Pink.....	40	4 00
<b>Tenuifolia, Single-flowering.</b> Rich crimson; narrow-leaved, feathery foliage.....	35	3 50
<b>Tenuifolia, fl.-pl.</b> Double-flowering; fringed leaved, with double, rich crimson flowers.....	60	6 00

## Ranunculus READY IN SEPTEMBER

The main soil for these should be loam or clay, with a good dressing of rotted manure and leaf-mold; if heavy, add a little sand. The soil should be well drained, cool, deep, rich and moist. Plant late in the autumn, claws downward, from 4 to 6 inches apart and 3 inches deep, covering with fine, pulverized soil.

*If ordered by mail, add 3 cts. per dozen or 15 cts. per 100 for postage*

### Persian Ranunculus

	Doz.	100		Doz.	100
<b>Jaune Supreme.</b> Splendid yellow.....	\$0 30	\$1 75	<b>Queen of the Netherlands.</b> Violet-black.....	\$0 30	\$1 75
<b>Mont Blanc.</b> The finest pure white variety.....	30	1 75	<b>Fireball.</b> Brilliant scarlet.....	25	1 50
<b>Orange Brilliant.</b> Deep yellow, tinged orange, black center.....	25	1 50	<b>Persian Mixed</b> .....	15	80
			<b>French Mixed</b> .....	15	80

### Turban Ranunculus

These are the most hardy of the Ranunculus, and will succeed with much less care than is necessary for the Persian sorts.

	Doz.	100		Doz.	100
<b>Grandiflora.</b> Crimson.....	\$0 25	\$1 50	<b>Souci Dore.</b> Orange.....	\$0 25	\$1 50
<b>Romano.</b> Scarlet.....	25	1 50	<b>Viridiflora.</b> Scarlet; green center.....	25	1 50
<b>Seraphique.</b> Citron.....	25	1 50	<b>Mixed Turban</b> .....	15	90

## Richardia (*Calla*)

### READY IN OCTOBER AND NOVEMBER

Tall-growing, bulbous perennials of graceful habit, and handsome foliage and flowers. They are easily cultivated in pots, requiring only rich soil and plenty of water. A compost of one part good loam and one part cow-manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting in September.

*If ordered by mail, add 3 cts. each or 20 cts. per dozen for postage*

	Each	Doz.	100
<b>White Calla, or Lily of the Nile</b> ( <i>Calla aethiopica</i> ). Large, white, trumpet-shaped flowers of great substance. One of the most popular ornamental house and greenhouse plants.			
Largest-size bulbs.....	\$0 25	\$2 50	\$15 00
Second-size bulbs.....	20	1 75	11 00
<b>"Little Gem" Calla.</b> Very neat, dwarf habit; makes an excellent pot-plant.....	10	75	5 00
<b>Black Calla.</b> See <i>Arum palastinum sanctum</i> .....	15	1 25	8 00
<b>Red Calla</b> ( <i>Arum cornutum</i> ). Flowers red, spotted black; stem mottled; a handsome pot-plant.....	12	1 00	7 00
<b>ELLIOTTIANA, Yellow, Spotted Leaf.</b> Dark green leaves, spotted silvery white.....	30	3 00	

Snowdrops

## Scilla READY IN SEPTEMBER

*S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years. The effect in early spring of the intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the snowdrop and the varied hues of the crocus, is very striking; most valuable for permanent edging, or planted in bunches of a dozen or so.

*If ordered by mail, add 5 cts. per dozen for postage, except Peruviana, for which add 2 cts. each*

	Each	Doz.	100
<b>Sibirica.</b> Blue. Extra-large bulbs.....	\$0 25	\$1 50	
<b>alba.</b> White-flowered variety of the above.....	25	1 50	
<b>Bifolia.</b> Blue.....	25	1 50	
<b>Campanulata</b> (Wood Hyacinth). Blue.....	25	1 50	
<b>alba.</b> White.....	25	1 50	
<b>rosea.</b> Rose.....	25	1 50	
<b>Nutans alba.</b> .....	25	1 50	
<b>cœrulea</b> (Nodding Squills). Blue.....	25	1 50	
<b>rosea.</b> Rose.....	25	1 50	
<b>Peruviana alba</b> (White Cuban Lily).....	\$0 20	2 00	
<b>cœrulea</b> (Blue Cuban Lily).....	20	2 00	

## Snowdrops (*Galanthus nivalis*)

### READY IN SEPTEMBER

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms. Should be planted 2 to 3 inches deep in a shady location.

*If ordered by mail, add 3 cts. per dozen or 15 cts. per 100 for postage*

**Single-flowering Snowdrops.** 20 cts. per doz., \$1 per 100, \$7 per 1,000.  
**Double-flowering Snowdrops.** 25c. per doz., \$1.50 per 100, \$13 per 1,000.  
**Giant Snowdrops of Asia Minor** (*Galanthus Elwesii*). Extra-size bulbs. 30 cts. per doz., \$1.75 per 100, \$12 per 1,000.

**Spiraea, or Astilbe** READY IN NOVEMBER

Transportation charges extra

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

**Japonica** (Hoteia). Excellent pot-plant for winter-blooming. Large, branching panicles of pure white feathery flowers; fine for cutting. Clumps for forcing or outdoor planting. 15 cts. each, \$1.25 per doz., \$6 per 100.

**Japonica compacta multiflora**. The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.50 per doz., \$8 per 100.

**Astilboides floribunda**. Very large, pure white plumes; neat habit; very abundant bloomer. 15 cts. each, \$1.25 per doz., \$6 per 100.

**Palmata**. Crimson; strong clumps. 20 cts. each, \$1.75 per doz., \$10 per 100.

**Aruncus**. Handsome plant with large plumes of pure white flowers. 20 cts. each, \$1.75 per doz., \$10 per 100.

**Astilbe Arendsi, Ceres**. Bright rosy lilac; very fine. 30 cts. each, \$3 per doz., \$20 per 100.

**GLADSTONE**. A hybrid *Spiraea* with beautiful, snow-white plumes borne on strong stems  $1\frac{1}{2}$  feet long, standing erect above the foliage. The plant is perfectly symmetrical in shape, the foliage very handsome and the flowers exquisitely fragrant. Fine forcer. 20 cts. each, \$1.75 per doz., \$10 per 100.

**WASHINGTON**. A splendid decorative plant, producing extra-large flowers. Strong grower; fine for forcing. 16 cts. each, \$1.60 per doz., \$9 per 100.

**QUEEN ALEXANDRA, PINK**. A splendid pink variety, in habit similar to the well-known Gladstone, but flowering two weeks later. It is a very free bloomer and bears its flowers well above the strong, dark green foliage.

When forced it must be shaded, as soon as it starts to color. It is a splendid outdoor plant, being as hardy as the old *Spiraea japonica*. Its color will not fade even in the brightest weather. 25 cts. each, \$2 per doz., \$12 per 100.

Transportation charges NOT included in above prices

Spiraea

**Trillium** (American Wood-Lily, or Indian Shamrock)

Hardy herbaceous perennials succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are natives of North America, and are known by various common names in different localities. They have violently emetic roots.

If ordered by mail, add 5 cts. per dozen or 30 cts. per 100 for postage

	Each	Doz.	100
<b>Erectum</b> . Dark purple; erect habit.....	\$0 10	\$0 75	\$5 00
<b>Grandiflorum</b> ("Giant American Wood-Lily," or "Wake-Robin"). Large, white flowers, changing to rose; quite hardy, and easily grown in shaded positions.....	07	60	3 50
<b>Ovatum</b> . White, changing to rose.....	10	75	5 00
<b>Sessile californicum</b> . A strong plant, 1 ft. high, with the separate leaves $5\frac{1}{2}$ inches long by $4\frac{1}{2}$ inches wide and the petals $3\frac{1}{2}$ inches long. Flowers pure white with purple centers; very fragrant.....	12	1 00	6 00
" <b>rubra</b> . Same as Californicum with narrow petals; deep maroon-purple to reddish purple.....	12	1 00	6 00
" <b>Snow Queen</b> . Flowers pure white with creamy centers and with broad petals.....	12	1 00	6 00

**Tuberoses** READY IN DECEMBER

The purity of color and rich perfume of the Tuberose are well known in this latitude. May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich, warm soil and a sunny situation. Cut off about a quarter of an inch from the bottom of the bulb before planting, and set so that the top will be one inch below the surface of the soil.

If ordered by mail, add 3 cts. each or 15 cts. per dozen for postage

	Each	Doz.	100
<b>Dwarf Double Pearl</b> . Dwarf habit; large, fine flowers of great substance.... per 1,000, \$12.	\$0 05	\$0 40	\$2 00
<b>Albino</b> . Purest white; single flowers.....	08	50	3 00
<b>Variegated-Leaf</b> . Foliage striped white and green; single white flowers.....	06	50	3 00

## Miscellaneous Bulbs and Roots

Those marked with an asterisk (\*) will not be ready till October or November  
Transportation charges extra

	Each	Doz.	100
* <b>Achimenes</b> . Mixed. Lovely greenhouse pot-plants.....	\$0 06	\$0 50	\$3 00
<b>Aconite</b> . See <i>Eranthis</i> .			
<b>Allium</b> . Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.			
“ <b>azureum</b> . Beautiful sky-blue flowers in large umbels; fine for pots or garden....	10	1 00	7 00
“ <b>neapolitanum</b> . Large umbels of pure white flowers, borne on large stems; valuable for forcing for winter cut-flowers, as well as for summer garden decoration.		20	1 00
“ <b>Moly luteum</b> . Golden yellow flowers in large umbels; very showy and attractive; fine for growing in the garden in groups or for naturalizing in masses.....		20	1 00
“ <b>Hermettii grandiflorum</b> . Makes a splendid pot-plant for winter-blooming in the house, the handsome, large, pure white flowers being produced abundantly and for a long time; largely used by florists for cut-flowers.....		25	1 25
* <b>Alstroemeria aurea</b> . ( <i>Aurantiaca</i> .) Orange-yellow, spotted black.....		40	
“ <i>Brasiliensis</i> . Deep red, with black spots.....		60	
* <b>Amorphophallus Rivieri</b> . A species of <i>Arum</i> , with ornamental leaves, flowering without soil or water.....	1 25	12 00	
* <b>Anomatheca cruenta</b> . Rich crimson flowers; neat, dwarf habit; excellent for window-garden.....		20	1 00
* <b>Anthericum</b> . Ornamental border plants; also fine for pot culture. Do best in light, rich soil, and require plenty of water while growing.			
“ <b>Liliago</b> (St. Bernard's Lily). Pure white flowers; 1½ feet high.....	10	75	
“ <b>Liliastrium major</b> (St. Bruno's Lily). Pure white; fragrant.....	07	60	
“ <b>ramosum</b> . Of branching habit; white flowers; 2 feet high.....	12	1 00	
* <b>Antholyza</b> , Mixed. Like <i>Gladioli</i> . Take up in fall.....	10	75	4 50
* <b>Apios tuberosa</b> . Hardy climber, with clusters of fragrant purple flowers.....		40	2 50
<b>Arum</b> . Make handsome pot-plants, and are also effective in subtropical gardening. <i>A. Dracunculus</i> and <i>A. italicum</i> are hardy.			
“ <b>crinitum</b> . Marbled stems; broad, flesh-colored, spotted flowers, covered with hairs.	40	4 00	
* “ <b>cornutum</b> (Red Calla). Flowers red, spotted black, stems mottled; handsome pot-plant; flowers without water or soil.....	12	1 00	7 00
“ <b>Dracunculus</b> (Dragon-flower). A striking and very ornamental plant for pots or garden. It grows to a height of 3 feet, with mottled stem and handsome foliage. Hardy.....	15	1 50	
“ <b>italicum</b> . A hardy species from the Channel Islands, with creamy white flowers...	06	50	
“ <b>maculatum</b> . A fine decorative plant; flowers white; green foliage, spotted black..	10	1 00	
“ <b>palastinum sanctum</b> (Black Calla). From the Lebanon mountains. A splendid pot- and chamber-plant, with fine dark green foliage, large black spathe and black spadix.....	15	1 25	8 00
<b>Asphodelus ramosus</b> (King's Spear). White.....	08	65	4 00
<b>Babiana</b> . Mixed colors; for pots.....	08	65	4 00
<b>Bleeding Heart</b> . See <i>Dicentra</i> , below.			
<b>Bloodroot</b> . See <i>Sanguinaria</i> , next page.			
<b>Bulbocodium vernum</b> . A very pretty little bulbous plant, with rosy purple, crocus-like flowers; it is one of the earliest spring plants, blooming even before the crocus.....		60	3 50
<b>Calla</b> . See <i>Richardia</i> , page 24.			
<b>Camassia Cusickii</b> . Superb variety with very large leaves and lovely, pale sky-blue flowers, produced in racemes 2 to 3 feet long.....	15	1 50	
“ <b>esculenta</b> . Pretty violet-blue flowers; fine for cutting.....		25	1 50
“ <b>Leichtlinii</b> . Purple.....	10	1 00	
<b>Chionodoxa gigantea</b> . Very large lilac-blue flowers, with large white eye.....	05	35	2 00
“ <i>Luciliae</i> (“Glory-of-the-Snow”). Porcelain-blue, white eye..... 3 for 10c...		25	1 50
“ <i>Sardensis</i> . Lovely deep blue flowers, produced in great numbers... 3 for 10c...		25	1 50
<b>Cinnamon Vine</b> . See <i>Dioscorea</i> .....	06	50	3 00
<b>Clematis coccinea</b> . A hardy herbaceous perennial climber; flowers rich scarlet.....	15	1 50	10 00
<b>Colchicum</b> . Mixed. Many bright colors.....	06	50	3 00
<b>Cooperia Drummondii</b> (Evening Star). White.....	05	35	2 00
“ <i>peduncularis</i> . Beautiful white, fragrant flowers.....	05	35	2 00
<b>Corydalis bulbosa rubra</b> . Rosy purple; very early, spring-flowering.....	06	50	3 00
* <b>Crocasmia aurea</b> (Tritonia). Half-hardy; orange flower.....	10	85	6 00
<b>Darlingtonia</b> (Pitcher Plant).....	50	4 00	
* <b>Dicentra spectabilis</b> (Dielytra; Bleeding Heart). Hardy; also for forcing.....	15	1 50	10 00
<b>Dioscorea Batatas</b> (Cinnamon Vine).....	06	50	3 00
<b>Dodecatheon Hendersoni</b> . Rose-purple, with yellow band.....	12	1 10	7 50
“ <i>Clevelandi</i> . White, tinted pink; tall.....	12	1 10	7 50
<b>Eranthis hyemalis</b> (Winter Aconite). Yellow.....		20	1 25
<b>Eucharis amazonica</b> . Fine, white-flowered greenhouse plant. Magnificent.....	75	7 50	
* <b>Geranium sanguineum</b> . Hardy perennial. Crimson-purple flowers.....	15	1 25	
* <b>Hæmanthus albidus</b> . White; fine for pots.....	1 00		
“ <i>coccineus</i> . Scarlet; for pots.....	2 00		
“ <i>punicus</i> . Orange-red; for pots.....	1 50		
* <b>Helleborus niger major</b> (Christmas Rose). Perfectly hardy, but most valuable for forcing.	40	4 00	
* <b>Hemerocallis</b> , Apricot. Distinct rich apricot.....	12	1 00	
“ <i>flava</i> . Clear yellow.....	10	75	5 00
“ <i>fulva</i> . Coppery orange, shaded crimson.....	12	1 10	7 50
“ <i>Kwanso flore pleno</i> . Coppery orange; double.....	12	1 10	7 50
“ <i>Sieboldi</i> . Reddish orange.....	10	75	5 00
* <b>Hyacinthus candicans</b> . A snow-white summer-flowering giant Hyacinth.....	05	40	2 50
* <b>Incarvillea Delavayi</b> . Large, rosy purple; splendid hardy perennial, with handsome foliage.....	10	75	

*Miscellaneous Bulbs and Roots, continued*

## Hardy Annual and Perennial Flower Seeds

### FOR AUTUMN SOWING

Many varieties of flower seeds, **Annals** as well as **Biennials** and **Perennials**, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerously than if sown in the spring.

## Mushroom Spawn

Cultural directions in our General Catalogue. Any one requiring fuller details should get Wm. Falconer's book on Mushroom Culture, sent postpaid, for \$1.

**English Spawn.** In bricks, weighing about 1½ lbs.  
Per brick 15 cts., 100 bricks \$9.

**American Spawn.** In bricks, weighing about 1 lb.  
Per brick 10 cts., 100 bricks \$12.50.

**French Spawn.** In bulk. Per lb. 30 cts., 10 lbs. \$2.50.

## *Insecticides and Remedies for Plant Diseases*

(All subject to change in price.) If ordered by parcel post, add 5 cts. to 12 cts. per lb. according to zone, for postage

**ANTIPEST.** A sure destroyer of all insect pests. Qt. 45 cts.,  $\frac{1}{2}$  gal. can 65 cts., gal. can \$1.25.

**APHINE.** Has no equal for the destruction of green, black or white fly, thrips, red spider, mealy bug, etc. Used one part to forty of water. Does not injure the most tender plants.  $\frac{1}{4}$  pt. 25 cts.,  $\frac{1}{2}$  pt. 40 cts., pt. 65 cts., qt. \$1, gal. \$2.50.

**ARSENATE OF LEAD.** Does not injure tender foliage. Lb. 16 cts., 5 lbs. 75 cts., 10 lbs. \$1.40, 20 lbs. \$2.75, 100 lbs. \$13.

**BORDEAUX MIXTURE, DRY.** For all fungous diseases. 1-lb. box 20 cts., 5 lbs. and over at 18 cts. per lb.; 50 lbs. \$7; liquid, qt. 40 cts., gal. \$1.25.

**BUG DEATH.** This is a fungicide, insecticide and plant-food combined. 1-lb. package 15 cts., 3-lb. package 35 cts., 5-lb. package 50 cts., 12½-lb. package \$1, 100-lb. package \$7.50.

**DALMATIAN INSECT POWDER.** 1/2 lb. box 30 cts., 1-lb. box 50 cts.

**FIR-TREE OIL.** For greenhouse and house plants. Destroys insects without injuring plant. Dilute 1 pint to 20 gallons water. Apply with vaporizer or syringe.  $\frac{1}{2}$ pt. 40 cts., pt. 75 cts., qt. \$1.25,  $\frac{1}{2}$ gal. \$2.25, gal. \$4.

**FIR-TREE OIL SOAP.** Mix at the rate of 1 ounce to a gallon of water, and apply with a bellows or syringe.  $\frac{1}{2}$ lb. tin 25 cts., 2-lb. tin 75 cts.

**FISH-OIL SOAP.** For washing trees and destroying all insects on the bark. 1-lb. box, 15 cts., 5 lbs. 50 cts., 10 lbs. 90 cts., 100 lbs. \$7.

**GRAPE DUST, HAMMOND'S.** For the prevention of mildew on roses, grapes, gooseberries, etc. Apply with bellows. 5-lb. pkg. 35c., 10-lb. pkg. 60c., 100 lbs. \$5.

**HELLEBORE.** Apply dry or mix in water—I oz. to 3 gals. 2-lb. box 45 cts., 1-lb. box 25 cts.

**KEROSENE EMULSION:** For cabbage worms, scale on trees, caterpillars, melon-louse, rose bugs, green fly, etc. Dilute 25 to 50 parts. Qt. 40 cts., gal. \$1.

*Insecticides and Remedies for Plant Diseases, continued*

**LEMON OIL.** For destroying scale, caterpillar, mealy bug., etc. Directions on can.  $\frac{1}{2}$  pt. 25 cts., pt. 40 cts., qt. 75 cts., gal. \$2.

**NICOTICIDE.** For fumigating or spraying. Effective against green fly, mealy bug, etc. Does not damage foliage or flowers. Sold in cans as follows: No. 1, 1 pt., sufficient for 32,000 cubic feet of space, \$2.50 each; No. 2,  $\frac{1}{2}$  pt. sufficient for 16,000 cubic feet of space, \$1.25; No. 3, 4 ozs., sufficient for 8,000 cubic feet of space, 70 cts. Gals. \$15 each,  $\frac{1}{2}$  gal. \$8.25 each, qts. \$4.50 each. Fumigators, 50 cts. each.

**"NICO-FUME" TOBACCO PAPER.** For fumigating. Does not injure blooms. In tins. 24 sheets, 75 cts., 144 sheets, \$3.50, 288 sheets \$6.50.

**NICO-FUME LIQUID.** For fumigating or spraying. Effective against green fly, mealy bug, etc. Does not stain or injure blooms, and leaves no disagreeable odor. For spraying, 1 to 2 teaspoonfuls to a gallon of water.  $\frac{1}{4}$  pt. 50 cts., pt. \$1.50,  $\frac{1}{2}$  gal. \$5.50, gal. \$10.50. Lamps 50 cts. each.

**PARIS GREEN.** Mix at the rate of 1 lb. to 200 gals. of water. 1-lb. can 35c.,  $\frac{1}{2}$  lb. can 20c.,  $\frac{1}{4}$  lb. can 12c.

**SLUG-SHOT (HAMMOND'S).** Excellent for destroying cabbage, turnip and beet fly, potato bugs, currant worms, etc. 5-lb. package 30 cts., 10-lb. pkg. 50 cts., 100-lb. pkg. \$4.50.

**SULPHO-TOBACCO SOAP.** Dissolve in proportion of 2 ounces to a gallon of water, and apply with a syringe or atomizer. It will destroy rose slugs, aphides, green fly, bark-lice, etc. 3-oz. box 10 cts., 8-oz. box 20 cts., 10-lb. box \$3.

**SULPHUR, POWDERED.** Protects against mildew on grapes, roses, etc. Lb. 10 cts., 10 lbs. 60 cts.

**TOBACCO DUST, Ordinary Kind.** For dusting. Lb. 10 cts., 5 lbs. 35 cts., 10 lbs. 60 cts., 100 lbs. \$3.

**Stoothoff's "Black Stuff."** For dusting. 50 lbs. \$2.25, 100 lbs. \$4.

**Stoothoff's "Fumigating Kind."** For burning. 50 lbs. \$2.25, 100 lbs. \$4.

**TOBACCO STEMS.** For fumigating plants infested with green fly. Bale of about 100 lbs. \$1.75, 200 lbs. \$3.25, 400 lbs. \$5.50.

**TREE TANGLEFOOT.** A sticky substance applied directly to the bark. For protecting trees against climbing insect pests in a simple, economical and effective way. One application remains sticky, fully exposed to weather three months. One pound will make a band 7 to 8 feet long. 1-lb can 30 cts., 3 lbs. 85 cts., 10 lbs. \$2.65, 20 lbs. \$4.80.

**X. L. ALL LIQUID INSECTICIDE.** For spraying. Purely nicotine; harmless to very delicate plants; kills mealy bugs, red spider and all insect pests. Pt. 65 cts., qt. \$1,  $\frac{1}{2}$  gal. \$1.75, gal. \$3.50.

*For San Jose Scale*

**Lime-Sulphur Solution** (California Wash). One gallon makes 25 by adding sufficient water. Qt. 40 cts., gal. \$1, 5 gals. \$3.50, in bbl. lots at 50 cts., per gal.

**Scalecide.** Petroleum oil that mixes at once with cold water and stays mixed. No hot water necessary. Add 1 gallon for every 15 to 20 gallons of water. Qt. 40 cts., gal. \$1, 5 gals. \$3.25.

## Thorburn's High-Grade Fertilizers, all f.o.b., N. Y.

### Thorburn's Lawn Fertilizer

Per ton \$50, single bags of 167 lbs. \$5, per bag of 100 lbs. \$3.25, 50 lbs. \$2, 25 lbs. \$1.25, 10 lbs. 75 cts.

### Thorburn's Complete Manure

Ton \$40, single bag of 167 lbs. \$4, bag of 100 lbs. \$2.75, 50 lbs. \$1.65, 25 lbs. \$1, 10 lbs. 50 cts.

### Pure Ground Bone Meal, No. 1

Finely pulverized. 5 lbs. 25 cts., 10 lbs. 40 cts., 25 lbs. 75 cts., 50 lbs. \$1.25, 100 lbs. \$2.25, per ton \$33.

### Thompson's Vine Manure

Unrivalled for vines, tomatoes, cucumbers, fruit trees, and all foliage, flowering and fruit-bearing plants and outdoor plants of every description. Splendid for lawns, etc. Per cwt. (112 lbs.) \$7,  $\frac{1}{2}$  cwt. (56 lbs.) \$4.

### Clay's Celebrated Fertilizer

One of the best manures for all horticultural purposes. 1 cwt. (112 lbs.) \$7,  $\frac{1}{2}$  cwt. (56 lbs.) \$4,  $\frac{1}{4}$  cwt. (28 lbs.) \$2.25,  $\frac{1}{8}$  cwt. (14 lbs.) \$1.25.

### Bowker's Ammoniated Food for Flowers

The best dressing for potted plants. Small package 15 cts.; large package 25 cts.

### Canada Hard-Wood Ashes

Highest grade, extra screened, unleached. In bags of about 100 lbs. \$1.50, per ton \$22.

### Pulverized Sheep Manure

1-lb. package 10 cts., 5-lb package 25 cts., 25 lbs. 75 cts., 50 lbs. \$1.25, 100 lbs. \$2, ton \$31.

## Horticultural Implements, Etc.

### Flower or Tree Tubs

sprinkler and fountain. Brass and nickel-plated;

malleable iron runners. Covers an area 40 feet in

diam. \$1.75.

**Shower Sprinkler.** Mounted on holder for sprink-

ling lawns—or can be attached to hose for washing

sidewalks, etc. Cannot clog or get out of order;

will not rust. Holder and nozzle complete, \$2.

**Thermometers.** Hotbed and mushroom bed. Brass

tips; made for plunging. Each, soft wood, \$1, box-

wood, \$1.25.

## **Rubber Hose** (Three-quarter inch)

Our hose is carefully selected, made of first-class material, and coupled at both ends, in 25- or 50-ft. lengths.

**Electric.** Can be cut in any length. 20 cts. per ft. For less than 25 feet, add 15 cts. for couplings.

**Thorburn Standard.** 5-ply, 11 cts. per ft.

X. 6-ply, 14 cts. per ft.

XX. 7-ply, 16 cts. per ft.

XXX. Best red, 7-ply, 18 cts. per ft.

## **Bucket Spray Pump**

Made of brass; easily operated; throws a solid stream 50 feet. Provided with combination nozzle and sprinkler for flowers. 8-foot extension for spraying large trees, 60 cts. extra. Also valuable for washing windows. Price \$3.75.

## **"Auto-Spray" Pump**

Self-operating, durable, easy to carry and to work. Made of galvanized iron or brass, with 4-ply rubber hose. For spraying trees, shrubs, cleaning windows, etc. Price, with brass tank and stop-cock nozzle, \$6.75; galvanized tank and stopcock nozzle, \$4.50. Brass extension pipe, 2 feet, 45 cts. extra. "Auto-Pop" nozzle, \$1 extra. "Auto-Pop" nozzle if sold alone, \$1.50.

## **The "Velvetlawn" Grass Seeder**

18 inches wide

The "Velvetlawn" Grass Seeder puts the seed into the soil where birds, wind and rain cannot get at it. Operator can drill any quantity of seed desired, and as the seed is all planted at an even depth in the ground, uniform growth is assured. Price \$15, net cash.

## **Water Ballast Roller**

Roller bearing. Can be filled without turning on end, with either sand or water. Suitable for lawns, tennis-courts and putting-greens, seams are electric-welded, not riveted. (Patented.)

One or two-section "Water Weight" Rollers, without counterbalancing handle-weights.

No.	Diam. in.	Length in.	Sec. tions	Weight empty, lbs.	Weight filled with water, lbs.	Weight filled with sand, lbs.	Price

THORBURN'S  
BULBS

ESTABLISHED  
1802

## Grass Seed for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the middle of September, so that the young grass may become well rooted before winter sets in.

### *The Thorburn Lawn Grass*

Many of the finest lawns in America were produced from this mixture. It is composed of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich greensward in three or four weeks from the time of sowing. (The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture.) It should be sown at the rate of 4 to 5 bushels to the acre. Per pt. 15 cts., qt. 25 cts., 2 qts. 45 cts.,  $\frac{1}{2}$ pk. 75 cts., pk. \$1.40, bus. of 20 lbs. \$5.

### *Thorburn's Grass Mixture for Shady Spots on Lawns*

A mixture of grasses that thrive in shaded situations under trees, or close to walks where there is little sun. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$ pk. \$1.25, pk. \$2, bus. of 22 lbs. \$7.

### *Thorburn's Grass Mixture for Terraces*

A mixture of fine stoloniferous grasses peculiarly adapted to terraces. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

### *Thorburn's Lawn-Restoring Grass Seed*

A mixture of grasses that will take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-restoring Grass Seed** should be sown before every summer rain on thin places. Per qt. 35c., 2 qts. 60c.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

### *Thorburn's Lawn Grass for the South*

A mixture of grasses that stand extremes of heat and drought, and that are, therefore, peculiarly adapted to southern lawns. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.50.

## *Also Permanent Grass Seed for Golf-Links, Tennis-Courts, Polo-Grounds, etc.*

We have devoted much attention to the seeding and preservation of golf-links, tennis-courts and polo-grounds, and offer the following mixtures, which have been used on most of the finest links, etc., in this country with very satisfactory results.

### *Tennis-Court Mixture*

A mixture of extra-fine grasses peculiarly adapted to tennis-courts. This mixture will make a firm, green and lasting turf of the finest texture, that will improve with trampling. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

### *Grass Mixture for Railroad Banks, etc.*

A mixture of grasses with long, interlacing, matting roots that will bind steep embankments, gravelly or sandy slopes, etc., preventing washouts by rain-storms and covering them with permanently green turf. Per qt. 30 cts., 2 qts. 50 cts.,  $\frac{1}{2}$ pk. 80 cts., pk. \$1.25, bus. of 18 lbs. \$4.50.

### *Fair-Green or Golf-Links Mixture*

For the grounds in general. Per bus. of 20 lbs. \$4.

### *Putting-Green Mixture*

A mixture of extra-fine grasses that will make a close, firm, green and lasting turf, which will improve with trampling. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$ pk. \$1.25, pk. \$2, bus. of 24 lbs. \$7.

### *Polo-Grounds Mixture*

A mixture of fine-leaved and deep-rooting grasses, forming a strong and lasting turf that will stand hard usage. Per bus. of 20 lbs. \$4.

# J. M. THORBURN & Co.

## Catalogue of Bulbs and Flowering Roots, also Flower and Vegetable Seeds, for Fall Planting

EVER since the days of the great Tulip Craze of the seventeenth century, when bulbs changed hands at fabulously inflated prices (one single Tulip being sold for \$5,200) world-wide interest in the cultivation of bulbs for their beautiful flowers has never ceased.

The House of Thorburn has been engaged in supplying the American people with bulbs, as well as seeds, for more than a century, such as Hyacinths, Tulips, Narcissus, Lilies, etc., all of the very highest quality obtainable, and at most reasonable prices.

When Grant Thorburn sold his first plant in the early days of the nineteenth century, he little thought what an extensive business would arise out of that transaction.

Have you ever tried to picture how the things of today looked a century or more ago? No doubt you have, and with interest, too. Those of you who may have visited our store, or are already purchasers of our Bulbs, Seeds, etc., perhaps may be interested to hear a little of our history:

Back in the latter part of the eighteenth century (in 1796, to be exact) Grant Thorburn landed in lower New York, his worldly wealth consisting mostly of health, courage and determination.

Five years later, living in a small house in what is now Nassau Street, then one of New York's foremost business streets, he began selling plants.

At that time plants were seldom sold, and when disposed of they were carried off, usually, in poorly put together boxes.

It was Grant Thorburn who conceived the idea of painting these boxes and making them in a workmanlike manner. Not perhaps a particularly brilliant thought, but it "caught on," and his business prospered.

And while he had at first sold his plants to a limited number, a constant and ever-increasing demand was soon created.

Then he added to his stock a supply of seeds, taking good care not to sell old seeds; and in this line, too, he prospered.

In 1802 his first catalogue was issued; a four-page affair. Prominently inscribed upon it was the fact that it was free.

Each year saw a larger book, but no conspicuous change was made in business methods or location until 1832, when his son was taken into the firm, and it went on as "Grant Thorburn & Son."

Possibly some of our good customers have wondered at the origin of the trade-mark

which we still carry on our seed bag. It is a survival of the initials of the old firm of 1832.

Commercial panics and wars made but little inroads on the business. Steadily, day by day, a country-wide reputation has formed.

Steadily, year by year, the demand for Thorburn Seeds has grown.

The First Store

Grant Thorburn landing in  
New York, 1796

The Son is Taken Into the Business

From time to time the firm of Thorburn has been obliged to seek larger quarters. Today we occupy an entire building, extending from Barclay Street through to Park Place.

On our staff are some of the strongest horticulture men in the seed business.

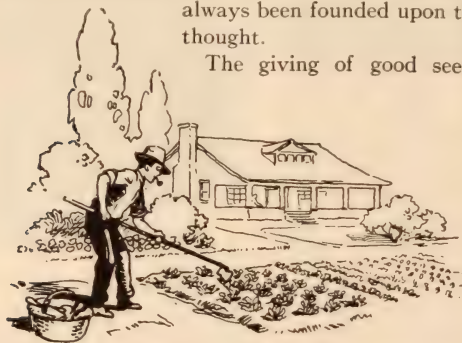

Our list of customers includes many thousands who buy from us each year—as have their fathers before them.

The purchases run from a small and careful assortment for a commuter's garden, all the way up to large shipments for great estates.

\* \* \*

We hear much in these days about "service." The steady growth of the Thorburn business has always been founded upon this thought.

The giving of good seeds,

For the Commuter's Garden

Or the Big Estate

good advice, and real assistance in the selection and planning of the garden.

Remembering always the long, straight road which we have traveled for more than a hundred years, we push forward, seeking the business of those who believe that careful, earnest, intelligent work is wanted in garden building as well as in all the affairs of life.

You are familiar with seed catalogues, but possibly not with ours. It will be a pleasure to you to look it over and note the moderateness of statement, the lack of superlatives in the descriptions and the wealth of good suggestions.

We shall be glad to enter your name for a copy of our seed catalogue for 1915.

**B**ULBS may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of blooms can be had from December until May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. The cultural directions found under the respective headings are worthy of careful attention.

Our bulbs are all selected, coming from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation, and often sold at auction and otherwise, at very low prices.

**NAME AND ADDRESS.** *We often receive orders with either the name or the address of the sender omitted. As we can do nothing with such orders, the customer thinks his order is being neglected. We therefore beg our correspondents to be careful to write on each order their name and full address.*

**ORDERS** should be sent as soon as possible after receipt of this catalogue. *The bulbs will be shipped in proper time for planting. They are ready from August to November, according to the time of ripening and the country from which they come.* Orders received earliest are sure of being filled in full. If left too late, the supply of some of the varieties may be exhausted.

The prices quoted include transportation charges except where noted.

Please address all orders and remittances to

F. W. BRUGGERHOF, President

**J. M. THORBURN & CO.**

53 Barclay Street and 54 Park Place, NEW YORK

# Hyacinths

THESE BULBS ARE READY FOR  
DELIVERY IN SEPTEMBER

**The Hyacinth** is one of the most popular and beautiful spring-flowering plants for indoor and outdoor decoration. By careful management in keeping up a succession, it may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground it is unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height, and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

**OUTSIDE CULTURE.** In this section, October is the month to plant Hyacinths outside. They succeed best in a light soil and a sunny situation. If the soil is naturally heavy, some sand should be mixed with it, and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs. Some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has been frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field-mice which may burrow it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibrous loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September to the end of November. Plenty of water should be applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.** Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten to twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

**Customers unacquainted** with the different varieties will do well to leave the selection to us, only specifying in their order whether bulbs are wanted for pot, glass or garden culture.

**We invite special attention** to the assortments of Named Hyacinths of our selection offered on page 4, and to the Hyacinth Glasses which are quoted at the end of the catalogue.

The names of our Hyacinths and Tulips are those given to them by the originators in Holland, and they are not sold under fancy names manufactured in this country

## Select Named Dutch Hyacinths

*N. B.* Our Select Named Hyacinths are the cream of the Holland nurseries—and are called *top-roots*—under their original names. For forcing in pots or for outdoor beds they far surpass the class of Bulbs usually sold.

The single-flowered varieties are generally more effective and better for forcing than the double ones. They also, as a rule, succeed better in glasses. The double varieties are distinguished by an asterisk (\*), and those of them that do well for forcing in water, by two asterisks(\*\*).

Not less than six of one kind sold at the dozen rate

**Ornement Rose.** Pale rose; broad spike  
**Pink Perfection.** Pale rose, striped pink  
**Robert Steiger.** Fine deep crimson

Single Hyacinth, Ida (Light yellow)

**Mixed Dutch Hyacinths in Separate Colors, Extra Quality**

LARGEST BULBS. SUITABLE EITHER FOR FORCING OR BEDDING

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all of the largest size. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

**Italian Hyacinths**

Grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are harder than the Romans, and may be planted outside in the fall for flowers for early spring cutting.

	Each	Doz.	100
Single White, Early.....	\$0 06	\$0 60	\$4 00
" " Late (St. Joseph)....	06	60	4 00
" Pink.....	06	60	4 00

**French Roman Hyacinths**

Extensively used by florists for forcing cut-flowers. For this purpose they are the best and most popular of bulbs. The flowers are delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown, and extremely early, and by making successive plantings they may be had in flower all through the winter. The blue Roman Hyacinths flower from one to two weeks later than the white variety.

French Roman Hyacinths

Duc Van Thol Tulips, Red, White, Scarlet, Yellow, and White shaded Rose.

## Tulips

READY FOR DELIVERY  
IN SEPTEMBER

For beauty of form and brilliancy of coloring, Tulips are unequalled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and height, medium or tall, to which they grow, so that purchasers may select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers they are also invaluable.

**CULTURE.**—The cultural directions given for hyacinths, on page 3, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open ground.

### Duc Van Thol Tulips

Six of a kind at dozen rate, 25 of a kind at 100 rate

The Duc Van Thols are the earliest of all the Tulips. They are of dwarf habit, and well adapted for forcing and for pot culture. They bloom outdoors before the Single Early Tulips.

## Parrot Tulips

Six of a kind at dozen rate, 25 of a kind at 100 rate

For outdoor cultivation. The petals of these have feathered edges, and, in addition to other colors, combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant colors, and form very effective groups for the flower-border. To get the best results they must have the full effect of the sun. *Very late-flowering.*

## Narcissus

### NARCISSUS ARE READY FOR DELIVERY IN SEPTEMBER

Narcissus are among the most popular and largely grown of spring-flowering bulbs, and deservedly, too. Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, lakes or ponds, and in mixed flower- or shrubbery-borders. They are also suitable for naturalizing in the grass, by the side of woodland walks, or in open spaces between trees and shrubs.

For growing in pots they require about the same treatment as hyacinths, three or four bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers. With the exception of the Polyanthus section, they are all perfectly hardy.

### Single Narcissus, or Daffodils ALL LARGEST-SIZED BULBS

#### Large-Crown or Trumpet Narcissus

The varieties belonging to this division have trumpets or crowns that are as long as, or longer than, the perianth segments.

#### BICOLOR

**Empress.** One of the largest and most beautiful; white perianth and rich golden yellow trumpet. An excellent forcer. 6 cts. each, 50 cts. per doz., \$3 per 100.

**Grandis.** White perianth, yellow trumpet; later than Empress. 5 cts. each, 35 cts. per doz., \$2.25 per 100.

**Horsfieldii.** White perianth, yellow trumpet; very early. 5c. ea., 40c. per doz., \$2.50 per 100.

**Narcissus, Grandis, Golden Spur and Poeticus ornatus**

## Short-Trumpet Narcissus

### INCOMPARABILIS

These are crosses between the Yellow Trumpet and Poeticus. The color of the perianth is usually yellow or white.

	Each	Doz.	100
<b>Cynosure.</b> Primrose perianth, changing to white, cup pale orange.....	\$0 05	\$0 30	\$1 75
<b>Simplex.</b> Single; yellow; early. Fine for cutting; also for forcing.....	05	30	1 50
<b>Sir Watkin.</b> Perianth sulphur, crown yellow, tinged bright orange. This is still the king of the short-cupped Narcissus, and used more generally and in larger quantities than any other short-cupped variety. Valuable as a cut-flower. First size.....	06	50	3 00
<b>Stella.</b> White perianth, yellow cup. Good forcer.....	05	30	1 75

### LEEDSII

These are crosses between the White Trumpets and Poeticus. The crowns are as large as those of the Incomparabilis group. The perianths are always white; the crowns are mostly white or light yellow.

	Each	Doz.	100
<b>Leedsii Type.</b> Silvery white, lemon cup.....	\$0 05	\$0 30	\$1 75
<b>Duchess of Brabant.</b> White perianth, lemon cup. Good for forcing.....	05	30	1 75
<b>Minnie Hume</b> (Queen of England). Large white perianth, cup passing from fine lemon to white.....	05	35	2 00
<b>Mrs. Langtry.</b> Pure white perianth, large white cup, edged yellow. Splendid for cutting or naturalizing.....	05	35	2 00

## Narcissus poeticus

Varieties belonging to this group always have a pure white perianth. The cups are very short, but wide-mouthed, and always more or less deeply rimmed with orange or scarlet.

	Each	Doz.	100
<b>Onatus.</b> Perianth pure white, cup yellow, margined scarlet. One of the most popular of all; useful for cut-flowers; very early flowering. Mother Bulbs.....	\$0 05	\$0 30	\$1 75
<b>Recurvis</b> (The Old Pheasant's Eye). Pure white perianth, scarlet cup; late.....	05	30	1 50

## Various Single Narcissus

	Each	Doz.	100
<b>Biflorus.</b> White perianth, yellow cup; twin-flowering.....	05	35	2 00
<b>Bulbocodium citrinum</b> (Hoop Petticoat). Pale sulphur-yellow.....	08	75	4 75
<b>conspicuum.</b> Golden yellow.....	08	75	4 50
<b>Tenuis</b> (Silver Jonquil). Sulphur-white perianth, yellow cup. A rush-leaved, dwarf variety, splendid for rock-work.....	08	70	3 75
<b>Single Trumpets, Mixed</b> .....	Each \$0 05	Doz. \$0 30	100 \$1 50
<b>Single, All Sorts Mixed</b> .....	05	30	1 50

## Double Narcissus

	Each	Doz.	100
<b>Alba plena odorata.</b> Pure white; a splendid cut-flower; sweet-scented. For outdoors.....	\$0 05	\$0 30	\$1 75
<b>Incomparabilis</b> (Butter and Eggs). Light yellow. For forcing.....	\$0 05	\$0 35	\$2 25
<b>Orange Phoenix</b> (Bacon and Eggs). Large; double; white with orange base.....	05	45	2 75
<b>Sulphur Phoenix.</b> Large; double; white with sulphur center. Not good for growing in pots on account of its weak foliage, but a splendid variety for cutting. The flower is rose-shaped and is of a most pleasing silvery white shade.....	06	50	3 00
<b>Tazetta.</b> (Early Yellow Roman.) Earliest yellow for forcing.....	05	35	2 25
<b>Von Sion.</b> The largest double yellow Trumpet variety. Extra fine for forcing; largely grown by florists for winter cut-flowers. Our bulbs are Dutch-grown, of the pure golden yellow variety, Each and of the largest size.....	1,000, \$30..	\$0 08	\$0 75
<b>Von Sion.</b> Double-nosed bulbs.....	1,000, \$32..	08	75
			4 50

## Polyanthus Narcissus

The varieties belonging to this class produce small, fragrant flowers growing in clusters. They are invaluable for forcing and may be grown under glass or in pots. If planted in the open border they must be protected over winter by a covering of litter.

	Each	Doz.	100
<b>Bazelman Major.</b> Broad white perianth, deep yellow cup; largest of all.....	\$0 09	\$0 85	\$5 25
<b>Gloriosa.</b> White perianth, deep orange cup; very striking.....	08	75	4 00

## *Lilies*

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *Lilium candidum* and *Lilium tigrinum*, which prefer a deep, rich loam, they all do best in a light, well-drained soil. Some peat or leaf-mold may be used to advantage. *Lilium auratum* cannot bear manure but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

**Lilium Harrisii** and **Lilium candidum** ready in August; others not until November.

### *Lilium Harrisii*

(Bermuda Easter Lily)

**BULBS NOW READY**

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, lasting a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decoration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

Lily-of-the-Valley

## Lily-of-the-Valley

(Convallaria majalis)

## READY IN NOVEMBER AND DECEMBER

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them. They may also be planted in moss fiber in vases.

**Clumps.** Fine, large clumps, with many flowering pips on each. Fine for planting outside in shaded positions and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per doz., \$20 per 100.

**Pips for Forcing.** 60 cts. per bundle of 25, \$2 per 100, \$16 per 1,000.

## Chinese Sacred Lily

(The Water Fairy Flower)

## READY IN SEPTEMBER

A variety of the Polyanthus Narcissus, imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs entirely and place in a sunny window in a cool room. 15 cts. each, \$1.25 per doz.

## Allium

Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower-border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.

**Azureum.** Beautiful sky-blue flowers in large umbels; fine for pots or garden. 12 cts. each, \$1.10 per doz., \$7.50 per 100.

**Neapolitanum.** Large umbels of pure white flowers, borne on large stems; valuable for forcing for winter cut-flowers, as well as for summer garden decoration. 25 cts. per doz., \$1.25 per 100.

**Moly luteum.** Golden yellow flowers in large umbels; very showy and attractive; fine for growing in the garden in groups or for naturalizing in masses. 25 cts. per doz., \$1.25 per 100.

**Hermettii grandiflorum.** Makes a splendid pot-plant for winter-blooming in the house, the handsome, large, pure white flowers being produced abundantly and for a long time; largely used by florists for cut-flowers. 30 cts. per doz., \$1.50 per 100.

## Amaryllis READY IN OCTOBER

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mold or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

**Belladonna major.** Violet and white; flowers in large umbels; fragrant. 25 cts. each, \$2.25 per doz.

**Belladonna speciosa purpurea.** 65 cts. each, \$6 per doz.

**Josephine** (Gigantea). Very fine scarlet; flowering in immense umbels; these are extra-sized bulbs. \$5 each.

**Hippeastrum Johnsonii** (Spice Lily). Beautiful flowers; crimson, striped white. Large bulbs. 65 cts. each, \$6 per doz.

**Hippeastrum, Mixed Hybrids.** 75 cts. each, \$7 per doz.

Amaryllis Hippeastrum Johnsonii

Anemone coronaria

## Anemone, or Windflower

Very ornamental hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

**Crocus**

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted closely—say 2 inches apart—and 3 inches deep, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful. For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

**Hybrid Named Crocus**

Remarkable for richness of color and immense size. These varieties are best for forming letters or designs on lawns, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. Flowers are produced very early, and mowing later on will not seriously injure the bulbs.

**Crown Imperials** (*Fritillaria imperialis*)

READY IN SEPTEMBER

A stately-growing plant, with dark green foliage and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

Maximus (Red)

Cyclamen persicum giganteum

Cyclamen MOST OF THEM READY IN NOVEMBER

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The soil best suited to them is a fresh, turfy loam, with a fourth to a fifth of well-rotted horse manure, to which add some clean sand if the soil is heavy. Plant so as to leave the top of the bulb just below the surface. Given the proper conditions, the Cyclamen is remarkably easy to grow. (We offer seed of our superb strain of *C. giganteum* at the end of this catalogue.)

Eremurus READY IN SEPTEMBER

A noble, bulbous plant from northern India, especially attractive, peerless in its majestic magnificence, compelling admiration by its gigantic proportions and the sweetness of its perfume, a plant not easily forgotten when seen well grown. It is a hyacinth-like perennial, starting growth quite early in the spring. Coming from a cold country it is perfectly hardy, but enjoys good, rich soil, and responds handsomely to liberal treatment. They thrive admirably in deep, rich, sandy loam with the addition of well-decayed cow manure. They need plenty of water in the flowering period, but require good drainage. When well established they should not be disturbed, as the roots are extremely brittle. The surface soil above the roots should be kept clean by hand-weeding and enriched by occasional applications of old manure, leaf-mold and a little sand well mixed. Autumn planting is desirable, and the crown should be covered with a mound of ashes over winter, or with a box with a water-tight top and filled with dry leaves. Protect the stems from frost when coming into flower in spring.

Eremurus

Crinum

Splendid, large-flowering bulbs, closely allied to the amaryllis. The most suitable soil is a compost of turfy loam, cow-manure and some sand. They should be grown in large pots or tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a coolhouse and allowed to rest until new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure-water during the growing season. They may be placed outside when warm weather begins, and will flower all through the summer, making splendid lawn or veranda plants.

<b>Asiaticum.</b> Pure white. Large bulbs.....	Each \$0 75
<b>Amabile, Giant Pink.</b> Extra large, bright pink, with white stripe; splendid flower; enormous bulbs. Unsurpassed for growing in tubs, blooming profusely outside all summer, and forming a most excellent porch decoration.....	2 50
<b>Kirki.</b> Large umbels of beautiful pure white flowers, with purple stripe in center of each petal.....	1 00
<b>Powellii.</b> Produces long stems, bearing at the top five to eight large, dark rose, bell-shaped flowers, 3 to 4 inches long.....	30
<b>Powellii album.</b> Pure white.....	50

**Fritillaria imperialis.** See Crown Imperials, Page 17.

**Freesia**

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in good, loamy soil, with an admixture of leaf-mold and sand, in a frame or greenhouse, and are excellent for window culture in winter. For the information of all not acquainted with these bulbs, we may say that they are quite small, but produce large blooms in comparison to their size.

**Freesia refracta alba.** The body of the flower is a pure white, with lower segments spotted lemon-yellow. Their fragrance is remarkable and very lasting.

Mammoth-size bulbs. 35 cts. per doz., \$2.50 per 100, \$15 per 1,000.

First-size bulbs. 25 cts. per doz., \$1.75 per 100, \$12 per 1,000.

Second-size bulbs. 20 cts. per doz., \$1.25 per 100, \$9 per 1,000.

**Freesia, “Purity.”** Magnificent, glistening pure white flowers of large size, borne on strong, lengthy stems, each truss bearing eight to ten buds, five or six of which are frequently open at the same time.

First-size bulbs. 50 cts. per doz., \$3 per 100.

Mammoth bulbs. 90 cts. per doz., \$6 per 100.

**Freesia Leichtlinii major.** Creamy white, shading to yellow, with orange blotch; distinct. 40 cts. per doz., \$2.50 per 100.

**Freesia refracta alba**

## Dwarf Gladiolus READY IN NOVEMBER

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse. Some varieties are successfully forced.

The Primulinus Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty and of most exquisite tints and shades; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding. Named varieties will be found in our General Catalogue, published January 1.

### Dwarf Gladiolus, continued

**PRIMULINUS HYBRIDS.** Extremely vigorous and healthy growers, blooming in July and August. Grow 3 to 5 feet high, with long spikes of richly colored blooms, varying in color from clear yellow to crimson, the latter with large, soft orange or golden throats. 15 cts. each, \$1.75 per doz., \$12 per 100.

**Ramosus, Ne Plus Ultra.** Crimson and white blotch. 8 cts. each, 60 cts. per doz., \$3.50 per 100.

**Ramosus in Mixture.** 5 cts. each, 35 cts. per doz., \$2.25 per 100.

## Gloxinias

### READY IN NOVEMBER

Gloxinias are among the most beautiful of greenhouse plants, being remarkable for the intensity and variety of their colorings and the exquisite manner in which they are often blotched mottled, penciled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mold and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large, and of erect-flowering strain:

Gladiolus Primulinus

## *Iris* (*Fleur-de-lis*)

**READY IN OCTOBER AND NOVEMBER, EXCEPT JAPAN IRIS, WHICH WILL NOT BE READY UNTIL JANUARY AND INTO SPRING**

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light, rich, sandy soil, and in a sunny situation. With the exception of *Moræa Pavonia*, all varieties are hardy. Good drainage is important. The varieties of *Iris Kaempferi*, from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 to 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms measuring 8 to 10 inches across. These require a liberal supply of water when growing.

### **Superb Collection of Large-Flowered Japan Iris (*Iris Kaempferi*)**

**READY IN JANUARY AND INTO SPRING**

We are importing from Japan a large supply of the following twenty of the best of these magnificent Irises, which excel in size, perfection of form and richness of color. These are most valuable for cut-flowers and table decoration—as handsome as orchids. Flowers should be cut in the early morning or after sunset. The roots come in large clumps. *The descriptions given are those furnished us by the growers in Japan.* May be ordered by numbers.

**30 cts. each, \$3 per doz., \$20 per 100. Transportation charges extra**

- 13 **Boteki-no-Koe.** Pure white, heavily veined lavender, with pale primrose blotches; standards wine-color, lighter toward edges, stigmas lavender. Three large petals. Striking.
- 26 **Date-dogu.** Rich claret-red, yellow blotches. Three petals.
- 89 **Fuyoho.** Large; pure white, yellow blotches; three very large petals.
- 31 **Gei-Sho-Ui.** Claret-red, veined white; standards shaded lavender, darker toward the edges, yellow blotches.
- 4 **Ho-o-jo (Ho-o-Castle).** Ruby-crimson, primrose blotches; standards white and lavender.
- 37 **Katsuraotoko.** White, veined lavender; standards white, suffused with lavender, darker toward the edges, pale yellow blotches. Six petals.
- 15 **Momiji-no-Taki.** Ruby-red, yellow blotches; standards white, spotted toward edges pale wine-color. Six petals.
- 30 **Noboro-Ryu.** Intense Tyrian blue, with yellow blotches; standards white, edged violet.
- 9 **Ran.** Royal purple, edged lavender, with large primrose blotches; standards wine-red, white at base. Six petals; large and distinct.
- 34 **Sassa-no-Koe.** White, veined wine-red and blotched yellow; standards lavender, running to purple at edges. Three petals.
- 20 **Senjo-To.** Light wine-color, spotted and shaded to dark red toward the edges of the petals, suffused with white, yellow blotches; standards shading to purple.
- 40 **Shiguremomiji.** Blush-pink, darker toward edges, splashed wine-red; stigmas lavender, primrose blotches. Three petals.
- 21 **Shikainami.** Light blue, shading to dark blue edges, white-veined, yellow blotches; standards shaded lavender, with dark edges. Six petals.
- 6 **Shippo (Cloisonne).** Rich tyrian blue, edged purple and veined white, yellow blotches; standards white and wine-color. Large flowers.

**Iris Kaempferi, or Japan Iris**

- 14 **Shiraga.** Deep purple, heavily veined white; standards lavender, darker toward edges, yellow blotches. Large flowers. Six petals.
- 17 **Suibijin.** Claret-red, darker toward edges; standards white, veined and edged pale wine-color; stigmas wine-color; three petals.
- 44 **Ujigawa.** Rich, vinous purple; standards blush-pink; stigmas lavender, radiating to purple edges, canary-yellow blotches. Three immense petals.
- 50 **Ushio-no-Iro.** Violet, veined white; standards white, edged sky-blue, yellow blotches. Seven or eight petals.
- 7 **Yamato-Nishiki.** Pale lavender, running to purple on outside of petals, blotched and flaked dark purple, large primrose blotches. Immense flower. Three petals.
- 8 **Yodokuruma.** Pale wine-color, veined darker, large orange blotches; standards very erect. Gigantic blooms. Three petals.

**Mixed.** Without names. 25 cts. each, \$2.25 per doz., \$15 per 100.

### **Spanish Iris (*Iris Hispanica*)**

**Not less than one dozen of a kind at dozen rates**

Very profitable for florists, who are planting them largely for cut-flowers. Plant in beds in the open as soon as received in the autumn, and protect during the winter months. In the beginning of April cover the beds with glass, so as to have the flowers ready for cutting in May.

Iris Hispanica

*Ixias* READY IN OCTOBER

The Named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them.

They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting.

If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

**Ambassador.** Carmine-violet. 3 for 10 cts., 30 cts. per doz., \$1.75 per 100. Each Doz. 100

Various Ixias

## *Lachenalia* READY IN SEPTEMBER

Very pretty, spring-flowering, greenhouse bulbous plants of elegant habit and with brightly colored flowers. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mold and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air and keep near the glass to insure sturdy growth. *Lachenalias* are also excellent subjects for hanging-baskets.

	Each	Doz.
<b>Luteola.</b> Pale yellow flowers flushed with green.....	\$0 20	\$2 00

*Montbretia, crocosmæflora*

## *Montbretia* READY IN NOVEMBER

Hardy, summer-flowering bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties.

	Each	Doz.	100
<b>Crocsmæflora aurantiaca.</b> Deep golden yellow, fine spike.....	\$0 05	\$0 35	\$2 25

## *Nerine*

READY IN OCTOBER AND NOVEMBER

Very beautiful greenhouse bulbous plants succeeding best in pots in light soil—say a compost of loam, leaf-mold and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die, they should be kept quite dry in a cool place until they begin to grow again.

	Each
<b>Flexuosa.</b> Bright crimson-scarlet, tinged with orange.....	\$3 00
<b>Fothergilli major.</b> A magnificent plant for house or conservatory. Intense shining scarlet. By artificial light the crystalline cells of the petals sparkle like jewels. Flowers freely.....	1 75

*Muscari, or Grape Hyacinth*

*Nerine, continued*

**Sarniensis** (True Guernsey Lily). Flowers brilliant crimson, in large clusters. The best-known sort..... \$0 60  
**Undulata**. Rosy carmine, edged white; very handsome..... 1 25

**Oxalis** READY IN SEPTEMBER

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging-baskets. They are easily grown in a sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

**Buttercup**. A splendid winter-bloom. Each Doz. 100  
 ing plant for pot culture. The flowers are pure, bright yellow, and produced in great abundance. It is very easily cultivated and, being a strong grower, only one or two bulbs should be planted in a 5- or 6-inch pot. First size. \$0 05 \$0 40 \$2 50  
**Bowiei**. Crimson..... 3 for 10c... 35 2 00  
**Grande Duchesse**—  
   **grandiflora alba**. White. 3 for 10c... 35 1 75  
   " **Lavender**..... 05 35 2 00

**Rubella**. Purple..... 3 for 10c... 35 1 75  
**Mixed**..... 2 for 5c... 20 1 00

Nerine Sarniensis

**Paeonies** READY IN OCTOBER

The old-fashioned double Pæonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Pæonies rank about first for lawn or flower-border or shrubbery decoration. Pæonies do best in deep, rich, rather moist soil. The plants are gross feeders, and the soil should be well worked before planting, and enriched with cow manure. Clean cultivation should be given. An annual top-dressing of short, well-rotted manure should be given in November, and forked into the soil in spring. Liquid manure, given in the growing season, helps the bloom wonderfully. They need abundant water, and if they suffer from drought at blooming time there are likely to be small flowers and blighted buds. The crowns should be set in planting about 2 inches below the surface. They may be set in spring or fall. They are all hardy. We offer only strong, flowering roots, with not less than three eyes.

Festiva maxima Pæony

**Herbaceous Chinese Paeonies**

<b>Viridiflora.</b> Scarlet; green center.....	35	2 00
<b>Mixed Turban</b> .....	20	1 00

*Richardia* (*Calla*)

READY IN OCTOBER AND NOVEMBER

Tall-growing, bulbous perennials of graceful habit, and handsome foliage and flowers. They are easily cultivated in pots, requiring only rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting in September.

	Each	Doz.	100
<b>White Calla, or Lily of the Nile</b> ( <i>Calla athiopica</i> ). Large, white, trumpet-shaped flowers of great substance. One of the most popular ornamental house and greenhouse plants. Largest-size bulbs.....	\$0 30	\$2 75	\$16 00
Second-size bulbs.....	25	2 00	12 00

<b>ELLIOTTIANA, Yellow, Spotted Leaf.</b> Dark green leaves, spotted silvery white...	35	3 25	

Calla, Little Gem

Scilla

READY IN SEPTEMBER

*S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years. The effect in early spring of the intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the snow-drop and the varied hues of the crocus, is very striking; most valuable for permanent edging, or planted in bunches of a dozen or so.

**Sibirica.** Blue. Extra-large bulbs. 30c. per doz., \$1.75 per 100.

**Sibirica alba.** White-flowered variety of the above. 30 cts. per doz., \$1.75 per 100.

**Bifolia.** Blue. 30 cts. per doz., \$1.75 per 100.

**Campanulata** (Wood Hyacinth). Blue. 30 cts. per doz., \$1.75 per 100.

“ **alba.** White.....

Snowdrops

Snowdrops (*Galanthus nivalis*)

READY IN SEPTEMBER

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms. Should be planted 2 to 3 inches deep in a shady location.

**Single-flowering Snowdrops.** 25 cts. per doz., \$1.25 per 100, \$7.50 per 1,000.

**Double-flowering Snowdrops.** 30 cts. per doz., \$1.75 per 100, \$14 per 1,000.

**Giant Snowdrops of Asia Minor** (*Galanthus Elwesii*). Extra-size bulbs. 30 cts. per doz., \$1.75 per 100, \$12 per 1,000.

Spiraea, or Astilbe

READY IN NOVEMBER

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

**Astilbe Arendsi, Ceres.** Bright rosy lilac; very fine.....

**Astilboides floribunda.** Very large, pure white plumes; neat habit; very abundant bloomer.....

**GLADSTONE.** A hybrid Spiraea, with beautiful, snow-white plumes, borne on strong stems 1½ feet long, standing erect above the foliage. The plant is perfectly symmetrical in shape, the foliage very handsome and the flowers exquisitely fragrant. Fine forcer.....

**Japonica** (Hoteia). Excellent pot-plant for winter-blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting.....

“ **compacta multiflora.** The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant.....

Each	Doz.
\$0 50	\$5 00
30	3 00
35	3 25
25	2 50
30	3 00

*Spiraea*  
Naarden

*Spiraea, continued*

Each Doz.

**Naarden.** Pink-flowering; early bloomer. Fine forcer.....

\$0 75

**Palmata.** Crimson; strong clumps.....

30 \$3 00

**QUEEN ALEXANDRA, PINK.** A splendid pink variety, in habit similar to the well-known Gladstone, but flowering two weeks later. It is a very free bloomer and bears its flowers well above the strong, dark green foliage. When forced it must be shaded, as soon as it starts to color. It is a splendid outdoor plant, being as hardy as the old *Spiraea japonica*. Its color will not fade even in the brightest weather.....

40 3 50

**WASHINGTON.** A splendid decorative plant, producing extra-large flowers. Strong grower; fine for forcing.....

30 3 00

## Trillium

(American Wood-Lily, or Indian Shamrock)

Hardy herbaceous perennials succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are natives

of North America, and are known by various common names in different localities. They have violently emetic roots.

	Each	Doz.	100
<b>Erectum.</b> Dark purple; erect habit.....	\$0 10	\$0 80	\$5 25

**Grandiflorum** ("Giant American Wood-Lily," or "Wake-Robin"). Large, white flowers, changing to rose; quite hardy, and easily grown in shaded positions.....

07 65 3 75

**Ovatum.** White, changing to rose.....

10 80 5 25

**Sessile californicum.** A strong plant, 1 ft. high, with the separate leaves 5½ inches long by 4½ inches wide and the petals 3½ inches long. Flowers pure white with purple centers; very fragrant.....

12 1 10 6 50

" **rubra.** Same as Californicum, with narrow petals; deep maroon-purple to reddish purple.....

12 1 10 6 50

" **Snow Queen.** Flowers pure white with creamy centers and with broad petals....

12 1 10 6 50

*Trillium sessile californicum*

## Tuberose

READY IN DECEMBER

The purity of color and rich perfume of the Tuberose are well known in this latitude. May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich, warm soil and a sunny situation. Set so that the top will be 1 inch below the surface of the soil.

	Each	Doz.	100
<b>Dwarf Double Pearl.</b> Dwarf habit; large, fine flowers of great substance... per 1,000, \$12..	\$0 08	\$0 50	\$2 50
<b>Albino.</b> Purest white; single flowers.....	08	60	3 25
<b>Variegated-Leaf.</b> Foliage striped white and green; single white flowers.....	08	60	3 25

Anthericum Liliastrum major

Ornithogalum arabicum

Cooperia peduncularis

## Miscellaneous Bulbs and Roots

Those marked with an asterisk (\*) will not be ready till October or November

	Each	Doz.	100
* <b>Achimenes</b> . Mixed. Lovely greenhouse pot-plants.....	\$0 06	\$0 60	\$3 25
<b>Aconite</b> . See Eranthis.			
* <b>Alstroemeria</b> aurea ( <i>Aurantiaca</i> ). Orange-yellow, spotted black.....		50	
" brasiliensis. Deep red, with black spots.....		70

* <b>Zephyranthus</b> Texana. 5 cts. each, 50 cts. per doz., \$3 per 100.			

Hyacinthus candicans

Watsonia Ardernei

# Hardy Annual and Perennial Flower Seeds

## FOR AUTUMN SOWING

Many varieties of flower seeds, **Annuals** as well as **Biennials** and **Perennials**, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring. For full descriptions see our General Seed Catalogue.

## Pansy

To have fine Pansies for spring flowering, the seed should be sown in frames in August, and not later than September.

**Thorburn Superb.** The richest and most choicely varied mixture possible. It produces only the finest colors, largest flowers and most beautiful forms ..... \$1 50 \$5 00 \$0 25

**Bugnot Superb Blotched.** An exceedingly large, three-blotted strain, with upper petals finely lined; great diversity of finest colors..... 1 25 4 00 25

**Cassier, Finest Mixed.** Flowers of grand size; beautifully spotted..... 1 25 4 00 25

**Masterpiece.** Curled, wavy petals, splendid colors; distinct. 50 1 75 15

**Masterpiece.** From the originator ..... 1 75 6 00 35

**Madame Perret.** A splendid giant-flowered strain, comprising all shades of red from light rose to dark purple, some  $\frac{1}{4}$ oz. Oz. Pkt. of them finely striped.... \$0 35 \$1 25 \$0 10

**Giant Orchid-flowered Mixed.** A splendid, distinct race, showing remarkable combinations of colors, including shades of chamois, terra-cotta, orange, etc. .... 60 2 00 15

**Non Plus Ultra.** A very rich mixture largely made up of **Cassier** and **Trimardeau** varieties..... 1 25 4 00 25

**Parisienne Mixed.** Handsome, large-flowering strain . 60 2 00 15

**Fine Large English.** All colors mixed..... 45 1 50 10

**Mixed.** Ordinary strain..... 20 75 05

**Azure-Blue.** Very fine color. 35 1 25 10

**Black-Blue.** Dark velvety, almost black..... 35 1 25 10

**Black** (*Faust; King of the Blacks*). Almost coal-black.. 35 1 25 10

**Cardinal.** Brilliant red; very fine..... 85 3 00 25

**Coquette de Poissy.** Distinct mauve, shading to white on the petals..... 35 1 25 10

**Dark Purple**..... 35 1 25 10

**Emperor William.** Splendid; ultramarine-blue; very showy..... 35 1 25 10

**Fairy Queen.** Light blue with white border..... 35 1 25 10

**Fawn-Color** (*Prince Bismarck*).  $\frac{1}{4}$ oz. Oz. Pkt. Quaint and pretty..... \$0 35 \$1 25 \$0 10

**Fire King.** Golden yellow, upper petals purple..... 35 1 25 10

**Golden Queen.** Pure yellow..... 45 1 50 10

**Light Blue.** Lovely sky-blue..... 45 1 50 10

**Lord Beaconsfield.** Deep purple-violet, shading to light blue..... 35 1 25 10

**Meteor.** Bright yellow and brown, attractively blotched and margined. 35 1 25 10

**Orange.** (*New*). Very fine..... 60 2 00 15

**Peacock.** Large, peacock-blue flowers, edged with white..... 35 1 25 10

**President Carnot.** Pure white petals, each with a deep blotch... 75 2 50 25

**Rainbow, or Pheasant's Eye** (*Quadricolor*). Very fine strain..... 45 1 50 10

**Snow Queen** (*Candidissima*). Pure satiny white..... 45 1 50 10

**Tufted Pansies.** A splendid strain;  $\frac{1}{4}$ oz. Oz. Pkt. small, but very fragrant flowers.. \$0 45 \$1 50 \$0 10

**TRIMARDEAU GIANT.** This strain has remarkably large flowers, carried well above their leaves, and generally marked with large blotches; plants are extra vigorous and compact.

**Giant White**..... 45 1 50 15

**Bridesmaid.** Most beautiful rosy white ground with dark center blotches..... 75 2 50 25

**Pure Yellow** (*Golden Crest*) 45 1 50 15

**Ruby King.** Richest shades of red, scarlet, orange-scarlet and wine-red..... 60 2 00 20

**Lord Beaconsfield.** Lavender and purple..... 60 2 00 20

**Prince Henry.** Darkest blue; splendid..... 75 2 50 25

Specimen from Collection of Thorburn Superb Pansies

**Trimardeau Giant Adonis.** Light  $\frac{1}{4}$ oz. Oz. Pkt. blue. Splendid..... \$0 75 \$2 50 \$0 25

**Azure-Blue** (*Light Blue*) Pure color..... 60 2 00 20

**Fire King.** Very showy. 45 1 50 15

**Hortensia, Red.** Splendid..... 60 2 00 20

**Auriculæflora.** Beautiful shades..... 45 1 50 15

**Yellow.** Dark center.... 45 1 50 15

**White, with Dark Eye.** 60 2 00 20

**Mixed**..... 35 1 25 10

Cultural directions in our General Catalogue. Any one requiring fuller details should get Wm. Falconer's book on Mushroom Culture, sent postpaid for \$1.

**English Spawn.** In bricks, weighing about 1½ lbs. Per brick 20 cts., 100 bricks \$12.

**American Spawn.** In bricks, weighing about 1 lb. Per brick 20 cts., 100 bricks \$16.

**French Spawn.** In bulk. Per lb. 30 cts., 10 lbs. \$2.50.

# Insecticides and Remedies for Plant Diseases

(All subject to change in price.) If ordered by parcel post, add 5 cts. to 12 cts. per lb. according to zone, for postage

**ANTIPEST.** A sure destroyer of all insect pests. Qt. 45 cts.,  $\frac{1}{2}$  gal. can 65 cts., gal. can \$1.25.

**APHINE.** Has no equal for the destruction of green, black or white fly, thrips, red spider, mealy bug, etc. Use one part to forty of water. Does not injure the most tender plants.  $\frac{1}{4}$  pt. 25 cts.,  $\frac{1}{2}$  pt. 40 cts., pt. 65 cts., qt. \$1, gal. \$2.50.

**ARSENATE OF LEAD.** Does not injure tender foliage. Lb. 20 cts., 5 lbs. 90 cts., 10 lbs. \$1.75, 20 lbs. \$2.75, 100 lbs. \$12.

**BORDEAUX MIXTURE, DRY.** For all fungous diseases. 1-lb. box 20 cts., 5 lbs. and over at 18 cts. per lb.; 50 lbs. \$7.50. Liquid, qt. 35 cts., gal. 85 cts.

**BUG DEATH.** This is a fungicide, insecticide and plant-food combined. 1-lb. package 15 cts., 3-lb. package 35 cts., 5-lb. package 50 cts., 12 $\frac{1}{2}$ -lb. package \$1, 100-lb. package \$7.50.

**DALMATIAN INSECT POWDER.**  $\frac{1}{2}$  lb. box 30 cts., 1-lb. box 50 cts.

**FIR-TREE OIL.** For greenhouse and house plants. Destroys insects without injuring plant. Dilute 1 pint to 20 gallons water. Apply with vaporizer or syringe.  $\frac{1}{2}$  pt. 40 cts., pt. 75 cts., qt. \$1.25,  $\frac{1}{2}$  gal. \$2.25, gal. \$4.

**FIR-TREE-OIL SOAP.** Mix at the rate of 1 ounce to a gallon of water, and apply with a bellows or syringe.  $\frac{1}{2}$  lb. tin 25 cts., 2-lb. tin 75 cts.

**FISH-OIL SOAP.** For washing trees and destroying all insects on the bark. 1-lb. box, 15 cts., 5 lbs. 50 cts., 10 lbs. 90 cts., 100 lbs. \$7.

**GRAPE DUST, HAMMOND'S.** For the prevention of mildew on roses, grapes, gooseberries, etc. Apply with bellows. 5-lb. pkg. 35c., 10-lb. pkg. 60c., 100 lbs. \$5.

**HELLEBORE.** Apply dry or mix in water—1 oz. to 3 gals. 2-lb. box 45 cts.; 1-lb. box 25 cts.

**KEROSENE EMULSION.** For cabbage worms, scale on trees, caterpillars, melon louse, rose bugs, green fly, etc. Dilute 25 to 50 parts. Qt. 40 cts., gal. \$1.

**LEMON OIL.** For destroying scale, caterpillar, mealy bug, etc. Directions on can.  $\frac{1}{2}$  pt. 25 cts., pt. 40 cts., qt. 75 cts., gal. \$2.

**NICOTICIDE.** For fumigating or spraying. Effective against green fly, mealy bug, etc. Does not damage foliage or flowers. Sold in cans as follows: No. 1, 1 pt., sufficient for 32,000 cubic feet of space, \$2.75 each; No. 2,  $\frac{1}{2}$  pt. sufficient for 16,000 cubic feet of space, \$1.50; No. 3, 4 ozs., sufficient for 8,000 cubic feet of space, 70 cts. Gals. \$17 each,  $\frac{1}{2}$  gals. \$9 each, qts. \$5 each. Fumigators, 50 cts. each.

**"NICO-FUME" TOBACCO PAPER.** For fumigating. Does not injure blooms. In tins. 24 sheets, \$1, 144 sheets, \$4.50, 288 sheets \$8.50.

**NICO-FUME LIQUID.** For fumigating or spraying. Effective against green fly, mealy bug, etc. Does not stain or injure blooms, and leaves no disagreeable odor. For spraying, 1 to 2 teaspoonfuls to a gallon of water.  $\frac{1}{4}$  pt. 60 cts., pt. \$2,  $\frac{1}{2}$  gal. \$7.50, gal. \$13.50. Lamps 50 cts. each.

**PARIS GREEN.** Mix at the rate of 1 lb. to 200 gals. of water. 1-lb. can 35c.,  $\frac{1}{2}$  lb. can 20c.,  $\frac{1}{4}$  lb. can 12c.

**SLUG-SHOT, HAMMOND'S.** Excellent for destroying cabbage, turnip and beet fly, potato bugs, currant worms, etc. 5-lb. package 35 cts., 10-lb. pkg. 60 cts., 100-lb. pkg. \$5.

**SULPHO-TOBACCO SOAP.** Dissolve in proportion of 2 ounces to a gallon of water, and apply with a syringe or atomizer. It will destroy rose slugs, aphides, green fly, bark lice, etc. 3-oz. box 10 cts., 8-oz. box 20 cts., 10-lb. box \$3.

**SULPHUR, POWDERED.** Protects against mildew on grapes, roses, etc. Lb. 10 cts., 10 lbs. 60 cts.

**TOBACCO DUST, Ordinary Kind.** For dusting. Lb. 10 cts., 5 lbs. 35 cts., 10 lbs. 60 cts., 100 lbs. \$3.

**Stoother's "Black Stuff."** For dusting. 50 lbs. \$2.25, 100 lbs. \$4.

**Stoother's "Fumigating Kind."** For burning. 50 lbs. \$2.25, 100 lbs. \$4.

**TOBACCO STEMS.** For fumigating plants infested with green fly. In bales of about 100 lbs. each, \$1.50 per 100 lbs.

**TREE TANGLEFOOT.** A sticky substance applied directly to the bark. For protecting trees against climbing insect pests in a simple, economical and effective way. One application remains sticky, fully exposed to weather, three months. One pound will make a band 7 to 8 feet long. 1-lb. can 30 cts., 3 lbs. 85 cts., 10 lbs. \$2.65, 20 lbs. \$4.80.

**X-L-ALL LIQUID INSECTICIDE.** For spraying. Purely nicotine; harmless to very delicate plants; kills mealy bugs, red spider and all insect pests. Pt. 65 cts., qt. \$1,  $\frac{1}{2}$  gal. \$1.75, gal. \$3.50.

## For San Jose Scale

**Lime-Sulphur Solution** (California Wash). One gallon makes 25 by adding sufficient water. Qt. 40 cts., gal. \$1, 5 gals. \$3.50; in bbl. lots at 50 cts. per gal.

**Scalecide.** Petroleum oil that mixes at once with cold water and stays mixed. No hot water necessary. Add 1 gallon for every 15 to 20 gallons of water. Qt. 40 cts., gal. \$1, 5 gals. \$4.

# Thorburn's High-Grade Fertilizers, all f.o.b., N. Y.

## Thorburn's Lawn Fertilizer

Per ton \$45, single bags of 167 lbs. \$5, per bag of 100 lbs. \$3, 50 lbs. \$1.75, 25 lbs. \$1, 10 lbs. 50 cts.

## Thorburn's Complete Manure

Per ton \$40, single bag of 167 lbs. \$4, bag of 100 lbs. \$2.75, 50 lbs. \$1.65, 25 lbs. \$1, 10 lbs. 50 cts.

## Pure Ground Bone Meal, No. 1

Finely pulverized. 5 lbs. 25 cts., 10 lbs. 40 cts., 25 lbs. 75 cts., 50 lbs. \$1.25, 100 lbs. \$2.25, per ton \$33.

## Thompson's Vine Manure

Unrivalled for vines, tomatoes, cucumbers, fruit trees, and all foliage, flowering and fruit-bearing plants and outdoor plants of every description. Splendid for lawns, etc. Per cwt. (112 lbs.) \$6.75,  $\frac{1}{2}$  cwt. (56 lbs.) \$3.50.

## Clay's Celebrated Fertilizers

One of the best manures for all horticultural purposes. 1 cwt. (112 lbs.) \$7,  $\frac{1}{2}$  cwt. (56 lbs.) \$4,  $\frac{1}{4}$  cwt. (28 lbs.) \$2.25,  $\frac{1}{8}$  cwt. (14 lbs.) \$1.25.

## Bowker's Ammoniated Food for Flowers

The best dressing for potted plants. Small package 15 cts., large package 25 cts.

## Canada Hard-Wood Ashes

Highest grade, extra screened, unleached. In bags of about 100 lbs. \$1.50, per ton \$24, barrel of 200 lbs. \$3.

## Pulverized Sheep Manure

1-lb. package 10 cts., 5-lb. package 25 cts., 25 lbs. 75 cts., 50 lbs. \$1.25, 100 lbs. \$2, ton \$30.

## Horticultural Implements, Etc.

## Grass Seed for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the middle of September, so that the young grass may become well rooted before winter sets in. The sowing should be done when the ground is moist or before expected rain; after sowing the ground should be rolled.

### The Thorburn Lawn Grass

Many of the finest lawns in America were produced from this mixture. It is composed of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich greensward in three or four weeks from the time of sowing. (The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture.) It should be sown at the rate of 4 to 5 bushels to the acre. Per pt. 15 cts., qt. 25 cts., 2 qts. 45 cts.,  $\frac{1}{2}$  pk. 75 cts., pk. \$1.40, bus. of 20 lbs. \$5.

### Thorburn's Grass Mixture for Shady Spots on Lawns

A mixture of grasses that thrive in shaded situations under trees, or close to walks where there is little sun. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$  pk. \$1.25, pk. \$2, bus. of 22 lbs. \$7.

### Thorburn's Grass Mixture for Terraces

A mixture of fine stoloniferous grasses peculiarly adapted to terraces. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$  pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

## Also Permanent Grass Seed for Golf-Links, Tennis Courts, Polo-Grounds, etc.

We have devoted much attention to the seeding and preservation of golf-links, tennis-courts and polo-grounds, and offer the following mixtures, which have been used on most of the finest links, etc., in this country with very satisfactory results.

### Tennis-Court Mixture

A mixture of extra-fine grasses peculiarly adapted to tennis-courts. This mixture will make a firm, green and lasting turf of the finest texture, that will improve with trampling. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$  pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

### Grass Mixture for Railroad Banks, etc.

A mixture of grasses with long, interlacing, matting roots that will bind steep embankments, gravelly or sandy slopes, etc., preventing washouts by rainstorms and covering them with permanently green turf. Per qt. 30 cts., 2 qts. 50 cts.,  $\frac{1}{2}$  pk. 80 cts., pk. \$1.25, bus. of 18 lbs. \$4.50.

### Thorburn's Lawn-Restoring Grass Seed

A mixture of grasses that will take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-restoring Grass Seed** should be sown before every summer rain on thin places. Per qt. 35c., 2 qts. 60c.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

### Thorburn's Lawn Grass for the South

A mixture of grasses that stand extremes of heat and drought, and that are, therefore, peculiarly adapted to southern lawns. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.50.

### Fair-Green or Golf-Links Mixture

For the grounds in general. Per bus. of 20 lbs. \$4.

### Putting-Green Mixture

A mixture of extra-fine grasses that will make a close, firm, green and lasting turf, which will improve with trampling. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$ pk. \$1.25, pk. \$2, bus. of 24 lbs. \$7.

### Polo-Grounds Mixture

A mixture of fine-leaved and deep-rooting grasses, forming a strong and lasting turf that will stand hard usage. Per bus. of 20 lbs. \$4.

## CATALOGUE

OF

## Bulbs and Flowering Roots, also Flower and Vegetable Seeds for Fall Planting

---

We have the pleasure of again presenting to our old friends and all interested in Gardening, our **ANNUAL CATALOGUE** of **Bulbs**, etc., for **Fall Planting**.

---

Even the most superficial lover of Nature must admit that the cultivation of **BULBS** for Winter and Spring flowering is a peculiarly interesting attraction, whether, when grown indoors, or scattered profusely throughout the extensive grounds of a country residence, or planted in and about the small suburban garden.

When the average man sees a pretty bed of Hyacinths, Tulips, or other showy Bulbs, in the Spring, he generally determines to have "something like that" in his own front or back garden next year, but when September or October arrives he is apt to forget all about the pretty bed until the Spring displays appear again. Therefore—order your Bulbs **EARLY** and plan out the beds for them now.

**Bulbs may be grown indoors in the winter months**, when flowers are most appreciated. By successive plantings a constant supply of blooms can be had from December until May. The finest outdoor displays of the early Spring months are also from bulbs planted in the

Autumn. The cultural directions found under the respective headings are worthy of careful attention.

**Our bulbs are all selected**, coming from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation, and often sold at auction and otherwise, at very low prices.

**NAME AND ADDRESS.** *We often receive orders with either the name or the address of the sender omitted. As we can do nothing with such orders, the customer thinks his order is being neglected. We therefore beg our correspondents to be careful to write on each order their name and full address.*

**ORDERS** should be sent as soon as possible after receipt of this catalogue. *The bulbs will be shipped in proper time for planting. They are ready from August to November, according to the time of ripening and the country from which they come. Orders received earliest are sure of being filled in full. If left too late, the supply of some of the varieties may be exhausted.*

**Prices, as will be seen upon comparison with others are as low as Highest Grade Bulbs can be sold at, and do not include transportation.**

We indicate under each heading of the various Bulbs, the mailing weight when packed, so that if wanted by parcel post, our Customers can determine the amount required to be added for postage according to Zone rate, as per table below.

The weights given are those taken from our stock last year, and may vary in some instances; should there be any difference in weight when orders are filled, the postage will be adjusted, and any amounts over remitted will be returned.

On shipments of 15 lbs. and upwards it is best to send by express, wherever possible, as by special arrangements with the express companies, bulbs travel at a reduction of 25 per cent. from regular rates; it is therefore both safer, and, in nearly all cases, cheaper, to send large packages by express instead of by mail.

## PARCEL-POST ZONE RATES

# Hyacinths

THESE BULBS ARE READY FOR  
DELIVERY IN SEPTEMBER

If to be sent by mail add postage at zone rates

The Hyacinth is one of the most popular and beautiful spring-flowering plants for indoor and outdoor decoration. By careful management in keeping up a succession, it may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground it is unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height, and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

**OUTSIDE CULTURE.** In this section, October is the month to plant Hyacinths outside. They succeed best in a light soil and a sunny situation. If the soil is naturally heavy, some sand should be mixed with it, and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs. Some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has been frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field-mice which may burrow into it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibrous loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September to the end of November. Plenty of water should be applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.** Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten to twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

Customers unacquainted with the different varieties will do well to leave the selection to us, only specifying in their order whether bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortments of Named Hyacinths of our selection offered on page 4, and to the Hyacinth Glasses which are quoted at the end of the catalogue.

The names of our Hyacinths and Tulips are those given to them by the originators in Holland, and they are not sold under fancy names manufactured in this country

## Select Named Dutch Hyacinths

N. B. Our Select Named Hyacinths are the cream of the Holland nurseries—and are called top-roots—under their original names. For forcing in pots or for outdoor beds they far surpass the class of Bulbs usually sold.

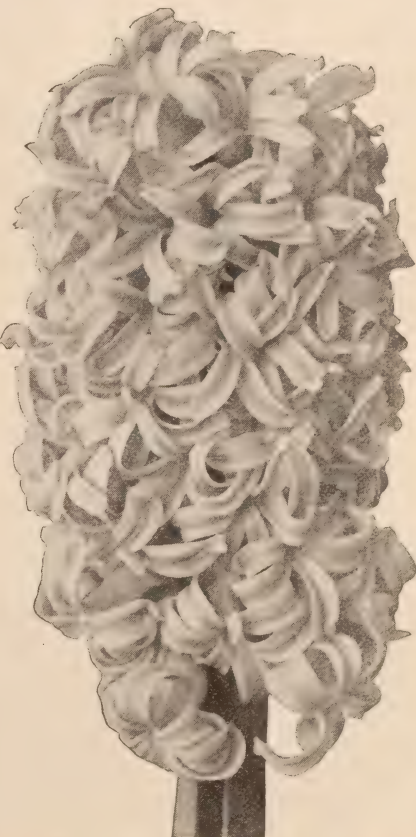

The single-flowered varieties are generally more effective and better for forcing than the double ones. They also, as a rule, succeed better in glasses. The double varieties are distinguished by an asterisk (\*), and those of them that do well for forcing in water, by two asterisks (\*\*).

Not less than six of one kind sold at the dozen rate

If to be sent by mail add postage at zone rates—weight, 4 lbs. per doz.

**Italian Hyacinths****Mailing Weight, 1 lb. doz., 8 lbs. 100.**

Grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are harder than the Romans, and may be planted outside in the fall for flowers for early spring cutting.

	Doz.	100
Single White .....	\$0 60	\$4 50
Single Pink .....	60	4 50

**French Roman Hyacinths****Mailing Weight, 2 lbs. per doz.; 9 lbs. per 100**

Extensively used by florists for forcing cut-flowers. For this purpose they are the best and most popular of bulbs. The flowers are delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown, and extremely early, and by making successive plantings they may be had in flower all through the winter. The blue Roman Hyacinths flower from one to two weeks later than the white variety.

	Each	Doz.	100
Pure White. First size.....	\$0 10	\$0 85	\$5 50

**Miniature Hyacinths****Mailing Weight, 2 lbs. doz.; 10 lbs. 100.**

These are also known as "Dutch Roman" and "Pan Hyacinths." They are very suitable for growing in groups in pots or earthen pans.

White, Bright Red, Blue all shades. 5 cts. each, 50 cts. per doz., \$3.50 per 100.

Mixed Colors. 45 cts. per doz., \$3.00 per 100.

**French Roman Hyacinths**

## Tulips

READY FOR DELIVERY  
IN SEPTEMBER

If to be sent by mail add postage at zone rates

For beauty of form and brilliancy of coloring, Tulips are unequaled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and height, medium or tall, to which they grow, so that purchasers may select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers they are also invaluable.

**CULTURE.**—The cultural directions given for hyacinths, on page 3, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. To obtain the best results it is desirable that they should not be planted in ground where Tulips were grown the previous year. We recommend early planting so that the bulbs may obtain a good root growth before frost sets in. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open ground.

### Duc Van Thol Tulips

Six of a kind at dozen rate, 50 of a kind at 100 rate

If to be sent by mail add postage at zone rates—1 lb. doz., 6 lbs. 100.

The Duc Van Thols are the earliest of all the Tulips. They are of dwarf habit, and well adapted for forcing and for pot culture. They bloom outdoors before the Single Early Tulips.

## Double Tulips

Six of a kind at dozen rate, 50 at 100 rate.

If to be sent by mail add postage at zone rates—1 lb. doz., 5 lbs. 100.

The Double Tulips come into bloom a little later than the single varieties. They are splendid for bedding, and the flowers last longer in bloom than the single ones. Some sorts are quite dwarf. Comparative earliness of flowering is indicated by the letters A B C. "Medium" and "tall" indicate relative height.

(Salmon-rose)

## Parrot Tulips

For outdoor cultivation. The petals of these have feathered edges, and, in addition to other colors, combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant colors, and form very effective groups for the flower-border. To get the best results they must have the full effect of the sun. **Very late-flowering.**

**Narcissus****NARCISSUS ARE READY FOR DELIVERY IN SEPTEMBER**

Narcissus are among the most popular and largely grown of spring-flowering bulbs, and deservedly, too. Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, lakes or ponds, and in mixed flower—or shrubbery—borders. They are also suitable for naturalizing in the grass, by the side of woodland walks, or in open spaces between trees and shrubs.

For growing in pots they require about the same treatment as hyacinths, three or four bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers. With the exception of the Polyanthus section, they are all perfectly hardy.

**Single Narcissus, or Daffodils****ALL LARGEST-SIZED BULBS**

If to be sent by mail add postage of zone rates as per weights indicated.

**Large-Crown, or Trumpet Narcissus**

The varieties belonging to this division have trumpets or crowns that are as long as, or longer than, the perianth segments.

## Single Narcissus, continued

If to be sent by mail, add postage at zone rates as per weights indicated.

## Bicolor

	Doz.	100
<b>Albicans</b> (White Spanish Daffodil). White perianth primrose trumpet. 2 lbs. doz., 10 lbs. 100.....	\$0 50	\$3 00
<b>Empress</b> . One of the largest and most beautiful; white perianth and rich golden yellow trumpet. An excellent forcer. 3 lbs. doz., 17 lbs. 100.....	60	3 50
<b>Grandis</b> . White perianth, yellow trumpet; later than Empress. 2 lbs. doz., 9 lbs. 100.....	40	2 50
<b>Horsfieldii</b> . White perianth, yellow trumpet; very early. 2 lbs. doz., 9 lbs. 100.....	40	2 50
<b>Mrs. Walter T. Ware</b> . Very free-flowering and early; beautiful golden yellow trumpet, well expanded and frilled at the brim. 2 lbs. doz., 9 lbs. 100.....	75	4 00
<b>Princeps</b> . Sulphur-yellow perianth and deep yellow trumpet; long, handsome flowers. Valuable for forcing or outdoor culture. A splendid variety. Largest Mother Bulbs. 2 lbs. doz., 16 lbs. 100.....	35	2 00
<b>Victoria</b> . Creamy white perianth, rich yellow, fluted trumpet. 2 lbs. doz., 14 lbs. 100.....	40	2 50

## Yellow

<b>Ard Righ</b> (Irish King). Yellow; very early. Fine forcer. 2 lbs. doz., 9 lbs. 100.....	75	4 00
<b>Emperor</b> . Large, golden yellow trumpet, deep primrose perianth. One of the best Daffodils for medium and late forcing. It is very free-flowering, with large, solid flowers of great substance. Largest Mother Bulbs. 3 lbs. doz., 17 lbs. 100.....	65	3 50
<b>Goldfinch</b> . Trumpet and perianth a deep golden; extra-large trumpet. 3 lbs. doz., 23 lbs. 100.....	1 00	7 00
<b>Golden Spur</b> . Uniform deep golden yellow. Most popular of the single Narcissus, owing to its earliness and the substance and beauty of its flowers. Largest Mother Bulbs. 2 lbs. doz., 12 lbs. 100.....	75	4 00
<b>Henry Irving</b> . Broad yellow perianth, fine yellow trumpet. Extra early and good for forcing. 1 lb. doz., 8 lbs. 100.....	50	3 00
<b>Major</b> (Trumpet Major). Pure yellow. The old variety. Earliest forcing. 1 lb. doz., 6 lbs. 100.....	50	3 00
<b>Obvallaris</b> (The Tenby Daffodil). Pure yellow; very early. Fine forcer. 1 lb. doz., 7 lbs. 100.....	50	3 00
<b>Spurius</b> (Single Von Sion). Pure yellow; large, expanded trumpet. Excellent for forcing. 3 lbs. doz., 18 lbs. 100.....	40	2 50
<b>Van Waveren's Giant</b> , the largest of all Narcissi, flowers of huge dimensions. Perianth primrose, bright yellow trumpet. 2 lbs. doz., 12 lbs. 100.....each	\$1.25..	14 00

## Short-Trumpet Narcissus

## Incomparabilis

These are crosses between the Yellow Trumpet and Poeticus. The color of the perianth is usually yellow or white.

	Doz.	100
<b>Beauty</b> , perianth sulphur, barred yellow, large cup margined orange scarlet. 2 lbs. doz., 8 lbs. 100.....	\$0 90	\$5 00
<b>Cynosure</b> . Primrose perianth, changing to white, cup pale orange. 2 lbs. doz., 8 lbs. 100....	30	1 50
<b>Figaro</b> . Orange cup. Yellow perianth. 2 lbs. doz., 8 lbs. 100.....	30	1 75
<b>Simplex</b> . Single; yellow; early. Fine for cutting; also for forcing. 2 lbs. doz., 8 lbs. 100..	30	1 75
<b>Sir Watkin</b> . Perianth sulphur, crown yellow, tinged bright orange. This is still the king of the short-cupped Narcissus, and used more generally and in larger quantities than any other short-cupped variety. Valuable as a cut-flower. First size. 3 lbs. doz., 16 lbs. 100.....	60	3 50
<b>Stella</b> . White perianth, yellow cup. Good forcer. 1 lb. doz., 5 lbs. 100.....	30	1 50

## Leedsii

These are crosses between the White Trumpets and Poeticus. The crowns are as large as those of the Incomparabilis group. The perianths are always white; the crowns are mostly white or light yellow.

	Doz.	100
<b>Leedsii Type</b> . Silvery white, lemon cup. 1 lb. doz., 5 lbs. 100.....	\$0 30	\$1 50
<b>Duchess of Brabant</b> . White perianth, lemon cup. Good for forcing. 2 lbs. doz., 14 lbs. 100.....	30	1 75
<b>Minnie Hume</b> (Queen of England). Large white perianth, cup passing from fine lemon to white. 1 lb. doz., 6 lbs. 100.....	30	1 75
<b>Mrs. Langtry</b> . Pure white perianth, large white cup, edged yellow. Splendid for cutting or naturalizing. 1 lb. doz., 5 lbs. 100.....	30	1 75

## Narcissus poeticus

Varieties belonging to this group always have a pure white perianth. The cups are very short, but wide-mouthed, and always more or less deeply rimmed with orange or scarlet.

	Doz.	100
<b>Ornatus</b> . Perianth pure white, cup yellow, margined scarlet. One of the most popular of all; useful for cut-flowers; very early flowering. Mother Bulbs. 1 lb. doz., 4 lbs. 100.....	\$0 30	\$1 75
<b>Recurvis</b> (The Old Pheasant's Eye). Pure white perianth, scarlet cup; late. 1 lb. doz., 7 lbs. 100.....	30	1 50

## Narcissus Poetaz Hybrids

New Hybrids between Poeticus Ornatus and Polyanthus Varieties.

	Doz.	100
<b>Aspasia</b> . Perianth pure white, yellow eye, large flowers. 2 lbs. doz., 9 lbs. 100.....	\$0 75	\$4 00
<b>Ideal</b> . Perianth white, dark orange eye. 6 to 7 flowers on a stem. 2 lbs. doz., 9 lbs. 100.....	60	3 50

## Various Single Narcissus

	Doz.	100
<b>Bulbocodium citrinum</b> (Hoop Petticoat). Pale sulphur-yellow, 1 lb. per doz.....	\$0 85	\$5 00
<b>Bulbocodium conspicuum</b> . Golden yellow, 1 lb. per doz.....	75	4 50
<b>Tenuior</b> (Silver Jonquil). Sulphur-white perianth, yellow cup. A rush-leaved, dwarf variety, splendid for rock-work. 1 lb. per doz.....	70	4 00
<b>Single Trumpets, Mixed</b> . 2 lbs. doz., 9 lbs. 100.....	30	1 75
<b>Single, All Sorts Mixed</b> . 2 lbs. doz., 9 lbs. 100.....	30	1 50

If to be sent by mail add postage at zone rates, as per weight indicated.

## Double Narcissus

	Doz.	100	
<b>Alba plena odorata.</b> Pure white; a splendid cut flower; sweet-scented. For outdoors. 1 lb. doz., 5 lbs. 100 .....		\$0 30	\$1 50
<b>Incomparabilis</b> (Butter and Eggs). Light yellow. For forcing. 2 lbs. doz., 15 lbs. 100 .....	35		2 00
<b>Orange Phoenix</b> (Bacon and Eggs). Large; double; white with orange base. 2 lbs. doz., 12 lbs. 100 ....	40		2 50
<b>Sulphur Phoenix.</b> Large; double; white with sulphur center. Not good for growing in pots on account of its weak foliage, but a splendid variety for cutting. The flower is rose-shaped and is of a most pleasing silvery white shade. 2 lbs. doz., 10 lbs. 100 ..	40		2 50
<b>Tazetta.</b> (Early Yellow Roman.) Earliest yellow for forcing. 2 lbs. doz., 10 lbs. 100 .....	35		2 00
<b>Von Sion.</b> The largest double yellow Trumpet variety. Extra fine for forcing; largely grown by florists for winter cut-flowers. Our bulbs are Dutch-grown, of the pure golden yellow variety, and of the largest size. 2 lbs. doz., 12 lbs. 100 .....	50		3 00
<b>Von Sion.</b> Double-nosed bulbs. 2 lbs. doz., 14 lbs. 100 .....	75		4 00

## Polyanthus Narcissus

The varieties belonging to this class produce small, fragrant flowers growing in clusters. They are invaluable for forcing and may be grown under glass or in pots. If planted in the open border they must be protected over winter by a covering of litter.

	Each	Doz.	100
<b>Bazelman Major.</b> Broad white perianth, deep yellow cup; largest of all. 2 lbs. doz., 12 lbs. 100 .....	\$0 10	\$1 00	\$6 00
<b>Gloriosa.</b> White perianth, deep orange cup; very striking. 3 lbs. doz., 24 lbs. 100 .....	10	90	5 00

Paper White Narcissus

Double Narcissus, Von Sion

	Each	Doz.	100
<b>Grand Monarque.</b> White, with yellow cup; very large flowers; vigorous grower. 2 lbs. doz., 12 lbs. 100 .....	\$0 10	\$0 90	\$5 00
<b>Grand Soleil d'Or.</b> Yellow, with orange cup; very free-blooming. 2 lbs. doz., 11 lbs. 100 .....	10	90	5 00
<b>Her Majesty.</b> White, yellow cup; extra large flower. 2 lbs. doz., 11 lbs. 100 .....	10	90	5 00
<b>Jaune Supreme.</b> Primrose, orange cup. 2 lbs. doz., 11 lbs. 100 .....	12	1 00	6 00
<b>White Pearl.</b> Perianth pure white, cup primrose; fine for cutting. 2 lbs. doz., 14 lbs. 100 .....	10	75	4 00
<b>Mixed Sorts.</b> 2 lbs. doz., 12 lbs. 100 .....		40	2 00

## Paper-White Narcissus

	Doz.	100
<b>Paper-White grandiflorus.</b> Large trusses of pure white flowers. Splendid forcer. Large bulbs. 2 lbs. doz., 12 lbs. 100 ..	\$0 40	\$2 50

## Jonquils

Not less than 50 of a kind at 100 rate.

A class related to the Narcissus, and suitable alike for pot culture or planting out. Culture same as for hyacinths.			
<b>Single Yellow Sweet-scented.</b> Per 1,000, \$6.00 4 oz. doz., 2 lbs. 100 .....	\$0 25		\$1 00
<b>Large Single</b> (Campernelle). Yellow; per 1,000, \$7.50. 8 oz. doz., 4 lbs. 100 .....	25		1 25

<b>Large Double.</b> Golden yellow, delightfully fragrant. Fine forcer. 8 oz. doz., 4 lbs. 100 .....	75		4 00
<b>Silver Jonquil</b> (Narcissus tenuior). 1 lb. doz. ....	70		4 00

If to be sent by mail add postage at zone rates as per weight indicated.

# Lilies

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *Lilium candidum* and *Lilium tigrinum*, which prefer a deep, rich loam, they all do best in a light, well-drained soil. Some peat or leaf-mold may be used to advantage. *Lilium auratum* cannot bear manure but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

*Lilium Harrisii* and *Lilium candidum* ready in August; others not until November.

## Lilium Harrisii

(Bermuda Easter Lily)

BULBS NOW READY.

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, lasting a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decoration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

If to be sent by mail add postage at zone rates as per weight indicated.

## Lily-of-the-Valley

(*Convallaria majalis*)

READY IN NOVEMBER AND  
DECEMBER

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them. They may also be planted in moss fiber in vases.

**Clumps.** Fine, large clumps, with many flowering pips on each. Fine for planting outside in shaded positions and for naturalizing by the side of streams or wood walks. Weight 3 lbs. each. 30 cts each, \$3 per doz., \$20 per 100.

**Pips for Forcing.** 50 cts. per bundle of 25. (2-lb. rate), \$1.75; per 100, \$15 per 1,000.

Lily-of-the-Valley.

## Chinese Sacred Lily

(The Water Fairy Flower)  
READY IN SEPTEMBER

A variety of the Polyanthus Narcissus, imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs entirely and place in a sunny window in a cool room. 15 cts. each, \$1.25 per doz. Mailing weight, 4-lb. doz.

## Allium

Mailing Weight, 1 lb. 100.

Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower-border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.

**Azureum.** Beautiful sky-blue flowers in large umbels; fine for pots or garden. 15 cts. each, \$1.50 per doz., \$10.00 per 100.

**Neapolitanum.** Large umbels of pure white flowers, borne on large stems; valuable for forcing for winter cut-flowers, as well as for summer garden decoration. 25 cts. per doz., \$1.25 per 100.

ALLIUM

**Moly luteum.** Golden yellow flowers in large umbels; very showy and attractive; fine for growing in the garden in groups or for naturalizing in masses. 25 cts. per doz., \$1.25 per 100.

**Hermettii grandiflorum.** Makes a splendid pot-plant for winter-blooming in the house, the handsome, large, pure white flowers being produced abundantly and for a long time; largely used by florists for cut-flowers. 35 cts. per doz., \$2.00 per 100.

# Amaryllis READY IN OCTOBER

If to be sent by mail add postage at zone rates, as per weight indicated.

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mold or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

**Belladonna major.** Violet and white; flowers in large umbels; fragrant. 4 lbs. doz.—25 cts. each, \$2.25 per doz.

**Belladonna speciosa purpurea.** 4 lbs. doz. 65 cts. each, \$6.50 per doz.

**Empress of India Seedlings.** Large flowers, brilliant scarlet with white stripes. 4 lbs. doz. 75 cts. each, \$8 per doz.

**Hippeastrum Johnsonii** (Spice Lily). Beautiful flowers; crimson, striped white. Large bulbs. 6 lbs. doz. 65 cts. each, \$6 per doz.

**Hippeastrum, New Vittata Hybrids.** Beautiful colors. 4 lbs. doz. 65 cts. each, \$6 per doz.

**Josephine** (Gigantea). Very fine scarlet; flowering in immense umbels; these are extra-sized bulbs. 1 lb. each, \$5 each.

**Lily of the Palace.** Very large, handsome flowers, crimson shaded with green. 4 lbs. doz. 75 cts. each, \$8 per doz.

Anemone

Coronaria

# Anemone, or Windflower

If to be sent by mail add postage at zone rates  
—6 oz. doz., 3 lbs. 100.

Very ornamental hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

## Crocus

If to be sent by mail add postage at zone rates—8 oz doz., 3 lbs. 100.

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted closely—say 2 inches apart—and 3 inches deep, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful. For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

## Hybrid Named Crocus

Remarkable for richness of color and immense size. These varieties are best for forming letters or designs on lawns, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. Flowers are produced very early, and mowing later on will not seriously injure the bulbs.

## Crown Imperials

(Fritillaria imperialis)

READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—each 1 lb., doz. 6 lbs.

A stately-growing plant, with dark green foliage and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and

Crown Imperial  
Maximus (Red)

### Crinum

If to be sent by mail add postage at zone rates as per weights indicated.

Splendid, large-flowering bulbs, closely allied to the amaryllis. The most suitable soil is a compost of turfy loam, cow-manure and some sand. They should be grown in large pots or tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a coolhouse and allowed to rest until new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure-water during the growing season. They may be placed outside when warm weather begins, and will flower all through the summer, making splendid lawn or veranda plants.

Cyclamen Persicum Giganteum.

Eremurus.

Asiaticum. Pure white. Large bulbs. 5 lb. rate.....	Each \$1 00
Amabile, Giant Pink. Extra large, bright pink, with white stripe; splendid flower; enormous bulbs. Unsurpassed for growing in tubs, blooming profusely outside all summer, and forming a most excellent porch decoration. 11 lb. rate .....	2 50

Powell album. Pure white. 2 lb. rate .....	50

### Cyclamen MOST OF THEM READY IN NOVEMBER

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The soil best suited to them is a fresh, turfy loam, with a fourth to a fifth of well-rotted horse manure, to which add some clean sand if the soil is heavy. Plant so as to leave the top of the bulb just below the surface. Given the proper conditions, the Cyclamen is remarkably easy to grow. (We offer seed of our superb strain of *C. giganteum* at the end of this catalogue.)

### Eremurus READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—1 lb. each.

A noble, bulbous plant from northern India, especially attractive, peerless in its majestic magnificence, compelling admiration by its gigantic proportions and the sweetness of its perfume, a plant not easily forgotten when seen well grown. It is a hyacinth-like perennial, starting growth quite early in the spring. Coming from a cold country it is perfectly hardy, but enjoys good, rich soil, and responds handsomely to liberal treatment. They thrive admirably in deep, rich, sandy loam

If to be sent by mail add postage at zone rates

**Eremurus, continued**

with the addition of well-decayed cow manure. They need plenty of water in the flowering period, but require good drainage. When well established they should not be disturbed, as the roots are extremely brittle. The surface soil above the roots should be kept clean by hand-weeding and enriched by occasional application of old manure, leaf-mold and a little sand well mixed. Autumn planting is desirable, and the crown should be covered with a mound of ashes over winter, or with a box with a water-tight top and filled with dry leaves. Protect the stems from frost when coming into flower in spring.

**Himalaicus.** Beautiful white flowers on racemes 4 to 8 feet high. Blooms in May and June.....\$1 25  
**Robustus.** Rosy lilac flowers on racemes 6 to 19 feet high, flowering in June.....1 25

**Fritillaria** READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—doz. 4 oz., 100 2 lbs.

Graceful, hardy, spring-flowering bulbous plants, thriving in good, rich, well-drained soil. They are effective in mixed flower-borders, and they also make excellent pot-plants both for their ease of cultivation and the quaintness of their flowers.

**Lilacea.** Flowers white; easily grown. 10 cts. each, \$1 per doz., \$6.75 per 100.  
**Meleagris alba** (Guinea-fowl Flower). White. 50 cts. per doz., \$3.00 per 100.  
**Meleagris.** Mixed colors. 40 cts. per doz. \$2.50 per 100.  
**Fritillaria imperialis.** See Crown Imperials, page 18

**Freesia**

If to be sent by mail add postage at zone rates—doz. 4 oz., 100 2 lbs.

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in good, loamy soil, with an admixture of leaf-mold and sand, in a frame or greenhouse, and are excellent for window culture in winter. For the information of all not acquainted with these bulbs, we may say that they are quite small, but produce large blooms in comparison to their size.

**Freesia refracta alba.** The body of the flower is a pure white, with lower segments spotted lemon-yellow. Their fragrance is remarkable and very lasting. Mammoth-size bulbs. 50 cts. per doz., \$3.00 per 100, \$16.00 per 1,000.

**Freesia, "Purity."** Magnificent, glistening pure white flowers of large size, borne on strong, lengthy stems, each truss bearing eight to ten buds, five or six of which are frequently open at the same time. Mammoth bulbs. 90 cts. per doz., \$6 per 100

First size bulbs. 50 cts. per doz., \$3.50 per 100

Second size bulbs. 40 cts. per doz., \$2.75 per 100

**Freesia Leichtlinii major.** Creamy white, shading to yellow, with orange blotch; distinct. 40 cts. per doz., \$2.50 per 100.

**Freesia, "Purity"**

Gladiolus Colvillei.

Gloxinias are among the most beautiful of greenhouse plants, being remarkable for the intensity and variety of their colorings and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mold and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large, and of erect-flowering strain:

**Iris**

(Fleur-de-lis)

**READY IN OCTOBER AND NOVEMBER, EXCEPT JAPAN IRIS, WHICH WILL NOT BE READY UNTIL DECEMBER AND INTO SPRING**

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light, rich, sandy soil, and in a sunny situation. With the exception of *Morea Pavonia*, all varieties are hardy. Good drainage is important. The varieties of *Iris Kaempferi*, from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 to 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms measuring 8 to 10 inches across. These require a liberal supply of water when growing.

**Dwarf Gladiolus****READY IN NOVEMBER**

If to be sent by mail add postage at zone rates—  
doz. 6 oz., 100 2 lb.

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse. Some varieties are successfully forced and may be had in full beauty in April and May.

These form a family of bulbs of rare beauty and of most exquisite tints and shades; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding. Named varieties will be found in our General Catalogue, published January 1.

Japan Iris (*Iris Kaempferi*)

## IRIS, continued

Superb Collection of Large-Flowered Japan Iris (*Iris Kaempferi*)

READY IN DECEMBER AND INTO SPRING

If to be sent by mail add postage at zone rates—each 1 lb., doz. 12 lbs.

30 cents each, \$3 per dozen, \$20 per 100.

We are importing from Japan a large supply of the following twenty of the best of these magnificent Iris, which excel in size, perfection of form and richness of color. These are most valuable for cut flowers and table decoration—as handsome as orchards. Flowers should be cut in the early morning or after sunset. The roots come in large clumps. The description given are those furnished us by the growers in Japan. May be ordered by numbers.

- 13 **Boteki-no-Koe.** Pure white, heavily veined lavender, with pale primrose blotches; standards wine-color, lighter toward edges, stigmas lavender. Three large petals. Striking.
- 26 **Date-dogu.** Rich claret-red, yellow blotches. Three petals.
- 89 **Fuyoho.** Large; pure white, yellow blotches; three very large petals.
- 31 **Gei-Sho-Un.** Claret-red, veined white; standards shaded lavender, darker toward the edges, yellow blotches.
- 4 **Ho-o-jo (Ho-o-Castle).** Ruby-crimson, primrose blotches; standards white and lavender.
- 37 **Katsuraotoko.** White, veined lavender; standards white, suffused with lavender, darker toward the edges, pale yellow blotches. Six petals.
- 15 **Momiji-no-Taki.** Ruby-red, yellow blotches; standards white, spotted toward edges pale wine-color. Six petals.
- 30 **Noboro-Ryu.** Intense Tyrian blue, with yellow blotches; standards white, edged violet.
- 9 **Ran.** Royal purple, edged lavender, with large primrose blotches; standards wine-red, white at base. Six petals; large and distinct.
- 34 **Sassa-no-Koe.** White, veined wine-red and blotched yellow; standards lavender, running to purple at edges. Three petals.
- 20 **Senjo-To.** Light wine-color, spotted and shaded to dark red toward the edges of the petals, suffused with white, yellow blotches; standards shading to purple.
- 40 **Shiguremomiji.** Blush-pink, darker toward edges, splashed wine-red; stigmas lavender, primrose blotches. Three petals.
- 21 **Shikainami.** Light blue, shading to dark blue edges, white-veined, yellow blotches; standards shaded lavender, with dark edges. Six petals.
- 6 **Shippo (Cloisonne).** Rich tyrian blue, edged purple and veined white, yellow blotches; standards white and wine-color. Large flowers.
- 14 **Shiraga.** Deep purple, heavily veined white; standards lavender, darker toward edges, yellow blotches. Large flowers. Six petals.
- 17 **Suibijin.** Claret-red, darker toward edges; standards white, veined and edged pale wine-color; stigmas wine-color; three petals.
- 44 **Ujigawa.** Rich, vinous purple; standards blush-pink; stigmas lavender, radiating to purple edges, canary-yellow blotches. Three immense petals.
- 50 **Ushio-no-Iro.** Violet, veined white; standards white, edged sky-blue, yellow blotches. Seven or eight petals.
- 7 **Yamato-Nishiki.** Pale lavender, running to purple on outside of petals, blotched and flaked dark purple, large primrose blotches. Immense flower. Three petals.
- 8 **Yodokuruma.** Pale wine-color, veined darker, large orange blotches; standards very erect. Gigantic blooms. Three petals.

## MIXED JAPAN IRIS, from a superb collection.

A splendid assortment, extra size clumps, home-grown stock, without names.  
Each 25 cts.; \$2.25 per doz.; \$15 per 100.

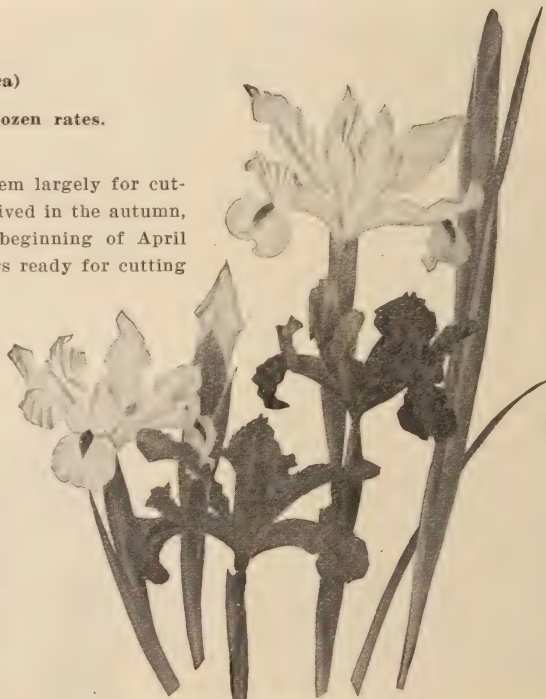

Spanish Iris (*Iris Hispanica*)

Not less than one dozen of a kind at dozen rates.

Doz. 6 oz., 100 3 lbs.

Very profitable for florists, who are planting them largely for cut-flowers. Plant in beds in the open as soon as received in the autumn, and protect during the winter months. In the beginning of April cover the beds with glass, so as to have the flowers ready for cutting in May.

## Ixias READY IN OCTOBER

If to be sent by mail add postage at zone rates

The named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

## Lachenalia READY IN SEPTEMBER

Mailed Free.

Very pretty, spring-flowering, greenhouse bulbous plants of elegant habit and with brightly colored flowers. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mold and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging-baskets.

Montbretia Crocosmæflora.

## Montbretia READY IN NOVEMBER

If to be sent by mail add postage at zone rates—

Doz. 6 oz., 100 2 lbs.

Hardy, summer-flowering bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties.

<b>Crocsmæflora aurantiaca.</b> Deep golden yellow, fine spike .....	Doz. 100	
<b>Crocsmæflora Bouquet Parfait.</b> Large bright vermillion flowers, with deep yellow centers .....	\$0 35	\$2 00

## Nerine

READY IN OCTOBER AND NOVEMBER.

Mailed Free.

Very beautiful greenhouse bulbous plants succeeding best in pots in light soil—say a compost of loam, leaf-mold and sand. Frequent re-potting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die, they should be kept quite dry in a cool place until they begin to grow again.

<b>Flexuosa.</b> Bright crimson-scarlet, tinged with orange .....	Each	
<b>Flexuosa alba.</b> Pure white .....	\$3 00	
<b>Fothergilli major.</b> A magnificent plant for house or conservatory. Intense shining scarlet. By artificial light the crystalline cells of the petals sparkle like jewels. Flowers freely .....	2 50	
<b>Sarriensis</b> (True Guernsey Lily). Flowers brilliant crimson, in large clusters. The best-known sort .....	1 75	
<b>Undulata.</b> Rosy carmine, edged white; very handsome .....	\$0 60	
	35	2 00

## Oxalis READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—1 lb. per 100.

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging-baskets. They are easily grown in a sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

<b>Buttercup.</b> A splendid winter-blooming plant for pot culture. The flowers are pure, bright yellow, and produced in great abundance. It is very easily cultivated and, being a strong grower, only one or two bulbs should be planted in a 5- or 6-inch pot. First size .....	Doz. 100	
<b>Bowiei.</b> Crimson .....	\$0 25	\$2 00
<b>Grande Duchesse—</b>	35	2 00

<b>Rubella.</b> Purple .....	35	1 75
<b>Mixed</b> .....	20	1 00

Muscari, or Grape Hyacinth.

## Paeonies READY IN OCTOBER.

(Finest Imported Roots)

If to be sent by mail add postage at zone rates—1 lb. each, 9 lbs. doz.

The old-fashioned double Paeonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Paeonies rank about first for lawn or flower-border or shrubbery decoration. Paeonies do best in deep, rich, rather moist soil. The plants are gross feeders, and the soil should be well worked before planting, and enriched with cow manure. Clean cultivation should be given. An annual top-dressing of short, well-rotted manure should be given in November, and forked into the soil in spring. Liquid manure, given in the growing season, helps the bloom wonderfully. They need abundant water, and if they suffer from drought at blooming time there are likely to be small flowers and blighted buds. The crowns should be set in planting about 2 inches below the surface. They may be set in spring or fall, to bloom the following summer. They are all hardy. We offer only strong, flowering roots, with not less than three eyes.

**Richardia** (Calla)

READY IN OCTOBER AND NOVEMBER

If to be sent by mail add postage at zone rates as per weight indicated.

Tall-growing, bulbous perennials of graceful habit, and handsome foliage and flowers. They are easily cultivated in pots, requiring only rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully re-potting in September.

	Each	Doz.
<b>White Calla, or Lily of the Nile</b> (Calla aethiopica). Large, white, trumpet-shaped flowers of great substance. One of the most popular ornamental house and greenhouse plants. Largest-size bulbs. Doz. 4 lbs. ....	\$0 25	\$2 50

Arum Palaestinum Sanctum.

**Scilla**

READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—6 oz. doz., 3 lbs. 100.

*S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years. The effect in early spring of the intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the snow-drop and the varied hues of the crocus, is very striking; most valuable for permanent edging, or planted in bunches of a dozen or so.

## Snowdrops

(Galanthus nivalis)

READY IN SEPTEMBER

Mailing rate—4 oz. doz., 2 lbs. 100.

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms. Should be planted 2 to 3 inches deep in a shady location.

**Single-flowering Snowdrops.** 25 cts. per doz., \$1.25 per 100, \$7.50 per 1,000.

**Double-flowering Snowdrops.** 30 cts. per doz., \$1.75 per 100, \$11 per 1,000.

**Giant Snowdrops of Asia Minor (Galanthus Elwesii).** Extra-size bulbs, 30 cts. per doz., \$1.75 per 100, \$12 per 1,000.

## Spiraea, or Astilbe

READY IN NOVEMBER

Mailing rate 2 lbs. each.

### Snowdrops.

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

	Each	Doz.
<b>Astilbe Arendsi, Ceres.</b> Bright rosy lilac; very fine.....	\$0 20	\$2 00
<b>Astilboides floribunda.</b> Very large, pure white plumes; neat habit; very abundant bloomer..	15	100
<b>GLADSTONE.</b> A hybrid Spiraea, with beautiful, snow-white plumes, borne on strong stems 1½ feet long, standing erect above the foliage. The plant is perfectly symmetrical in shape, the foliage very handsome and the flowers exquisitely fragrant. Fine forcer....	15	150
<b>Japonica (Hoteia).</b> Excellent pot-plant for winter-blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting..	15	150
<b>Japonica compacta multiflora.</b> The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant.....	15	150

	Each	Doz.
<b>NAARDEN.</b> Pink-flowering; early bloomer. Fine forcer.....	\$0 50	\$5 00

**QUEEN ALEXANDRA, PINK.** A splendid pink variety, in habit similar to the well-known Gladstone, but flowering two weeks later. It is a very free bloomer and bears its flowers well above the strong, dark green foliage. When forced it must be shaded, as soon as it starts to color. It is a splendid outdoor plant, being as hardy as the old Spiraea japonica. Its color will not fade even in the brightest weather.... 25 175

**WASHINGTON.** A splendid decorative plant, producing extra-large flowers. Strong grower; fine for forcing ..... 25 175

## Trillium

(American Wood-Lily, or Indian Shamrock)

Mailing rate—1 lb. doz., 7 lbs. 100.

Hardy herbaceous perennials succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are natives of North America, and are known by various common names in different localities. They have violently emetic roots.

Spiraea Naarden

<b>Sessile Snow Queen.</b> Flowers pure white with creamy centers and with broad petals..	12	100	6 50

## Tuberoses

READY IN DECEMBER

Mailing rate—2 lbs. doz.

The purity of color and rich perfume of the Tuberose are well known. In this latitude May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich, warm soil and a sunny situation. Set so that the top will be 1 inch below the surface of the soil.

	Each	Doz.	100
<b>Dwarf Double Pearl.</b> Dwarf habit; large, fine flowers of great substance .....	\$0 08	\$0 50	\$2 00

Hyacinthus Candicans

Watsonia Ardernei

# Hardy Annual and Perennial Flower Seeds

FOR AUTUMN SOWING

Mailed free of postage

Many varieties of flower seeds, **Annals** as well as **Biennials** and **Perennials**, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerously than if sown in the spring. For full descriptions see our General Seed Catalogue. Character and Hardiness indicated by letters A, Annual; B, Biennial; P, Perennial; h, hardy; hh, half hardy; g, greenhouse; t, tender.

NEW YORK

## Grass Seed for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the middle of September, so that the young grass may become well rooted before winter sets in. The sowing should be done when the ground is moist or before expected rain; after sowing the ground should be rolled.

### The Thorburn Lawn Grass

Many of the finest lawns in America were produced from this mixture. It is composed of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich greensward in three or four weeks from the time of sowing. (The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture.) It should be sown at the rate of 4 to 5 bushels to the acre. Per pt. 20 cts., qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$  pk. \$1., pk. \$1.75, bus. of 20 lbs. \$6.

### Thorburn's Grass Mixture for Shady Spots on Lawns

A mixture of grasses that thrive in shaded situations under trees, or close to walks where there is little sun. Per qt. 40 cts., 2 qts. 75 cts.,  $\frac{1}{2}$  pk. \$1.25, pk. \$2.15, bus. of 22 lbs. \$8.

### Thorburn's Grass Mixture for Terraces

A mixture of fine stoloniferous grasses peculiarly adapted to terraces. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$  pk. \$1.25, pk. \$2, bus. of 20 lbs. \$7.

### Thorburn's Lawn-Restoring Grass Seed

A mixture of grasses that will take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-restoring Grass Seed** should be sown before every summer rain on thin places. Per qt. 40c, 2 qts. 70c,  $\frac{1}{2}$  pk. \$1.25, pk. \$2, bus. of 20 lbs. \$7.

### Thorburn's Lawn Grass for the South

A mixture of grasses that stand extremes of heat and drought, and that are, therefore, peculiarly adapted to southern lawns. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$  pk. \$1.25, pk. \$2, bus. of 20 lbs. \$7.50.

## Also Permanent Grass Seed for Golf Links, Tennis Courts, Polo Grounds, etc.

We have devoted much attention to the seeding and preservation of golf-links, tennis-courts and polo-grounds, and offer the following mixtures, which have been used on most of the finest links, etc., in this country with very satisfactory results.

### Tennis-Court Mixture

A mixture of extra-fine grasses peculiarly adapted to tennis-courts. This mixture will make a firm, green and lasting turf of the finest texture, that will improve with trampling. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$  pk. \$1.25, pk. \$2, bus. of 20 lbs., \$7.

### Grass Mixture for Railroad Banks, etc.

A mixture of grasses with long, interlacing, matting roots that will bind steep embankments, gravelly or sandy slopes, etc., preventing washouts by rainstorms and covering them with permanently green turf. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$  pk. 85 cts., pk., \$1.50, bus. of 18 lbs. \$5.50.

### Fair-Green or Golf-Links Mixture

For the grounds in general. Per bus. of 20 lbs. \$5.

### Putting-Green Mixture

A mixture of extra-fine highest grade grasses that will make a close, firm, green and lasting turf, which will improve with trampling. Per qt. 40 cts., 2 qts. 75 cts.,  $\frac{1}{2}$  pk. \$1.25, pk. \$2.15, bus. of 24 lbs. \$8.

### Polo-Grounds Mixture

A mixture of fine-leaved and deep-rooting grasses, forming a strong and lasting turf that will stand hard usage. Per bus. of 20 lbs. \$5.

## CATALOGUE

OF

## Bulbs and Flowering Roots, also Flower and Vegetable Seeds for Fall Planting

We have the pleasure of again presenting to our old friends and all interested in Gardening, our **ANNUAL CATALOGUE** of **Bulbs**, etc., for **Fall Planting**.

When the average man sees a pretty bed of hyacinths, Tulips, or other showy Bulbs, in the Spring, he generally determines to have "something like that" in his own front or back garden next year, but when September or October arrives he is apt to forget all about the pretty bed until the Spring displays appear again. Therefore—order your Bulbs **EARLY** and plan out the beds for them now.

Bulbs may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of blooms can be had from December until May. The finest outdoor displays of the early Spring months are also from bulbs planted in the Autumn. The cultural directions found under the respective headings are worthy of careful attention.

The time taken under ordinary conditions for the different bulbs to form enough roots to enable them to be forced with any kind of success is as follows: Paper white narcissus, 6 to 8 weeks; Roman hyacinths, 8 to 10 weeks; Dutch hyacinths, 14 to 16 weeks; daffodils, jonquils and narcissus, 14 to 16 weeks; lilies such as Harrisii, longiflorum, gigantium, formosum, speciosum,

etc., will take at least 16 to 18 weeks. When well rooted remove to where they may be forced at a temperature of about 60°. Of course the time will vary either one way or the other according to the strength of the bulbs.

Our bulbs are all selected first size top roots, coming from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation, and often sold at auction and otherwise, at very low prices.

**NAME AND ADDRESS.** *We often receive orders with either the name or the address of the sender omitted. As we can do nothing with such orders, the customer thinks his order is being neglected. We therefore beg our correspondents to be careful to write on each order their name and full address.*

**ORDERS** should be sent as soon as possible after receipt of this catalogue. The bulbs will be shipped in proper time for planting. They are ready from August to November, according to the time of ripening and the country from which they come. Orders received earliest are sure of being filled in full. If left too late, the supply of some of the varieties may be exhausted.

Prices, as will be seen upon comparison with others are as low as Highest Grade Bulbs can be sold at, and do not include transportation.

We indicate under each heading of the various Bulbs, the mailing weight when packed, so that if wanted by parcel post, our Customers can determine the amount required to be added for postage according to Zone rate, as per table below.

The weights given are those taken from our stock last year, and may vary in some instances; should there be any difference in weight when orders are filled, the postage will be adjusted, and any amounts over remitted will be returned.

On shipments of 15 lbs. and upwards it is best to send by express, wherever possible, as by special arrangements with the express companies, bulbs travel at a reduction of 25 per cent. from regular rates; it is therefore both safer, and, in nearly all cases, cheaper, to send large packages by express instead of by mail.

## PARCEL-POST ZONE RATES

### Within the United States

Zone	Within	1st lb. or fraction	Additional lb. or fraction

# Hyacinths

THESE BULBS ARE READY FOR  
DELIVERY IN SEPTEMBER

If to be sent by mail add postage at zone rates

**The Hyacinth** is one of the most popular and beautiful spring-flowering plants for indoor and outdoor decoration. By careful management in keeping up a succession, it may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground it is unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height, and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

**OUTSIDE CULTURE.** In this section, October is the month to plant Hyacinths outside. They succeed best in a light soil and a sunny situation. If the soil is naturally heavy, some sand should be mixed with it, and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs. Some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has been frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field-mice which may burrow into it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibrous loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September to the end of November. Plenty of water should be applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.** Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten to twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

Customers unacquainted with the different varieties will do well to leave the selection to us, only specifying in their order whether bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortments of Named Hyacinths of our selection offered on page 5, and to the Hyacinth Glasses which are quoted at the end of the catalogue.

The names of our Hyacinths and Tulips are those given to them by the originators in Holland, and they are not sold under fancy names manufactured in this country

## Select Named Dutch Hyacinths

**N. B.** Our Select Named Hyacinths are the cream of the Holland nurseries—and are called top-roots—under their original names. For forcing in pots or for outdoor beds they far surpass the class of Bulbs usually sold.

The single-flowered varieties are generally more effective and better for forcing than the double ones. They also, as a rule, succeed better in glasses.

The double varieties that do well for forcing in water are distinguished by two asterisks (\*\*).

All varieties indicated in heavy faced type have ranked first at Exhibitions abroad, producing large and many blooms.

Not less than six of one kind sold at the dozen rate

### Mixed Dutch Hyacinths in Separate Colors, Extra Quality

LARGEST BULBS. SUITABLE EITHER FOR FORCING OR BEDDING

If to be sent by mail add postage at zone rates—2 lbs. doz., 16 lbs. 100

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all of the largest size. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

Not less than 1 dozen of a color at dozen rates, 50 of a color at 100 rate.

## Italian Hyacinths

Mailing Weight, 1 lb. doz., 8 lbs. 100.

Grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are hardier than the Romans, and may be planted outside in the fall for flowers for early spring cutting.

	Doz.	100
Single White .....	\$0 75	\$5 50
Single Pink .....	75	5 50

## French Roman Hyacinths

Mailing Weight, 2 lbs. per doz.; 9 lbs. per 100

Extensively used by florists for forcing for cut-flowers. For this purpose they are the best and most popular of bulbs. The flowers are delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown, and extremely early, and by making successive plantings they may be had in flower all through the winter. The blue Roman Hyacinths flower from one to two weeks later than the white variety.

	Each	Doz.	100
Pure White. First size....	\$0 10	\$1 00	\$6 50
Pure White. Ex. size bulbs	15	1 25	8 00
Single Blue .....	10	1 00	6 00

## Dutch Romans or Miniature Hyacinths

Mailing Weight, 2 lbs. doz.; 10 lbs. 100.

These are also known as "Pan Hyacinths." They are very suitable for growing in groups in pots or earthen pans. Also good for growing in Bulb Fibre.

In the entire group of Hyacinths there is hardly anything more fascinating than a well grown pan of miniatures; the spikes are slender yet well provided with flower bells; the symmetry of the individual plant is remarkable.

The following varieties are good for forcing:

	Each.	Doz.	100
Albertine, early pure white.....	\$0 10	\$0 75	\$5 00
Czar Peter, pale porcelain, tinged lilac.....			
Gertrude, rosy pink.....			
King of the Blues, fine deep blue.....			
La Victoire, brilliant scarlet red.....			

French Roman Hyacinths

Single White and Blush.....	50	4 50
Single Light and Dark Blue.....	50	4 50

## Tulips

READY FOR DELIVERY  
IN SEPTEMBER

If to be sent by mail add postage at zone rates

For beauty of form and brilliancy of coloring, Tulips are unequaled. For bedding they are the most popular and effective of all hardy bulbous plants. In order to assist our customers in selecting varieties of tulips for beds, borders, etc., we give herewith a list of the most popular varieties, in very Early, Early, and Late sorts. The height of stem is indicated as "tall" and "medium." The varieties indicated in heavy faced type are new and choice and are highly recommended. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers they are also invaluable.

**CULTURE.**—The cultural directions given for hyacinths, on page 3, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. To obtain the best results it is desirable that they should not be planted in ground where Tulips were grown the previous year. We recommend **early planting** so that the bulbs may obtain a good root growth before frost sets in. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open ground.

## Duc Van Thol Tulips

Six of a kind at dozen rate, 50 of a kind at 100 rate

If to be sent by mail add postage at zone rates—1 lb. doz., 6 lbs. 100.

The Duc Van Thols are the earliest of all the Tulips. They are of dwarf habit, and well adapted for forcing and for pot culture. They bloom outdoors before the Single Early Tulips.

## Double Tulips

Six of a kind at dozen rate, 50 at 100 rate.

If to be sent by mail add postage at zone rates—1 lb. doz., 5 lbs. 100.

The Double Tulips come into bloom a little later than the single varieties. They are splendid for bedding, and the flowers last longer in bloom than the single ones. Some sorts are quite dwarf. Comparative earliness of flowering is indicated by the letters A B C. "Medium" and "tall" indicate relative height.

## Darwin Tulips

If to be sent by mail add  
postage at zone rates—1 lb.  
doz., 6lbs, 100.

Too much can not be said in praise of this class of Tulip and now that the prices have become moderate, everyone should have them. They excel in brilliancy of color, perfect form of flower, tall, strong stems, splendid for cutting, planted in groups amongst shrubs, and in the perennial border they cannot be surpassed; they are all single and self-colored.

## Parrot Tulips

Mailing weight 1 lb. doz., 7 lbs. 100

For outdoor cultivation. The petals of these have feathered edges, and, in addition to other colors, combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant colors, and form very effective groups for the flower-border. To get the best results they must have the full effect of the sun. **Very late-flowering.**

Narcissus

## Narcissus

NARCISSUS ARE READY FOR DELIVERY IN SEPTEMBER

Narcissus are among the most popular and largely grown of spring-flowering bulbs, and deservedly, too. Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, lakes or ponds, and in mixed flower—or shrubbery—borders. They are also suitable for naturalizing in the grass, by the side of woodland walks, or in open spaces between trees and shrubs.

For growing in pots they require about the same treatment as hyacinths, three or four bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers. With the exception of the Polyanthus section, they are all perfectly hardy.

### Single Narcissus, or Daffodils

ALL LARGEST SIZE BULBS

If to be sent by mail add postage of zone rates as per weights indicated

#### Large Crown, or Trumpet Narcissus

The varieties belonging to this division have trumpets or crowns that are as long as, or longer than, the perianth segments.

#### Bicolor

**Paper-White Narcissus**

If to be sent by mail add postage at zone rates as per weight indicated

## Lilies

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *Lilium candidum* and *Lilium tigrinum*, which prefer a deep, rich loam, they all do best in a light, well-drained soil. Some peat or leaf-mold may be used to advantage. *Lilium auratum* cannot bear manure but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

*Lilium Harrisii* and *Lilium candidum* ready in August; others not until November

### *Lilium Harrisii*

(Bermuda Easter Lily)

**BULBS NOW READY.**

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, lasting a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decoration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

## Lily-of-the-Valley

(*Convallaria majalis*)

READY IN NOVEMBER AND  
DECEMBER

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them. They may also be planted in moss fiber in vases.

**Clumps.** Fine, large clumps, with many flowering pips on each. Fine for planting outside in shaded positions and for naturalizing by the side of streams or wood walks. Weight 3 lbs. each. 30 cts. each, \$3 per doz., \$22 per 100.

**Pips for Forcing.** 70 cts. per bundle of 25, (2-lb. rate), \$2.50; per 100, \$22 per 1,000.

Lily-of-the-Valley.

## Chinese Sacred Lily

(The Water Fairy Flower)

READY IN SEPTEMBER

A variety of the *Polyanthus Narcissus*, imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs entirely and place in a sunny window in a cool room. 15 cts. each, \$1.50 per doz. Mailing weight, 4-lb. doz.

ALLIUM

## Allium

Mailing Weight, 1 lb. 100.

Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower-border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.

**Azureum.** Beautiful sky-blue flowers in large umbels; fine for pots or garden decoration. Each 25 cts., per doz., \$2.25, \$12.00 per 100.

**Neapolitanum.** Large umbels of pure white flowers, borne on large stems; valuable for forcing for winter cut-flowers, as well as for summer garden decoration. 25 cts. per doz., \$1.25 per 100.

**Moly luteum.** Golden yellow flowers in large umbels; very showy and attractive; fine for growing in the garden in groups or for naturalizing in masses. 25 cts. per doz., \$1.25 per 100.

**Hermettii grandiflorum.** Makes a splendid pot-plant for winter-blooming in the house, the handsome large, pure white flowers being produced abundantly and for a long time; largely used by florists for cut-flowers. 35 cts. per doz., \$2 per 100.

**Amaryllis** READY IN OCTOBER

If to be sent by mail add postage at zone rates, as per weight indicated

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mold or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

- Belladonna major.** Violet and white; flowers in large umbels; fragrant. 4 lbs. doz.—25 cts. each, \$2.25 per doz.  
**Belladonna speciosa purpurea.** 4 lbs. doz. 80 cts. each, \$8.00 per doz.  
**Empress of India Seedlings.** Large flowers, brilliant scarlet with white stripes. 4 lbs. doz. 75 cts. each, \$8 per doz.  
**Hippeastrum Johnsonii** (Spice Lily). Beautiful flowers; crimson, striped white. Large bulbs. 6 lbs. doz. 65 cts. each, \$6 per doz.  
**Hippeastrum, New Vittata Hybrids.** Beautiful colors. 4 lbs. doz. 65 cts. each, \$6 per doz.  
**Joséphine** (Gigantea). Very fine scarlet; flowering in immense umbels; these are extra-sized bulbs. 1 lb. each, \$5 each.  
**Lily of the Palace.** Very large, handsome flowers, crimson shaded with green. 4 lbs. doz. 75 cts. each, \$8 per doz.  
**Valloia purpurea.** 30 cts each, \$3 per doz.

Anemone  
Coronaria

**Anemone, or Windflower**

If to be sent by mail add postage at zone rates—6 oz. doz., 3 lbs. 100

Very ornamental hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

**Coronari, or Poppy-Flowered Anemone**

These Begonias have beautifully shaped, gracefully frilled and crested flowers borne above the foliage on long and erect stems. A fine strain with a great future. **Red, Rose, White, Yellow** and **Salmon**. \$1 per doz., \$8 per 100.

## Brodiaea READY IN SEPTEMBER

Mailing weight—1 lb. 100

Pretty bulbous plants from the Pacific coast. They have narrow, grassy leaves, slender stems and umbels of lily-like flowers. For forcing or outdoor culture. Do best in rich, sandy loam. If grown in pots, a compost of loam, leaf-mold and sand is best. All are hardy except *Coccinea*, which should have some protection and partial shade.

	Doz.	100
<b>Coccinea (Floral Firecracker)</b> . Rich blood-crimson, tipped white .....	\$0 60	\$5 00
<b>Congesta</b> . Tall-growing; purple flowers.....	60	7 00

Calochortus

Crocus

If to be sent by mail add postage at zone rates—8 oz. doz., 3 lbs. 100.

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted closely—say 2 inches apart—and 3 inches deep, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful. For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

Hybrid Named Crocus

Remarkable for richness of color and immense size. These varieties are best for forming letters or designs on lawns, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. Flowers are produced very early, and mowing later on will not seriously injure the bulbs.

Crown Imperial  
Maximus (Red)

## Crown Imperials

(*Fritillaria imperialis*)

READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—each 1 lb., doz. 6 lbs.

A stately-growing plant, with dark green foliage and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

	Each	Doz.
Aurora. Red .....	\$0 25	\$2 50

Fine Mixed Varieties. Per 100, \$12	20	1 75

## Crinum

If to be sent by mail add postage at zone rates as per weights indicated

Splendid, large-flowering bulbs, closely allied to the amaryllis. The most suitable soil is a compost of turfy loam, cow-manure and some sand. They should be grown in large pots or tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a coolhouse and allowed to rest until new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure-water during the growing season. They may be placed outside when warm weather begins, and will flower all through the summer making splendid lawn or veranda plants.

	Each	Doz.
Asiaticum. Pure white. Large bulbs. 5 lb. rate.....		\$1 00
Amabile, Giant Pink. Extra large, bright pink, with white stripe; splendid flower; enormous bulbs. Unsurpassed for growing in tubs, blooming profusely outside all summer, and forming a most excellent porch decoration. 11 lb. rate.....		2 50
Kirkii. Large umbels of beautiful pure white flowers, with purple stripe in center of each petal. 1 lb. rate.....		1 50
Powellii. Produces long stems, bearing at the top five to eight large, dark rose, bell-shaped flowers, 3 to 4 inches long. 2 lb. rate.....		25
Powellii album. Pure white. 2 lb. rate.....		50

## Cyclamen Most of Them Ready in November

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The soil best suited to them is a fresh, turfy loam, with a fourth to a fifth of well-rotted horse manure, to which add some clean sand if the soil is heavy. Plant so as to leave the top of the bulb just below the surface. Given the proper conditions, the Cyclamen is remarkably easy to grow. (We offer seed of our superb strain of *C. giganteum* at the end of this catalogue.)

Cyclamen Persicum Giganteum.

## Eremurus READY IN SEPTEMBER

If to be sent by mail add postage at zone rate—1 lb. each

A noble, bulbous plant from northern India, especially attractive, peerless in its majestic magnificence, compelling admiration by its gigantic proportions and the sweetness of its perfume, a plant not easily forgotten when seen well grown. It is a hyacinth-like perennial, starting growth quite early in the spring. Coming from a cold country it is perfectly hardy, but enjoys good, rich soil, and responds handsomely to liberal treatment. They thrive admirably in deep, rich, sandy loam with the addition of well-decayed cow manure. They need plenty of water in the flowering period, but require good drainage. When well established they should not be disturbed, as the roots are extremely brittle. The surface soil above the roots should be kept clean by hand-weeding and enriched by occasional application of old manure, leaf-mold and a little sand well mixed. Autumn planting is desirable, and the crown should be covered with a mound of ashes over winter, or with a box with a water-tight top and filled with dry leaves. Protect the stems from frost when coming into flower in spring.

**Himalaicus.** Beautiful white flowers on racemes 4 to 8 feet high. Blooms in May and June.....\$1 25  
**Robustus.** Rosy lilac flowers on racemes 6 to 19 feet high, flowering in June.....1 25

Erythronium.

## Erythronium (Dog's-Tooth Violets)

READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—doz. 4 oz.; 100 2 lb.

Very ornamental, hardy bulbous plants of neat and dwarf habit. They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in a sheltered position on rockeries, or in mixed flower- or shrubby-borders.

	Each	Doz.	100

<b>Meleagris.</b> Mixed colors.....	40	2 50	

## Freesia

If to be sent by mail add postage at zone rate—doz. 4 oz., 100 2 lbs.

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in good, loamy soil, with an admixture of leaf-mold and sand, in a frame or greenhouse, and are excellent for window culture in winter. For the information of all not acquainted with these bulbs, we may say that they are quite small, but produce large blooms in comparison to their size.

**Freesia refracta alba.** The body of the flower is a pure white, with lower segments spotted lemon-yellow. Their fragrance is remarkable and very lasting.

Mammoth-size bulbs. 50 cts. per doz., \$3.50 per 100.

**Freesia, "Purity."** Magnificent, glistening pure white flowers of large size, borne on strong, lengthy stems, each truss bearing eight to ten buds, five or six of which are frequently open at the same time.

First size bulbs. 50 cts. per doz., \$3.50 per 100.

**Freesia Leichtlinii major.** Creamy white, shading to yellow, with orange blotch; distinct. 75 cts. per doz., \$5 per 100.

Freesia, "Purity"

Gladiolus Colvillei

## Dwarf Gladiolus

READY IN NOVEMBER

If to be sent by mail add postage at zone rates—  
doz. 6 oz., 100 2 lb.

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse. Some varieties are successfully forced and may be had in full beauty in April and May.

These form a family of bulbs of rare beauty and of most exquisite tints and shades; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding. Named Hybrids will be found in our General Catalogue, published January 1.

## Gloxinias

READY IN NOVEMBER

If to be sent by mail add postage at zone rates—doz. 1 lb., 100 7 lbs.

Gloxinias are among the most beautiful of greenhouse plants, being remarkable for the intensity and variety of their colorings and the penciled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mold and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large, and of erect-flowering strain:

## Iris

(Fleur-de-lis)

READY IN OCTOBER AND NOVEMBER, EXCEPT JAPAN IRIS, WHICH WILL NOT BE READY UNTIL DECEMBER AND INTO SPRING

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light, rich, sandy soil, and in a sunny situation. With the exception of *Moræa Pavonia*, all varieties are hardy. Good drainage is important. The varieties of *Iris Kaempferi*, from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 to 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms measuring 8 to 10 inches across. These require a liberal supply of water when growing.

Japan Iris (Iris Kaempferi)

## IRIS, continued

Superb Collection of Large Flowered Japan Iris (*Iris Kaempferi*)

READY IN DECEMBER AND INTO SPRING

If to be sent by mail add postage at zone rates—each 1 lb., doz. 12 lbs.

30 cents each, \$3.00 per dozen, \$20 per 100.

We are importing from Japan a large supply of the following twenty of the best of these magnificent Irises, which excel in size, perfection of form and richness of color. These are most valuable for cut flowers and table decoration—as handsome as orchids. Flowers should be cut in the early morning or after sunset. The roots come in large clumps. The descriptions given are those furnished us by the growers in Japan. May be ordered by numbers.

- 13 **Boteiki-no-Koe.** Pure white, heavily veined lavender, with pale primrose blotches; standards wine-color, lighter toward edges, stigmas lavender. Three large petals. Striking.
- 26 **Date-dogu.** Rich claret-red, yellow blotches. Three petals.
- 89 **Fuyoho.** Large; pure white, yellow blotches; three very large petals.
- 31 **Gei-Sho-Un.** Claret-red, veined white; standards shaded lavender, darker toward the edges, yellow blotches.
- 4 **Ho-o-jo (Ho-o-Castle).** Ruby-crimson, primrose blotches; standards white and lavender.
- 37 **Katsuraotoko.** White, veined lavender; standards white, suffused with lavender, darker toward the edges, pale yellow blotches. Six petals.
- 15 **Momiji-no-Taki.** Ruby-red, yellow blotches; standards white, spotted toward edges pale wine-color. Six petals.
- 30 **Noboro-Ryu.** Intense Tyrian blue, with yellow blotches; standards white, edged violet.
- 9 **Ran.** Royal purple, edged lavender, with large primrose blotches; standards wine-red, white at base. Six petals; large and distinct.
- 34 **Sassa-no-Koe.** White, veined wine-red and blotched yellow; standards lavender, running to purple at edges. Three petals.
- 20 **Senjo-To.** Light wine-color, spotted and shaded to dark red toward the edges of the petals, suffused with white, yellow blotches; standards shading to purple.
- 40 **Shiguremomiji.** Blush-pink, darker toward edges, splashed wine-red; stigmas lavender, primrose blotches. Three petals.
- 21 **Shikainami.** Light blue, shading to dark blue edges, white-veined, yellow blotches; standards shaded lavender, with dark edges. Six petals.
- 6 **Shippo (Cloisonne).** Rich tyrian blue, edged purple and veined white, yellow blotches; standards white and wine-color. Large flowers.
- 14 **Shiraga.** Deep purple, heavily veined white; standards lavender, darker toward edges, yellow blotches. Large flowers. Six petals.
- 17 **Suibijin.** Claret-red, darker toward edges; standards white, veined and edged pale wine-color; stigmas wine-color; three petals.
- 44 **Ujigawa.** Rich, vinous purple; standards blush-pink; stigmas lavender, radiating to purple edges, canary-yellow blotches. Three immense petals.
- 50 **Ushio-no-Iro.** Violet, veined white; standards white, edged sky-blue, yellow blotches. Seven or eight petals.
- 7 **Yamato-Nishiki.** Pale lavender, running to purple on outside of petals, blotched and flaked dark purple, large primrose blotches. Immense flower. Three petals.
- 8 **Yodokuruma.** Pale wine-color, veined darker, large orange blotches; standards very erect. Gigantic blooms. Three petals.

## Ixiäs READY IN OCTOBER

If to be sent by mail add postage at zone rates

The named Hybrid Ixiäs are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixiäs attract much attention.

Lachenalia

READY IN SEPTEMBER  
Mailed Free

Very pretty, spring-flowering, greenhouse bulbous plants of elegant habit and with brightly colored flowers. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mold and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging-baskets.

Nerine

READY IN OCTOBER AND NOVEMBER

Mailed Free

Very beautiful greenhouse bulbous plants succeeding best in pots in light soil—say a compost of loam, leaf-mold and sand. Frequent re-potting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die, they should be kept quite dry in a cool place until they begin to grow again.

	Each
Fothergilli major. A magnificent plant for house or conservatory. Intense shining scarlet. By artificial light the crystalline cells of the petals sparkle like jewels. Flowers freely.....	\$2 00
Sarniensis (True Guernsey Lily). Flowers brilliant crimson, in large clusters. The best-known sort.....	60

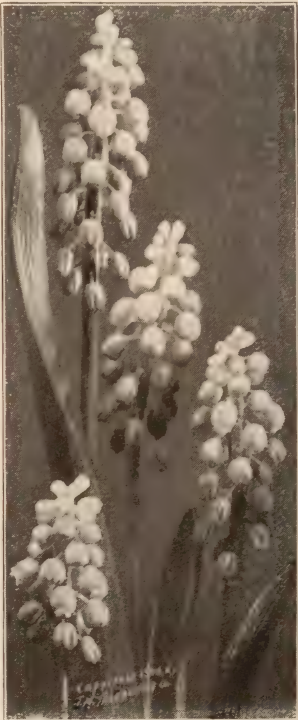

Oxalis

READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—1 lb. per 100

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging-baskets. They are easily grown in a sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

	Doz.	100
Buttercup. A splendid winter-blooming plant for pot culture. The flowers are pure, bright yellow, and produced in great abundance. It is very easily cultivated and, being a strong grower, only one or two bulbs should be planted in a 5- or 6-inch pot. First size.....	\$0 25	\$2 00

Muscari, or Grape Hyacinth

## Paeonies READY IN OCTOBER

(Finest Imported Roots)

If to be sent by mail add postage at zone rates—1 lb. each, 9 lbs. doz.

The old-fashioned double Paeonies are too well known to require description. Their popularity is due to their great merits, their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Paeonies rank about first for lawn, flower-border or shrubbery decoration. Paeonies do best in deep, rich, rather moist soil. The plants are gross feeders, and the soil should be well worked before planting, and enriched with cow manure. Clean cultivation should be given. An annual top-dressing of short, well-rotted manure should be given in November, and forked into the soil in spring. Liquid manure, given in the growing season, helps the bloom wonderfully. They need abundant water, and if they suffer from drought at blooming time there are likely to be small flowers and blighted buds. The crowns should be set in planting about 2 inches below the surface. They may be set in spring or fall, to bloom the following summer. They are all hardy. We offer only strong, flowering roots, with not less than three eyes.

**Phlox suffruticosa.** Snowdown, white.

## Ranunculus READY IN SEPTEMBER

If to be sent by mail add postage at zone rates

Mailing rate—1 lb. 100

The main soil for these should be loam or clay, with a good dressing of rotted manure and leaf-mold; if heavy, add a little sand. The soil should be well drained, cool, deep, rich and moist. Plant late in the autumn, claws downward, from 4 to 6 inches apart and 3 inches deep, covering with fine, pulverized soil.

### Persian Ranunculus

	Doz.	100
<b>Fireball.</b> Brilliant scarlet .....	\$0 30	\$1 75
<b>Jaune Supreme.</b> Splendid yellow....	35	2 50

## Richardia (Calla)

READY IN OCTOBER AND NOVEMBER

If to be sent by mail add postage at zone rates as per weight indicated

Tall-growing, bulbous perennials of graceful habit, and handsome foliage and flowers. They are easily cultivated in pots, requiring only rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting them in September.

	Each	Doz.
<b>White Calla, or Lily of the Nile</b> ( <i>Calla aethiopica</i> ). Large, white, trumpet-shaped flowers of great substance. One of the most popular ornamental house and greenhouse plants. Largest-size bulbs.		
Doz. 4 lbs. ....	\$0 25	\$2 50
Second-size bulbs. Doz. 3 lbs. ....	25	2 00
<b>Black Calla.</b> See <i>Arum palaestinum sanctum</i> . Doz. 2 lbs. ....	25	2 50
<b>Red Calla</b> ( <i>Arum cornutum</i> ). Flowers red, spotted black; stem mottled; a handsome pot-plant. Each 8 oz., doz., 5 lbs. ....	20	1 75
<b>ELLIOTTIANA, Yellow Spotted Leaf.</b> Dark green leaves, spotted silvery white. Doz. 2 lbs. ....	30	3 00

*Arum Palaestinum Sanctum*

*Scilla Sibirica*

## Scilla

READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—6 oz. doz., 3 lbs. 100.

*S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years. The effect in early spring of the intensely rich blue, early-flowering *Scilla*, contrasting with the snow-white of the snow-drop and the varied hues of the crocus, is very striking; most valuable for permanent edging, or planted in bunches of a dozen or so.

	Doz.	100

<i>coerulea</i> ( <i>Blue Cuban Lily</i> )..Each	25..	2 50

Snowdrops

If to be sent by mail add postage at zone rates

## Snowdrops

(Galanthus nivalis)

READY IN SEPTEMBER

Mailing rate—4 oz. doz., 2 lbs. 100

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms. Should be planted 2 to 3 inches deep in a shady location.

**Single-flowering Snowdrops.** 30 cts. per doz., \$2.00 per 100, \$12 per 1,000.

**Double flowering Snowdrops.** 40 cts. per doz., \$2.75 per 100, \$18 per 1,000.

**Giant Snowdrops of Asia Minor (Galanthus Elwesii).** Extra-size bulbs, 30 cts. per doz., \$2 per 100, \$12 per 1,000.

## Spiraea, or Astilbe

READY IN NOVEMBER

Mailing rate 2 lbs. each

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

	Each	Doz.
<b>America.</b> Rosy lilac .....	\$0 20	\$2 00
<b>Astilbe Arendsi, Ceres.</b> Bright rosy lilac; very fine .....	20	2 00
<b>Astilboides floribunda.</b> Very large, pure white plumes; neat habit; very abundant bloomer .....	15	1 00
<b>GLADSTONE.</b> A hybrid Spiraea, with beautiful, snow-white plumes, borne on strong stems 1½ feet long, standing erect above the foliage. The plant is perfectly symmetrical in shape, the foliage very handsome and the flowers exquisitely fragrant. Fine forcer....	15	1 50
<b>Japanica (Hoteia).</b> Excellent pot-plant for winter-blooming. Large, branching panicles of pure white feathery flowers; fine for cutting. Clumps for forcing or outdoor planting.	15	1 50
<b>Japanica compacta multiflora.</b> The neat, compact habit and profusion of large, handsome pure white flowers make it a most elegant pot-plant .....	15	1 50
<b>Mont Blanc.</b> Large plumes of the purest white....	35	3 50

Each. Doz.

**NAARDEN.** Pink-flowering; early bloomer. Fine forcer.....\$0 50 \$5 00

**QUEEN ALEXANDRA, PINK.** A splendid pink variety, in habit similar to the well-known Gladstone, but flowering two weeks later. It is a very free bloomer and bears its flowers well above the strong, dark green foliage. When forced it must be shaded, as soon as it starts to color. It is a splendid outdoor plant, being as hardy as the old Spiraea japonica. Its color will not fade even in the brightest weather.. 25 1 75

**Rubens.** Lovely deep carmine rose; good variety for forcing.. 35 3 50

**WASHINGTON.** A splendid decorative plant, producing extra-large flowers. Strong grower; fine for forcing ..... 25 | 1 75 |

## Trillium

(American Wood-Lily, or Indian Shamrock)

Mailing rate—1 lb. doz., 7 lbs. 100

Hardy herbaceous perennials succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are natives of North America, and are known by various common names in different localities. They have violently emetic roots.

Spiraea Naarden

Trillium Grandiflorum.

Dwarf Double Pearl. Dwarf habit; large, fine flow rs of great substance.....\$0 10 \$0 50 \$3 00  
Albino. Purest white; single flowers.....10 60 3 50  
Variegated-Leaf. Foliage striped white and green; single white flowers.....10 60 3 50

Bulbocodium

Leucojum

Chionodoxa

Miscellaneous Bulbs and Roots

Those marked with an asterisk (\*) will not be ready till October or November

If to be sent by mail add postage at zone rates, according to indicated weight.

	Each	Doz.	100

Sessile californicum. A strong plant, 1 ft. high, with the separate leaves 5½ inches long by 4½ inches wide and the petals 3½ inches long. Flowers pure white with purple centers; very fragrant..	15	1 00	7 00
Sessile rubra. Same as Californicum, with narrow petals; deep maroon-purple to reddish purple .....	15	1 00	7 00
Sessile Snow Queen. Flowers pure white with creamy centers and with broad petals..	15	1 00	7 00

Tuberose

READY IN DECEMBER

Mailing rate—2 lbs. doz.

The purity of color and rich perfume of the Tuberose are well known. In this latitude May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich, warm soil and a sunny situation. Set so that the top will be 1 inch below the surface of the soil.

	Each	Doz.	100
Dwarf Double Pearl. Dwarf habit; large, fine flow rs of great substance.....	\$0 10	\$0 50	\$3 00
Albino. Purest white; single flowers.....	10	60	3 50
Variegated-Leaf. Foliage striped white and green; single white flowers.....	10	60	3 50

Watsonia Ardernei

# Hardy Annual and Perennial Flower Seeds

FOR AUTUMN SOWING

Mailed free of postage

Many varieties of flower seeds, **Annuals** as well as **Biennials** and **Perennials**, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring. For full descriptions see our General Seed Catalogue. Character and hardiness indicated by letters A, Annual; B, Biennial; P, Perennial; h, hardy, hh, half hardy; g, green-house; t, tender.

## Pansy

To have fine Pansies for spring flowering, the seed should be sown in frames in August, and not later than September.

### VARIOUS MIXTURES

	Pkt.		Pkt.
<b>Thorburn Superb.</b> The richest and most choicely varied mixture possible. It produces only the finest colors, largest flowers and most beautiful forms.....	\$0 25	<b>Meteor.</b> Bright yellow and brown, attractively blotched and margined.....	10

**NEW YORK**

# Lawn Grass Seed Mixtures for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the middle of September, so that the young grass may become well rooted before winter sets in. The sowing should be done when the ground is moist or before expected rain; after sowing the ground should be rolled.

Prices of all Lawn Grasses include free delivery in the United States, by Freight, Express, or Mail at our option.

## THE THORBURN LAWN GRASS

Many of the finest lawns in America were produced from this mixture. It is composed of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich greensward in three or four weeks from the time of sowing. (The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture.) It should be sown at the rate of 4 to 5 bushels to the acre.

Pt.....	\$0 20	2 qts.....	\$0 60	Pk.....	\$1 75
Qt.....	35	½ pk.....	1 00	Bushel of 20 lbs.....	6 00

### Thorburn's Grass Mixture for Shady Spots on Lawns

A mixture of grasses that thrive in shaded situations under trees, or close to walks where there is little sun.

Qt.....	\$0 40	½ pk.....	\$1 25
2 qts.....	75	Pk.....	2 15
Bushel of 22 pounds.....			8 00

### Thorburn's Grass Mixture for Ter- races

A mixture of fine stoloniferous grasses peculiarly adapted to terraces.

Qt.....	\$0 40	½ pk.....	\$1 25
2 qts.....	70	Pk.....	2 00
Bushel of 20 pounds.....			7 00

### Thorburn's Lawn - Restoring Grass Seed

A mixture of grasses that will take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-restoring Grass Seed** should be sown before every summer rain on thin places.

Qt.....	\$0 40	½ pk.....	\$1 25
2 qts.....	70	Pk.....	2 00
Bushel of 20 pounds.....			7 00

### Thorburn's Lawn Grass for the South

A mixture of grasses that stand extremes of heat and drought, and that are, therefore, peculiarly adapted to southern lawns. Per qt. 40 cts., 2 qts. 70 cts., ½ pk. \$1.25, pk. \$2, bus. of 20 lbs. \$7.50.

## Also Permanent Grass Seed for Golf Links, Tennis Courts, Polo Grounds, etc.

We have devoted much attention to the seeding and preservation of golf links, tennis-courts and polo-grounds, and offer the following mixtures, which have been used on most of the finest links, etc. in this country with very satisfactory results.

### Tennis-Court Mixture

A mixture of extra-fine grasses peculiarly adapted to tennis-courts. This mixture will make a firm, green and lasting turf of the finest texture, that will improve with trampling.

Qt.....	\$0 40	½ pk.....	\$1 25
2 qts.....	70	Pk.....	2 00
Bushel of 20 pounds.....			7 00

### Grass Mixture for Railroad Banks, etc.

A mixture of grasses with long, interlacing, matting roots that will bind steep embankments, gravelly or sandy slopes, etc., preventing washouts by rainstorms and covering them with permanently green turf.

Qt.....	\$0 35	½ pk.....	\$0 85
2 qts.....	60	Pk.....	1 50
Bushel of 18 pounds.....			5 50

### Fair-Green or Golf-Links Mixture

For the grounds in general.

Per bushel of 20 pounds.....	\$5 00
------------------------------	--------

### Putting-Green Mixture

A mixture of extra-fine highest grade grasses that will make a close, firm, green and lasting turf, which will improve with trampling.

Qt.....	\$0 40	½ pk.....	\$1 25
2 qts.....	75	Pk.....	2 15
Bushel of 24 pounds.....			8 00

### Polo-Grounds Mixture

A mixture of fine-leaved and deep-rooting grasses, forming a strong and lasting turf that will stand hard usage.

Per bushel of 20 pounds.....	\$5 00
------------------------------	--------

# J. M. THORBURN & CO.

## CATALOGUE

OF

### Bulbs and Flowering Roots, also Flower and Vegetable Seeds for Fall Planting

We have the pleasure of again presenting to our old friends and all interested in Gardening, our **ANNUAL CATALOGUE** of **Bulbs, etc., for Fall Planting.**

**Bulbs may be grown indoors in the winter months**, when flowers are most appreciated. By successive plantings a constant supply of blooms can be had from December until May. The finest outdoor displays of the early Spring months are also from bulbs planted in the Autumn. The cultural directions found under the respective headings are worthy of careful attention.

The time taken under ordinary conditions for the different bulbs to form enough roots to enable them to be forced with any kind of success is as follows: Paper white narcissus, 6 to 8 weeks; Roman hyacinths, 8 to 10 weeks; Dutch hyacinths, 14 to 16 weeks; daffodils, jonquils and narcissus, 14 to 16 weeks; lilies such as Harrisii, longi-florum, giganteum, formosum, speciosum, etc., will take at least 16 to 18 weeks. When well rooted remove to where they may be forced at a temperature of about 60°. Of course the time will vary either one way or the other according to the strength of the bulbs.

Our bulbs are all **SELECTED FIRST SIZE TOP ROOTS**, coming from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation, and often sold at auction and otherwise, at very low prices.

**NAME AND ADDRESS.** *We often receive orders with either the name or the address of the sender omitted. As we can do nothing with such orders, the customer thinks his order is being neglected. We therefore beg our correspondents to be careful to write on each order their name and full address.*

**ORDERS** should be sent as soon as possible after receipt of this catalogue. *The bulbs will be shipped in proper time for planting. They are ready from August to November, according to the time of ripening and the country from which they come.* Orders received earliest are sure of being filled in full. If left too late, the supply of some of the varieties may be exhausted.

Prices, as will be seen upon comparison with others are as low as Highest Grade Bulbs can be sold at, and do not include transportation.

We indicate under each heading of the various Bulbs, the mailing weight when packed, so that if wanted by parcel post, our Customers can determine the amount required to be added for postage according to Zone rate, as per table below.

The weights given are those taken from our stock last year, and may vary in some instances; should there be any difference in weight when orders are filled, the postage will be adjusted, and any amounts overremitted will be returned.

On shipments of 15 lbs. and upwards it is best to send by express, wherever possible, as by special arrangements with the express companies, bulbs travel at a reduction of 25 per cent. from regular rates; it is therefore both safer, and, in nearly all cases, cheaper, to send large packages by express instead of by mail.

## PARCEL-POST ZONE RATES

### Within the United States

Zone	Within	1st lb. or fraction	Additional lb. or fraction
1st	50 miles of N. Y. City	5c	1c
2d	50 to 150 miles of N. Y. City	5c	1c
3d	150 to 300 miles of N. Y. City	6c	2c
4th	300 to 600 miles of N. Y. City	7c	4c

# Hyacinths

THESE BULBS ARE READY FOR  
DELIVERY IN SEPTEMBER

If to be sent by mail add postage at zone rates

**The Hyacinth** is one of the most popular and beautiful spring flowering plants for indoor and outdoor decoration. By careful management in keeping up a succession, it may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground it is unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height, and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

**OUTSIDE CULTURE** In this section, October is the month to plant Hyacinths outside. They succeed best in a light soil and a sunny situation. If the soil is naturally heavy, some sand should be mixed with it, and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs. Some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has been frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field-mice which may burrow into it.

**CULTURE IN POTS** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibrous loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September to the end of November. Plenty of water should be applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES** Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten to twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

Customers unacquainted with the different varieties will do well to leave the selection to us, only specifying in their order whether bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortment of Named Hyacinths of our selection offered on page 5, and to the Hyacinth Glasses which are quoted at the end of the catalogue.

The names of our Hyacinths and Tulips are those given to them by the originators in Holland, and they are not sold under fancy names manufactured in this country.

## SELECT NAMED DUTCH HYACINTHS

**N. B.** Our Select Named Hyacinths are the cream of the Holland nurseries—and are called top-roots—under their original names. For forcing in pots or for outdoor beds they far surpass the class of Bulbs usually sold.

The single-flowered varieties are generally more effective and better for forcing than the double ones. They also, as a rule, succeed better in glasses.

The double varieties that do well for forcing in water are distinguished by two asterisks (\*\*).

All varieties indicated in heavy faced type have ranked first at Exhibitions abroad, producing large and many blooms.

Not less than five of one kind sold at the ten rate.

If to be sent by mail add postage at zone rates—weight 4 lbs. per 10.

### MIXED DUTCH HYACINTHS in Separate Colors, Extra Quality

LARGEST BULBS. SUITABLE EITHER FOR FORCING OR BEDDING

If to be sent by mail add postage at zone rates—2 lbs. 10; 16 lbs. 100

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all of the largest size. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers

# Italian Hyacinths

Mailing Weight, 1 lb. per 10

Grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are harder than the Romans, and may be planted outside in the fall for flowers for early spring cutting.

	10	100
Single White. Crop doubtful.		
Single Pink.....	\$0 75	\$6 50

# French Roman Hyacinths

Mailing Weight, 2 lbs. per 10

Extensively used by florists for forcing for cut-flowers. For this purpose they are the best and most popular of bulbs. The flowers are delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early, and by making successive plantings they may be had in flower all through the winter. The blue Roman Hyacinths flower from one to two weeks later than the white variety.

	Each	10	100
Pure White. First size.....	\$0 15	\$1 20	\$8 00
Pure White. Ex. size bulbs..	15	1 25	10 00
Pure White. Largest size...	20	1 50	14 00
Single Blue.....	10	1 00	6 00

# Dutch Romans or Miniature Hyacinths

Mailing Weight, 2 lbs. 10

These are also known as "Pan Hyacinths." They are very suitable for growing in groups in pots or earthen pans. Also good for growing in Bulb Fibre.

In the entire group of Hyacinths there is hardly anything more fascinating than a well grown pan of miniatures; the spikes are slender yet well provided with flower bells; the symmetry of the individual plant is remarkable.

The following varieties are good for forcing:

	Each	10	100
Albertine, early pure white .....	\$0 10	\$0 50	\$4 00
Czar Peter, pale porcelain, tinged lilac.....			
Gertrude, rosy pink.....			
King of the Blues, fine deep blue.....			
La Victoire, brilliant scarlet red.....

## TULIPS READY FOR DELIVERY IN SEPTEMBER

If to be sent by mail add postage at zone rates

For beauty of form and brilliancy of coloring, Tulips are unequalled. For bedding they are the most popular and effective of all hardy bulbous plants. In order to assist our customers in selecting varieties of tulips for beds in borders, etc., we give herewith a list of the most popular varieties, in very Early, Early, and Late sorts. The height of stem is indicated as "tall" and "medium". The varieties indicated in heavy faced type are new and choice and are highly recommended. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers they are also invaluable.

**CULTURE.**—The cultural directions given for hyacinths, on page 3, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. To obtain the best results it is desirable that they should not be planted in ground where Tulips were grown the previous year. We recommend **early planting** so that the bulbs may obtain a good root growth before the frost sets in. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open ground.

### Duc Van Thol Tulips

50 of a kind at 100 rate

If to be sent by mail add postage at zone rates—1 lb. 10

The Duc Van Thols are the earliest of all the Tulips. They are of dwarf habit, and well adapted for forcing and for pot culture. They bloom outdoors before the Single Early Tulips.

## Double Tulips

50 at 100 rate

If to be sent by mail add postage at zone rates—1 lb. 10; 5 lbs. 100

The Double Tulips come into bloom a little later than the single varieties. They are splendid for bedding, and the flowers last longer in bloom than the single ones. Some sorts are quite dwarf. Comparative earliness of flowering is indicated by the letters A, B, C. "Medium" and "tall" indicate relative height.

## Darwin Tulips

If to be sent by mail add postage at zone rates—1 lb. 10; 6 lbs. 100

Too much can not be said in praise of this class of Tulip and now that the prices have become moderate, everyone should have them. They excel in brilliancy of color, perfect form of flower, tall, strong stems, splendid for cutting, planted in groups amongst shrubs, and in the perennial border they cannot be surpassed; they are all single and self-colored.

## Parrot Tulips

Mailing weight 1 lb. 10; 7 lbs. 100

For outdoor cultivation. The petals of these have feathered edges, and, in addition to other colors, combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant colors, and form very effective groups for the flower-border. To get the best results they must have the full effect of the sun. **Very late-flowering.**

# NARCISSUS

## NARCISSUS ARE READY FOR DELIVERY IN SEPTEMBER

Narcissus are among the most popular and largely grown of spring-flowering bulbs, and deservedly, too. Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, lakes or ponds, and in mixed flower—or shrubbery—borders. They are also suitable for naturalizing in the grass, by the side of woodland walks, or in open spaces between trees and shrubs.

For growing in pots they require about the same treatment as hyacinths, three or four bulbs in a 5 inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers. With the exception of the Polyanthus section, they are all perfectly hardy.

## Single Narcissus, or Daffodils

### ALL LARGEST SIZE BULBS

If to be sent by mail add postage of zone rates as per weights indicated

### Large Crown, or Trumpet Narcissus

The varieties belonging to this division have trumpets or crowns that are as long as, or longer than, the perianth segments.

#### Bicolor

## SINGLE NARCISSUS, continued

If to be sent by mail, add postage at zone rates as per weights indicated

## Short Trumpet Narcissus

## Barri

Narcissus belonging to this group are crosses between yellow Trumpets and Poeticus. The crown usually is not over one-third the length of the perianth

<b>ALBATROSS.</b> Perianth white, pale lemon cup frilled and edge glowing orange red, beautiful.....	10	\$1 25
<b>CONSPICUUS.</b> Broad yellow perianth, broad short cup, edged bright orange-scarlet; very free bloomer.....	30	30
<b>LADY GODIVA.</b> Perianths white cup broad; yellow edged, bright orange-scarlet.....	1 00	1 00
<b>Sea Gull.</b> Large spreading white perianth, cup canary, edged apricot; very charming flower.....	1 25	1 25

## Incomparabilis

These are crosses between the yellow trumpet, and Poeticus, but the crowns are larger than those of the Barri group, sometimes being three-quarters of the length of a perianth segment. The color of the perianth is either yellow or white.

	10	100
<b>AUTOCRAT.</b> Deep yellow perianth and cup very pretty.....	\$0 35	\$2 50
<b>Beauty,</b> perianth sulphur, barred yellow, large cup margined orange scarlet. 2 lbs. 10.....	60	5 00
<b>Cynosure.</b> Primrose perianth, changing to white, cup pale orange. 2 lbs. 10.....	25	2 00
<b>FRANK MILES.</b> Soft clear yellow, twisted perianth; handsome flower.....	45	3 50
<b>Simplex.</b> Single; yellow; Early. Fine for cutting; also for forcing. 2 lbs. 10.....	25	2 00
<b>Sir Watkin.</b> Perianth sulphur, crown yellow, tinged bright orange. This is still the king of the short-cupped Narcissus, and used more generally and in larger quantities than any other short-cupped variety. Valuable as a cut-flower. Mother Bulbs. 3 lbs. 10.....	50	4 00
<b>Stella.</b> White perianth, yellow cup. Good forcer. 1 lb. 10.....	25	2 00

## Leedsii

These are crosses between the White Trumpets and Poeticus. The crowns are as large as those of the Incomparabilis group. The perianths are always white; the crowns are mostly white or light yellow.

	10	100
<b>Leedsii Type.</b> Silvery white, lemon cup. 1 lb. 10.....	\$0 25	\$1 50
<b>KATHERINE SPURRELL.</b> Broad white perianth, cup canary; large flower of good quality.....	75	6 00
<b>Minnie Hume</b> (Queen of England). Large white perianth, cup passing from fine lemon to white. 1 lb. 10.....	30	2 00
<b>Mrs. Langtry.</b> Pure white perianth, large white cup, edged yellow. Splendid for cutting or naturalizing. 1 lb. 10.....	30	2 00

## Narcissus Poeticus

Varieties belonging to this group always have a pure white perianth. The cups are very short, but wide-mouthed, and always more or less deeply rimmed with orange or scarlet.

	10	100
<b>Cassandra.</b> Very fine, perfectly shaped, wide spreading clear white perianth, dark red rimmed crown.....	25c each..	\$2 00
<b>CLARA VIEBIG.</b> Soft glowing orange cup, pure white perianth.....	75	6 00
<b>GLORY OF LISSE.</b> Improved poeticus ornatus, a splendid forcer.....	60	5 00
<b>KING EDWARD.</b> Broad pure white perianth, orange scarlet crown.....	60	5 00
<b>Ornatus.</b> Perianth pure white, cup yellow, margined scarlet. One of the most popular of all; useful for cut-flowers; very early flowering. Mother Bulbs. 1 lb. 10.....	30	2 00
<b>Recurvus</b> (The Old Pheasant's Eye). Pure white perianth, scarlet cup; late. 1 lb. 10.....	25	1 50

## Narcissus Poetaz Multiflorus

An altogether new race of narcissus, perfectly hardy; they are crosses between Polyanthus and Poeticus Ornatus, flowering in clusters like Polyanthus Narcissus but without their fragrance.

## New Hybrids between Poeticus Ornatus and Polyanthus Varieties.

	10	100
<b>ADMIRATION.</b> Pale yellow, cup scarlet edged.....	each 35c..	\$2 50
<b>Aspasia.</b> Perianth pure white, yellow eye, large flowers. 2 lbs. 10.....	50	\$4 00
<b>Elvira.</b> Pure white, yellow eye, large and free-flowering.....	50	4 00
<b>Ideal.</b> Perianth white, dark orange eye. 6 to 7 flowers on a stem. 2 lbs. 10.....	1 00	9 00
<b>MIGNON.</b> White perianth, cup creamy white with deep orange scarlet, scarlet edge.....	20c each..	1 75

## Various Single Narcissus

	10	100
<b>Bulbocodium citrinum</b> (Hoop Petticoat). Pale sulphur-yellow. 1 lb. per 10.....	\$0 75	\$6 00

# Lilies

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *Lilium candidum* and *Lilium tigrinum*, which prefer a deep, rich loam, they all do best in a light, well-drained soil. Some peat or leaf-mold may be used to advantage. *Lilium auratum* cannot bear manure but thrives in ordinary light soil. They all prefer a partial shade, and the tallest sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

*Lilium Harrisii* and *Lilium Candidum* ready in August, others not until November

## *Lilium Harrisii*

(Bermuda Easter Lily)

BULBS NOW READY.

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, lasting a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decoration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

## Lily-of-the-Valley

(*Convallaria majalis*)

**READY IN NOVEMBER AND  
DECEMBER**

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them. They may also be planted in moss fiber in vases.

**Clumps.** Fine, large clumps, with many flowering pips on each. Fine for planting outside in shaded positions and for naturalizing by the side of streams or wood walks. Weight 3 lbs. each.

Each .....	\$0 40
Per 10 .....	3 50
Per 100 .....	30 00

**Pips for Forcing.** Finest Exhibition size,  
Per bundle of 25 (2 lb. rate.) ..... \$1 00  
Per 100 .....

Per 1,000 .....	25 00
-----------------	-------

Lily-of-the-Valley.

## Chinese Sacred Lily

**Mammoth Size**

(The Water Fairy Flower)

**READY IN SEPTEMBER**

A variety of the Polyanthus Narcissus, imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs entirely and place in a sunny window in a cool room. 25 cts. each. \$2.00 per 10. Mailing weight, 4 lb. 10.

ALLIUM

## Allium

**Mailing Weight, 1 lb. 100.**

Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower-border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.

**Azureum.** Beautiful sky-blue flowers in large umbels; fine for pots or garden decoration. Each 20 cts., per 10, \$1.50, \$10.00 per 100.

**Neapolitanum.** Large umbels of pure white flowers, borne on large stems; valuable for forcing for winter cut-flowers, as well as for summer garden decoration. 20 cts. per 10., \$1.50 per 100.

**Moly luteum.** Golden yellow flowers in large umbels; very showy and attractive; fine for growing in the garden in groups or for naturalizing in masses. 20 cts. per 10, \$1.50 per 100.

**Hermettii grandiflorum.** Makes a splendid pot-plant for winter-blooming in the house, the handsome large, pure white flowers being produced abundantly and for a long time; largely used by florists for cut-flowers. 25 cts. per 10, \$2.00 per 100.

## Amaryllis READY IN OCTOBER

If to be sent by mail add postage at zone rates, as per weight indicated

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mold or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

**Belladonna major.** Violet and white; flowers in large umbels; fragrant. 4 lbs. 10. 25 cts. each. \$2.25 per 10.

**Belladonna speciosa purpurea.** 4 lbs. 10. \$1.00 each. \$8.00 per 10.

**Empress of India Seedlings.** Large flowers, brilliant scarlet with white stripes. 4 lbs. 10. 80 cts. each. \$7.50 per doz.

**Hippeastrum Johnsonii** (Spice Lily). Beautiful flowers; crimson, striped white. Large bulbs. 6 lbs. doz. 60 cts. each. \$5.50 per doz.

**Lily of the Palace.** Very large, handsome flowers, crimson shaded with green. 4 lbs. 10. 80 cts. each. \$7.50 per doz.

**Vallota purpurea.** 50 cts each. \$4.00 per 10.

## Anemone, or Windflower

If to be sent by mail add postage at zone rates—6 oz. doz., 3 lbs. 100

Very ornamental hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

## Coronari, or Poppy-Flowered Anemone

## Begonia Crispa, Single, Fringed

These Begonias have beautifully shaped, gracefully frilled and crested flowers borne above the foliage on long and erect stems. A fine strain with a great future. Red, Rose, White, Yellow, Salmon and Orange. \$1 per 10, \$8 per 100.

## Brodiaea READY IN SEPTEMBER

Mailing weight—1 lb. 100

Pretty bulbous plants from the Pacific coast. They have narrow, grassy leaves, slender stems and umbels of lily-like flowers. For forcing or for outdoor culture. Do best in rich, sandy loam. If grown in pots, a compost of loam, leaf-mold and sand is best. All are hardy except Coccinea, which should have some protection and partial shade.

	10	100
Coccinea (Floral Firecracker). Rich blood-crimson, tipped white. Largest size bulbs.....	\$0 60	\$5 00
Congesta. Tall-growing; purple flowers.....	1 25	10 00
Grandiflora. Deep purple flowers; large and showy.....	1 00	7 00

“ Mariposa Tulips, Eldorado strain.....	60	5 00
“ Star Tulips.....	50	4 00
“ All Sorts.....	50	4 00

## Crocus

If to be sent by mail add postage at zone rates—8 oz. 10, 3 lbs. 100.

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted closely—say 2 inches apart—and 3 inches deep, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful. For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

Calochortus

Not less than 10 of a kind sold.

Crocus—Continued

### Hybrid Named Crocus

Remarkable for richness of color and immense size. These varieties are best for forming letters or designs on lawns, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. Flowers are produced very early, and mowing later on will not seriously injure the bulbs.

<b>Scipio.</b> White outside, with purple base and pale mauve stripes inside orange anthers; extra fine.....	30	2 00

### Crown Imperials

(Fritillaria Imperialis)

READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—each 1 lb. 10 6 lbs.

A stately-growing plant, with dark green foliage and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

	Each	10
<b>Aurora.</b> Red.....	\$0 35	\$2 50
<b>Crown on Crown.</b> Red.....	35	2 50

<b>Silver Striped Leaved.</b> .....	40	3 00
<b>Fine Mixed Varieties.</b> ..... Per 100, \$12.....	25	1 50

## Crinum

If to be sent by mail add postage at zone rates as per weights indicated

Splendid, large-flowering bulbs, closely allied to the amaryllis. The most suitable soil is a compost of turfy loam, cow-manure and some sand. They should be grown in large pots or tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a coolhouse and allowed to rest until new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure-water during the growing season. They may be placed outside when warm weather begins, and will flower all through the summer making splendid lawn or veranda plants.

	Each	1 lb.	5 lb.
<b>Kirkii.</b> Large umbels of beautiful pure white flowers, with purple stripe in center of each petal. 1 lb. rate.		\$0 25	
<b>Powellii.</b> Produces long stems, bearing at the top five to eight large, dark rose, bell-shaped flowers, 3 to 4 inches long. 2 lb. rate.			25
<b>Powellii album.</b> Pure white. 2 lb. rate.			50

## Cyclamen

Most of Them Ready in November

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The soil best suited to them is a fresh, turfy loam, with a fourth to a fifth of well-rotted horse manure, to which add some clean sand if the soil is heavy. Plant so as to leave the top of the bulb just below the surface. Given the proper conditions, the Cyclamen is remarkably easy to grow. (We offer seed of our superb strain of *C. giganteum* at the end of this catalogue.)

	Each	10
<b>Coum.</b> Crimson; round-leaved.	\$0 60	\$5 00
<b>Europaeum roseum.</b> Very showy, rosy red; hardy.	20	1 75

<b>Hederaefolium album</b> (Neapolitanum). Ivy-leaved Cyclamen. Autumn flowering; quite hardy in sheltered situations. Doz. 2 lb. rate.	20	1 75
<b>Repandum.</b> Rosy red, with purple eye.	35	2 50

Cyclamen Persicum Giganteum.

## Eremurus READY IN SEPTEMBER

If to be sent by mail add postage at zone rate—1 lb. each.

A noble, bulbous plant from northern India, especially attractive, peerless in its majestic magnificence, compelling admiration by its gigantic proportions and the sweetness of its perfume, a plant not easily forgotten when seen well grown. It is a hyacinth-like perennial, starting growth quite early in the spring. Coming from a cold country it is perfectly hardy, but enjoys good, rich soil, and responds handsomely to liberal treatment. They thrive admirably in deep, rich, sandy loam with the addition of well-decayed cow manure. They need plenty of water in the flowering period, but require good drainage. When well established they should not be disturbed, as the roots are extremely brittle. The surface soil above the roots should be kept clean by hand-weeding and enriched by occasional application of old manure, leaf-mold and a little sand well mixed. Autumn planting is desirable, and the crown should be covered with a mound of ashes over winter, or with a box with a water-tight top and filled with dry leaves. Protect the stems from frost when coming into flower in spring.

	Each
<b>Himalaicus.</b> Beautiful white flowers on racemes 4 to 8 feet high. Blooms in May and June.	\$1 25
<b>Robustus.</b> Rosy lilac flowers on racemes 6 to 19 feet high, flowering in June.	1 25

## Erythronium (Dog's-Tooth Violets)

READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—10 4 oz., 100 2 lb.

Very ornamental, hardy bulbous plants of neat and dwarf habit. They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in a sheltered position on rockeries or in mixed flower- or shrubbery-borders.

	Each	10	100
<b>Californicum.</b> Cream-yellow, with maroon band at base; leaves mottled.	\$0 10	\$0 60	\$5 00
<b>Citrinum.</b> Leaves mottled, flowers yellow.	10	75	6 00
<b>Giganteum</b> (Giant Dog's-Tooth Violet). Large, straw-colored flowers, orange centers, borne on long, slender stems. Foliage richly mottled; fine pot-plant.	10	75	6 00
<b>Hartwegii.</b> Pretty yellow flowers, each on a separate stalk; good for pots.	10	60	5 00
<b>Hendersonii.</b> Pale lilac, purplish center.	10	60	5 00
<b>Dens-Canis</b> (Dog's-Tooth Violet). Mixed; leaves blotched brown and white.		25	1 50

## Fritillaria READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—10 4 oz., 100 2 lbs.

Graceful, hardy, spring flowering bulbous plants, thriving in good, rich, well-drained soil. They are effective in mixed flower-borders, and they also make excellent pot-plants both for their ease of cultivation and the quaintness of their flowers.

Freesia, "Purity"

## Dwarf Gladiolus

READY IN NOVEMBER

If to be sent by mail add postage at zone rates—10, 6 oz., 100 2 lb.

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse. Some varieties are successfully forced and may be had in full beauty in April and May.

These form a family of bulbs of rare beauty and of most exquisite tints and shades; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of garden at a season when flowers of vivid tints are scarce. They are valuable for bedding. Named Hybrids will be found in our General Catalogue, published January 1.

	10	100
<b>Cardinalis Ackermanni.</b> Salmon-orange with white blotch	\$0 30	\$2 00

## Freesia

If to be sent by mail add postage at zone rate—10, 4 oz., 100, 2 lb.

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in good, loamy soil, with an admixture of leaf-mold and sand, in a frame or greenhouse, and are excellent for window culture in winter. For the information of all not acquainted with these bulbs, we may say that they are quite small, but produce large blooms in comparison to their size.

**Freesia refracta alba.** The body of the flower is a pure white, with lower segments spotted lemon-yellow. Their fragrance is remarkable and very lasting.

Mammoth-size bulbs. 45 cts. per 10, \$3.50 per 100.

**Freesia, "Purity."** Magnificent, glistening pure white flowers of large size, borne on strong, lengthy stems, each truss bearing eight to ten buds, five or six of which are frequently open at the same time. First size bulbs. 50 cts. per 10, \$4.00 per 100.

**Freesia Leichtlinii major.** Creamy white, shading to yellow, with orange blotch; distinct. 60 cts. per 10, \$5 per 100.

Gladiolus Colvillei

## Gloxinias READY IN NOVEMBER

If to be sent by mail add postage at zone rates—10 1 lb., 100 7 lbs.

Gloxinias are among the most beautiful of greenhouse plants, being remarkable for the intensity and variety of their colorings and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mold and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large, and of erect-flowering strain:

## Iris

(Fleur-de-lis)

**READY IN OCTOBER AND NOVEMBER, EXCEPT JAPAN IRIS, WHICH WILL NOT BE READY UNTIL DECEMBER AND INTO SPRING.**

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light, rich, sandy soil, and in a sunny situation. With the exception of *Moræa Pavonia*, all varieties are hardy. Good drainage is important. The varieties of *Iris Kaempferi*, from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 to 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms measuring 8 to 10 inches across. These require a liberal supply of water when growing.

Japan Iris (*Iris Kaempferi*)

## Superb Collection of Large Flowered Japan Iris (*Iris Kaempferi*)

**READY IN DECEMBER AND INTO SPRING**

If to be sent by mail add postage at zone rates—each 1 lb. 10, 12 lbs.  
45 cts. each, \$4.00 per 10

We are importing from Japan a large supply of the following twenty of the best of these magnificent Irises, which excel in size, perfection of form and richness of color. These are most valuable for cut flowers and table decoration—as handsome as orchids. Flowers should be cut in the early morning or after sunset. The roots come in large clumps. The descriptions given are those furnished us by the growers in Japan. May be ordered by numbers.

- 13 **Boteki-no-Koe.** Pure white, heavily veined lavender, with pale primrose blotches; standards wine-color, lighter toward edges, stigmas lavender. Three large petals. Striking.
- 26 **Date-dogu.** Rich claret-red, yellow blotches. Three petals.
- 89 **Fuyoho.** Large; pure white, yellow blotches; three very large petals.
- 31 **Gel-Sho-Un.** Claret-red, veined white; standards shaded lavender, darker toward the edges, yellow blotches.
- 4 **Ho-o-jo (Ho-o-Castle).** Ruby-crimson, primrose blotches; standards white and lavender.
- 37 **Katsuraotoko.** White, veined lavender; standards white, suffused with lavender, darker toward the edges, pale yellow blotches. Six petals.
- 15 **Momiji-no-Taki.** Ruby-red, yellow blotches; standards white, spotted toward edges pale wine-color. Six petals.
- 30 **Noboro-Ryu.** Intense Tyrian blue, with yellow blotches; standards white, edged violet.
- 9 **Ran.** Royal purple, edged lavender, with large primrose blotches; standards wine-red, white at base. Six petals; large and distinct.
- 34 **Sassa-no-Koe.** White, veined wine-red and blotched yellow; standards lavender, running to purple at edges. Three petals.
- 20 **Senjo-To.** Light wine-color, spotted and shaded to dark red toward the edges of the petals, suffused with white, yellow blotches; standards shading to purple.
- 40 **Shiguremomiji.** Blush-pink, darker toward edges, splashed wine-red; stigmas lavender, primrose blotches. Three petals.
- 21 **Shikainami.** Light blue, shading to dark blue edges, white-veined, yellow blotches; standards shaded lavender, with dark edges. Six petals.
- 6 **Shippo (Cloisonne).** Rich Tyrian blue, edged purple and veined white, yellow blotches; standards white and wine-color. Large flowers.
- 14 **Shiraga.** Deep purple, heavily veined white; standards lavender, darker toward edges, yellow blotches. Large flowers. Six petals.
- 17 **Subijin.** Claret-red, darker toward edges; standards white, veined and edged pale wine-color; stigmas wine-color; three petals.
- 44 **Ujigawa.** Rich, vinous purple; standards blush-pink; stigmas lavender, radiating to purple edges, canary-yellow blotches. Three immense petals.
- 50 **Ushio-no-Iro.** Violet, veined white; standards white, edged sky-blue, yellow blotches. Seven or eight petals.
- 7 **Yamato-Nishiki.** Pale lavender, running to purple on outside of petals, blotched and flaked dark purple, large primrose blotches. Immense flower. Three petals.
- 8 **Yodokuruma.** Pale wine-color, veined darker, large orange blotches; standards very erect. Gigantic blooms. Three petals.

Iris Hispanica.

<b>Rembrandt.</b> Wide dark blue standards falls, rich deep blue with fine orange blotch; vigorous grower....	1 00	7 00

### Ixias READY IN OCTOBER

If to be sent by mail add postage at zone rates.

The named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

**Queen Wilhelmina.** White yellow blotch; beautiful.  
**Surbiton.** Very dark yellow; fine.

Iris Anglica

**Lachenalia****READY IN SEPTEMBER****Mailed Free**

Very pretty, spring-flowering, greenhouse bulbous plants of elegant habit and with brightly colored flowers. They should be grown in pots, four to six bulbs in a 5 inch pot, in a compost of two parts loam, two parts leaf-mold and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging-baskets.

	Each	10
<b>Luteola.</b> Pale yellow flowers flushed with green.....	\$0 30	\$2 00

**Nerine****READY IN OCTOBER AND NOVEMBER****Mailed Free**

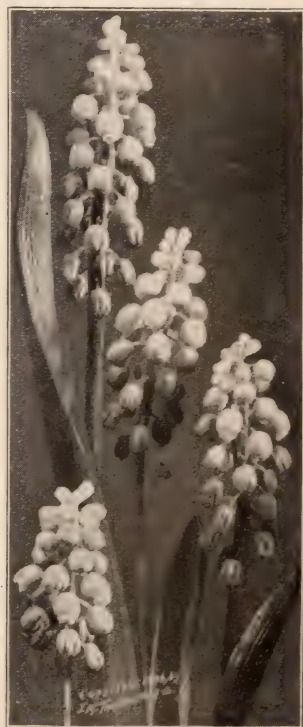

Very beautiful greenhouse bulbous plants succeeding best in pots in light soil—say a compost of loam, leaf-mold and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die, they should be kept quite dry in a cool place until they begin to grow again.

	Each
<b>Sarniensis</b> (True Guernsey Lily). Flowers brilliant crimson in large clusters. The best-known sort.....	\$0 60

**Oxalis** **READY IN SEPTEMBER****If to be sent by mail add postage at zone rates—1 lb. per 100**

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging-baskets. They are easily grown in a sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

	10	100
<b>Buttercup.</b> A splendid winter-blooming plant for pot culture. The flowers are pure, bright yellow, and produced in great abundance. It is very easily cultivated and, being a strong grower, only one or two bulbs should be planted in a 5- or 6-inch pot. Doubtful

<b>Mixed.</b> .....	20	1 00

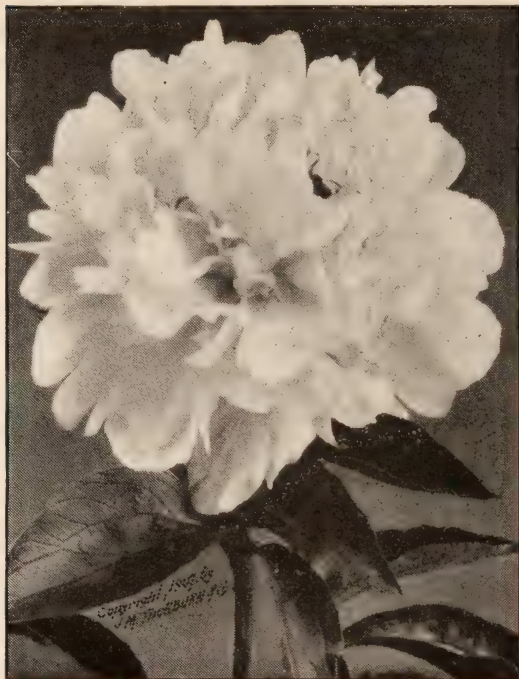

**Muscari, or Grape Hyacinth**

## Paeonies READY IN OCTOBER

(Finest Imported Roots)

If to be sent by mail add postage at zone rates—1 lb. each, 9 lbs. 10

The old-fashioned double Paeonies are too well known to require description. Their popularity is due to their great merits, their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Paeonies rank about first for lawn, flower-border or shrubby decoration. Paeonies do best in deep, rich, rather moist soil. The plants are gross feeders, and the soil should be well worked before planting, and enriched with cow manure. Clean cultivation should be given. An annual top-dressing of short, well-rotted manure should be given in November, and forked into the soil in spring. Liquid manure, given in the growing season, helps the bloom wonderfully. They need abundant water, and if they suffer from drought at blooming time there are likely to be small flowers and blighted buds. The crowns should be set in planting about 2 inches below the surface. They may be set in spring or fall, to bloom the following summer. They are all hardy. We offer only strong, flowering roots, with not less than three eyes.

**Festiva Maxima Paeony**

### Herbaceous Chinese Paeonies

## Richardia (Calla)

READY IN OCTOBER AND NOVEMBER

If to be sent by mail add postage at zone rates as per weight indicated

Tall-growing, bulbous perennials of graceful habit, and handsome foliage and flowers. They are easily cultivated in pots, requiring only rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting them in September.

	each	10
<b>White Calla, or Lily of the Nile</b> ( <i>Calla aethiopica</i> ). Large, white, trumpet-shaped flowers of great substance. One of the most popular ornamental house and greenhouse plants. Largest-size bulbs.

*Scilla Sibirica*

## Snowdrops

(*Galanthus nivalis*)

READY IN SEPTEMBER

If to be sent by mail add postage at zone rates

Mailing rate—4 oz. 10, 2 lbs. 100.

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms. Should be planted 2 to 3 inches deep in a shady location.

**Single-flowering Snowdrops.** 35 cts. per 10, \$2.50 per 100, \$15 per 1,000.

**Double-flowering Snowdrops.** 40 cts. per 10, \$3.00 per 100, \$18 per 1,000.

**Giant Snowdrops of Asia Minor** (*Galanthus Elwesii*).

Extra-size bulbs, 35 cts. per 10, \$2.50 per 100, \$15 per 1,000.

Snowdrops

## Spiraea, or Astilbe READY IN NOVEMBER

Mailing rate 2 lbs. each.

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

	Each	10
<b>America.</b> Rosy lilac.....	\$0 20	\$1 50
<b>Astilbe Arendsi, Ceres.</b> Bright rosy lilac; very fine.....	20	1 50
<b>Astilboides floribunda.</b> Very large, pure white plumes; neat habit; very abundant bloomer.....	20	1 50
<b>GLADSTONE.</b> A hybrid Spiraea, with beautiful, snow-white plumes, borne on strong stems, 1½ feet long, standing erect above the foliage. The plant is perfectly symmetrical in shape, the foliage very handsome and the flowers exquisitely fragrant. Fine forcer.....	20	1 50
<b>Japonica (Hoteia).</b> Excellent pot-plant for winter-blooming. Large, branching panicles of pure white feathery flowers; fine for cutting. Clumps for forcing or outdoor planting.....	20	1 50

<b>Mont Blanc.</b> Large plumes of the purest white.....	20	1 50

**NAARDEN.** Pink-flowering; early bloomer. Fine forcer..... 30 2 50

**QUEEN ALEXANDRA, PINK.**

A splendid pink variety, in habit similar to the well-known Gladstone, but flowering two weeks later. It is a very free bloomer and bears its flowers well above the strong, dark green foliage. When forced it must be shaded as soon as it starts to color. It is a splendid outdoor plant, being as hardy as the old Spiraea japonica. Its color will not fade even in the brightest weather..... 20 1 50

**Rubens.** Lovely deep carmine rose; good variety for forcing..... 35 2 50

**WASHINGTON.** A splendid decorative plant, producing extra-large flowers. Strong grower; fine for forcing..... 20 1 50

## Trillium

(American Wood-Lily, or Indian Shamrock)  
Mailing rate—1 lb. 10, 7 lbs. 100.

Hardy herbaceous perennials succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are native of North America, and are known by various common names in different localities. They have violently metic roots.

If to be sent by mail add postage at zone rates.

	Each	10	100

MISCELLANEOUS BULBS AND ROOTS,  
continued

If to be sent by mail add postage at zone rates.

\***WATSONIA ARDERNEI** (O'Brien). Each bulb produces from 50 to 100 large and very beautiful snow-white gladiolus-like blooms over 3 inches in diameter. Fine for forcing in the greenhouse or for planting outdoors in spring. 2 lbs. 10, 20 cts. each, \$1.60 per 10, \$12, 100.

\***Zephyranthes candida**. Most popular of white-flowered Zephyr Lilies, leaves appearing with the flowers and lasting through the winter in favored localities. White, greenish base. 40 cts. per 10, \$3 per 100.

Hyacinthus Candicans

Watsonia Ardernei

## Hardy Annual and Perennial Flower Seeds

FOR AUTUMN SOWING

Mailed free of postage

Many varieties of flower seeds. **Annuals** as well as **Biennials** and **Perennials**, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring. For full descriptions see our General Seed Catalogue. Character and Hardiness indicated by letters A, Annual; B, Biennial; P, Perennial; h, hardy, hh, half hardy; g, greenhouse; t, tender.
